## **Product Features**

The Dell<sup>™</sup> S2240L/S2340L flat panel display has an active matrix, Thin-Film Transistor, Liquid Crystal Display. The monitor's features include:

- S2240L: 54.61 cm (21.5 inches) viewable area display. 1,920 x 1,080 resolution, plus full-screen support for lower resolutions.
- S2340L: 58.42 cm (23.0 inches) viewable area display. 1,920 x 1,080 resolution, plus full-screen support for lower resolutions.
- Wide viewing angle to allow viewing from a sitting or standing position, or while moving from side-to-side.
- Removable pedestal.
- Plug and play capability if supported by your system.
- On-Screen Display (OSD) adjustments for ease of set-up and screen optimization.
- Software and documentation media which includes an information file (INF), Image Color Matching File (ICM), and product documentation.
- Dell Display Manager included (comes in the CD attached with the monitor).
- Security lock slot.
- Dell Display Manager functionality.
- ENERGY STAR compliant.
- EPEAT<sup>™</sup> Silver compliant.
- RoHS compliant.

# **Back View**

Label	Description	Use
1	Regulatory rating label	Lists the regulatory approvals.
2	Audio Line-out	Connect your speakers.*
3	HDMI connector	To connect your computer to the monitor using a HDMI cable.
4	VGA connector	To connect your computer to the monitor using a VGA cable.
5	Adapter connector	To connect the monitor power cable using a 12V DC adapter for transition.
6	Security lock slot	Use a security lock with the slot to help secure your monitor.
7	Barcode serial number label	Refer to this label if you need to contact Dell for technical support.
8	Cable clip	For cable management.
9	Stand release button	To release stand from monitor.

\* Headphone usage is not supported for the audio line-out connector.

## Side View

## **Monitor Specifications**

The following sections give you information about the various power management modes and pin assignments for the various connectors of your monitor.

#### **Power Management Modes**

If you have VESA's DPM compliance display card or software installed in your PC, the monitor automatically reduces its power consumption when not in use. This is referred to as *Power Save Mode*. If the computer detects input from keyboard, mouse, or other input devices, the monitor automatically resumes functioning. The following table shows the power consumption and signaling of this automatic power saving feature:

VESA Modes	Horizontal Sync	Vertical Sync	Video	Power Indicator	Power Consumption
Normal operation	Active	Active	Active	White	23 W (Maximum) for S2240L 18 W (Typical) for S2240L 24 W (Maximum) for S2340L
					19 W (Typical) for S2340L
Active-off mode	Inactive	Inactive	Blank	Amber	Less than 0.5 W
Switch off	-	-	-	Off	Less than 0.5 W

The OSD will only function in the *normal operation* mode. When any button except power button is pressed in Active-off mode, the following messages will be displayed:

#### Dell S2X40L

There is no signal coming from your computer. Press any key on the

keyboard or move the mouse to wake it up. If there is no display, press

the monitor button now to select the correct input source on the

On-Screen-Display menu.

(IIII)

Activate the computer and monitor to gain access to the OSD.

**NOTE:** Dell S2240L/S2340L monitor is **ENERGY STAR**<sup>®</sup>-compliance.

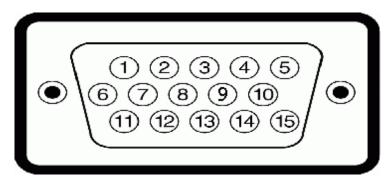

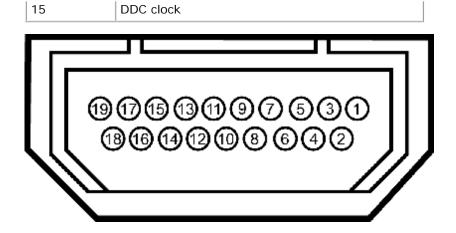

- \* Zero power consumption in OFF mode can only be achieved by disconnecting the main cable from the monitor.
- \*\* Maximum power consumption with max luminance and contrast.

## **Pin Assignments**

#### 15-pin D-Sub connector

Pin Number	Monitor Side of the 15-pin Side Signal Cable
1	Video-Red

14	Reserved (N.C. on device)	
15	SCL	
16	SDA	
17	DDC/CEC Ground	
18	+5V Power	
19	Hot Plug Detect	

## Plug and Play Capability

You can install the monitor in any Plug and Play compatible system. The monitor automatically provides the computer with its Extended Display Identification Data (EDID) using Display Data Channel (DDC) protocols so that the system can configure itself and optimize the monitor settings. Most monitor installations are automatic. You can select different settings if required.

Operating	5,000 m (16,405 ft) max	5,000 m (16,405 ft) max	
Non-operating	12,192 m (40,000 ft) max	12,192 m (40,000 ft) max	
	78.43 BTU/hour (maximum)	81.84 BTU/hour (maximum)	
Thermal dissipation	61.38 BTU/hour (typical)	64.79 BTU/hour (typical)	

## **LCD Monitor Quality & Pixel Policy**

During the LCD Monitor manufacturing process, it is not uncommon for one or more pixels to become fixed in an unchanging state. The visible result is a fixed pixel that appears as an extremely tiny dark or bright discolored spot. When the pixel remains permanently lit, it is known as a "bright dot". When the pixel remains black, it is known as a "dark dot".

In almost every case, these fixed pixels are hard to see and do not detract from display quality or usability. A display with 1 to 5 fixed pixels is considered normal and within competitive standards. For more information, see Dell Support site at: <u>support.dell.com</u>.

## **Maintenance Guidelines**

### **Caring for Your Monitor**

**CAUTION:** Read and follow the <u>safety instructions</u> before cleaning the monitor.

#### **CAUTION:** Before cleaning the monitor, unplug the monitor power cable from the electrical outlet.

For best practices, follow the instructions in the list below while unpacking, cleaning, or handling your monitor:

- To clean your antistatic screen, slightly dampen a soft, clean cloth with water. If possible, use a special screen-cleaning tissue or solution suitable for the antistatic coating. Do not use benzene, thinner, ammonia, abrasive cleaners, or compressed air.
- Use a slightly dampened, warm cloth to clean the plastics. Avoid using detergent of any kind as some detergents leave a milky film on the plastics.
- If you notice a white powder when you unpack your monitor, wipe it off with a cloth. This white powder occurs during the shipping of the monitor.
- Handle your monitor with care as a darker-colored monitor may scratch and show white scuff marks more than a lighter-colored monitor.
- To help maintain the best image quality on your monitor, use a dynamically changing screen saver and power off your monitor when not in use.

Back to Contents Page

# **Setting Up the Monitor**

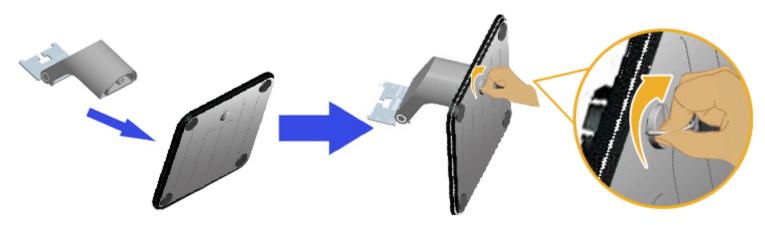

## Dell™ S2240L/S2340L Monitor User's Guide

- Attaching the Stand
- Connecting Your Monitor
- Organizing Your Cables
- Removing the Monitor Stand

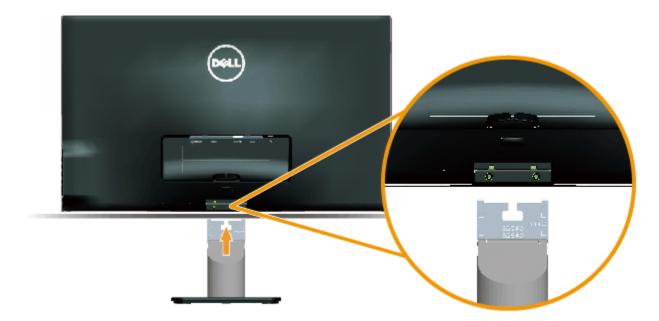

#### Attaching the Stand

**NOTE:** The stand base and stand riser are detached when the monitor is shipped from the factory.

1. Assemble the stand riser to stand base.

- a. Attach the stand riser to the stand base.
- b. Tighten the screw clockwise located on the base.
- 2. Attach the stand assembly to the monitor:

- a. Place the monitor on a soft cloth or cushion near the edge of desk.
- b. Align the stand assembly bracket to the monitor groove.
- c. Insert the bracket towards monitor until it locks in place.

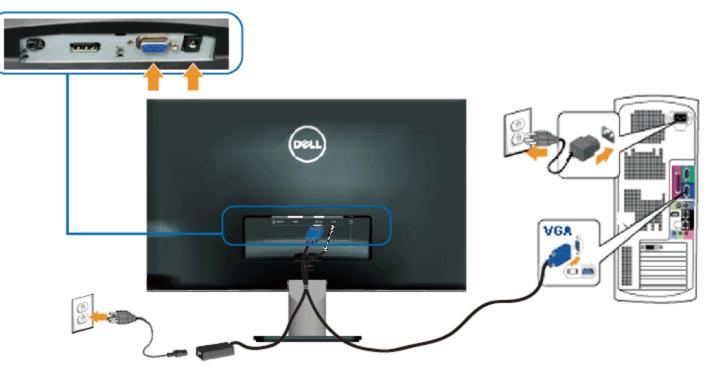

## **Connecting Your Monitor**

MARNING: Before you begin any of the procedures in this section, follow the <u>Safety Instructions</u>.

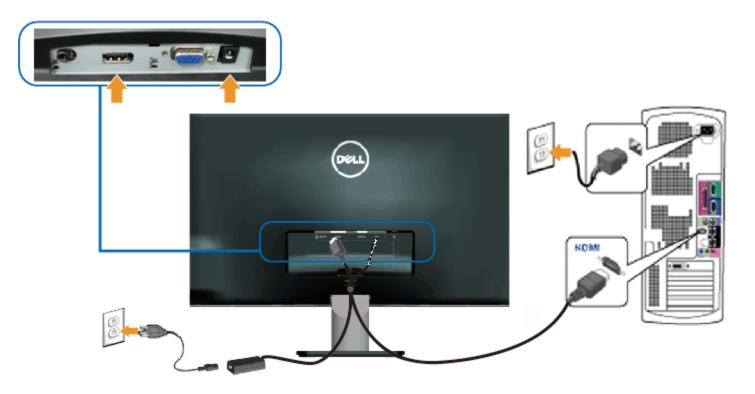

To connect your monitor to the computer:

- 1. Turn off your computer and disconnect the power cable.
- 2. Connect the blue (analog VGA) or HDMI display connector cable to the corresponding video port on the back of your computer. Do not use both cables on the same computer. Use both the cables only when they are connected to two different computers with appropriate video systems.

**Connecting the Blue VGA Cable** 

#### Connecting the monitor with HDMI

# **Organizing Your Cables**

After attaching all necessary cables to your monitor and computer, organize all cables as shown below:

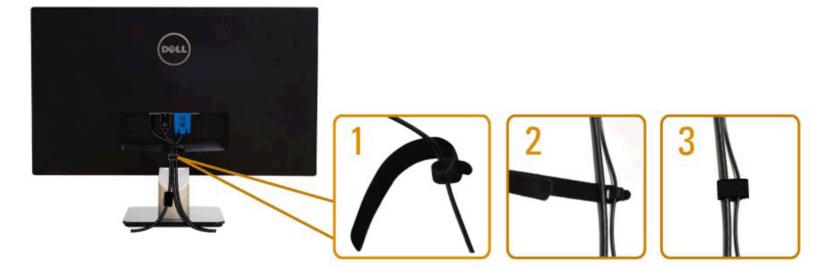

- 1. Insert cables into cable clip.
- 2. Tie the cables together using the velcro strap that shipped with your monitor.

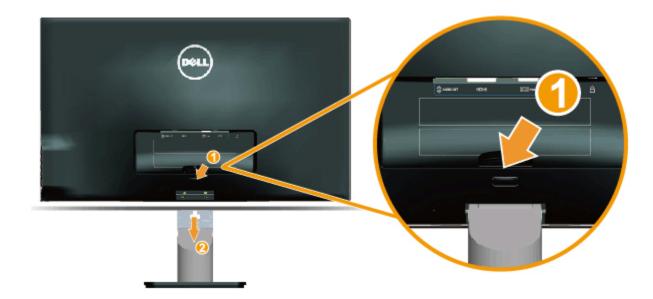

## **Removing the Monitor Stand**

After placing the monitor panel on a soft cloth or cushion, complete the following steps to remove the base:

- 1. Push the release button above the stand.
- 2. While pushing the release button, pull the stand away from the monitor.

Back to Contents Page

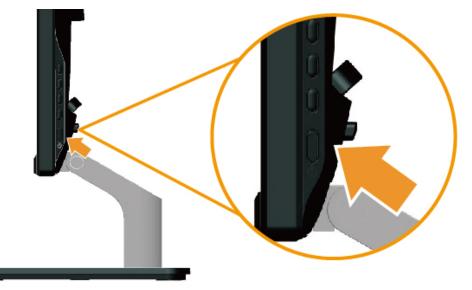

## **Operating the Monitor**

#### Dell<sup>™</sup> S2240L/S2340L Monitor User's Guide

- Using the Right Side Panel Controls
- Using the On-Screen Display (OSD) Menu
- Setting the Maximum Resolution
- Using the Tilt

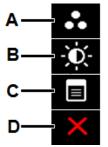

#### **Power On the Monitor**

Press the 🕑 button to turn on the monitor.

## Using the Right Side Panel Controls

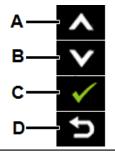

Use the keys on the Right side of the monitor to adjust the image settings.

	Right side panel Key	Description
A	Preset Modes	Use the <b>Preset modes</b> key to choose from a list of preset color modes. See <u>Using the OSD Menu</u> .
В	<b>Brightness / Contrast</b>	Use the Brightness / Contrast key to direct access to the "Brightness" and "Contrast" control menu.
С	<b>G</b> Menu	Use the <b>Menu</b> key to open the on-screen display (OSD).
D	Exit	Use the <b>Exit</b> key to exit on-screen display (OSD) from menu and sub-menus.

#### Right side panel Key

<u>Use the keys</u> on the Right side of the monitor to adjust the image settings.

Right side panel Key

A		Use the <b>Up</b> key to adjust (increase ranges) items in the OSD menu.
В	Down	Use the <b>Down</b> key to adjust (decrease ranges) items in the OSD menu.
C	ОК	Use the <b>OK</b> key to confirm your selection.
D	Back	Use the <b>Back</b> key to go back to the previous menu.

## Using the On-Screen Display (OSD) Menu

#### Accessing the Menu System

- **NOTE:** If you change the settings and then either proceed to another menu or exit the OSD menu, the monitor automatically saves those changes. The changes are also saved if you change the settings and then wait for the OSD menu to disappear.
  - Press the D button to open the OSD menu and display the main menu.

#### **OSD Warning Messages**

When the monitor does not support a particular resolution mode you will see the following message:

This means that the monitor cannot synchronize with the signal that it is receiving from the computer. See <u>Monitor Specifications</u> for the horizontal and vertical frequency ranges addressable by this monitor. Recommended mode is 1,920 x 1,080.

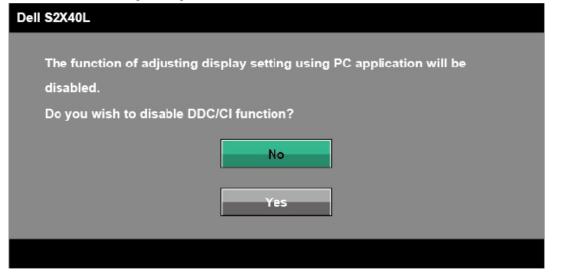

When the Energy Smart or Dynamic Contrast feature is enabled (in these preset modes: Game or Movie), the manual brightness adjustment is disabled.

#### Dell S2X40L

To allow manual adjustment of brightness, the Energy Smart / Dynamic will be switched off.

Do you want to continue?

You will see the following message before the DDC/CI function is disabled.

When the monitor enters the Power Save mode, the following message appears:

Activate the computer and wake up the monitor to gain access to the OSD.

If you press any button other than the power button the following messages will appear depending on the selected input:

There is no signal coming from your computer. Press any key on the keyboard or move the mouse to wake it up. If there is no display, press the monitor button now to select the correct input source on the On-Screen-Display menu.

#### **و**

If VGA or HDMI cable is not connected, a floating dialog box as shown below appears. The monitor will enter Power Save Mode in 5 minutes if left at this state.

See <u>Troubleshooting</u> for more information.

#### **Setting the Maximum Resolution**

To set the Maximum resolution for the monitor:

#### Windows XP:

- 1. Right-click on the desktop and select Properties.
- 2. Select the **Settings** tab.
- 3. Set the screen resolution to 1920 x 1080.
- 4. Click OK.

Windows Vista®, Windows ® 7, Windows ® 8/Windows ® 8.1:

- 1. For Windows ® 8 / Windows ® 8.1 only, select the Desktop tile to switch to classic desktop.
- 2. Right-click on the desktop and click Screen Resolution.
- 3. Click the Dropdown list of the Screen resolution and select 1920 x 1080.
- 4. Click OK.

If you do not see 1920 x 1080 as an option, you may need to update your graphics driver. Depending on your computer, complete one of the following procedures.

If you have a Dell desktop or portable computer:

• Go to support.dell.com, enter your service tag, and download the latest driver for your graphics card.

If you are using a non-Dell computer (portable or desktop):

- Go to the support site for your computer and download the latest graphic drivers.
- Go to your graphics card website and download the latest graphic drivers.

### Using the Tilt

#### Tilt

With the stand assembly, you can tilt the monitor for the most comfortable viewing angle.

**NOTE:** The stand base is detached when the monitor is shipped from the factory.

## **Troubleshooting**

#### Dell<sup>™</sup> S2240L/S2340L monitor

- Self-Test
- Built-in Diagnostics
- In-Store Demo
- Common Problems
- Product Specific Problems

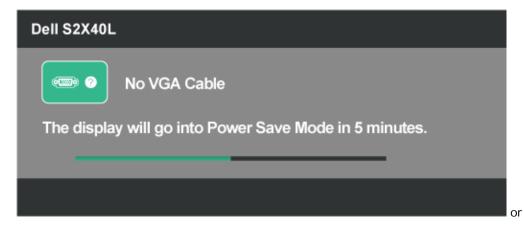

WARNING: Before you begin any of the procedures in this section, follow the <u>Safety Instructions</u>.

#### **Self-Test**

Your monitor provides a self-test feature that allows you to check whether your monitor is functioning properly. If your monitor and computer are properly connected but the monitor screen remains dark, run the monitor self-test by performing the following steps:

- 1. Turn off both your computer and the monitor.
- 2. Unplug the video cable from the back of the computer. To ensure proper Self-Test operation, remove both Digital (black connector) and the Analog (blue connector) cables from the back of computer.
- 3. Turn on the monitor.

The floating dialog box should appear on-screen (against a black background) if the monitor cannot sense a video signal and is working correctly. While in self-test mode, the power LED remains white. Also, depending upon the selected input, one of the dialogs shown below will continuously scroll through the screen.

Dell S2X40L
No HDMI Cable
The display will go into Power Save Mode in 5 minutes.

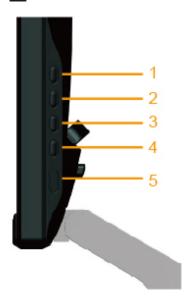

- 4. This box also appears during normal system operation, if the video cable becomes disconnected or damaged. The monitor will enter **Power Save Mode** in 5 minutes if left at this state.
- 5. Turn off your monitor and reconnect the video cable; then turn on both your computer and the monitor.

If your monitor screen remains blank after you use the previous procedure, check your video controller and computer, because your monitor is functioning properly.

### **Built-in Diagnostics**

Your monitor has a built-in diagnostic tool that helps you determine if the screen abnormality you are experiencing is an inherent problem with your monitor, or with your computer and video card.

**NOTE:** You can run the built-in diagnostics only when the video cable is unplugged and the monitor is in self-test mode.

To run the built-in diagnostics:

1. Ensure that the screen is clean (no dust particles on the surface of the screen).

- 2. Unplug the video cable(s) from the back of the computer or monitor. The monitor then goes into the self-test mode.
- 3. Press and hold the Button 1 and Button 4 on the right side panel simultaneously for 2 seconds. A gray screen appears.
- 4. Carefully inspect the screen for abnormalities.
- 5. Press the **Button 4** on the right side panel again. The color of the screen changes to red.
- 6. Inspect the display for any abnormalities.
- 7. Repeat steps 5 and 6 to inspect the display in green, blue, black, white, and text screens. The test is complete when the text screen appears. To exit, press the **Button 4** again.

If you do not detect any screen abnormalities upon using the built-in diagnostic tool, the monitor is functioning properly. Check the video card and computer.

#### **In-Store Demo**

To enter InStore OSD Mode

All cables detached/disconnected. Monitor in "On" mode. Press and hold "menu" (Button 4) + "up" (Button 2) for 5 seconds

To exit InStore OSD Mode Press power button once If power is cut off during demo, resume the demo after power is restored.

#### **Common Problems**

The following table contains general information about common monitor problems you might encounter and the possible solutions.

Common Symptoms	What You Experience	Possible Solutions
No Video/Power LED off	No picture	<ul> <li>Ensure that the video cable connecting the monitor and the computer is properly connected and secured.</li> <li>Verify that the power outlet is functioning properly using any other electrical equipment.</li> <li>Ensure that the power button is depressed fully.</li> </ul>
No Video/Power LED on	No picture or no brightness	<ul> <li>Increase brightness &amp; contrast controls via OSD.</li> <li>Perform monitor self-test feature check.</li> <li>Check for bent or broken pins in the video cable connector.</li> <li>Ensure that the correct input source is selected via the <u>INPUT SOURCE</u> menu.</li> <li>Run the built-in diagnostics.</li> </ul>
Poor Focus	Picture is fuzzy, blurry, or ghosting	<ul> <li>Perform Auto Adjust via OSD.</li> <li>Adjust the Phase and Pixel Clock controls via OSD.</li> <li>Eliminate video extension cables.</li> <li>Reset the monitor to Factory Settings.</li> <li>Change the video resolution to the correct aspect ratio (16:9).</li> </ul>
Shaky/Jittery Video	Wavy picture or fine movement	<ul> <li>Perform Auto Adjust via OSD.</li> <li>Adjust the Phase and Pixel Clock controls via OSD.</li> <li>Reset the monitor to Factory Settings.</li> <li>Check environmental factors.</li> <li>Relocate the monitor and test in another room.</li> </ul>
Missing Pixels	LCD screen has spots	Cycle power on-off.

		Pixel that is permanently off is a natural defect that can occur in LCD technology.
		For more information on Dell Monitor Quality and Pixel Policy, see Dell Support site at: support.dell.com.
Stuck-on Pixels	LCD screen has bright spots	<ul> <li>Cycle power on-off.</li> <li>Pixel that is permanently off is a natural defect that can occur in LCD technology.</li> </ul>
		For more information on Dell Monitor Quality and Pixel Policy, see Dell Support site at: support.dell.com.
Brightness Problems	Picture too dim or too bright	<ul> <li>Reset the monitor to Factory Settings.</li> <li>Auto Adjust via OSD.</li> <li>Adjust brightness &amp; contrast controls via OSD.</li> </ul>
Geometric Distortion	Screen not centered correctly	<ul> <li>Reset the monitor to Factory Settings.</li> <li>Auto Adjust via OSD.</li> <li>Adjust brightness &amp; contrast controls via OSD.</li> </ul>
		<b>NOTE:</b> When using 'HDMI', the positioning adjustments are not available.
Horizontal/Vertical Lines	Screen has one or more lines	<ul> <li>Reset the monitor to Factory Settings.</li> <li>Perform Auto Adjust via OSD.</li> <li>Adjust Phase and Pixel Clock controls via OSD.</li> <li>Perform monitor self-test feature check and determine if these lines are also in self-test mode.</li> <li>Check for bent or broken pins in the video cable connector.</li> </ul>
		NOTE: When using 'HDMI', the Pixel Clock and Phase adjustments are not available.
Synchronization Problems	Screen is scrambled or appears torn	<ul> <li>Reset the monitor to Factory Settings.</li> <li>Perform Auto Adjust via OSD.</li> <li>Adjust Phase and Pixel Clock controls via OSD.</li> <li>Perform monitor self-test feature check to determine if the scrambled screen appears in self-test mode.</li> <li>Check for bent or broken pins in the video cable connector.</li> <li>Restart the computer in the <i>safe mode</i>.</li> </ul>
Safety-Related Issues	Visible signs of smoke or sparks	<ul><li>Do not perform any troubleshooting steps.</li><li>Contact Dell immediately.</li></ul>
Intermittent Problems	Monitor malfunctions on & off	<ul> <li>Ensure that the video cable connecting the monitor to the computer is properly connected and is secured.</li> <li>Reset the monitor to Factory Settings.</li> <li>Perform monitor self-test feature check to determine if the intermittent problem occurs in <i>self-test mode</i>.</li> </ul>
Missing Color	Picture missing color	<ul> <li>Perform monitor self-test feature check.</li> <li>Ensure that the video cable connecting the monitor to the computer is properly connected and is secured.</li> <li>Check for bent or broken pins in the video cable connector.</li> </ul>
Wrong Color	Picture color not good	<ul> <li>Try different Color Preset Settings in Color Settings OSD. Adjust R/G/B value in Color Settings OSD if the Color Management is turned off.</li> <li>Change the Input Color Format to RGB or YPbPr in Color settings OSD.</li> </ul>

hage retention from a atic image left on the static image displaye appears on the scree ne	more information, see Power Management Modes).

# **Product Specific Problems**

Specific Symptoms	What You Experience	Possible Solutions
Screen image is too small	Image is centered on screen, but does not fill entire viewing area	Reset the monitor to Factory Settings.
Cannot adjust the monitor with the buttons on the front panel	OSD does not appear on the screen	<ul> <li>Turn off the monitor, unplug the power cord, plug back, and then turn on the monitor.</li> <li>Check if the OSD menu is locked. If yes, press and hold key for 10 seconds to unlock. See <u>Menu Lock</u>.</li> </ul>
No Input Signal when user controls are pressed	No picture, the LED light is white. When you press "up", "down" or "Menu" key, the message " No input signal" will appear.	<ul> <li>Check the signal source. Ensure the computer is not in the power saving mode by moving the mouse or pressing any key on the keyboard.</li> <li>Check whether the signal cable is properly plugged in. Re-plug the signal cable if necessary.</li> <li>Reset the computer or video player.</li> </ul>
The picture does not fill the entire screen	The picture cannot fill the height or width of the screen	<ul> <li>Due to different video formats (aspect ratio) of DVDs, the monitor may display in full screen.</li> <li>Run the built-in diagnostics.</li> </ul>

**NOTE:** When choosing HDMI mode, the **Auto Adjust** function is not available.

### Dell<sup>™</sup> S2240L/S2340L Monitor User's Guide

- Safety Instructions
- FCC Notice (U.S. Only) and Other Regulatory Information
- Contacting Dell

# MARNING: Safety Instructions

MARNING: Use of controls, adjustments, or procedures other than those specified in this documentation may result in exposure to shock, electrical hazards, and/or mechanical hazards.

For information on safety instructions, see the Product Information Guide.

#### FCC Notices (U.S. Only) and Other Regulatory Information

For FCC notices and other regulatory information, see the regulatory compliance website located at www.dell.com\regulatory compliance.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) this device may not cause harmful interference

(2) this device must accept any interference received including interference that may cause undesired operation

#### **Contacting Dell**

For customers in the United States, call 800-WWW-DELL (800-999-3355).

**NOTE:** If you do not have an active Internet connection, you can find contact information on your purchase invoice, packing slip, bill, or Dell product catalog.

Dell provides several online and telephone-based support and service options. Availability varies by country and product, and some services may not be available in your area. To contact Dell for sales, technical support, or customer service issues:

- 1. Visit support.dell.com.
- 2. Verify your country or region in the **Choose A Country/Region** drop-down menu at the bottom of the page.

- 3. Click **Contact Us** on the left side of the page.
- 4. Select the appropriate service or support link based on your need.
- 5. Choose the method of contacting Dell that is convenient for you.

# **Setting Up Your Monitor**

### Dell<sup>™</sup> S2240L/S2340L monitor

#### Setting the display resolution to 1920 x 1080 (Maximum)

For optimal display performance while using the Microsoft Windows operating systems, set the display resolution to **1920 x 1080** pixels by performing the following steps:

In Windows Vista®, Windows® 7, Windows® 8/Windows® 8.1:

- 1. For Windows® 8 / Windows® 8.1 only, select the Desktop tile to switch to classic desktop.
- 2. Right-click on the desktop and click Screen Resolution.
- 3. Click the Dropdown list of the Screen resolution and select 1920 x 1080.
- 4. Click OK.

If you do not see **1920 x 1080** as an option, you may need to update your graphics driver. Please choose the scenario below that best describes the computer system you are using, and and follow the given steps.

1: If you have a Dell<sup>™</sup> desktop or a Dell <sup>™</sup> portable computer with internet access.

2: If you have a non Dell ™desktop, portable computer, or graphics card.

## **Setting Up Your Monitor**

### Dell<sup>™</sup> S2240L/S2340L Monitor

# If you have a Dell<sup>™</sup> desktop or a Dell<sup>™</sup> portable computer with internet access

- 1. Go to <u>http://support.dell.com</u>, enter your service tag, and download the latest driver for your graphics card.
- 2. After installing the drivers for your graphics adapter, attempt to set the resolution to **1920 x 1080** again.

**NOTE:** If you are unable to set the resolution to **1920 x 1080**, please contact Dell<sup>™</sup> to inquire about a graphics adapter that supports these resolutions.

# **Setting Up Your Monitor**

#### Dell<sup>™</sup> S2240L/S2340L monitor

# If you have a non Dell<sup>™</sup> desktop, portable computer, or graphics card

In Windows Vista®, Windows® 7, Windows® 8/Windows® 8.1:

- 1. For Windows® 8/Windows® 8.1 only, select the Desktop tile to switch to classic desktop.)
- 2. Right-click on the desktop and click Personalization.
- 3. Click Change Display Settings.
- 4. Click Advanced Settings.
- 5. Identify your graphics controller supplier from the description at the top of the window (e.g. NVIDIA, ATI, Intel etc.).

6. Please refer to the graphics card provider website for updated driver (for example, <u>http://www.ATI.com</u> OR <u>http://www.NVIDIA.com</u> ).

7. After installing the drivers for your Graphics Adapter, attempt to set the resolution to **1920 x 1080** again.

**NOTE:** If you are unable to set the resolution to **1920 x 1080**, please contact the manufacturer of your computer or consider purchasing a graphics adapter that will support the video resolution of **1920 x 1080**.
