### Using the StorPort Driver with the Microsoft® Windows® Server 2003 Operating System

If you are using the StorPort driver with the Microsoft Windows Server 2003 operating system and do not have Service Pack 1 or later installed, make sure you are using the latest `storport.sys` driver. Updated StorPort drivers are available from [www.microsoft.com](http://www.microsoft.com). For the latest required hotfix, see [http://www.qlogic.com/go/emc\\_approved](http://www.qlogic.com/go/emc_approved).

### QLogic SANSurfer SANblade Manager

QLogic SANSurfer SANblade Manager version 2.0.30 Build 17 or later supports the Dell 2362M Integrated Fibre Channel Module card for the PowerEdge 6850. If you are using an earlier version, see [support.dell.com](http://support.dell.com) or [www.qlogic.com](http://www.qlogic.com) to update your SANSurfer application.

### Brocade SilkWorm 4100 Port Synchronization

When using Fabric Operating System version 4.4.0b or earlier, port synchronization may fail. To avoid this problem, set the topology to loop-first and point-to-point. This corresponds to the default NVRAM settings. An update that resolves this issue will be available at [www.brocade.com](http://www.brocade.com).

### Version Display at System Boot

During system boot, the Dell 2362M Integrated Fibre Channel Module is displayed as QLA2322.
