Power Companion

1. Power-in port (from laptop adapter)
2. Power button/Battery-status button
3. Battery-status lights (5)
4. USB-out ports (2)
5. Power-out port (to laptop)
Charging Your Power Companion

⚠️ **WARNING:** To avoid injury and damaging your device, only use the power adapter of your Dell computer.

Before first use, charge the power companion using the power adapter of your Dell computer.

⚠️ **NOTE:** It takes approximately 3 hours to fully charge the power companion.

⚠️ **NOTE:** You can charge your devices through the power companion while the power companion is getting charged.

⚠️ **NOTE:** The power adapter is not shipped with the power companion.

1. Connect one end of the power adapter of your Dell computer to the power-in port of the power companion.

2. Connect the power adapter of your Dell computer to an electrical outlet.
   - The battery-status light turns on (solid white) indicating the battery is getting charged. Refer to “Checking Battery Charge Status” section for details.
   - The battery-status lights turn off when the battery is fully charged or when the power adapter is disconnected.

⚠️ **NOTE:** If the amber battery-status light lights up while the battery is charging, this indicates a charging error. Check if you are using the correct power adapter.

⚠️ **NOTE:** For more information on battery-status lights, see “Checking Battery Charge Status” on page 11.
Charging Your Device

Charging Your Laptop

1. Connect one end of the power-output cable to the power-out port of the power companion.
2. Connect the other end of the power-output cable to the power-adapter port of your laptop.
3. Press the power button to start charging your laptop.

⚠️ NOTE: The battery-status light blinks amber when the power companion battery is low.
Charging Your Mobile Devices

Using the power companion, you can charge up to two portable devices simultaneously.

1. Connect one end of the USB cable to the USB port on the power companion.
2. Connect the other end of the USB cable to the charging port of your mobile device.

⚠️ **NOTE:** The USB cable is not shipped with the power companion.

⚠️ **NOTE:** The battery-status light blinks amber when the power companion battery is low.
# Checking the Battery

## Checking Battery Charge Status

You can check the battery-charge status by pressing the power button. The battery-status lights turn on indicating the battery-charge status of the power companion.

⚠️ **NOTE:** The battery-status lights remain illuminated for 5 seconds after you release the power button.

Checking Battery Health

Battery health is a measurement reflecting the general condition of the battery. It indicates how much battery life remains before the power companion must be replaced.

**NOTE:** The units of SOH (State Of Health) are percentage (%) points.

A battery’s SOH is 100% at the time of manufacture and will deteriorate gradually with usage.

Press and hold the power button for 5 seconds to turn on the power companion and check the battery health status.

Attaching the Ferrite Core

In order to reduce electromagnetic interference, attach the supplied ferrite core on the power-output cable connected to your laptop.

1. Open the two halves of the ferrite core.
2. Clamp the core around the power-output cable as shown in the illustration.

3. Fold over the ferrite core, snapping the small latches back together.

For PW7015M, attach the ferrite core to the power-out cable of your power companion when using a 90-watt power adapter.

For PW7015L, attach the ferrite core to the power-out cable of your power companion for all types of power adapters.
