Every Dell UP3017 is shipped incorporating pre-tuned sRGB and AdobeRGB with average DeltaE < 2. Color and Luminance Uniformity is adjusted across the screen to meet DeltaE < 2 and 97-102% respectively. This helps prevent significant color inconsistency or inaccuracy. In addition, a tighter grey-scale tracking helps enable ultra-smooth color gradation.

Be assured of Accurate, Precise and Consistent Onscreen Color with every Dell Ultrasharp UP3017.
