

Statement of Volatility – Dell 1350cnw

⚠ CAUTION: A CAUTION indicates either potential damage to hardware or loss of data and tells you how to avoid the problem.

The Dell 1350cnw Color Laser Printer contains both volatile and non-volatile (NV) components. Volatile components lose their data immediately after power is removed from the component. Non-volatile (NV) components continue to retain their data even after power is removed from the component. The following NV components are present on the system board.

Table 1. List of Volatile and Non-Volatile Components on System Board

Color Laser Product	Memory Application	Memory Size	Memory Type	Volatile/ Non-Volatile	User Data
1350cnw	Firmware, Usage Statistics, Configuration, Fax	SIZE NOT AVAILABLE	EEPROM	Non-Volatile	No
	Running Code	SIZE NOT AVAILABLE	FLASH	Non-Volatile	No
	Base Memory	128 MB	SDRAM	Volatile	Yes
	Optional Memory	NA	NA	NA	NA
	Drum	NA	NA	Volatile	Yes
	Fuser	NA	NA	Volatile	Yes

⚠ CAUTION: All other components on the motherboard will lose data if power is removed from the system. Primary power loss (unplugging the power cord) will cause user data on the memory to be lost.

Notes:

- EEPROM may be used and could contain user data.
- User Data utilized by memory type.
