Setting Up Your Monitor

Dell™ U2711 Flat Panel Monitor

1. Verify the contents of the box

2. Connect the monitor using ONLY ONE of the following cables: the white DVI cable or the blue VGA cable

3. Connect the USB cable to enable the USB hub and the card reader

4. Connect the power cable

5. Press the power button

6. If nothing appears on the screen, touch the Input Source Select button

NOTE: It is recommended that you connect the monitor using the white DVI cable for better performance.

CAUTION: Before setting up your Dell computer monitor, see the safety instructions that shipped with your monitor.

CAUTION: When connecting the cables, do not overcrowd the ports and connectors. This can cause damage to the connector pins.

NOTE: Dell recommends using the white DVI cable for better performance.

NOTE: The blue connector is used for display monitors only, not for audio.

NOTE: Connect only one of the DVI cables to your computer. Connect both DVI cables to the same computer and experience no benefit.

NOTE: This product supports only DVI-D input.
Adjust the monitor
