#### Message 1

**There is no signal coming from your computer.**

Press any key on the keyboard or move the mouse to wake it up.

If there is no display, press the monitor button now to select the correct input source on the On-Screen-Display menu.

#### Message 2

**There is no signal coming from your computer.**

Press any key on the keyboard or move the mouse to wake it up.

If there is no display, press the monitor button now to select the correct input source on the On-Screen-Display menu.

#### Message 3

**There is no signal coming from your video source.**

If there is no display, press the monitor button now to select the correct input source on the On-Screen-Display menu.

---

**Note:**

- VGA
- DVI-D
- HDMI
- DisplayPort

**Selected Video Input:** VGA, DVI-D, HDMI

---

**Possible causes:**

- Computer is not powered on.
- Computer is in power-saving mode.
- Cables are not connected properly.
- Video card is not recognized.
- Monitor settings are incorrect.

**Solution:**

- Power on the computer.
- Wake the computer from power-saving mode.
- Check cable connections.
- Check video card settings.
- Adjust monitor settings.

---

**How to connect:**

- VGA:
  - Connect the VGA cable to the monitor.
- DVI-D:
  - Connect the DVI-D cable to the monitor.
- HDMI:
  - Connect the HDMI cable to the monitor.
- DisplayPort:
  - Connect the DisplayPort cable to the monitor.

**Composite, Component, DVI-D, HDMI**

---

**Additional tips:**

- Ensure the monitor is set to the correct resolution and refresh rate.
- Check for any software updates that may affect the video output.
- Restart the computer to see if the issue resolves.

---

**FAQ:**

- How do I change the video input on my monitor?
  - Refer to the user manual for your monitor.

---

**Customer support:**

- Contact Dell support for further assistance.

---

**More information:**

- Visit the Dell Support website for troubleshooting guides.
- Join the Dell Community for user discussions.
