Monitor Specifications

Power Management Modes

If you have VESA's DPM™ compliance display card or software installed in your PC, the monitor can automatically reduce its power consumption when not in use. This is referred to as 'Power Save Mode'*. If input from keyboard, mouse, or other input devices is detected by the computer, the monitor will automatically "wake up". The following table shows the power consumption and signaling of this automatic power saving feature:

VESA Modes	Horizontal Sync	Vertical Sync	Video	Power Indicator	Power Consumption
Normal operation(with Dell Soundbar and USB active)	Active	Active	Active	Blue	177 W (maximum)
Normal operation	Active	Active	Active	Blue	147 W (typical)
Active-off mode	Inactive	Inactive	Blanked	Amber	Less than 3 W
Switch off	-	-	-	Off	Less than 1 W

This monitor is **ENERGY STAR**®-compliant as well as TCO '99 power management compatible.

* Zero power consumption in OFF mode can only be achieved by disconnecting the main cable from the monitor.

ENERGY STAR® is a U.S. registered mark. As an **ENERGY STAR®** Partner, DELL has determined that this product meets the **ENERGY STAR®** guidelines for energy efficiency.

Universal Serial Bus (USB) Interface

This monitor supports High-Speed Certified USB 2.0 interface.*

	Data Rate	Power Consumption
High speed	480 Mbps	2.5W (Max., each port)
Full speed	12 Mbps	2.5W (Max., each port)
Low speed	1.5 Mbps	2.5W (Max., each port)

USB ports:

- l 1 upstream - rear
- l 4 downstream - 2 on rear; 2 on left side

NOTE: USB 2.0 capability requires 2.0 capable computer.

NOTE: Monitor's USB interface works ONLY when monitor is Powered ON (or in Power Save Mode). Switching your monitor OFF and then ON would re-enumerate its USB interface; attached peripherals may take a few seconds to resume normal functionality.

Plug and Play Capability

You can install the monitor in any Plug and Play-compatible system. The monitor automatically provides the computer system with its Extended Display Identification Data (EDID) using Display Data Channel (DDC) protocols so the system can configure itself and optimize the monitor settings. If desired, the user can select different settings, but in most cases monitor installation is automatic.

Caring for Your Monitor

⚠ **CAUTION: Read and follow the safety instructions before cleaning the monitor.**

⚠ **CAUTION: Before cleaning the monitor, unplug the monitor from the electrical outlet.**

- To clean your antistatic screen, lightly dampen a soft, clean cloth with water. If possible, use a special screen-cleaning tissue or solution suitable for the antistatic coating. Do not use benzene, thinner, ammonia, abrasive cleaners, or compressed air.
- Use a lightly-dampened, warm cloth to clean the plastics. Avoid using detergent of any kind as some detergents leave a milky film on the plastics.
- If you notice a white powder when you unpack your monitor, wipe it off with a cloth. This white powder occurs during the shipping of the monitor.
- Handle your monitor with care as darker-colored plastics may scratch and show white scuff marks more than lighter-colored monitor.

⚠ CAUTION: Safety Instructions

⚠ **CAUTION: Use of controls, adjustments, or procedures other than those specified in this documentation may result in exposure to shock, electrical hazards, and/or mechanical hazards.**

Read and follow these instructions when connecting and using your computer monitor:

- To help avoid damaging your computer, be sure that the voltage selection switch on the power supply for the computer is set to match the alternating current (AC) power available at your location:

    o 115 volts (V)/60 hertz (Hz) in most of North and South America and some Far Eastern countries such as Japan, South Korea (also 220 volts (V)/60 hertz (Hz)), and Taiwan.

    o 230 volts (V)/50 hertz (Hz) in most of Europe, the Middle East, and the Far East.

- Always be sure that your monitor is electrically rated to operate with the AC power available in your location.

NOTE: This monitor does not need or have a voltage selection switch for setting the AC voltage input. It will automatically accept any AC input voltage according to the ranges defined in the "Electrical Specifications" section in the User's Guide.

- Do not store or use the monitor in locations that are exposed to heat, direct sunlight, or extreme cold.

- Avoid moving the monitor between locations with large temperature differences.

- Do not subject the monitor to severe vibration or high impact conditions. For example, do not place the monitor inside a car trunk.

- Do not store or use the monitor in locations exposed to high humidity or dusty environment.

- Do not allow water or other liquids to spill on or into the monitor.

- Keep flat panel monitor in room temperature conditions. Excessive cold or hot conditions can have an adverse effect on the liquid crystal of the display.

- Never insert anything metallic into the monitor openings. Doing so may create the danger of electric shock.

- To avoid electric shock, never touch the inside of the monitor. Only a qualified technician should open the monitor case.

- Never use your monitor if the power cable has been damaged. Ensure that nothing rests on your computer's cables and that the cables are not located where they can be stepped on or tripped over.

- Be sure to grasp the plug, not the cable, when disconnecting the monitor from an electric socket.

- Openings in the monitor cabinet are provided for ventilation. To prevent overheating, these openings should not be blocked or covered. Avoid using the monitor on a bed, sofa, rug, or other soft surface, as doing so may block the ventilation openings in the bottom of the cabinet. If you place the monitor in a bookcase or an enclosed space, be sure to provide adequate ventilation and air flow.

- Place your monitor in a location with low humidity and minimum dust. Avoid places similar to a damp basement or dusty hallway.

- Do not expose the monitor to rain or use it near water (in kitchens, next to swimming pools, etc.). If the monitor accidentally gets wet, unplug it and contact an authorized dealer immediately. You can clean the monitor with a damp cloth when necessary, being sure to unplug the monitor first.

- Place the monitor on a solid surface and treat it carefully. The screen is made of glass and can be damaged if dropped or hit sharply.

- Locate your monitor near an easily accessible electric outlet.

- If your monitor does not operate normally - in particular, if there are any unusual sounds or smells coming from it - unplug it immediately and contact an authorized dealer or service center.

- Do not attempt to remove the back cover, as you will be exposed to an electrical shock hazard. The back cover should only be removed by qualified service personnel.

- High temperatures can cause problems. Don't use your monitor in direct sunlight, and keep it away from heaters, stoves, fireplaces, and other sources of heat.

- Unplug the monitor when it is going to be left unused for an extended period of time.

- Unplug your monitor from the electric outlet before any service is performed.

- LAMP(S) INSIDE THIS PRODUCT CONTAIN MERCURY AND MUST BE RECYCLED OR DISPOSED OF ACCORDING TO LOCAL, STATE OR FEDERAL LAWS. FOR MORE INFORMATION, GO TO WWW.DELL.COM/HG OR CONTACT THE ELECTRONIC INDUSTRIES ALLIANCE AT WWW.EIAE.ORG.

Setting Up Your Monitor
Dell™ 3007WFP Flat Panel Monitor

- Connecting Your Monitor
- Installing the Utility Tool (Microsoft® Windows® Operation Systems)
- Using the Front Panel Buttons
- Using the OSD
- Using the Dell Soundbar (Optional)

Connecting Your Monitor

⚠ **CAUTION: Before you begin any of the procedures in this section, follow the safety instructions.**
1. Turn off your computer and unplug the power cord.

2. Connect the white connector end of the DVI cable attached on the monitor to the connectors on the computer.

3. Connect the USB cable that was included with your monitor to the computer and the upstream USB connector on the monitor. Once this cable is connected the computer and the monitor, you can use the USB downstream on the monitor.

4. **Connect any USB devices.**

5. Connect the power cord.

6. Turn on your monitor and computer. If you do not see an image, see Troubleshooting Your Monitor. Troubleshooting.

📝 **NOTE: The Monitor will display full screen in White, Black, Red, Green and Blue color rolling pattern on screen if the DVI cable is not connected. This test pattern will be displayed continually when Monitor detects that DVI cable from Monitor to PC is not connected.**

Installing the Utility Tool (Microsoft® Windows® Operation Systems)

The **setup.exe** application tool launcher provided in the CD allows you to the install utility tool on the computer. This feature queries the monitor for the brightness parameter and displays the adjustment range bar on the screen.

1. Insert the CD into the CD drive.

2. Open the **Drivers** folder and double-click **setup.exe.**

📝 **Ensure that the USB cable is connected between the monitor and the computer.**

3. The install Shield wizard will launch the application tool. Click Next to countinue.

4. Select **Accept the license agreement** and click **Next**.

5. Click **Install** to complete the installation. After the installation is complete, click **Finish**.

You are now ready to view adjustment range bar while adjusting the brightness on the monitor.
Using the Front Panel Buttons

Use the buttons on the front of the monitor to adjust the image settings.
 Down (-) and Up (+)	Touch - or + to activate the on-screen display (OSD). Use these buttons to decrease/increase the brightness ranges.
 Power Button and Indicator	Use the power button to turn the monitor on and off. The blue light indicates the monitor is on and fully functional. An amber light indicates power save mode.

Using the OSD

 NOTE: If you make an adjustment, the monitor automatically saves any adjustments you have made.

1. Touch - or + to activate the on-screen display (OSD).

2. Touch - and + button to select the desired parameter.

Icon	Brightness bar	Description
	Brightness	Brightness adjusts the luminance of the monitor. Press the + button to increase luminance and press the - button to decrease luminance (min 0 ~ max 20).

 NOTE: OSD generate from PC application F/W through the upstream port of USB to make sure the USB cable connect well.

Using the Dell Soundbar (Optional)

The Dell Soundbar is a four-speaker, two-channel speaker that can be attached to your monitor. Located on the Soundbar are a: Rotary volume and on/off control to adjust the overall system level, a green LED for power indication, and two audio headset jacks.

1. Attach mechanism
2. Power/volume control
3. Power indicator
4. Headphone connectors

Soundbar Attachment to the Monitor

🔴 **NOTICE: Do not use the soundbar power connector with any other device.**

1. Attach the Soundbar by aligning the two slots on the Soundbar with the two tabs on the bottom of the monitor.
2. Slide the Soundbar to the left until it snaps in to place.
3. Plug in the power cord from the Soundbar in to the connector on the back of the monitor.
4. Insert the green stereo plug from the Soundbar in to your computer's audio output connector.
