About Your Monitor

Package Contents

Your monitor ships with the components shown below. Make sure that you have received all the components and [contact Dell](#) if something is missing.

 **NOTE:** Some items may be optional and may not ship with your monitor. Some features or media may not be available in certain countries.

	Monitor
	Stand riser
	Stand base
	Power cable (varies by country)
	HDMI 2.0 cable

	USB 3.0 upstream cable (enables the USB ports on the monitor)
	DP cable (DP to mDP)
	<ul style="list-style-type: none"> • Drivers and documentation media • Quick Setup Guide • Safety and Regulatory Information

Product Features

The **Dell S2817Q** monitor has an active matrix, thinfilm transistor (TFT), liquid crystal display (LCD), and LED backlight. The monitor features include:

- 70.86 cm (27.9-inch) viewable area display (measured diagonally).
3840 x 2160 resolution with full-screen support for lower resolutions.
- Mega dynamic contrast ratio (8,000,000:1).
- Tilt capability.
- Dual HDMI/MHL offers seamless connectivity to secondary devices such as select smartphones, DVD players, gaming consoles etc.
- Removable stand.
- Plug and play capable if supported by your system.
- Color gamut of 72% (typical).
- On-screen display (OSD) adjustments for easy setup and screen optimization.
- Software and documentation media includes an information file (INF), Image-color matching file (ICM), and product documentation.
- Dell display manager software (available on the disc shipped with the monitor).
- Energy saver feature for energy star compliance.
- Security-lock slot.
- Capability of switching from wide aspect to standard aspect ratio while maintaining image quality.
- EPEAT Silver rating.
- BFR/PVC- reduced.
- TCO-certified displays.
- Arsenic-free glass and mercury-free for the panel only.
- 0.5 W standby power when in the sleep mode.
- Energy gauge shows the energy level being consumed by the monitor in real time.
- Analog backlight dimming control for flicker free display.

Identifying Parts and Controls

Front view

Label	Description
1	Function buttons (For more information, see Operating the Monitor)
2	Power on/off button (with LED indicator)

Back View

Label	Description	Use
1	Security-lock slot	Secures monitor with security lock (sold separately).
2	Barcode, serial number, and Service Tag label	Refer to this label if you need to contact Dell for technical support.
3	Regulatory label	Lists the regulatory approvals.
4	Letter etching	Lists the regulatory approvals.
5	Cable-management slot	Use to organize cables by placing them through the slot.

Bottom View

Label	Description	Use
1	AC power connector	To connect the monitor power cable.
2	USB downstream ports	Connect your USB device. You can only use this connector after you have connected the USB cable to the computer and USB upstream connector on the monitor.
3	USB upstream port	Connect the USB cable that comes with your monitor to the computer. Once this cable is connected, you can use the USB downstream connectors on the monitor.
4	Audio line-out port	Connect speakers to playback audio coming through HDMI or DP audio channels. Only supports 2-channel audio. NOTE: The audio line-out port does not support headphones. ⚠ WARNING: Excessive sound pressure from earphones or headphones can cause hearing damage or loss.
5	HDMI (MHL) 1 port	Connect your computer with HDMI cable or portable device with MHL cable.
6	HDMI (MHL) 2 port	Connect your computer with HDMI cable or portable device with MHL cable.
7	DP connector (in)	Connect your computer with DP cable.
8	mDP connector (in)	Connect your computer with mDP to DP cable.

Monitor Specifications

Flat Panel Specifications

Screen type	Active matrix - TFT LCD
Panel type	TN
Viewable image	
Diagonal	70.86 cm (27.90 inches)
Active Area	
Horizontal	620.93 mm (24.45 inches)
Vertical	341.28 mm (13.43 inches)
Area	211910.99 mm ² (328.36 inches ²)
Pixel pitch	0.16 mm x 0.16 mm
Viewing angle	
Horizontal	170° (typical)
Vertical	160° (typical)
Luminance output	300 cd/m ² (typical)
Contrast ratio	1000 to 1 (typical) 8,000,000 to 1 (dynamic contrast on)
Faceplate coating	Anti-glare treatment of the front polarizer (3H)
Backlight	LED
Response Time	2 ms typical (G to G)
Color depth	1.0737 G (8 Bits.+ High FRC)
Color gamut	72% of NTSC

Resolution Specifications

Horizontal scan range	31 kHz to 140 kHz (DP/HDMI) 30 kHz to 83 kHz (MHL)
Vertical scan range	50 Hz to 75 Hz (DP/HDMI) 24 Hz to 60 Hz (MHL)
Maximum preset resolution	3840 x 2160 at 60 Hz
Video display capabilities (DP & HDMI & MHL playback)	480p, 576p, 720p, 1080p

Preset Display Modes

Dimensions (with stand)	
Height	470.6 mm (18.53 inches)
Width	657.9 mm (25.90 inches)
Depth	185.4 mm (7.30 inches)
Dimensions (without stand)	
Height	382.4 mm (15.05 inches)
Width	657.9 mm (25.90 inches)
Depth	63.4 mm (2.50 inches)
Stand dimensions	
Height	182.8 mm (7.20 inches)
Width	244.6 mm (9.63 inches)
Depth	185.4 mm (7.30 inches)
Weight	
Weight with packaging	9.05 kg (19.95 lb)

Weight with stand assembly and cables	6.6 kg (14.55 lb)
Weight without stand assembly (For wall mount or VESA mount considerations - no cables)	5.05 kg (11.13 lb)
Weight of stand assembly	1.0 kg (2.2 lb)

Environmental Characteristics

Temperature	
Operating	0°C to 40°C (32°F to 104°F)
Non-operating	-20°C to 60°C (-4°F to 140°F)
Humidity	
Operating	10% to 80% (non-condensing)
Non-operating	5% to 90% (non-condensing)
Altitude	
Operating	5,000 m (16,404 ft) (maximum)
Non-operating	12,192 m (40,000 ft) (maximum)
Thermal dissipation	308 BTU/hour (maximum) 120 BTU/hour (typical)

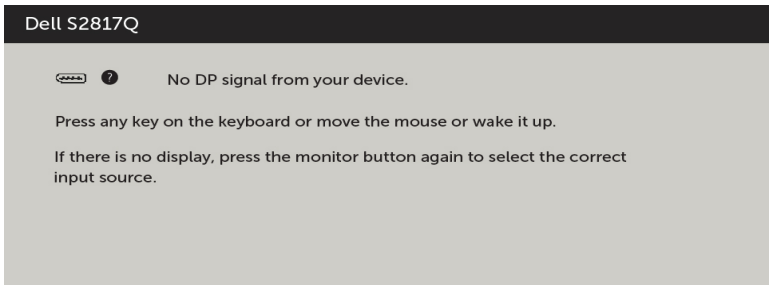

Power Management Modes

If you have VESA’s DPM-compliant video card or software installed in your PC, the monitor can automatically reduce its power consumption when not in use. This is referred to as power save mode*. If the computer detects input from the keyboard, mouse, or other input devices, the monitor automatically resumes functioning. The following table shows the power consumption and signaling of this automatic power saving feature.

VESA Modes	Horizontal Sync	Vertical Sync	Video	Power Indicator	Power Consumption
Normal operation	Active	Active	Active	White	90 W (maximum)** 35 W (typical)
Active-off mode	Inactive	Inactive	Off	White (blinking slowly)	Less than 0.5 W
Switch off	-	-	-	Off	Less than 0.3 W

Energy Star	Power Consumption
On Mode	30 W***

The OSD operates only in the normal operation mode. If you press any button in the active-off mode, one of the following message is displayed:

*Zero power consumption in OFF mode can only be achieved by disconnecting the AC mains cable from the monitor.

**Maximum power consumption with maximum luminance.

*** Energy consumption (On Mode) is tested at 230 Volts / 50 Hz.

This document is informational only and reflects laboratory performance. Your product may perform differently, depending on the software, components and peripherals you ordered and shall have no obligation to update such information. Accordingly, the customer should not rely upon this information in making decisions about electrical tolerances or otherwise. No warranty as to accuracy or completeness is expressed or implied.

Activate the computer and the monitor to gain access to the OSD.

NOTE: This monitor is **ENERGY STAR** -compliant.

Universal Serial Bus (USB)

This section gives you information about the USB ports available on your monitor.

NOTE: Up to 0.9 A on 2 USB downstream ports.

Your computer has the following USB ports:

- One upstream - bottom
- Two downstream - Two at bottom

NOTE: The monitor's USB ports work only when the monitor is on or in the power save mode. If you turn off the monitor and then turn it on, the attached peripherals may take a few seconds to resume normal functionality.

Transfer speed	Data rate	Power consumption
SuperSpeed	5 Gbps	4.5 W (Max., each port)
Hi-Speed	480 Mbps	2.5 W (Max., each port)
Full speed	12 Mbps	2.5 W (Max., each port)

Plug-and-Play

You can install the monitor in any Plug-and-Play-compatible system. The monitor automatically provides the computer system with its extended display identification data (EDID) using display data channel (DDC) protocols so the computer can configure itself and optimize the monitor settings. Most monitor installations are automatic; you can select different settings if desired. For more information about changing the monitor settings, see [Operating the Monitor](#).

LCD Monitor Quality and Pixel Policy

During the LCD monitor manufacturing process, it is not uncommon for one or more pixels to become fixed in an unchanging state which are hard to see and do not affect the display quality or usability. For more information on LCD Monitor Pixel Policy, see Dell support site at: <http://www.dell.com/support/monitors>.

Setting Up the Monitor

Attaching the Stand

NOTE: The stand riser and stand base are detached when the monitor is shipped from the factory.

NOTE: The procedure below is applicable for the default stand. If you purchased any other stand, see the documentation shipped with the stand to set it up.

CAUTION: Place monitor on a flat, clean, and soft surface to avoid scratching the display panel.

Connect the stand riser to stand base.

- 1 Attach the stand riser to the stand base.
- 2 Tighten the thumbscrew below the stand base.

To attach the monitor stand:

- 1 Remove the monitor protective cover and place the monitor with its front facing downward on it.
- 2 Insert the two tabs on the upper part of the stand to the groove on the back of the monitor.
- 3 Press the stand down till it snaps into its place.

Connecting Your Monitor

⚠ WARNING: Before you begin any of the procedures in this section, follow the [Safety Instructions](#).

To connect your monitor to the computer:

- 1 Turn off your computer.
- 2 Connect the HDMI/DP-mDP/USB cable from your monitor to the computer.
- 3 Switch on your monitor.
- 4 Select the correct input source at Monitor OSD Menu and turn on your computer.

📌 NOTE: S2817Q default setting is DP 1.2. DP 1.1 Graphic card may not display normally. Please refer to [“product specific problems – No image when using DP connection to the PC”](#) to change default setting.

Connecting the HDMI cable

Connecting the mDP (or DP) cable

📌 NOTE: Default is DP port. Select input source on monitor to switch to mDP.

Connecting the USB cable

Using the Mobile-High Definition Link (MHL)

- NOTE:** This monitor is MHL ready.
- NOTE:** To use the MHL function, use only MHL certified cable and source devices that support MHL output.
- NOTE:** Some MHL source devices may take more than a few seconds or longer to output an image, depending on MHL source devices.
- NOTE:** When the connected MHL source device enters standby mode, the monitor displays a black screen or the message below, depending on MHL source device's output.

To enable MHL connection, please perform the below steps:

- 1 Plug the power cable on your monitor into a AC outlet.
- 2 Connect the (micro) USB port on your MHL source device to HDMI/MHL port on the monitor with a MHL certified cable (see [Bottom View](#) for details).
- 3 Turn on the monitor and the MHL source device.

- 4 Select input source on monitor to HDMI/MHL by using OSD menu (see [Using the On-Screen Display \(OSD\) Menu](#) for details).
- 5 If the monitor does not display an image, see [Mobile High-Definition Link \(MHL\) Specific Problems](#).

Organizing Your Cables

After attaching all necessary cables to your monitor and computer, (see [Connecting Your Monitor](#) for cable attachment) organize all cables as shown above.

Removing the Monitor Stand

CAUTION: To prevent scratches on the LCD screen while removing the stand, make sure that the monitor is placed on a soft, clean surface.

NOTE: The procedure below is applicable for the default stand. If you purchased any other stand, see the documentation shipped with the stand to set it up.

To remove the stand:

- 1 Place the monitor on paper cushion or thick sitting mat.
- 2 Use a long and thin screwdriver to push the release latch.
- 3 Pull the stand neck in the arrow direction to detach the stand.

Operating the Monitor

Turning on the Monitor

Press the  button to turn on the monitor.

Using the Front Panel Controls

Use the control buttons on the front of the monitor to adjust the characteristics of the image being displayed. As you use these buttons to adjust the controls, an OSD shows the numeric values of the characteristics as they change.

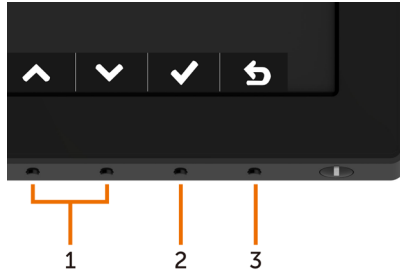

The following table describes the front panel buttons:

Front-Panel Button	Description
1  Shortcut key: Preset Modes	Use this button to choose from a list of preset color modes.
2  Shortcut key: Volume	Use this button to directly access the volume level bar.
3  Menu	Use this menu button to launch the on-screen display (OSD) and select the OSD menu. See Accessing the Menu System .
4  Exit	Use this button to go back to the main menu or exit the OSD main menu.
5  Power (with power light indicator)	Use the Power button to turn the monitor On and Off. The white LED indicates the monitor is On and fully functional. A glowing white LED indicates DPMS Power Save Mode.

Front-Panel Button

Use the buttons on the front of the monitor to adjust the image settings.

Front Panel Button	Description
1   Up Down	Use the Up (increase) and Down (decrease) keys to adjust items in the OSD menu.
2  OK	Use the OK button to confirm your selection.
3  Back	Use the Back button to go back to the previous menu.

Using the On-Screen Display (OSD) Menu

Accessing the Menu System

 **NOTE:** Any changes you make using the OSD menu are automatically saved if you move to another OSD menu, exit the OSD menu, or wait for the OSD menu to disappear.

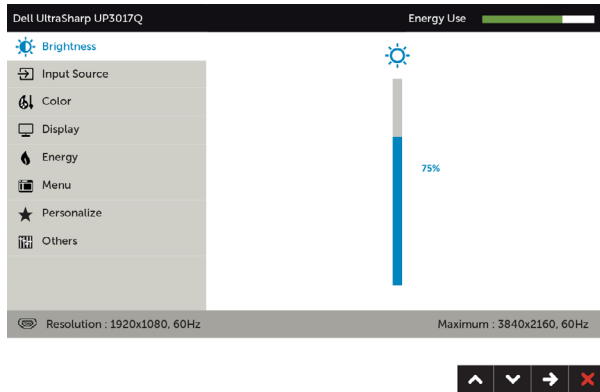

- 1 Press the  button to launch the OSD menu and display the main menu.

- 2 Press the  and  buttons to move between options. As you move from one icon to another, the option name is highlighted.
- 3 Press the  or  button once to activate the highlighted option.
- 4 Press the  and  buttons to select the desired parameter.
- 5 Press  to enter the slide bar and then use the  or  button, according to the indicators on the menu, to make your changes.
- 6 Press the  button once to return to the main menu to select another option or press the  button two or three times to exit from the OSD menu.

Icon**Menu and Submenus****Description****Brightness/Contrast**

Use this menu to activate **Brightness/Contrast** adjustment.

**Brightness**

Brightness adjusts the luminance of the backlight (minimum 0; maximum 100).

Press the  button to increase brightness.

Press the  button to decrease brightness.

NOTE: Manual adjustment of **Brightness** is disabled when **Dynamic Contrast** is switched on.

Contrast

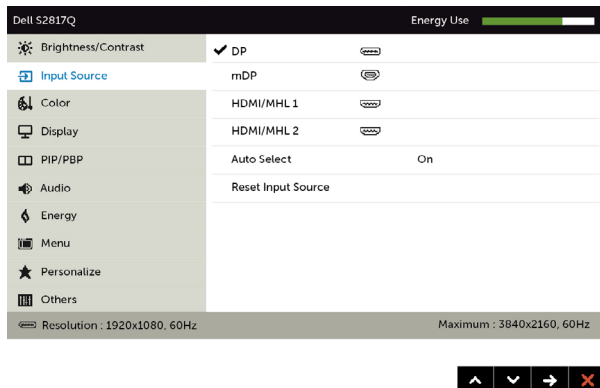

Adjust the **Brightness** first, and then adjust **Contrast** only if further adjustment is necessary.

Press the  button to increase contrast and press the  button to decrease contrast (between 0 and 100).

Contrast adjusts the difference between darkness and lightness on the monitor.

**Input Source**

Use the **Input Source** menu to select between different video inputs that are be connected to your monitor.

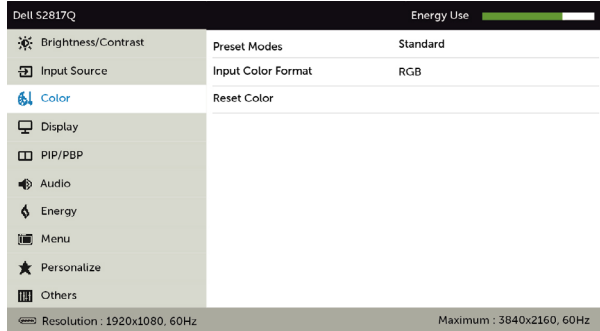

Icon	Menu and Submenus	Description
	DP	Select DP input when you are using the DP (DisplayPort) connector. Use  to select the DP input source.
	mDP	Select mDP input when you are using the mDP (mini DisplayPort) connector. Use  to select the mDP input source.
	HDMI/MHL 1	Select the HDMI/MHL 1 input when you are using the HDMI connector. Use  to select the HDMI/MHL 1 input source.
	HDMI/MHL 2	Select the HDMI/MHL 2 input when you are using the HDMI connector. Use  to select the HDMI/MHL 2 input source.
	Auto Select	Use  to select Auto Select , the monitor scans for available input sources.
	Reset Input Source	Resets your monitor's Input Source settings to the factory defaults.

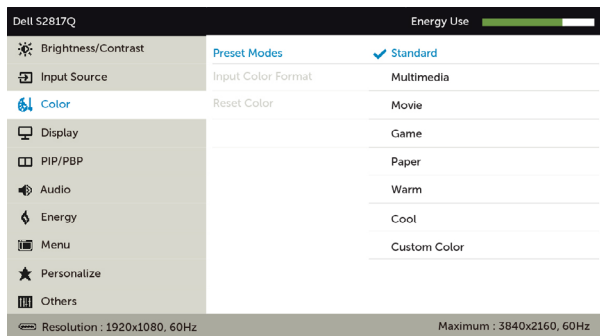

Color

Use the **Color** menu to adjust the color setting mode.

Icon	Menu and Submenus	Description
------	-------------------	-------------

Preset Modes When you select **Preset Modes**, you can choose **Standard, Multimedia, Movie, Game, Paper, Warm, Cool** or **Custom Color** from the list.

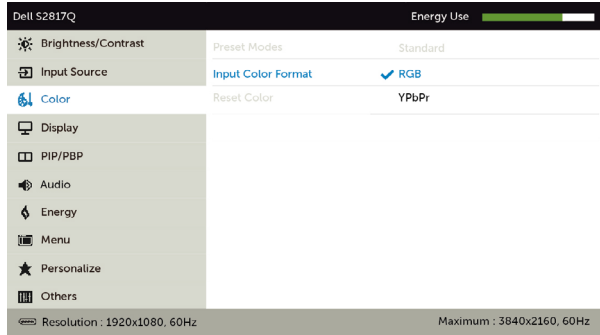

- **Standard:** Default color settings. This is the default preset mode.
- **Multimedia:** Ideal for multimedia applications.
- **Movie:** Ideal for movies.
- **Game:** Ideal for most gaming applications.
- **Paper:** Loads brightness and sharpness settings ideal for viewing text. Blend the text background to simulate paper media without affecting color images.
- **Warm:** Increases the color temperature. The screen appears warmer with a red/yellow tint.
- **Cool:** Decreases the color temperature. The screen appears cooler with a blue tint.
- **Custom Color:** Allows you to manually adjust the color settings. Press the  and  buttons to adjust the Red, Green, and Blue values and create your own preset color mode.

Icon	Menu and Submenus	Description
------	-------------------	-------------

Input Color Format

Allows you to set the video input mode to:

- **RGB:** Select this option if your monitor is connected to a computer (or DVD player) using the HDMI, DP-mDP cable or MHL devices using the MHL cable.
- **YPbPr:** Select this option if your DVD player supports only YPbPr output.

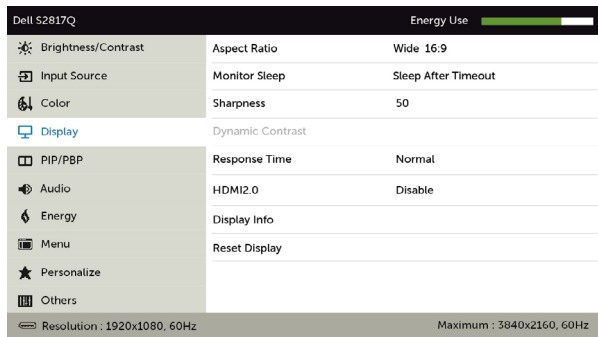

Reset Color

Resets your monitor's color settings to the factory defaults.

Display

Use the **Display** menu to adjust image.

Aspect Ratio

Adjust the image ratio to **Wide 16:9**, **4:3**, or **5:4**.

Monitor Sleep

Sleep After Timeout: Monitor goes into sleep after timeout.
Never: Monitor never goes into sleep.

Sharpness

Makes the image look sharper or softer.
 Use or to adjust the sharpness from '0' to '100'.

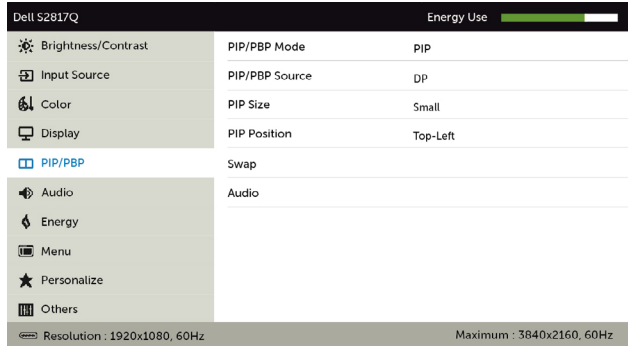

Icon	Menu and Submenus	Description
	Dynamic Contrast	<p>Allows you to increase the level of contrast to provide sharper and more detailed image quality.</p> <p>Push the  button to select the Dynamic Contrast “On” or “Off”.</p> <p>NOTE: For Game and Movie preset mode only.</p> <p>NOTE: Dynamic Contrast provides higher contrast if you select Game or Movie preset mode.</p>
	Response Time	Allows you to set the Response Time to Normal or Fast .
	HDMI 2.0	<p>For switch HDMI1.4/HDMI2.0.</p> <p>NOTE: Ensure that your Graphics Card can support these features before selecting HDMI2.0.</p> <p>Wrong settings may result in blank screen.</p>
	Display Info	Displays the monitor’s current settings.
	Reset Display	Restores the display settings to factory defaults.

PIP/PBP

This function brings up a window displaying image from another input source. Thus you can watch two images from different sources at the same time.

During DC/AC power cycle, the PIP/PBP setting will only be disabled if there is no “main source” signal.

Right-Window (select from input Source)	Left-window (select from PIP/ PBP source)		
	mDP	DP	HDMI/MHL
mDP	X	X	√
DP	X	X	√
HDMI/MHL	√	√	X

Icon	Menu and Submenus	Description
	PIP/PBP Mode	Adjusts the PBP (Picture by Picture) model to PIP Small, PIP Large, PBP Aspect Ratio, or PBP Fill. You can disable this feature by selecting Off.
	PIP/PBP Source	Select PIP or PBP function.
	PIP Size	Select the PIP/PBP window size of Small or Large.
	PIP Position	Select PIP sub-window position. Use  or  to browse and  or  select Top-Left, Top-Right, Bottom-Right, or Bottom-left.
	Swap	For PIP/PBP source swap.
	Audio	For PIP/PBP Audio swap.

Icon	Menu and Submenus	Description
------	-------------------	-------------

Audio

Volume	Allows you to set the volume level of audio source. Use or to adjust the volume level from '0' to '100'.
---------------	--

Speaker	Allows you to set the Speaker to Enable or Disable .
----------------	--

Reset Audio	Select this option to restore default audio settings.
--------------------	---

Energy

Power Button LED	Allows you to set the state of the power light to save energy.
-------------------------	--

USB	Allows you to enable or disable USB function during monitor standby mode. NOTE: USB ON/OFF under standby mode is only available when the USB upstream cable is unplugged. This option will be greyed out when the USB upstream cable plugs in.
------------	--

Reset Energy	Select this option to restore default Energy settings.
---------------------	---

Icon	Menu and Submenus	Description
	Menu	<p>Select this option to adjust the settings of the OSD, such as, the languages of the OSD, the amount of time the menu remains on screen, and so on.</p> 
	Language	<p>Set the OSD display to one of eight languages. (English, Spanish, French, German, Brazilian Portuguese, Russian, Simplified Chinese, or Japanese).</p>
	Transparency	<p>Select this option to change the menu transparency by using  and  (min. 0 / max. 100).</p>

Description

Other

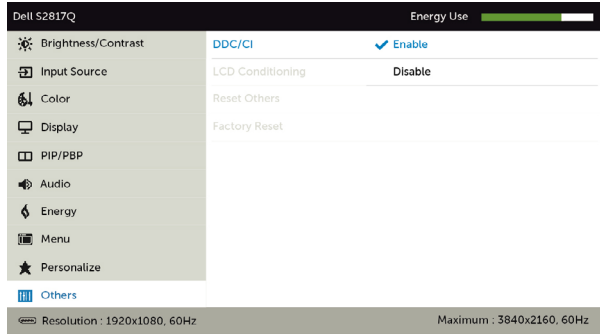

Select this option to adjust the OSD settings, such as the **DDC/CI**, **LCD conditioning**, and so on.

DDC/CI

DDC/CI (Display Data Channel/Command Interface) allows you to adjust the monitor settings using software on your computer.

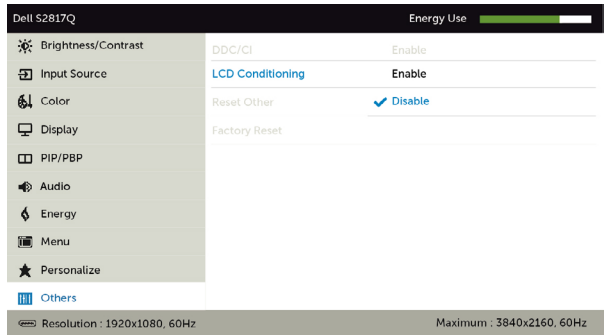

Select **Disable** to turn off this feature.

Enable this feature for best user experience and optimum performance of your monitor.

Icon	Menu and Submenus	Description
------	-------------------	-------------

LCD Conditioning Helps reduce minor cases of image retention. Depending on the degree of image retention, the program may take some time to run. Select **Enable** to start the process.

Reset Others Restores other settings, such as **DDC/CI**, to factory defaults.

Factory Reset Restores all OSD settings to the factory defaults.

 **NOTE:** This monitor has a built-in feature to automatically calibrate the brightness to compensate for LED aging.

OSD Warning Messages

When the **Dynamic Contrast** feature is enabled (in these preset modes: **Game** or **Movie**), manual brightness adjustment is disabled.

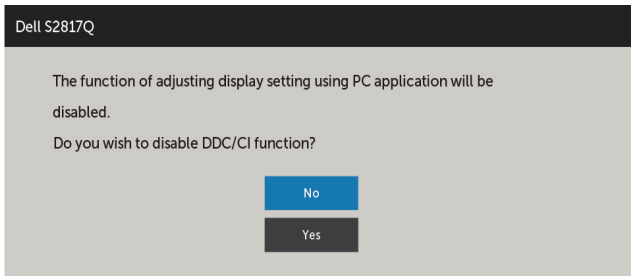

When the monitor does not support a particular resolution mode, you can see the following message:

This means that the monitor cannot synchronize with the signal that it is receiving from the computer. See [Monitor Specifications](#) for the Horizontal and Vertical frequency ranges addressable by this monitor. Recommended mode is 3840 x 2160.

You can see the following message before the DDC/CI function is disabled:

When the monitor enters the **Power Save** mode, the following message appears:

Activate the computer and wake up the monitor to gain access to the [OSD](#).

If you press any button other than the power button, the following messages will appear depending on the selected input:

If either DP, mDP, HDMI/MHL input is selected and the corresponding cable is not connected, a floating dialog box as shown below appears.

or

or

See [Troubleshooting](#) for more information.

Troubleshooting

⚠ WARNING: Before you begin any of the procedures in this section, follow the [Safety Instructions](#).

Self-Test

Your monitor provides a self-test feature that allows you to check whether your monitor is functioning properly. If your monitor and computer are properly connected but the monitor screen remains dark, run the monitor self-test by performing the following steps:

- 1 Turn off both your computer and the monitor.
- 2 Unplug the video cable from the back of the computer. To ensure proper Self-Test operation, remove all digital and the analog cables from the back of computer.
- 3 Turn on the monitor.

The floating dialog box should appear on-screen (against a black background), if the monitor cannot sense a video signal and is working correctly. While in self-test mode, the power LED remains white. Also, depending upon the selected input, one of the dialogs shown below will continuously scroll through the screen.

or

or

- 4 This box also appears during normal system operation, if the video cable becomes disconnected or damaged.
 - 5 Turn off your monitor and reconnect the video cable; then turn on both your computer and the monitor.
- If your monitor screen remains blank after you use the previous procedure, check your video controller and computer, because your monitor is functioning properly.

Built-in Diagnostics

Your monitor has a built-in diagnostic tool that helps you determine if the screen abnormality you are experiencing is an inherent problem with your monitor, or with your computer and video card.

 **NOTE:** You can run the built-in diagnostics only when the video cable is unplugged and the monitor is in self-test mode.

To run the built-in diagnostics:

- 1 Make sure that the screen is clean (no dust particles on the surface of the screen).
- 2 Unplug the video cable(s) from the back of the computer or monitor. The monitor then goes into the self-test mode.
- 3 Press and hold **Button 1** and **Button 4** on the front panel simultaneously for 2 seconds. A gray screen appears.
- 4 Carefully inspect the screen for abnormalities.
- 5 Press **Button 4** on the front panel again. The color of the screen changes to red.
- 6 Inspect the display for any abnormalities.
- 7 Repeat steps 5 and 6 to inspect the display in green, blue, black, white, and text screens.

The test is complete when the text screen appears. To exit, press **Button 4** again. If you do not detect any screen abnormalities upon using the built-in diagnostic tool, the monitor is functioning properly. Check the video card and computer.

Common Problems

The following table contains general information about common monitor problems you might encounter and the possible solutions:

Common Symptoms	What You Experience	Possible Solutions
No Video/Power LED off	No picture	<ul style="list-style-type: none"> • Ensure that the video cable connecting the monitor and the computer is properly connected and secure. • Verify that the power outlet is functioning properly using any other electrical equipment. • Ensure that the power button is depressed fully. • Ensure that the correct input source is selected in the Input Source menu.
No Video/Power LED on	No picture or no brightness	<ul style="list-style-type: none"> • Increase brightness & contrast controls via OSD. • Perform monitor self-test feature check. • Check for bent or broken pins in the video cable connector. • Run the built-in diagnostics. • Ensure that the correct input source is selected in the Input Source menu.
Missing Pixels	LCD screen has spots	<ul style="list-style-type: none"> • Cycle power on-off. • Pixel that is permanently off is a natural defect that can occur in LCD technology. • For more information on Dell Monitor Quality and Pixel Policy, see Dell Support site at: http://www.dell.com/support/monitors.
Stuck-on Pixels	LCD screen has bright spots	<ul style="list-style-type: none"> • Cycle power On-Off. • Pixel that is permanently off is a natural defect that can occur in LCD technology. • For more information on Dell Monitor Quality and Pixel Policy, see Dell Support site at: http://www.dell.com/support/monitors.
Brightness Problems	Picture too dim or too bright	<ul style="list-style-type: none"> • Reset the monitor to factory settings. • Adjust brightness & contrast controls via OSD.
Safety Related Issues	Visible signs of smoke or sparks	<ul style="list-style-type: none"> • Do not perform any troubleshooting steps. • Contact Dell immediately.
Intermittent Problems	Monitor malfunctions on & off	<ul style="list-style-type: none"> • Ensure that the video cable connecting the monitor to the computer is connected properly and is secure. • Reset the monitor to factory settings. • Perform monitor self-test feature check to determine if the intermittent problem occurs in self-test mode.

Common Symptoms	What You Experience	Possible Solutions
Missing Color	Picture missing color	<ul style="list-style-type: none"> • Perform monitor self-test. • Ensure that the video cable connecting the monitor to the computer is connected properly and is secure. • Check for bent or broken pins in the video cable connector.
Wrong Color	Picture color not good	<ul style="list-style-type: none"> • Change the settings of the Preset Modes in the Color menu OSD depending on the application. • Adjust R/G/B value under Custom. Color in Color menu OSD. • Change the Input Color Format to PC RGB or YPbPr in the Color menu OSD. • Run the built-in diagnostics.
Image retention from a static image left on the monitor for a long period of time	Faint shadow from the static image displayed appears on the screen	<ul style="list-style-type: none"> • Use the Power Management feature to turn off the monitor at all times when not in use (for more information, see Power Management Modes). • Alternatively, use a dynamically changing screensaver.

Product Specific Problems

Specific Symptoms	What You Experience	Possible Solutions
Screen image is too small	Image is centered on screen, but does not fill entire viewing area	<ul style="list-style-type: none"> • Check the Aspect Ratio setting in the Display menu OSD. • Reset the monitor to factory settings.
Cannot adjust the monitor with the buttons on the front panel	OSD does not appear on the screen	<ul style="list-style-type: none"> • Turn off the monitor, unplug the monitor power cable, plug it back, and then turn on the monitor. • Check whether the OSD menu is locked. If yes, press and hold the button beside the power button for 6 seconds to unlock (for more information, see Lock).
No Input Signal when user controls are pressed	No picture, the LED light is white	<ul style="list-style-type: none"> • Check the signal source. Ensure the computer is not in the power saving mode by moving the mouse or pressing any key on the keyboard. • Check whether the signal cable is plugged in properly. Re-plug the signal cable if necessary. • Reset the computer or video player.
The picture does not fill the entire screen	The picture cannot fill the height or width of the screen	<ul style="list-style-type: none"> • Due to different video formats (aspect ratio) of DVDs, the monitor may display in full screen. • Run the built-in diagnostics.

Specific Symptoms	What You Experience	Possible Solutions
No image when using DP connection to the PC	Black screen	<ul style="list-style-type: none"> • Verify which DP standard (DP 1.1a or DP 1.2) is your Graphics Card certified to. Download and install the latest graphics card driver. • Some DP 1.1a graphics card cannot support DP 1.2 monitors. Go to OSD menu, under Input Source selection, press and hold DP select  key for 8 sec to change the monitor setting from DP 1.2 to DP 1.1a.

Mobile High-Definition Link (MHL) Specific Problems

Specific Symptoms	What You Experience	Possible Solutions
MHL interface is not working	Cannot see MHL device image shown on the monitor	<ul style="list-style-type: none"> • Ensure your MHL cable and MHL device are MHL certified. • Check your MHL device is turned on. • Check your MHL device is not in standby mode. • Check physical MHL cable connection is corresponding to input source selected on OSD Menu: HDMI/MHL. • Wait for 30 seconds after connecting MHL cable as some MHL devices require longer recovery time.

Appendix

Safety Instructions

For displays with glossy bezels the user should consider the placement of the display as the bezel may cause disturbing reflections from surrounding light and bright surfaces.

 **WARNING: Use of controls, adjustments, or procedures other than those specified in this documentation may result in exposure to shock, electrical hazards, and/or mechanical hazards.**

For information on safety instructions, see the Safety, Environmental, and Regulatory Information (SERI).

FCC Notices (U.S. only) and Other Regulatory Information

For FCC notices and other regulatory information, see the regulatory compliance website located at www.dell.com/regulatory_compliance.

Contacting Dell

 **NOTE:** If you do not have an active Internet connection, you can find contact information on your purchase invoice, packing slip, bill, or Dell product catalog.

Dell provides several online and telephone-based support and service options. Availability varies by country and product, and some services may not be available in your area.

To get online Monitor support content:

See www.dell.com/support/monitors.

To contact Dell for sales, technical support, or customer service issues:

- 1 Go to www.dell.com/support.
- 2 Verify your country or region in the Choose A Country/Region drop-down menu at the top-left corner of the page.
- 3 Click **Contact Us** next to the country dropdown.
- 4 Select the appropriate service or support link based on your need.
- 5 Choose the method of contacting Dell that is convenient for you.

Setting Up Your Monitor

Setting Display Resolution to 3840 x 2160 (maximum)

For best performance, set the display resolution to 3840 x 2160 pixels by performing the following steps:

In Windows Vista, Windows 7, Windows 8 or Windows 8.1:

- 1 For Windows 8 or Windows 8.1 only, select the Desktop tile to switch to classic desktop.
- 2 Right-click on the desktop and click **Screen Resolution**.
- 3 Click the Dropdown list of the Screen Resolution and select 3840 x 2160.
- 4 Click **OK**.

In Windows 10:

- 1 Right-click on the desktop and click **Display Settings**.
- 2 Click **Advanced display settings**.
- 3 Click the dropdown list of **Resolution** and select 3840 x 2160.
- 4 Click **Apply**.

If you do not see the recommended resolution as an option, you may need to update your graphics driver. Please choose the scenario below that best describes the computer system you are using, and follow the given steps.

Dell computer

- 1 Go to www.dell.com/support, enter your service tag, and download the latest driver for your graphics card.
- 2 After installing the drivers for your graphics adapter, attempt to set the resolution to 3840 x 2160 again.

 **NOTE:** If you are unable to set the resolution to 3840 x 2160, please contact Dell to inquire about a graphics adapter that supports these resolutions.

Non-Dell computer

In Windows Vista, Windows 7, Windows 8 or Windows 8.1:

- 1 For Windows 8 or Windows 8.1 only, select the Desktop tile to switch to classic desktop.
- 2 Right-click on the desktop and click **Personalization**.
- 3 Click **Change Display Settings**.
- 4 Click **Advanced Settings**.
- 5 Identify your graphics controller supplier from the description at the top of the window (e.g. NVIDIA, ATI, Intel etc.).
- 6 Refer to the graphic card provider website for updated driver (for example, <http://www.ATI.com> or <http://www.NVIDIA.com>).
- 7 After installing the drivers for your graphics adapter, attempt to set the resolution to **3840 x 2160** again.

In Windows 10:

- 1 Right-click on the desktop and click **Display Settings**.
- 2 Click **Advanced display settings**.
- 3 Click **Display adapter properties**.
- 4 Identify your graphics controller supplier from the description at the top of the window (e.g. NVIDIA, ATI, Intel etc.).
- 5 Refer to the graphic card provider website for updated driver (for example, <http://www.ATI.com> or <http://www.NVIDIA.com>).
- 6 After installing the drivers for your graphics adapter, attempt to set the resolution to 3840 x 2160 again.

NOTE: If you are unable to set the recommended resolution, please contact the manufacturer of your computer or consider purchasing a graphics adapter that supports the video resolution.

Maintenance Guidelines

Cleaning Your Monitor

WARNING: Before cleaning the monitor, unplug the monitor power cable from the electrical outlet.

CAUTION: Read and follow the [Safety Instructions](#) before cleaning the monitor.

For best practices, follow these instructions in the list below while unpacking, cleaning, or handling your monitor:

- To clean your anti-static screen, lightly dampen a soft, clean cloth with water. If possible, use a special screen-cleaning tissue or solution suitable for the anti-static coating. Do not use benzene, thinner, ammonia, abrasive cleaners, or compressed air.
- Use a lightly-dampened, soft cloth to clean the monitor. Avoid using detergent of any kind as some detergents leave a milky film on the monitor.
- If you notice white powder when you unpack your monitor, wipe it off with a cloth.
- Handle your monitor with care as a darker-colored monitor may get scratched and show white scuff marks more than a lighter-colored monitor.
- To help maintain the best image quality on your monitor, use a dynamically changing screen saver and turn off your monitor when not in use.
