⚠️ **CAUTION: Safety Instructions**

1. Do not use the projector near appliances that generate a lot of heat.
2. Do not use the projector in areas where there is an excessive amount of dust. The dust may cause the system to fail and the projector will automatically shutdown.
3. Ensure that the projector is mounted in a well-ventilated area.
4. Do not block the ventilation slots and openings on the projector.
5. Ensure the projector operates between ambient temperatures (5 °C to 35 °C).
6. Do not try to touch the ventilation outlet as it can become very hot after the projector has been turned on or immediately after it is turned off.
7. Do not look into the lens while the projector is on as it may cause injury to your eyes.
8. Do not place any objects near or in front of the projector or cover its lens while the projector is on as the heat may cause the object to melt or burn.
9. Do not use the wireless projector near cardiac pacemakers.
10. Do not use the wireless projector near medical equipment.
11. Do not use the wireless projector near microwave ovens.

**NOTE:**

- Do not attempt to wall mount the projector by yourself. It should be installed by a qualified technician.
- Recommended Projector Wall Mount Kit (P/N: 7XY53). For more information, see the Dell Support website at [dell.com/support](http://dell.com/support).
- For more information, see the Safety Information that shipped with your projector.
- The S510 projector can only be used indoors.

</table>
CAUTION: Before you begin any of the procedures in this section, follow the Safety Instructions as described on page 8.
Connecting to a Computer

Connecting a Computer Using a VGA Cable

1 Power cord
2 VGA to VGA cable
3 USB-A to Mini USB-B cable

NOTE: The Mini USB cable must be connected if you want to use the Page Up and Page Down features on the remote control.
Monitor Loop-Through Connection Using VGA Cables

1 Power cord
2 VGA to VGA cable

NOTE: Only one VGA cable is shipped with your projector. An additional VGA cable can be purchased on the Dell website at www.dell.com.
Connecting Your Projector

Connecting a Computer Using a RS232 cable

1 Power cord
2 RS232 (9-pin D-sub female to female pin2-3 swap) cable

**NOTE:** The RS232 (9-pin D-sub female to female pin2-3 swap) cable is not shipped with your projector. Consult a professional installer for the cable and RS232 remote control software.
Connecting Your Projector

Connecting a Computer Using a USB Cable

1 Power cord
2 USB-A to USB-B cable

NOTE: Plug and Play. Only one USB cable is shipped with your projector. An additional USB cable can be purchased on the Dell website at www.dell.com.
Connecting a Computer Using a HDMI Cable

1 Power cord
2 HDMI cable

**NOTE:** The HDMI cable is not shipped with your projector. You can purchase the HDMI cable on the Dell website at [www.dell.com](http://www.dell.com).
Connecting a Mobile Devices (Tablet) Using a MHL Cable

1 Power cord
2 MHL cable

NOTE: The MHL cable is not shipped with your projector.

NOTE:
  a Your smartphone or tablet must support MHL function.
  b Some smartphone or tablet need to connect the additional MHL adapter or adapter cable, please contact your dealer of devices.
Connecting a Computer Using Wireless or Intel® WiDi

NOTE: Your computer should be equipped with a wireless adapter and properly configured to detect another wireless connection. Refer to your computer’s documentation on how to configure a wireless connection.

NOTE: To connect a computer via Intel® WiDi, your computer must be Intel® WiDi compatible.
Connecting to Smartphone or Tablet Using Wireless

**NOTE:** Dell S510 supports the MobiShow and WiFi-Doc applications. These applications enable you to transmit supported content from your Android or iOS devices wirelessly. After installing and launching the application on your mobile device, enable Wi-Fi on your mobile device and connect to the projector network, Dell S510. For more Information, please visit go to Dell Support site at dell.com/support.

Files supported are:

<table>
<thead>
<tr>
<th>Mobi Show</th>
<th>Photos</th>
<th>jpeg / jpg</th>
</tr>
</thead>
<tbody>
<tr>
<td>MS Powerpoint</td>
<td></td>
<td>PtG2 (converted from ppt)*</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>WiFi-Doc</th>
<th>Photos</th>
<th>jpeg / jpg</th>
</tr>
</thead>
<tbody>
<tr>
<td>MS Powerpoint / Word / Excel / Text / PDF</td>
<td>ppt / pptx / doc / docx / xls / xlsx / txt / pdf</td>
<td></td>
</tr>
</tbody>
</table>

* Please install the PtG2 Converter into your PC for file conversion of ppt into PtG2 format. PtG2 Converter can be downloaded from dell.com/support.
Connecting a DVD Player

Connecting a DVD Player Using a Composite Video and L/R Audio Cable

1. Power cord
2. Composite Video cable
3. L/R audio cable

NOTE: The Composite Video cable is not shipped with your projector. You can purchase the Composite Video Extension (50 ft/100 ft) cable on the Dell website at www.dell.com.

NOTE: The L/R audio cable is not shipped with your projector.
Connecting a DVD Player Using a Component Video Cable

1. Power cord
2. VGA to Component Video cable
3. Audio cable

**NOTE:** The VGA to Component Video cable and audio cable are not shipped with your projector. You can purchase the VGA to Component Video Extension (50 ft/100 ft) cable on the Dell website at [www.dell.com](http://www.dell.com).
Connecting a DVD Player Using a HDMI Cable

1 Power cord
2 HDMI cable

**NOTE:** The HDMI cable is not shipped with your projector. You can purchase the HDMI cable on the Dell website at [www.dell.com](http://www.dell.com).
Connecting an External Speaker Using Audio Cable

1 Power cord
2 Audio cable

NOTE: The audio cable is not shipped with your projector.
Connecting to Local Area Network

To project an image and control the projector that is connected to a network through a RJ45 cable.

1 Power cord
2 RJ45 cable

NOTE: The RJ45 cable is not shipped with your projector. You can purchase the RJ45 cable on the Dell website at www.dell.com.
Connection With Commercial RS232 Control Box

1. Power cord
2. RS232 (9-pin D-sub female to female pin2-3 swap) cable
3. Commercial RS232 control box

**NOTE:** The RS232 (9-pin D-sub female to female pin2-3 swap) cable is not shipped with your projector. Consult a professional technician to obtain the cable.
Using Your Projector

Turning Your Projector On

NOTE: Turn on the projector before you turn on the source (computer, DVD player, etc.). The Power button light blinks white until pressed.

1 Connect the power cord and appropriate signal cables to the projector. For information about connecting the projector, see “Connecting Your Projector” on page 9.
2 Press the Power button (see “Using the Remote Control” on page 29 to locate the Power button).
3 Turn on your source (computer, DVD player, etc.)
4 Connect your source to the projector using the appropriate cable. See “Connecting Your Projector” on page 9 for instructions to connect your source to the projector.
5 By default, the input source of the projector is set to VGA-A. Change the input source of the projector if necessary.
6 If you have multiple sources connected to the projector, press the Source button on the remote control to select the desired source. See “Using the Remote Control” on page 29 to locate the Source button.

Turning Your Projector Off

CAUTION: Unplug the projector after properly shutting down as explained in the following procedure.

1 Press the Power button. Follow the instruction displayed on screen to properly turn off the projector.

NOTE: The “Press Power Button to Turn off Projector” message will appear on the screen. The message disappears after 5 seconds or you can press the Menu button to clear it.
2 Press the Power button again. The cooling fans continue to operate for 120 seconds.
3 To power off the projector quickly, press the Power button and hold for 1 second while the projector’s cooling fans are still running.
NOTE: Before you turn on the projector again, wait for 60 seconds to allow the internal temperature to stabilize.

4 Disconnect the power cord from the electrical outlet and the projector.

Adjusting the Projector Focus
1 Rotate the focus ring until the image is clear. The projector focuses at distances ranging between 1.7 ft to 2.49 ft (0.517 m to 0.759 m ± 0.01 m).

Cleaning the Projector’s Mirror
1 Turn off the projector power and disconnect the power cord.
2 Let the projector cool for at least 30 minutes.
3 Use air blower bulb to blow off dust on the mirror or gently wipe the mirror by using a microfiber cleaning cloth. Do not scrub the surface of the mirror. It may scratch the mirror.

⚠️ CAUTION: Do not spray cleaners or solvents directly on the projector.

⚠️ WARNING: Cleaning a wall-mounted projector can result in a fall or injury. You can remove the projector from the wall-mounting bracket to clean the projector’s mirror.
Adjusting Projection Image Size

Projector to screen distance (d)

- 70" (177.8 cm)
- 80" (203.2 cm)
- 87.2" (221.4 cm)
- 90" (228.6 cm)
- 100" (254 cm)
### Using Your Projector

**NOTE:** The distance from mirror to the rear of projector: 33.5 cm

<table>
<thead>
<tr>

Installing the Remote Control Batteries

NOTE: Remove the batteries from the remote control when not in use.

1. Press the tab to lift the battery compartment cover.

2. Check the polarity (+/-) marking on the batteries.

3. Insert the batteries and align their polarity correctly according to the marking in the battery compartment.

NOTE: Avoid mixing different types of batteries or using new and old batteries together.

4. Slip the battery cover back.
Replacing the Interactive Pen Tips

NOTE: If the pen tip becomes damaged or no longer works well, you should replace them.
Replacing the Interactive Pen Batteries

**NOTE:** If the battery is low, the LED indicator starts flashing red as you turn on the pen. You should replace with two new AAA batteries.

1. You can access the battery compartment by turning open the pen head.

2. Check the polarity (+/-) marking on the batteries.

3. Insert the batteries and align their polarity correctly according to the marking on the pen head.

**NOTE:** Avoid mixing different types of batteries or using new and old batteries together.

4. Place the pen head back, turn until the battery compartment access fully closed.
Operating Range with Remote Control

<table>
<thead>
<tr>
<th>Operating range</th>
</tr>
</thead>
<tbody>
<tr>
<td>Angle</td>
</tr>
<tr>
<td>Distance</td>
</tr>
<tr>
<td>340°</td>
</tr>
<tr>
<td>7 m/22.97 feet</td>
</tr>
</tbody>
</table>

NOTE: Actual operating range may slightly differ from the diagram. Weak batteries will also prevent the remote control from properly operating the projector.
Using the On-Screen Display

- The projector has a multi-language On-Screen Display (OSD) Menu that can be displayed with or without an input source.
- Press the Menu button on the remote control to enter the Main Menu.
- To navigate through the tabs in the Main Menu, press the ▼ or ▲ buttons on the remote control.
- To select a submenu, press the ▼ or ▲ button on the remote control.
- To select an option, press the ▼ or ▲ buttons on the remote control. When an item is selected, the color changes to dark blue.
- Use the ▼ or ▲ buttons on the remote control to adjust the settings.
- To go back to the Main Menu, press the ▼ button on the remote control.
- To exit the OSD, press the Menu button directly on the remote control.

INPUT SOURCE

The Input Source menu allows you to select your projector's input source.

<table>
<thead>
<tr>
<th>Input Source</th>
<th>VGA-A</th>
<th>VGA-B</th>
<th>HDMI-A/MHL</th>
<th>HDMI-B</th>
<th>WIRELESS/LAN</th>

<td>VGA-A</td>
<td>VGA-B</td>
<td>HDMI-A/MHL</td>
<td>HDMI-B</td>
<td>WIRELESS/LAN</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**NOTE:** The WIRELESS/LAN can be used after the "Wireless and LAN" option is turned on.

**NOTE:** The USB can be used after the "Wireless and LAN" option is turned on.
INTERNAL MEMORY—Allows you to playback the photo, video, music, and MS word, excel, powerpoint, and PDF files from internal memory of the projector.

NOTE:

STORAGE MODE—You may also connect USB cable in Internal Memory source to execute copy, delete, move and more instructions from your computer to projector internal memory.

When you connect the projector and computer via USB cable, a USB Connected message will pop up and allow you to select DoUSB or Storage Mode.

USB CONNECTED:
You have connected the projector to your computer via USB.
Select DoUSB if you want to start projecting from your computer using DoUSB as an Input Source.
Select Storage Mode if you want to copy files between your computer and the projector’s internal memory.

INPUT SOURCE WIRELESS/LAN
The Input Source Wireless/LAN menu allows you to activate the Intel® WIDI/Miracast and Wireless/LAN Display.

INTEL® WIDI/MIRACAST—Press \ to access the projector’s Intel® WIDI or Miracast Guide screen.

WIRELESS/LAN DISPLAY—Press \ to access the projector’s Wireless or LAN Guide screen. See “Wireless/LAN Guide screen” on page 73.
INPUT SOURCE USB

The Input Source USB menu allows you to activate the USB Display and USB Viewer.

USB DISPLAY—Allows you to display the computer/laptop screen to your projector via the USB cable.

NOTE: If the DoUSB can’t display, please see “Troubleshooting Your Projector” on page 133.

USB VIEWER—Allows you to playback the photo, video, music, and MS word, excel, powerpoint, and PDF files from your USB flash disk.

AUTO ADJUST

Auto Adjust automatically adjusts the projector’s Horizontal, Vertical, Frequency, and Tracking in PC mode.
BRIGHTNESS/CONTRAST

The Brightness/Contrast menu allows you adjust the brightness/contrast settings of your projector.

BRIGHTNESS—Use ▲ and ▼ to adjust the brightness of the image.

CONTRAST—Use ▲ and ▼ to adjust the display contrast.

NOTE: If you adjust the settings for Brightness and Contrast the projector automatically switches to Custom mode.

VIDEO MODE

The Video Mode menu allows you to optimize the display image: Presentation, Bright, Movie, sRGB (provides more accurate color representation), and Custom (set your preferred settings).
Using Your Projector

**AUDIO VOLUME**
The Audio Volume menu allows you to adjust the Audio, Microphone, Master volume settings of your projector.

- **Audio Volume**—Press ▲ to increase the audio volume and ▼ to decrease the audio volume.
- **Mic Volume**—Press ▲ to increase the microphone volume and ▼ to decrease the microphone volume.
- **Master Volume**—Press ▲ to increase the audio and microphone volume and ▼ decrease the audio and microphone volume.

**AUDIO EQ**
The Audio EQ menu allows you to adjust the audio to boost or reduce (attenuating) the levels of different frequencies in a signal.

---

40 | Using Your Projector
ADVANCED SETTINGS
The Advanced Settings menu allows you to change settings for Image, Display, Projector, LAN, Wireless, Menu, Power, and Information.

IMAGE SETTINGS (IN PC MODE)—Select and press  to activate image settings. The image settings menu provides the following options:

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>COLOR TEMPERATURE</td>
<td>Allows you to adjust the color temperature. The screen appears cooler at higher color temperatures and warmer at lower color temperatures. When you adjust the values in the Color Adjust menu, the Custom mode is activated. The values are saved in the Custom mode.</td>
</tr>
<tr>
<td>RGB COLOR ADJUST</td>
<td>Allows you to manually adjust the colors red, green, and blue.</td>
</tr>
<tr>
<td>WHITE INTENSITY</td>
<td>Press  and use  and  to display white intensity.</td>
</tr>
<tr>
<td>COLOR SPACE</td>
<td>Allows you to select the color space. The options are: RGB, YCbCr, and YPbPr.</td>
</tr>
<tr>
<td>VGA OUTPUT</td>
<td>Select On or Off the VGA output function at projector standby status. Default is Off.</td>
</tr>
</tbody>
</table>

NOTE: If you adjust the settings for Color Temperature, RGB Color Adjust, and White Intensity the projector automatically switches to Custom mode.
IMAGE SETTINGS (IN VIDEO MODE)—Select and press \( \uparrow \) to activate image settings. The image settings menu provides the following options:

<table>

**COLOR TEMPERATURE**—Allows you to adjust the color temperature. The screen appears cooler at higher color temperatures and warmer at lower color temperatures. When you adjust the values in the **Color Adjust** menu, the Custom mode is activated. The values are saved in the Custom mode.

**RGB COLOR ADJUST**—Allows you to manually adjust the colors red, green, and blue.

**SATURATION**—Allows you to adjust the video source from black and white to fully saturated color. Press \( \uparrow \) to increase the amount of color in the image and \( \downarrow \) to decrease the amount of color in the image.

**SHARPNESS**—Press \( \uparrow \) to increase the sharpness and \( \downarrow \) to decrease the sharpness.

**TINT**—Press \( \uparrow \) to increase the amount of green in the image and \( \downarrow \) to decrease the amount of green in the image.

**WHITE INTENSITY**—Press \( \uparrow \) and use \( \uparrow \) and \( \downarrow \) to display white intensity.

**COLOR SPACE**—Allows you to select the color space. The options are: RGB, YCbCr, and YPbPr.

**VGA OUTPUT**—Select On or Off the VGA output function at projector standby status. Default is Off.

**NOTE:**

1. If you adjust the settings for **Color Temperature**, **RGB Color Adjust**, **Saturation**, **Sharpness**, **Tint**, and **White Intensity** the projector automatically switches to Custom mode.
2 Saturation, Sharpness, and Tint only available when the input source is from Composite.

IMAGE SETTINGS (NO INPUT SOURCE)—Select and press \( \text{ } \) to activate image settings. The image settings menu provides the following options:

<table>
<thead>
<tr>
<th>Advanced Settings</th>
<th>VGA Output</th>
</tr>
</thead>
<tbody>
<tr>
<td>Display Settings</td>
<td>Off</td>
</tr>
<tr>
<td>Projector Settings</td>
<td></td>
</tr>
<tr>
<td>LAN Settings</td>
<td></td>
</tr>
<tr>
<td>Wireless Settings</td>
<td></td>
</tr>
<tr>
<td>Menu Settings</td>
<td></td>
</tr>
<tr>
<td>Power Settings</td>
<td></td>
</tr>
<tr>
<td>Information</td>
<td></td>
</tr>
</tbody>
</table>

VGA OUTPUT—Select On or Off the VGA output function at projector standby status. Default is Off.

DISPLAY SETTINGS (IN PC MODE)—Select and press \( \text{ } \) to activate display settings. The display settings menu provides the following options:

<table>
<thead>
<tr>
<th>Advanced Settings</th>
<th>Dell 5510</th>
</tr>
</thead>
<tbody>
<tr>
<td>Image Settings</td>
<td></td>
</tr>
<tr>
<td>Projector Settings</td>
<td></td>
</tr>
<tr>
<td>LAN Settings</td>
<td></td>
</tr>
<tr>
<td>Wireless Settings</td>
<td></td>
</tr>
<tr>
<td>Menu Settings</td>
<td></td>
</tr>
<tr>
<td>Power Settings</td>
<td></td>
</tr>
<tr>
<td>Information</td>
<td></td>
</tr>
</tbody>
</table>

HORIZONTAL POSITION—Press \( \leftarrow \) to move the image right and \( \rightarrow \) to move the image left.

VERTICAL POSITION—Press \( \uparrow \) to move the image up and \( \downarrow \) to move the image down.

FREQUENCY—Allows you to change the display data clock frequency to match the frequency of your computer’s graphics card. If you see a vertical flickering wave, use the Frequency control to minimize the bars. This is a coarse adjustment.

TRACKING—Synchronize the phase of the display signal with the graphic card. If you experience an unstable or flickering image, use Tracking to correct it. This is a fine adjustment.
**ASPECT RATIO**—Allows you to select the aspect ratio to adjust how the image appears. Options are: Origin, 16:10, and 4:3.

- **Origin** — Select Origin to maintain the aspect ratio of the image projector according to the input source.
- **16:10** — The input source scales to fit the width of the screen to project a 16:10 screen image.
- **4:3** — The input source scales to fit the screen and projects a 4:3 image.

**ZOOM**—Press ▲ and ▼ to zoom and view the image.

Adjust the image scale by pressing ◀ or ▶ and press ▼ to view on your remote control only.

**ZOOM NAVIGATION**—Press ◀ to activate the Zoom Navigation menu.

Use ◀ ▶ △ ▴ to navigate the projection screen.

**3D FORMAT**—Allows you to select the 3D format. Options are: Side By Side, Side By Side Full, Top/Bottom, and Top/Bottom Full.

**3D SYNC INVERT**—If you see a discrete or overlapping image while wearing DLP 3D goggles, you may need to execute 'Invert' to get best match of left/right image sequence to get the correct image. (For DLP 3D goggles)

**NOTE:**

1. When you want to create a 3D experience, you will need a few other components including:
   a. “Active” 3D glasses with DLP Link™.
   b. 3D content. See “Note 2”.
   c. 3D Player.

2. HDMI 1.4a 3D support and refresh rate are as below:
   a. 1280x720p@50 Hz Frame Packing
   b. 1280x720p@59.94/60 Hz Frame Packing
   c. 1920x1080p@23.98/24 Hz Frame Packing
   d. 1920x1080i@50 Hz Side by Side Half
   e. 1920x1080i@59.94/60 Hz Side by Side Half
   f. 1280x720p@50 Hz Top and Bottom

44 | Using Your Projector
DISPLAY SETTINGS (IN VIDEO MODE)—Select and press \( \nabla \) to activate display settings. The display settings menu provides the following options:

**ASPECT RATIO**—Allows you to select the aspect ratio to adjust how the image appears. Options are: Origin, 16:10, and 4:3.
- **Origin** — Select Origin to maintain the aspect ratio of image projector according to the input source.
- **16:10** — The input source scales to fit the width of the screen to project a 16:10 screen image.
- **4:3** — The input source scales to fit the screen and projects a 4:3 image.

**ZOOM**—Press \( \Delta \) and \( \nabla \) to zoom and view the image.

Adjust the image scale by pressing \( \Delta \) or \( \nabla \) and press \( \nabla \) to view on your remote control only.

**ZOOM NAVIGATION**—Press \( \nabla \) to activate the Zoom Navigation menu.
Use \( \bullet \), \( \nabla \), \( \Delta \), \( \nabla \) to navigate the projection screen.

**3D FORMAT**—Allows you to select the 3D format. Options are: Side By Side, Side By Side Full, Top/Bottom, and Top/Bottom Full.

**3D SYNC INVERT**—If you see a discrete or overlapping image while wearing DLP 3D goggles, you may need to execute 'Invert' to get best match of left/right image sequence to get the correct image. (For DLP 3D goggles)
NOTE:

1 When you want to create a 3D experience, you will need a few other components including:
   a “Active” 3D glasses with DLP Link™.
   b 3D content. See “Note 2”.
   c 3D Player.
2 HDMI 1.4a 3D support and refresh rate are as below:
   a 1280x720p@50 Hz Frame Packing
   b 1280x720p@59.94/60 Hz Frame Packing
   c 1920x1080p@23.98/24 Hz Frame Packing
   d 1920x1080i@50 Hz Side by Side Half
   e 1920x1080i@59.94/60 Hz Side by Side Half
   f 1280x720p@50 Hz Top and Bottom
   g 1280x720p@59.94/60 Hz Top and Bottom
   h 1920x1080p@23.98/24 Hz Top and Bottom

PROJECTOR SETTINGS—Select and press \( \text{ } \) to activate projector settings.
The projector settings menu provides the following options:

**AUTO SOURCE**—Select Off (the default) to lock the current input signal. If you press the Source button when the Auto Source mode is set to Off, you can manually select the input signal. Select On to auto detect the available input signals. If you press the Source button when the projector is on, it automatically finds the next available input signal.

**PROJECTOR MODE**—Allows you to select the projector mode, depending upon how the projector is mounted.

- Rear Projection-Wall Mount — The projector reverses and turns the image upside down. You can project from behind a translucent screen with a wall-mounted projection (for regular projection).
- Front Projection-Wall Mount — The projector turns the image upside down for wall-mounted projection.
**CLOSED CAPTION**—Select **On** to enable close caption and activate the closed caption menu. Select appropriate closed caption options: CC1, CC2, CC3, and CC4.

⚠️ **NOTE:**
1. Closed caption option is available for NTSC only.
2. Closed captioning can only be enabled via Composite Video input.

**STARTUP SCREEN**—Default is Dell logo as wallpaper. You can also select Capture Screen option to capture the screen display. The following message appears on the screen.

![Screen capture in progress...](image)

0 100%

⚠️ **NOTE:** To capture a full image, ensure that the input signal connected to the projector is at 1280 x 800 resolution.

**TEST PATTERN**—Test Pattern is used to test focus and resolution. You can enable or disable the Test Pattern by selecting **Off**, **1**, or **2**.

Test Pattern 1:

![Test Pattern 1](image)

Test Pattern 2:

![Test Pattern 2](image)

**MINI USB FUNCTION**—Allows you to select the **Interactive Pen** or Remote Pg Ctrl.
FACTORY RESET—Select Confirm and press \( \square \) to reset all settings to its factory default. The below warning message appears:

Reset items include both computer sources and Video source settings.

LAN SETTINGS—Select and press \( \square \) to activate LAN settings. The LAN settings menu provides the following options:

- **WIRELESS AND LAN**—Select **Enabled** to activate the Wireless and LAN function. Select **Disabled** to deactivation the Wireless and LAN function.

- **DHCP**—If a DHCP server exists in the network to which the projector is connected, the IP address will automatically be acquired when you select DHCP On. If DHCP is Off, manually set the IP Address, Subnet Mask, and Gateway. Use \( \SquareLeft \) and \( \SquareRight \) to select the number of IP address, Subnet Mask, and Gateway. Key in enter to confirm each number and then use \( \SquareLeft \) and \( \SquareRight \) to set the next item.

- **IP ADDRESS**—Automatically or manually assigns the IP address to the projector connected to the network.

- **SUBNET MASK**—Configure the Subnet Mask of the network connection.

- **GATEWAY**—Check the Gateway address with your network/system administrator if you configure it manually.

- **DNS**—Check the DNS Server IP address with your network/system administrator if you configure it manually.

- **STORE**—Press \( \square \) to save the changes made in network configuration settings.

**NOTE:**
1 Use \( \) and \( \checkmark \) button to select IP Address, Subnet Mask, Gateway, DNS, and Store.

2 Press the \( \checkmark \) button to enter IP Address, Subnet Mask, Gateway or DNS to set the value. (The selected option is highlighted in blue)
   a Use \( \) and \( \checkmark \) button to select the option.
   b Use \( \) and \( \checkmark \) button to set the value.
   c After the setup is complete, press the \( \checkmark \) button to exit.

3 After the IP Address, Subnet Mask, Gateway, and DNS is set up, select Store and press \( \checkmark \) button to store the settings.

4 If you select Store without pressing the Enter button, the system will keep the original settings.

RESET—Press \( \) to reset network configuration.

WIRELESS SETTINGS—Select and press \( \) to activate wireless settings. The wireless settings menu provides the following options:

<table>
<thead>
<tr>
<th>Advanced Settings</th>
<th>DHCP Server</th>
<th>Start IP Address</th>
<th>192.168.100.11</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td>End IP Address</td>
<td>192.168.100.514</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Subnet Mask</td>
<td>255.255.255.0</td>
</tr>
<tr>
<td></td>
<td>Gateway</td>
<td>192.168.100.10</td>
<td></td>
</tr>
<tr>
<td></td>
<td>DNS</td>
<td>192.168.100.10</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Store</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>Information</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>Reset</td>
<td>Press ( \checkmark )</td>
<td></td>
</tr>
</tbody>
</table>

DHCP SERVER—Allows you to enable DHCP server of the wireless.

START IP ADDRESS—Automatically or manually assigns the Start IP address of the DHCP server to the projector connected to the wireless.

END IP ADDRESS—Automatically or manually assigns the End IP address of the DHCP server to the projector connected to the wireless.

SUBNET MASK—Configure the Subnet Mask of the wireless connection.

GATEWAY—Check the Gateway address with your network/system administrator if you configure it manually.

DNS—Check the DNS Server IP address with your network/system administrator if you configure it manually.

STORE—Press \( \) to save the changes made in wireless configuration settings.

\[ \text{NOTE:} \]
1. Use ▲ and ▼ button to select IP Address, Subnet Mask, Gateway, DNS, and Store.

2. Press the □ button to enter IP Address, Subnet Mask, Gateway, or DNS to set the value. (The selected option is highlighted in blue)
   a. Use ▲ and ▼ button to select the option.
   b. Use ▲ and ▼ button to set the value.
   c. After the setup is complete, press the □ button to exit.

3. After the IP Address, Subnet Mask, Gateway, and DNS is set up, select Store and press □ button to store the settings.

4. If you select Store without pressing the Enter button, the system will keep the original settings.

RESET—Press □ to reset wireless configuration.

MENU SETTINGS—Select and press □ to activate the menu settings. The menu settings consists of the following options:

<table>
<thead>
<tr>
<th>Advanced Settings</th>
<th>Menu Position</th>
<th>Center</th>
</tr>
</thead>
<tbody>
<tr>
<td>Menu Settings</td>
<td>Menu Timeout</td>
<td>20 Sec.</td>
</tr>
<tr>
<td>Display Settings</td>
<td>Menu Transparency</td>
<td>0</td>
</tr>
<tr>
<td>Projector Settings</td>
<td>Change Password</td>
<td>Disabled</td>
</tr>
<tr>
<td>General Settings</td>
<td>Password</td>
<td>Enabled</td>
</tr>
</tbody>
</table>

MENU POSITION—Allows you to change the position of the OSD menu on the screen.

MENU TIMEOUT—Allows you to adjust the time for an OSD timeout. By default, the OSD disappears after 20 seconds of non-activity.

MENU TRANSPARENCY—Select to change the transparency level of the OSD background.

PASSWORD—When Password Protect is enabled, a Password Protect screen requesting you to enter a password will be displayed when the power plug is inserted into the electrical output and the power for the projector is first turned on. By default, this function is disabled. You can enable this feature by selecting Enabled. If the password has been set before, key in the password first and select the function. This password security feature will be activated the next time you turn on the projector. If you enable this feature, you will be asked to enter the projector’s password after you turn on the projector:
1. First time password input request:
   a. Go to Menu Settings, press \( \text{Menu} \) and then select Password to enable the password settings.
   
   ![Menu Settings Screenshot]

   b. Enabling the Password function will pop up a change screen. Key in a 4-digit number from the screen and press \( \text{Enter} \).

   ![Password Change Screen]

   c. To confirm, enter the password again.

   d. If the password verification is successful, you may resume with accessing the projector's functions and its utilities.

2. If you have entered an incorrect password, you will be given two more chances. After three invalid attempts, the projector will automatically turn off.

   **NOTE:** If you forget your password, contact DELL or a qualified service person.

3. To disable the password function, select the Disabled option to close the function.

4. To delete the password, select the Delete option.
CHANGE PASSWORD—Key in the original password. Then, enter the new password and confirm the new password again.

POWER SETTINGS—Select and press to activate power settings. The power settings menu provides the following options:
**Quick Shutdown**—Select On to turn off the projector with a single press of the Power button. This function allows the projector to quickly power off with an accelerated fan speed. Slightly higher acoustic noise is expected during quick power off.

- **NOTE:** Before you turn on the projector again, wait for 60 seconds to allow the internal temperature to stabilize. The projector will take a longer time to turn on if you try to power on immediately. Its cooling fan will run at full speed for about 30 seconds to stabilize the internal temperature.

**Power Saving**—By default, the projector is set to enter power saving mode after 20 minutes of no activity. A warning message appears on screen showing a 60 seconds countdown before switching to power saving mode. Press any button during the countdown period to stop the power-saving mode.

You can also set a different delay period to enter power saving mode. The delay period is the time you want the projector to wait without an input signal.

If an input signal is not detected during the delay period, the projector turns off. To turn on the projector press the Power button.

**During Standby**—Select Wireless On or Off set the Wireless/LAN model on/off while the projector is standby status (default is Wireless Off).

**Lamp Mode**—Allows you to select the Normal, ECO, Dynamic, or Extreme Dimming mode.

Normal mode operates at full power level. ECO mode operates at a lower power level which may provide longer lamp life, quieter operation, and dimmer luminance output on the screen.

**Dynamic**—Select and press \( \text{ } \) to activate dynamic feature.

**Extreme Dimming**—Select and press \( \text{ } \) to activate extreme dimming feature.

**Lamp Hour Reset**—Press \( \text{ } \) and select the Confirm option to reset the lamp hour.
INFORMATION—The information menu displays the current S510 projector settings.

<table>
<thead>
<tr>

How to set-up File Type for Multimedia with USB

NOTE: A USB flash disk must be plugged into the projector if you want to use the multimedia USB function.

Follow these steps to playback the Photo, Video, or Music files on your projector:

1. Connect the power cable and turn on the projector by pressing the power button.

2. Plug in a **USB flash disk** to your projector.

3. Press the **Menu** button on the remote control.
4 Access the Input Source menu, select USB and then select USB Viewer on the sub-menu.

The USB Screen shown below appears:

5 Select the multimedia files: Photo, Video, Music, or Office Viewer, and then press the to start playing. Or select the Setup option to change multimedia settings. See “Multimedia Setup” on page 62.
How to set-up File Type for Multimedia with Internal Memory

Follow these steps to playback the Photo, Video, or Music files on your projector:

1. Connect the power cable and turn on the projector by pressing the power button.

2. Press the Menu button on the remote control.

3. Access the Input Source menu, select Internal Memory source.
The Internal Memory Screen shown below appears:

4 Select the multimedia files: Photo, Video, Music, or Office Viewer, and then press the ✓ to start playing. Or select the Setup option to change multimedia settings. See “Multimedia Setup” on page 62.
Office Viewer for the USB and Internal Memory

The Office Viewer feature allows you to use MS Excel, MS Word, MS PowerPoint, and PDF files.

Buttons Introduction

Use the up, down, left, and right buttons for navigation and button on the remote control to select.

| **Software** | Intel® My Wi-Fi Technology (Intel® MWT) and Intel® Wireless Display must be pre-installed and enabled. |
| **Operating System** | One of the following operating systems is required:  
Microsoft Windows 7  
Microsoft Windows 8  
Microsoft Windows 8.1 |

For most up-to-date information, visit Intel® WiDi website at www.intel.com/go/widi
Enable Intel® WiDi on Projector

1. Connect the power cable and press the power button.

2. Press the Menu button on the remote control.

NOTE: Use ◄, ◄, ◄, and ► buttons to navigate and ◄ to select.

3. Access the Input Source menu, select Wireless/LAN and then select Intel® WiDi/Miracast on the sub-menu.
The **Intel® WiDi Guide Screen** shown below appears:

4 Take note of the **ADAPTER NAME** and **PIN CODE**. You will need this information to log-in later.

**Using Intel® WiDi with Microsoft Windows 7 and Windows 8**

1 Type WiDi in your Windows search bar. If your computer has built-in Intel® WiDi, you will see the “Intel® WiDi” application in your search results.

2 Connect your computer to Dell Projector.
3 Key in Security Code as provided in Step 4 of Enable Intel® WiDi on Projector, for pairing confirmation.

Renaming Intel® WiDi Adapter
1 Select "Settings".

2 Select "Current Display Settings".
3 You may type a new descriptive name for the adapter.

Using Intel® WiDi with Microsoft Windows 8.1

NOTE: The Intel® WiDi features are accessed differently in Windows 8.1, and the Intel® WiDi software is not needed.

1 Bring up the Devices Charm.

2 Select "Project".
3 Select "Add a wireless display".

4 Choose detected **Dell Projector**.

5 Key in PIN as provided in Step 4 of Enable Intel® WiDi on Projector for pairing confirmation.
6 Screen is projected.

7 To adjust projection modes or disconnect, bring up the Devices Charm, select **Project**. Alternatively, use the shortcut **Win + P** for direct toggle.
Wireless Display or LAN Display Installation

NOTE: Your computer must have the following minimum system requirements:

Operating System:
- Windows
  - Microsoft Windows XP Home or Professional Service pack 2 (32-bit recommended), Windows Vista 32-bit, and Windows 7 Home or Professional 32-bit or 64-bit, Windows 8 32-bit or 64-bit
- MAC
  - MacBook and above, MacOS 10.5 and above

Minimum Hardware:
- Intel Dual Core 1.4 MHz or higher
- 256 MB of RAM required, 512 MB or more recommended
- 10 MB of available hard-disk space
- nVIDIA or ATI graphic card with 64 MB VRAM or above
- Ethernet adapter (10/100 bps) for an Ethernet connection
- A supported WLAN adapter for a WLAN connection (any NDIS-compliant 802.11b or 802.11g or 802.11n Wi-Fi device)

Web browser
- Microsoft Internet Explorer 6.0 or 7.0 (recommended) or 8.0, Firefox 2.0, Safari 3.0, and above
For Windows Operating System Settings

Enable Wireless or LAN on the Projector

1. Connect the power cable and press the power button.

2. Press the Menu button on the remote control.

   ✷ NOTE: Use ▼, □, △, and ▷ buttons to navigate and ▼ to select.

3. Access the Input Source menu, select Wireless/LAN and then select Wireless/LAN Display on the sub-menu.
The **Wireless Guide Screen** shown below appears:

4. Take note of the **Wireless Network (SSID), IP Address, and Access Code**. You will need this information to log-in later.

   For Wireless display settings, go to **Step 5**.

   For LAN display settings, go to **Step 11**.

**Install the Dell Projector Connection Manager on Your Computer by Wireless**

5. Connect your computer to the Dell S510 abcd wireless network.
**NOTE:**
- Your computer must have wireless network function to detect the connection.
- When you connect to the Dell S510 abcd wireless network, you will lose wireless connectivity with other wireless networks.

**NOTE:** Remember to turn off all proxies. (In Microsoft® Windows Vista: Click Control Panel → Internet Options → Connections → LAN Settings)

6 Open your internet browser. You will be automatically directed to the S510 Web Management web page.

**NOTE:** If the web page does not load automatically, enter the IP address (default IP address is 192.168.100.10) noted from the projector’s screen in the browser’s address bar.
7 The S510 Web Management page opens. For first-time use, click **Download**.

8 Select the appropriate operating system, then click **Download**.
9 Click Run to proceed with the one-time installation of the software.

NOTE: You may choose to save the file and install it at a later time. To do this, click Save.

NOTE: Audio projection function needs install extra driver only in Windows XP. If your computer does not have the driver installed, a pop-up message will appear on-screen prompting you to install the required driver. You can download the 'Audio Projection Driver' from the Dell Support site at dell.com/support.

NOTE: If you are unable to install the application because of inadequate rights on the computer, please contact your network administrator.

10 The installation software will launch. Follow the on-screen instruction to complete setup.
Launch the Dell Projector Connection Manager
Once the installation is complete, the program will launch and search automatically. If the program does not launch automatically, you can double-click the icon on the desktop to start the application.

Login
Login with the Access Code provided in Step 4 of Wireless Display or LAN Display Installation, then click OK.
Install the Dell Projector Connection Manager on Your Computer by LAN

11 The installation software will launch. Follow the on-screen instruction to complete setup.

12 Repeat steps 6 - 10 to install Dell Projector Connection Manager.
Launch and Login the Dell Projector Connection Manager

Once the installation is complete, the program will launch and search automatically. If the program does not launch automatically, you can double-click the icon on the desktop to start the application.

a. Click the “Manual Network Connection” (Fig.1).

b. Enter **IP Address** (Fig.2, default IP address: 192.168.100.10).

c. Enter **Access Code** (Fig.3).

(Fig.1) (Fig.2) (Fig.3)
### Understanding the Buttons

After a successful log in, the following screen appears:

</tbody>
</table>
Using the Settings
Click \( \text{ } \) to display the settings menu.

**RESOLUTION**—Allows you to setup the resolution.

**DISPLAY MODE**—Allows you to setup the default projection mode.
**AUDIO**—Allows you to change the audio settings.

**USB DONGLE**—Allows you to create USB dongle. See "Make Application Token" on page 132.
**ABOUT**—Display the application version.
For Mac Operating System Settings

Enable Wireless or LAN on the Projector

1. Connect the power cable and press the power button.

2. Press the **Menu** button on the remote control.

   ![Menu button](image)

   **NOTE:** Use the arrow buttons to navigate and the select button to select.

3. Access the **Input Source** menu, select **Wireless/LAN** and then select **Wireless/LAN Display** on the sub-menu.

![Input Source menu](image)
The **Wireless Guide Screen** shown below appears:

4. Take note of the **Wireless Network (SSID)**, **IP Address**, and **Access Code**. You will need this information to log-in later.

   - For Wireless display settings, go to **Step 5**.
   - For LAN display settings, go to **Step 11**.

**Launch the Dell Wireless Application Software on Your Computer by Wireless**

5. Connect your computer to the Dell S510 abcd wireless network.

6. Open your Safari browser. You will be automatically directed to the **SS10 Web Management** web page.

   - **NOTE:** If the web page does not load automatically, enter the IP address (default IP address is 192.168.100.10) noted from the projector’s screen in the browser’s address bar.

7. The **SS10 Web Management** page opens. For first-time use, click **Download**.

8. Select the appropriate operating system, then click **Download**.

9. Execute the **Dell_S510.dmg** file from downloaded folder.

10. Execute the **Dell SS10 Wireless Application** from Dell S510 folder.
Login
Login with the Access Code provided in Step 4 of Wireless Display or LAN Display Installation, then click Connect.

Launch the Dell Wireless Application Software on Your Computer by LAN
11 Connect the LAN cable to the projector and the computer.
12 Repeat steps 6 - 10 to launch the Dell Wireless Application.

Login
Login with the Access Code provided in Step 4 of Wireless Display or LAN Display Installation, then click Connect.

</table>
Projecting the Presentation

- To project the presentation, click any of the projection buttons. The icon turns green.
- To pause the presentation, click . The icon turns green.
- To continue the presentation, click again.
- To audio projection the presentation, click .
- To stop the presentation, click .

**NOTE:** WLAN environment using 802.11g connection, and no screen stretching.

Using the Menu

Click to display the menu.

- **Web Management**—Click to open the Web Management page. See “IR Pen Interactivity Installation” on page 104.
- **Search Server**—Click to search and connect to wireless projector.
- **Projection Quality**—Allows you to set the projector quality is **Blur but Faster** or **Clear but Slower**.
- **Info**—Click to display system information.
- **About**—Click to display the application version.
- **Exit**—Click to close the application.
Audio Projection Installation

Audio Projection only supports the Wireless Display and LAN Display input source.

Minimum system requirements are as follow:

Operating System:

- Windows
  
  Microsoft Windows XP™ Home or Professional Service pack 2/3 (32-bit recommended), Windows Vista 32-bit, or Windows® 7 Home or Professional 32-bit or 64-bit, Windows 8 32-bit or 64-bit

- Mac
  
  MacBook Pro and above, MacOS 10.5 and above

Minimum Hardware:

a Intel® Core™ i5-460 MHz (2.53 GHz/Turbo 2.8 GHz) or greater
b 1 GB DDR3 VRAM independent graphics card or more recommended
c 2 GB dual channel DDR3 SDRAM memory at 1066 MHz required or more recommended
d Gigabit Ethernet
e Integrated 802.11 a/b/g/n Wi-Fi Device for a WLAN connection

**NOTE:** If your computer does not meet the minimum hardware requirements, audio projection may have lag or noise. Meet the recommended system requirements to have optimized performance of audio projection.

**NOTE:** Audio projection function needs install extra driver only in Windows XP. If your computer does not have the driver installed, a pop-up message will appear on-screen prompting you to install the required driver. You can download the “Audio Projection Driver” from the Dell Support site at dell.com/support.

**NOTE:** Audio Projection function needs installed extra driver in Mac operating system. If your Mac computer does not have the driver installed, a pop-up message will appear on-screen prompting you to install the required driver. You can download the “Soundflower” driver from the some search engine sites (ex. Yahoo, MSN...). The “Soundflower” driver is a free application.
**NOTE:** Ports / Protocol for connection to the projector for projection via Ethernet:

<table>
<thead>
<tr>
<th>Protocol</th>
<th>Ports</th>
<th>Backup</th>
</tr>
</thead>
<tbody>
<tr>
<td>UDP</td>
<td>1047,</td>
<td>1048, 1049</td>
</tr>
<tr>
<td>TCP</td>
<td>3268, 515, 1688, 1041</td>
<td>389, 8080, 21</td>
</tr>
</tbody>
</table>
For Windows Operating System Settings

Enable Wireless or LAN on the Projector

1. Connect the power cable and press the power button.

2. Press the **Menu** button on the remote control.

3. Access the **Input Source** menu, select the **Wireless/LAN** and then select the **Wireless/LAN Display** on the sub-menu.
Using Your Projector

4 Take note of the **Wireless Network (SSID)**, **IP Address**, and **Access Code**. You will need this information to log-in later.

For Wireless display settings, go to **Step 5**.

For LAN display settings, go to **Step 7**.

### Install the Dell Projector Connection Manager on Your Computer by Wireless

5 “Dell Projector Connection Manager” is required if the Wireless or LAN is used for the audio projection set-up. Please download and install the software the first time you use audio projection. If it is already installed, skip **Step 5 - 6**.

**NOTE:** You only need to install the “Dell Projector Connection Manager Software” once.

6 Dell Projector Connection Manager Software download and install steps, you can refer to steps 6 to 10 of the “Wireless Display or LAN Display Installation” on page 71.
Launch the Dell Projector Connection Manager
Once the installation is complete, the program will launch and search automatically. If the program does not launch automatically, you can double-click the icon on the desktop to start the application.

Login
Login with the Access Code provided in Step 4 of Audio Projection Installation, then click OK.
Install the Dell Projector Connection Manager on Your Computer by LAN

7 Connect the LAN cable to the projector and the computer.
8 Refer to step 6 to install Dell Projector Connection Manager.

Launch the Dell Projector Connection Manager

Once the installation is complete, the program will launch and search automatically. If the program does not launch automatically, you can double-click the icon on the desktop to start the application.

a Click the "Manual Network Connection" (Fig.1).
b Enter IP Address (Fig.2, default IP address: 192.168.100.10).
c Enter Access Code (Fig.3).
Using Your Projector

**9** You are now logged into the Dell Projector Connection Manager. Click the "Play" button in the application to starting the LAN or wireless audio projection.

**10** Click the “Audio Projection” button in the application to toggle audio projection On/Off.

**NOTE:** Audio projection function needs install extra driver only in Windows XP. If your computer does not have the driver installed, a pop-up message will appear on-screen prompting you to install the required driver. You can download the “Audio Projection Driver” from the Dell Support site at [dell.com/support](http://dell.com/support).
11 Executing the Windows Media Player or others audio player software (example: Winamp player...) on your computer.
For Mac Operating System Settings

Enable Wireless or LAN on the Projector

1. Connect the power cable and press the power button.

2. Press the Menu button on the remote control.

3. Access the Input Source menu, select the Wireless/LAN and then select the Wireless/LAN Display on the sub-menu.
The **Wireless Guide Screen** shown below appears:

4 Take note of the **Wireless Network (SSID), IP Address, and Access Code**. You will need this information to log-in later.

   For Wireless display settings, go to **Step 5**.
   For LAN display settings, go to **Step 14**.

---

**Launch the Dell Wireless Application Software on Your Computer by Wireless**

5 Connect your computer to the Dell S510 abcd wireless network.

6 Open your Safari browser. You will be automatically directed to the **S510 Web Management** web page.

   **NOTE:** If the web page does not load automatically, enter the IP address (default IP address is 192.168.100.10) noted from the projector’s screen in the browser’s address bar.

7 The S510 Web Management page opens. For first-time use, click **Download**.

8 Select the application operating system, then click **Download**.

9 Execute the **Dell_S510.dmg** file from downloaded folder.

10 Execute the **Dell S510 Wireless Application** from Dell S510 folder.
Login
Login with the Access Code provided in Step 4 of Audio Projection Installation, then click Connect.

11 You are now logged into the S510 Wireless Application. Click “Play” button in the application to starting the wireless or LAN projection.

12 Click “Audio Projection” button in the application to toggle audio projection On/Off.

NOTE: Audio projection function needs installed extra driver in Mac operating system. If your Mac computer does not have the driver installed, a pop-up message will appear on-screen prompting you to install the required driver. You can download the “Soundflower” driver from the some search engine sites (ex. Yahoo, MSN...). The “Soundflower” driver is a free application. See “Install the Soundflower Driver” on page 100.

13 Executing the audio player software on your computer.
Launch the Dell Wireless Application Software on Your Computer by LAN
14 Connect the LAN cable to the projector and the computer.
15 Repeat steps 6 - 13 to launch and login the Dell Wireless Application.

Install the Soundflower Driver
1 You can download the “Soundflower” driver from the some search engine sites (ex. Yahoo, MSN...). The “Soundflower” driver is a free application.
2 Execute the “Soundflower.dmg” file from downloaded folder.
3 Execute the “Soundflower.pkg” file from Soundflower folder.
4 The installation software will launch. Follow the on-screen instruction to complete setup.
USB Display (DoUSB) Installation

For Windows Operating System

1. Connect the power cable and press the power button.

2. Connect the USB (type A to B) cable to the projector and the computer.

3. When you connect the projector and computer via USB cable, a USB Connected message will pop up and allow you to select DoUSB or Storage Mode. Select “DoUSB” option to switch to the USB Display source.

NOTE: If the DoUSB can’t display, please see “Troubleshooting Your Projector” on page 133.
For Mac Operating System

1. Connect the power cable and press the power button.

2. Connect the USB (type A to B) cable to the projector and the computer.

3. When you connect the projector and computer via USB cable, a USB Connected message will pop up and allow you to select DoUSB or Storage Mode. Select “DoUSB” option to switch to the USB Display source.

   ![USB Connected Message]

   **NOTE:** DoUSB function needs install driver in Mac operating system. If your Mac computer does not have the driver installed, a pop-up message will appear on-screen prompting you to install the required driver. See “Install the DoUSB Driver” on page 103.
Install the DoUSB Driver

1. Double-click the "USB_DISPLAY" icon on the desktop.
2. Execute the "MAC_USB_Display.pkg" file from USB_DISPLAY folder.
3. The installation software will launch. Follow the on-screen instruction to complete setup.
4. When installation is completed, restart your computer.
IR Pen Interactivity Installation

NOTE: You computer must have the following minimum system requirements:

Operating System:

• Windows
  Windows XP Professional service pack 3 32-bit, Windows 7 32-bit/64-bit, Windows 8 32-bit/64-bit, and Windows 8.1 32-bit/64-bit
  Windows .NET Framework 4.0 installation is required (You can download it from the Microsoft site)

• Mac
  MacOS 10.6 and above

Minimum Hardware:

a Windows processor type: Intel Core i3 or above
b MAC processor type: Intel Core i2 duo or above
c Windows/MAC RAM: 2 GB of RAM required or more are recommended
d Windows/MAC Min. HDD space: 110 MB of available hard-disk space
For Windows Operating System Settings

1. Connect power, VGA, mini USB cables to projector.

2. Power on the projector by pressing the power button on the remote control.

3. Connect VGA and mini USB cables to your computer.
4 The PenDriver install message will pop-up automatically after you plug in the USB cable to your computer. Follow the on-screen instruction to complete setup.

The driver icon will appear in your computer's notification area if the driver has installed successfully. If the Pen driver is not automatically installed, go to My Computer and run "PenDriver.exe".

NOTE: You may require administrator-level access to install the driver. Contact your network administrator for support.

5 Click the Pen driver icon, select Calibrate pen and then select Auto on the sub-menu.

If the "auto calibrate failed" message prompts, please take the steps below for troubleshooting, then do auto calibrate again.

a Turn lights off or reduce stray light to whiteboard
b Do not walk in front of or move the projector
c Adjust focus to sharpen the projected image
If the "auto calibrate still failed" message appears on screen, please change to manual calibrate.

**Manual Calibrate:**
Click the Pen driver icon, select *Calibrate pen* and then select *Manual* on the sub-menu.

Touch the target marks on the screen. (Press the "ESC" key to exit the calibration process). After the 4th point of calibration is finished, please wait for 2 seconds while the calibration data is saved.

6 Turn on the power switch of the IR Pen.
7 Point the IR Pen to the screen, and start using your IR Pen.
For Mac Operating System Settings

8 Repeat steps 1 - 3 to turn on the projector power and connect VGA and USB cables.

9 Search CD-ROM of the PenDriver in your computer.

10 Double-click PenDriver.zip file from the MAC folder.

11 Execute the PenDriver.app in the Download folder.

12 Refer to steps 5 - 7 to execute the initialize the control function and start using your IR Pen.
Managing the Projector From Web Management

Configuring the Network Setting
If the projector is connected to a network, you can access the projector using a web browser. For configuring the network setting, refer to “LAN Settings” on page 48.

Accessing Web Management
Use Internet Explorer 6.0 and above or Firefox 2.0 and above and enter the IP address. You can now access Web Management and manage the projector from a remote location.

Home Page

- Access the Web Management Home page by entering the projector’s IP address at the web browser. See “LAN Settings” on page 48.
- Select the language for web management from the list.
- Click any menu item on the left tab to access the page.
Download the Dell Projector Connection Manager
See also “Wireless Display or LAN Display Installation” on page 71.

Click the Download button of the corresponding operating system of your computer.
Conference Control
This allows you to host conference presentations from different sources without using projector cables and lets you control how each presentation will appear on screen.

![Conference Control Interface]

**NOTE:** Without Conference Play Control, the last user to hit the “Play” button on the application will take control of the full-screen projection.

**Computer Name:** Lists the computers logged for conference control.

**Play Control:** Click the buttons to control how each computer’s projection will appear on screen.

- **Full screen projection** — The presentation from the computer occupies the whole screen.
- **Split 1** - The presentation from the computer appears on the upper left corner of the screen.
- **Split 2** - The presentation from the computer appears on the upper right corner of the screen.
- **Split 3** - The presentation from the computer appears on the lower left corner of the screen.
- **Split 4** - The presentation from the computer appears on the lower right corner of the screen.
- **Stop** - Projection from the computer is stopped.

**IP Address:** Shows each computer’s IP Address.

**NOTE:** To end the conference, click **Home**.
Managing Properties

Admin

An administrator password is required to access the Admin page.

- **Admin Password**: Enter the administrator password and then click **Login**. The default password is “admin”. To change the password, see “Change Passwords” on page 117.

Displays the **Network Status**, **Connection Status**, and **Projector Status** information.
### Network Status

See OSD section on page 48.

#### IP Setup

- Choose **Obtain an IP address automatically** to assign an IP address to the projector automatically, or **Use the following IP address** to assign an IP address manually.

#### DHCP Server Setup

- Choose **Auto** to automatically set up the **Start IP**, **End IP**, **Frequency Band**, **Subnet Mask**, **Default Gateway**, and **DNS Server** address from a DHCP server, or **Disable** to disable this function.
Wireless Setup

- Choose **Enable** to set up the **Region**, **SSID**, **SSID Broadcast**, **Frequency Band**, **Channel**, **Encryption**, **Key** and **TX mode channel**. Choose **Disable** to disable the wireless set up.

  **SSID**: Up to maximum length of 32 characters.

  **Encryption**: You can disable WPA key or select one of 64-bit or 128-bit in ASCII or HEX string.

  **Key**: If Encryption is enabled, you have to set key value according to the Encryption mode you selected.

RADIUS Server Setup

- Set up the IP address, Port, and Key information.

GateKeeper

- There are three options:

  **All Pass**: Allow users to access the office network via the wireless projector.

  **All Block**: Block users from accessing the office network via the wireless projector.

  **Internet Only**: Block users from the office network, but still reserve Internet connection capability.

Set Security For SNMP

- Setup Write Community information.

Click the **Apply** button to save and apply changes. The projector must be restarted for the changes to take effect.
Projection Setup

- **Resolution**: Allows you to select the resolution. Options are: XGA (1024 x 768) and WXGA (1280 x 800).

- **Login Code**: Select how you want the login code to be generated by the projector. There are three options:
  - **Disable**: Login code will not be required when logging in to the system.
  - **Random**: Default is Random. Login code will be randomly generated.
  - **Use the following code**: Enter a 4-digit code. This code will be used to log in to the system.

Projector Setup

- **Set up the Projector Name, Location, and Contact information** (up to 21 characters for each field).

Click the **Apply** button to save and apply changes. The projector must be restarted for the changes to take effect.
Change Passwords

This page allows you to change the administrator password.

- **Enter New Password**: Enter the new password.
- **Confirm New Password**: Enter the password again and click **Apply**.

**NOTE**: Contact Dell if you forget your administrator password.
Click the **Apply** button to restore the wireless/network setup to its factory default settings.
Firmware Upgrade

Use the Firmware Upgrade page to update your projector’s wireless firmware.

1. You can download the firmware files from dell.com/support.
2. Press Browse to select the file to update.
3. Click the Update button to start. Wait while the system updates the firmware in your device.
4. Click OK when the update is complete.
Using Your Projector

Projector Control Panel

**Projector Information**

- **Projector Status**: There are five states: Lamp On, Standby, Power Saving, Cooling, and Warming up. Click **Refresh** to refresh the status and control settings.

- **Power Saving**: Power Saving can be set to Off, 20, 60, 90, or 120 minutes. For more information, see “Power Saving” on page 53.

- **Alert Status**: There are three alert states: Lamp warning, Low lamp life, and Temperature warning. Your projector might lock up in the protection mode if any of the alerts are activated. To exit the protection mode, click **Clear** to clear the Alert Status before you power on your projector.
Image Control

- **Projector Mode**: Allows you to select the projector mode, depending on how the projector is mounted. There are two projection modes: Front Projection-Wall Mount and Rear Projection-Wall Mount.

- **Source Select**: The Source Select menu allows you to select your projector’s input source. You can select VGA-A, VGA-B, Composite Video, HDMI-A, HDMI-B, Wireless Display, USB Display, USB Viewer, Intel® WiDi, or Internal Memory.

- **Video Mode**: Select a mode to optimize the display image based on how the projector is being used:
  - **Presentation**: Best for presentation slides.
  - **Bright**: Maximum brightness and contrast.
  - **Movie**: For viewing movies and photos.
  - **sRGB**: Provides a more accurate color representation.
  - **Custom**: User-preferred settings.

- **Blank Screen**: You can select On or Off.

- **Aspect Ratio**: Allows you to select the aspect ratio to adjust how the image appears.

- **Brightness**: Select value to adjust the brightness of the image.

- **Contrast**: Select value to adjust the display contrast.

Click the Auto Adjust button to adjust the settings automatically.

Audio Control

- **Volume**: Select the value (0~20) for audio volume.

Click the Factory Reset button to restore the factory default settings.
Using Your Projector

Alert Setting

E-mail Alert

- E-mail Alert: You can set whether to be notified by email (Enable) or not (Disable).
- To/Cc/From: You can enter email address of sender (From) and recipients (To/Cc) to receive notification when an abnormality or warning occurs.
- Subject: You can enter the subject line of the email.

Click the E-mail Alert Test button to test the e-mail alert settings.

SMTP Setting

- Out going SMTP server, User name, and Password should be provided by your network administrator or MIS.

Alert Condition

- You can select the abnormalities or warnings to be notified by email. When any of the alert conditions occur, an email will be sent to the recipients (To/Cc).

Click the Save button to the save settings.

NOTE: E-mail alert is designed to work with a standard SMTP server using the default 25 port. It does not support encryption and authentication (SSL or TLS).
Reboot System

Click **Reboot** to reboot the system.

</table>
### Using Your Projector

#### User Password

Select the **Enabled** check box to require a password to open the operation window on the computer.

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. New Password</td>
<td>Enter the new password when changing the password to open the operation window. (Up to 26 single-byte alphanumerical characters)</td>
</tr>
<tr>
<td>2. Confirm</td>
<td>Enter the same password as you entered in New Password. If the passwords are not the same, an error is displayed.</td>
</tr>
<tr>
<td>3. Send</td>
<td>Click this button to confirm the changes made to the User Password.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>4. DHCP</td>
<td>Select the <strong>Enabled</strong> check box to use DHCP. You cannot enter an IP address if DHCP is enabled.</td>
</tr>
<tr>
<td>5. IP Address</td>
<td>Enter the IP address to assign to the currently connected projector.</td>
</tr>
<tr>
<td>6. Subnet Mask</td>
<td>Enter a subnet mask for the currently connected projector.</td>
</tr>
<tr>
<td>7. Default Gateway</td>
<td>Enter the gateway address for the currently connected projector.</td>
</tr>
<tr>
<td>8. DNS Server</td>
<td>Enter the DNS server IP address for the currently connected projector.</td>
</tr>
<tr>
<td>9. Send</td>
<td>Click this button to confirm the changes made to the projector.</td>
</tr>
</tbody>
</table>
Admin Password
Select the **Enabled** check box to require a password to open the Tools window.

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>New Password Enter the new password when changing the password to open the Tools window. (The name can contain up to 26 single-byte alphanumeric characters.)</td>
</tr>
<tr>
<td>2</td>
<td>Confirm Enter the same password as you entered in New Password. If the passwords are not the same, an error is displayed.</td>
</tr>
<tr>
<td>3</td>
<td>Send Click this button to confirm the changes made to the Admin Password.</td>

FAQS:

I would like to remotely access the projector via the Internet. What is the best setting for the browser?

To have the best setting for the browser, please follow the below steps:

1. Open Control Panel → Internet Options → General tab → Temporary Internet Files → Settings → Select Every visit to the pages.

2. Some firewall or anti-virus may block the HTTP application. If possible, turn off the firewall or anti-virus.

I would like to remotely access the projector via Internet. What socket port number should I open for it in the firewall?

The following are the TCP/IP socket ports which the projector uses.

<table>
<thead>
<tr>
<th>UDP/TCP</th>
<th>Port Number</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>TCP</td>
<td>80</td>
<td>Web configuration (HTTP)</td>
</tr>
<tr>
<td>UDP/TCP</td>
<td>25</td>
<td>SMTP: used for email routing between mail servers</td>
</tr>
<tr>
<td>UDP/TCP</td>
<td>161</td>
<td>SNMP: Simple Network Management Protocol</td>
</tr>
<tr>
<td>UDP</td>
<td>9131</td>
<td>AMX: used for AMX discovery</td>
</tr>
</tbody>
</table>

Why am I unable to access the projector via the Internet?

1. Check whether your computer/laptop is connected to the Internet.

2. Check with your MIS or network administrator whether your computer/laptop is in the same subnet.
### Why am I unable to access the SMTP server?

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Check with your MIS or network administrator whether the SMTP server function is open for the projector and the IP assigned to the projector is allowed to access the SMTP server. The projector’s SMTP socket port number is 25, this cannot be changed.</td>
</tr>
<tr>
<td>2</td>
<td>Check if the outgoing SMTP server, user name, and password are set correctly.</td>
</tr>
<tr>
<td>3</td>
<td>Some SMTP servers will check whether the mail address of “From” correlates with the “User name” and “Password”. For example, you use <a href="mailto:test@dell.com">test@dell.com</a> as the mail address in “From”. You should also use <a href="mailto:test@dell.com">test@dell.com</a> account information for the User name and the password to log in the SMTP server.</td>
</tr>
</tbody>
</table>

### Why am I unable to receive the test alert email even though the projector already indicates the test mail is already sent?

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>It could be because the SMTP server recognized the alert mail as a spam mail or because of the SMTP server restriction. Check with your MIS or network administrator for the SMTP server’s setting.</td>
</tr>
</tbody>
</table>
Firewall Configuration and FAQ

Q: Why can’t I access the Web Management Page?
A: Your computer’s firewall configuration may prevent you from accessing the Web Management Web Page. Please refer to the following configuration settings:

<table>
<thead>
<tr>
<th>Firewall Protection</th>
<th>Configuration</th>
</tr>
</thead>
<tbody>
<tr>
<td>McAfee Security Center</td>
<td>1. Launch McAfee Security Center ([Start] &gt; [All Programs] &gt; McAfee &gt; McAfee Security Center).</td>
</tr>
<tr>
<td></td>
<td>2. On the personal firewall plus tab, click View the Internet Applications List.</td>
</tr>
<tr>
<td></td>
<td>3. Find and select Dell Projector from the list.</td>
</tr>
<tr>
<td></td>
<td>4. Right-click on its Permissions column.</td>
</tr>
<tr>
<td></td>
<td>5. Select Allow Full Access from the pop-up menu.</td>
</tr>
<tr>
<td>Norton AntiVirus</td>
<td>1. Open Norton AntiVirus ([Start] &gt; [All Programs] &gt; Norton AntiVirus &gt; Norton AntiVirus).</td>
</tr>
<tr>
<td></td>
<td>2. Click Options menu, then select Norton AntiVirus.</td>
</tr>
<tr>
<td></td>
<td>3. On the Status page, select Internet Worm Protection.</td>
</tr>
<tr>
<td></td>
<td>4. Find and select Dell Projector from the list of programs.</td>
</tr>
<tr>
<td></td>
<td>5. Right-click on its Internet Access column.</td>
</tr>
<tr>
<td></td>
<td>6. Select Permit All from the pop-up menu.</td>
</tr>
<tr>
<td></td>
<td>7. Click OK.</td>
</tr>
<tr>
<td>Sygate Personal Firewall</td>
<td>1. Open Sygate Personal Firewall ([Start] &gt; [All Programs] &gt; Sygate &gt; Sygate Personal Firewall).</td>
</tr>
<tr>
<td></td>
<td>2. From the Running Applications list, find and right-click on Dell Projector.</td>
</tr>
<tr>
<td></td>
<td>3. Select Allow from the pop-up menu.</td>
</tr>
<tr>
<td>Firewall Protection</td>
<td>Configuration</td>
</tr>
<tr>
<td>---------------------</td>
<td>---------------</td>
</tr>
</tbody>
</table>
| **Windows Firewall**| 1. Open Windows Firewall (Start > All Programs > Control Panel). Double-click on Windows Firewall.  
2. On the General tab, uncheck Don’t allow exceptions.  
3. On the Exceptions tab, click the Add Program... button.  
4. Find and select Dell Projector from the list of programs, then click OK.  
5. Click OK to confirm exceptions settings. |
| **Zone Alarm**      | 1. Open Zone Alarm Firewall (Start > All Programs > Zone Labs > Zone Labs Center).  
2. On the Program Control page, find and select Dell Projector from the list.  
3. Right-click on its Access-Trusted column.  
4. Select Allow from the pop-up menu.  
5. Right-click and select Allow for the Access-Internet, Server-Trusted, and Server-Internet columns. |
Make Application Token

The Application Token lets you perform Plug and Show using a USB token.

1. From the application software, click \[ \text{USB Dongle} \]
2. The following screen appears. Click Next.

3. Plug a flash drive into any of the USB ports on your computer. Select the drive from the list, then click Next.

4. Click Finish to close the wizard.
If you experience problems with your projector, see the following troubleshooting tips. If the problem persists, contact Dell (see Contacting Dell on page 147).

<table>
<thead>
<tr>
<th>Problem</th>
<th>Possible Solution</th>
</tr>
</thead>
</table>
| No image appears on the screen | • Ensure that you have chosen the correct input source on the INPUT SOURCE menu.  
• Ensure the external graphics port is enabled. If you are using a Dell laptop computer, press <kbd>Fn</kbd> + <kbd>F8</kbd>. For other computers, see your respective documentation. If images are not displayed properly, please upgrade the video driver of your computer. For Dell computers, see support.dell.com.  
• Ensure that all the cables are securely connected. See “Connecting Your Projector” on page 9.  
• Ensure that the pins of the connectors are not bent or broken.  
• Ensure that the lamp is securely installed (see “Changing the Lamp” on page 139).  
• Use Test Pattern in the Projector Settings of the Advanced Settings menu. Ensure that the colors of the test pattern are correct. |
### Possible Solution (continued)

Changing the Lamp

⚠️ CAUTION: Before you begin any of the procedures in this section, follow the Safety Instructions as described on page 8.

Replace the lamp when the message “Lamp is approaching the end of its useful life in the operation. Replacement suggested! www.dell.com/lamps” appears on the screen. If this problem persists after replacing the lamp, contact Dell. For more information, see “Contacting Dell” on page 147.

⚠️ CAUTION: Use an original lamp to ensure safe and optimal working condition of your projector.

⚠️ CAUTION: The lamp becomes very hot when in use. Do not attempt to replace the lamp until the projector has been allowed to cool down for at least 30 minutes.

⚠️ CAUTION: Do not touch the bulb or the lamp glass at any time. Projector lamps are very fragile and may shatter if touched. The shattered glass pieces are sharp and can cause injury.

⚠️ CAUTION: If the lamp shatters, remove all broken pieces from the projector and dispose or recycle according to state, local, or federal law. For more information see www.dell.com/hg.

1 Turn off the projector and disconnect the power cord.
2 Let the projector cool for at least 30 minutes.
3 Loosen the two screws that secure the lamp cover, and remove the cover.
4 Loosen the two screws that secure the lamp.
5 Pull the lamp up by its metal handle.

⚠️ NOTE: Dell may require lamps replaced under warranty to be returned to Dell. Otherwise, contact your local waste disposal agency for the address of the nearest deposit site.

6 Replace with the new lamp.
7 Tighten the two screws that secure the lamp.
8 Replace the lamp cover and tighten the two screws.
9 Reset the lamp usage time by selecting “Yes” for **Lamp Reset** in the OSD **Power Settings** of the **Advanced Settings** menu (see Power Settings of the Advanced Setting menu on page 52). When a new lamp module has been changed, the projector will automatically detect and reset the lamp hours.

⚠️ **CAUTION:** Lamp Disposal (for the US only)

- **CAUTION:** LAMP(S) INSIDE THIS PRODUCT CONTAIN MERCURY AND MUST BE RECYCLED OR DISPOSED OF ACCORDING TO LOCAL, STATE, OR FEDERAL LAWS. FOR MORE INFORMATION, GO TO WWW.DELL.COM/HG OR CONTACT THE ELECTRONIC INDUSTRIES ALLIANCE AT WWW.EIAE.ORG. FOR LAMP-SPECIFIC DISPOSAL INFORMATION, CHECK WWW.LAMPRECYCLE.ORG.

IR Pen Dimensions (D x Φ) 6.39 x 0.71 (162.2 x 18 mm)
Environmental

Operating temperature: 5 °C - 40 °C (41 °F - 104 °F)

Humidity: 80% maximum

Storage temperature: 0 °C to 60 °C (32 °F to 140 °F)

Humidity: 90% maximum

Shipping temperature: -20 °C to 60 °C (-4 °F to 140 °F)

Humidity: 90% maximum

I/O Connectors

Power: One AC power socket (3-pin - C14 inlet)

VGA input: Two 15-pin D-sub connectors (Blue), VGA-A and VGA-B, for analog RGB/Component input signals.

VGA output: One 15-pin D-sub connector (Black) for VGA-A loop through.

Composite Video input: One Yellow RCA jack for CVBS signal.

HDMI input: Two HDMI connector for supporting HDMI 1.4a. HDCP compliant/one with MHL.

Analog Audio input: Two 3.5 mm stereo mini phone jack (Blue) and one pair of RCA connector (Red/White).

Variable audio output: One 3.5 mm stereo mini phone jack (Green).

USB (type B) port: One mini USB slave for remote support and firmware upgrade.

RS232 port: One 9-pin D-sub for RS232 communication.

USB (type A) port: One USB connector for multimedia playback (Video/Music/Photo/Office Viewer).

USB (type B) port: One USB connector for supporting USB display and USB memory storage access (internal memory).
NOTE: The lamp life rating for any projector is a measure of brightness degradation only, and is not a specification for the time it takes a lamp to fail and cease light output. Lamp life is defined as the time it takes for more than 50 percent of a lamp sample population to have brightness decrease by approximately 50 percent of the rated lumens for the specified lamp. The lamp life rating is not guaranteed in any way. The actual operating life span of a projector lamp will vary according to operating conditions and usage patterns. Usage of a projector in stressful conditions which may include dusty environments, under high temperatures, many hours per day, and abrupt powering-off will most likely result in a lamp’s shortened operating life span or possible lamp failure.

**Microphone**

One 3.5 mm stereo mini phone jack (Pink).

**Wireless**

Wireless Standard: IEEE 802.11 a/b/g/n (2T2R)

OS environment: Windows 8/7/Vista/XP/2000, MAC OS X

Support: Presentation slides and projector control.

Allow connection up to 30 users at the same time.

4-to-1 split screen. Allows four presentation slides to be projected on screen.

Conference Control mode.

Supports Audio Projection (driver installation may be required. Download from dell.com/support).

Supports MobiShow and WiFi-Doc projection.

**Lamp**

OSRAM 280 W user-replaceable lamp

**Lamp life**

Normal mode: Up to 3000 hours

Eco mode: Up to 4000 hours

Dynamic eco cycle mode: Up to 5000 hours

For customers in the United States, call 800-WWW-DELL (800-999-3355).

NOTE: If you do not have an active Internet connection, you can find contact information on your purchase invoice, packing slip, bill, or Dell product catalog.

Dell provides several online and telephone-based support and service options. Availability varies by country and product, and some services may not be available in your area. To contact Dell for sales, technical support, or customer service issues:

1. Visit go to www.dell.com/contactDell.
2. Select your region on the interactive map.
3. Select a Segment for Contact.
4. Select the appropriate service or support link based on your need.
Contacting Crestron

Crestron provides phone based and online technical support options. Availability varies by country, but an e-mail to getroomview@crestron.com can be directed appropriately for users in any country.

Technical Support
In the US and Canada
Phone: 877-516-5394
Email: roomviewsupport@crestron.com

Outside the US and Canada
Phone: +1 201-367-1037
Email: roomviewsupport@crestron.com
Appendix: Glossary

ANSI Lumens — A standard for measuring the brightness. It is calculated by dividing a square meter image into nine equal rectangles, measuring the lux (or brightness) reading at the center of each rectangle, and averaging these nine points.
Aspect Ratio — The most popular aspect ratio is 4:3 (4 by 3). Early television and computer video formats are in a 4:3 aspect ratio, which means that the width of the image is 4/3 times the height.
Brightness — The amount of light emitted from a display or projection display or projection device. The brightness of projector is measured by ANSI lumens.
Color Temperature — The color appearance of white light. Low color temperature implies warmer (more yellow/red) light while high color temperature implies a colder (more blue) light. The standard unit for color temperature is Kelvin (K).
Component Video — A method of delivering quality video in a format that consists of the luminance signal and two separate chrominance signals and are defined as Y'Pb'Pr’ for analog component and Y'Cb'Cr’ for digital component. Component video is available on DVD players.
Composite Video — A video signal that combines the luma (brightness), chroma (color), burst (color reference), and sync (horizontal and vertical synchronizing signals) into a signal waveform carried on a single wire pair. There are three kinds of formats, namely, NTSC, PAL, and SECAM.
Compressed Resolution — If the input images are of higher resolution than the native resolution of the projector, the resulting image will be scaled to fit the native resolution of the projector. The nature of compression in a digital device means that some image content is lost.
Contrast Ratio — Range of light and dark values in a picture, or the ratio between their maximum and minimum values. There are two methods used by the projection industry to measure the ratio:
1 Full On/Off — measures the ratio of the light output of an all white image (full on) and the light output of an all black (full off) image.
2 ANSI — measures a pattern of 16 alternating black and white rectangles. The average light output from the white rectangles is divided by the
average light output of the black rectangles to determine the ANSI contrast ratio.

Full On/Off contrast is always a larger number than ANSI contrast for the same projector.

dB — decibel — A unit used to express relative difference in power or intensity, usually between two acoustic or electric signals, equal to ten times the common logarithm of the ratio of the two levels.

Diagonal Screen — A method of measuring the size of a screen or a projected image. It measures from one corner to the opposite corner. A 9 FT high, 12 FT wide, screen has a diagonal of 15 FT. This document assumes that the diagonal dimensions are for the traditional 4:3 ratio of a computer image as per the example above.

DHCP — Dynamic Host Configuration Protocol — A network protocol that enables a server to automatically assign a TCP/IP address to a device.

DLP® — Digital Light Processing™ — Reflective display technology developed by Texas Instruments, using small manipulated mirrors. Light passing through a color filter is sent to the DLP mirrors which arrange the RGB colors into a picture projected onto screen, also known as DMD.

DMD — Digital Micro-Mirror Device — Each DMD consists of thousands of tilting, microscopic aluminum alloy mirrors mounted on a hidden yoke.

DNS — Domain Name System — An Internet service that translates domain names into IP addresses.

Focal Length — The distance from the surface of a lens to its focal point.

Frequency — It is the rate of repetition in cycles per seconds of electrical signals. Measured in Hz (Hertz).

HDCP — High-Bandwidth Digital-Content Protection — A specification developed by Intel™ Corporation to protect digital entertainment across digital interface, such as DVI, HDMI.

HDMI — High-Definition Multimedia Interface — HDMI carries both uncompressed high definition video along with digital audio and device control data in a single connector.

Hz (Hertz) — Unit of frequency.

IEEE802.11 — A set of standards for wireless local area network (WLAN) communication. 802.11b/g/n uses the 2.4 GHz band.

Keystone Correction — Device that will correct an image of the distortion (usually a wide-top narrow-bottom effect) of a projected image caused by improper projector to screen angle.
**Maximum Distance** — The distance from a screen the projector can be to cast an image that is usable (bright enough) in a fully darkened room.

**Maximum Image Size** — The largest image a projector can throw in a darkened room. This is usually limited by focal range of the optics.

**Minimum Distance** — The closest position that a projector can focus an image onto a screen.

**NTSC** — National Television Standards Committee. North American standard for video and broadcasting, with a video format of 525 lines at 30 frames per second.

**PAL** — Phase Alternating Line. A European broadcast standard for video and broadcasting, with a video format of 625 lines at 25 frames per second.

**Reverse Image** — Feature that allows you to flip the image horizontally. When used in a normal forward projection environment text, graphics, etc. are backwards. Reverse image is used for rear projection.

**RGB** — Red, Green, Blue — typically used to describe a monitor that requires separate signals for each of the three colors.

**SECAM** — A French and international broadcast standard for video and broadcasting, closely related to PAL but with a different method of sending color information.

**SSID** — Service Set Identifiers — A name used to identify the particular wireless LAN to which a user wants to connect.

**SVGA** — Super Video Graphics Array — 800 x 600 pixels count.

**SXGA** — Super Extended Graphics Array, — 1280 x 1024 pixels count.

**UXGA** — Ultra Extended Graphics Array — 1600 x 1200 pixels count.

**VGA** — Video Graphics Array — 640 x 480 pixels count.

**WEP** — Wired Equivalent Privacy — This is a method for encrypting communication data. The encryption key is created and notified only to the communicating user, so the communication data cannot be decrypted by a third party.

**XGA** — Extended Video Graphics Array — 1024 x 768 pixels count.

**WXGA** — Wide Extended Graphics Array — 1280 x 800 pixels count.
