- Removing the AC Adapter Connector
- Replacing the AC Adapter Connector

WARNING: Before working inside your computer, read the safety information that shipped with your computer. For additional safety best practices information, see the Regulatory Compliance Homepage at www.dell.com/regulatory_compliance.

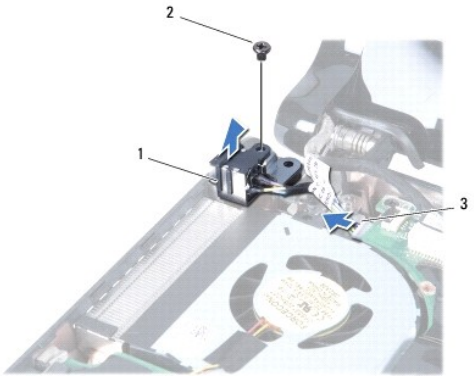
CAUTION: Only a certified service technician should perform repairs on your computer. Damage due to servicing that is not authorized by Dell™ is not covered by your warranty.

CAUTION: To avoid electrostatic discharge, ground yourself by using a wrist grounding strap or by periodically touching an unpainted metal surface.

CAUTION: To help prevent damage to the system board, remove the main battery (see Removing the Battery) before working inside the computer.

Removing the AC Adapter Connector

1. Follow the procedures in Before You Begin.
2. Remove the battery (see Removing the Battery).
3. Remove the optical drive (see Removing the Optical Drive).
4. Remove the module cover (see Removing the Module Cover).
5. Remove the power button panel (see Removing the Power Button Panel).
6. Remove the keyboard (see Removing the Keyboard).
7. Remove the palm rest (see Removing the Palm Rest).
8. Disconnect the AC adapter connector cable from the connector on the system board.
9. Remove the screw that secures the AC adapter connector to the computer base.
10. Lift the AC adapter connector out of the computer base.



1	AC adapter connector	2	screw
3	AC adapter connector cable		

Replacing the AC Adapter Connector

1. Follow the procedures in Before You Begin.

2. Place the AC adapter connector in the computer base.
3. Replace the screw that secures the AC adapter connector to the computer base.
4. Connect the AC adapter connector cable to the connector on the system board.
5. Replace the palm rest (see Replacing the Palm Rest).
6. Replace the keyboard (see Replacing the Keyboard).
7. Replace the power button panel (see Replacing the Power Button Panel).
8. Replace the module cover (see Replacing the Module Cover).
9. Replace the optical drive (see Replacing the Optical Drive).
10. Replace the battery (see Replacing the Battery).

CAUTION: Before turning on the computer, replace all screws and ensure that no stray screws remain inside the computer. Failure to do so may result in damage to the computer.

Before You Begin

Dell™ Inspiron™ 1464 Service Manual

- Recommended Tools
- Turning Off Your Computer
- Before Working Inside Your Computer

This manual provides procedures for removing and installing components in your computer. Unless otherwise noted, each procedure assumes that the following conditions exist:

- You have performed the steps in Turning Off Your Computer and Before Working Inside Your Computer.
- You have read the safety information that shipped with your computer.
- A component can be replaced or—if purchased separately—installed by performing the removal procedure in the reverse order.

Recommended Tools

The procedures in this document may require the following tools:

- small Phillips screwdriver
- small flat-blade screwdriver
- plastic scribe
- BIOS executable update program available at **support.dell.com**

Turning Off Your Computer

CAUTION: To avoid losing data, save and close all open files and exit all open programs before you turn off your computer.

1. Save and close all open files and exit all open programs.
2. Turn off the computer:

   In Microsoft® Windows Vista®, click **Start** , click the arrow , and then click **Shut Down**.

   In Microsoft Windows® 7, click **Start** and then click **Shut Down**.

   The computer turns off after the operating system shutdown process finishes.
3. Ensure that the computer is turned off. If your computer did not automatically turn off when you shut down the operating system, press and hold the power button until the computer turns off.

Before Working Inside Your Computer

Use the following safety guidelines to help protect your computer from potential damage and to help to ensure your own personal safety.

WARNING: Before working inside your computer, read the safety information that shipped with your computer. For additional safety best practices information, see the Regulatory Compliance Homepage at www.dell.com/regulatory_compliance.

CAUTION: Only a certified service technician should perform repairs on your computer. Damage due to servicing that is not authorized by Dell is not covered by your warranty.

CAUTION: Handle components and cards with care. Do not touch the components or contacts on a card. Hold a card by its edges or by its metal mounting bracket. Hold a component such as a processor by its edges, not by its pins.

CAUTION: When you disconnect a cable, pull on its connector or on its pull-tab, not on the cable itself. Some cables have connectors with locking tabs; if you are disconnecting this type of cable, press in on the locking tabs before you disconnect the cable. As you pull connectors apart, keep them evenly aligned to avoid bending any connector pins. Also, before you connect a cable, ensure that both connectors are correctly oriented and aligned.

CAUTION: To avoid damaging the computer, perform the following steps before you begin working inside the computer.

1. Ensure that the work surface is flat and clean to prevent the computer cover from being scratched.
2. Turn off your computer (see Turning Off Your Computer) and all attached devices.

CAUTION: To disconnect a network cable, first unplug the cable from your computer and then unplug the cable from the network device.

3. Disconnect all telephone or network cables from the computer.
4. Eject the card from the 7-in-1 memory card reader, if applicable.
5. Disconnect your computer and all attached devices from their electrical outlets.
6. Disconnect all attached devices from your computer.

CAUTION: To help prevent damage to the system board, remove the main battery (see Removing the Battery) before working inside the computer.

7. Remove the battery (see Removing the Battery).
8. Open the computer and press the power button to ground the system board.

Flashing the BIOS

Dell™ Inspiron™ 1464 Service Manual

1. Turn on the computer.
2. Go to **support.dell.com/support/downloads**.
3. Click **Select Model**.
4. Locate the BIOS update file for your computer:

   NOTE: The Service Tag for your computer is located at the bottom of the computer.

   If you have your computer's Service Tag:

   a. Click **Enter a Service Tag**.

   b. Enter your computer's Service Tag in the **Enter a service tag:** field, click **Go**, and proceed to step 5.

   If you do not have your computer's Service Tag:

   a. Select the type of product in the **Select Your Product Family** list.

   b. Select the product brand in the **Select Your Product Line** list.

   c. Select the product model number in the **Select Your Product Model** list.

   NOTE: If you have selected a different model and want to start over again, click **Start Over** on the top right of the menu.

   d. Click **Confirm**.
5. A list of results appear on the screen. Click **BIOS**.
6. Click **Download Now** to download the latest BIOS file.
   The **File Download** window appears.
7. Click **Save** to save the file on your desktop. The file downloads to your desktop.
8. Click **Close** if the **Download Complete** window appears.
   The file icon appears on your desktop and is titled the same as the downloaded BIOS update file.
9. Double-click the file icon on the desktop and follow the instructions on the screen.

Internal Card With Bluetooth® Wireless Technology

Dell™ Inspiron™ 1464 Service Manual

- Removing the Bluetooth Card
- Replacing the Bluetooth Card

WARNING: Before working inside your computer, read the safety information that shipped with your computer. For additional safety best practices information, see the Regulatory Compliance Homepage at www.dell.com/regulatory_compliance.

CAUTION: Only a certified service technician should perform repairs on your computer. Damage due to servicing that is not authorized by Dell™ is not covered by your warranty.

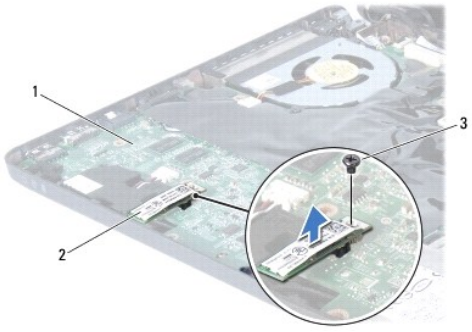
CAUTION: To avoid electrostatic discharge, ground yourself by using a wrist grounding strap or by periodically touching an unpainted metal surface.

CAUTION: To help prevent damage to the system board, remove the main battery (see Removing the Battery) before working inside the computer.

If you ordered a card with Bluetooth wireless technology with your computer, it is already installed.

Removing the Bluetooth Card

1. Follow the procedures in Before You Begin.
2. Remove the battery (see Removing the Battery).
3. Remove the optical drive (see Removing the Optical Drive).
4. Remove the module cover (see Removing the Module Cover).
5. Remove the power button panel (see Removing the Power Button Panel).
6. Remove the keyboard (see Removing the Keyboard).
7. Remove the palm rest (see Removing the Palm Rest).
8. Remove the screw that secures the Bluetooth card to the system board.
9. Lift the Bluetooth card to disconnect it from the connector on the system board.



1	system board	2	Bluetooth card
3	screw		

Replacing the Bluetooth Card

1. Follow the procedures in Before You Begin.

2. Align the connector on the Bluetooth card with the connector on the system board, and press down to connect the Bluetooth card to the system board.
3. Replace the screw that secures the Bluetooth card to the system board.
4. Replace the palm rest (see Replacing the Palm Rest).
5. Replace the keyboard (see Replacing the Keyboard).
6. Replace the power button panel (see Replacing the Power Button Panel).
7. Replace the module cover (see Replacing the Module Cover).
8. Replace the optical drive (see Replacing the Optical Drive).
9. Replace the battery (see Replacing the Battery).

△ **CAUTION: Before turning on the computer, replace all screws and ensure that no stray screws remain inside the computer. Failure to do so may result in damage to the computer.**

- Replacing the Camera Module

WARNING: Before working inside your computer, read the safety information that shipped with your computer. For additional safety best practices information, see the Regulatory Compliance Homepage at www.dell.com/regulatory_compliance.

CAUTION: Only a certified service technician should perform repairs on your computer. Damage due to servicing that is not authorized by Dell™ is not covered by your warranty.

CAUTION: To avoid electrostatic discharge, ground yourself by using a wrist grounding strap or by periodically touching an unpainted metal surface (such as a connector on the back of the computer).

CAUTION: To help prevent damage to the system board, remove the main battery (see Removing the Battery) before working inside the computer.

Removing the Camera Module

1. Follow the procedures in Before You Begin.
2. Remove the battery (see Removing the Battery).
3. Remove the display assembly (see Removing the Display Assembly).
4. Remove the display bezel (see Removing the Display Bezel).
5. Remove the display panel (see Removing the Display Panel).
6. Carefully peel the camera module off the display cover.
7. Remove the tape that secures the camera cable to the camera module.

NOTE: The color of the tape on the camera module may vary depending on your computer model.

8. Disconnect the camera cable from the camera module.

- Removing the Coin-Cell Battery
- Replacing the Coin-Cell Battery

WARNING: Before working inside your computer, read the safety information that shipped with your computer. For additional safety best practices information, see the Regulatory Compliance Homepage at www.dell.com/regulatory_compliance.

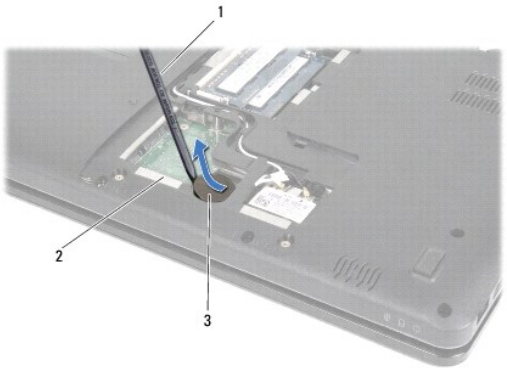
CAUTION: Only a certified service technician should perform repairs on your computer. Damage due to servicing that is not authorized by Dell™ is not covered by your warranty.

CAUTION: To avoid electrostatic discharge, ground yourself by using a wrist grounding strap or by periodically touching an unpainted metal surface.

CAUTION: To help prevent damage to the system board, remove the main battery (see Removing the Battery) before working inside the computer.

Removing the Coin-Cell Battery

1. Follow the procedures in Before You Begin.
2. Remove the battery (see Removing the Battery).
3. Remove the module cover (see Removing the Module Cover).
4. Use a plastic scribe to pry the coin-cell battery out of the battery socket on the system board.



1	plastic scribe	2	system board
3	coin-cell battery		

Replacing the Coin-Cell Battery

1. Follow the procedures in Before You Begin.
2. With the positive side up, snap the coin-cell battery into the battery socket on the system board.
3. Replace the module cover (see Replacing the Module Cover).
4. Replace the battery (see Replacing the Battery).

CAUTION: Before turning on the computer, replace all screws and ensure that no stray screws remain inside the computer. Failure to do so may result in damage to the computer.

WARNING: Before working inside your computer, read the safety information that shipped with your computer. For additional safety best practices information, see the Regulatory Compliance Homepage at www.dell.com/regulatory_compliance.

CAUTION: Only a certified service technician should perform repairs on your computer. Damage due to servicing that is not authorized by Dell™ is not covered by your warranty.

CAUTION: To avoid electrostatic discharge, ground yourself by using a wrist grounding strap or by periodically touching an unpainted metal surface (such as the back panel) on the computer.

CAUTION: To help prevent damage to the system board, remove the main battery (see Removing the Battery) before working inside the computer.

Removing the Module Cover

1. Follow the procedures in Before You Begin.
2. Remove the battery (see Removing the Battery).
3. Loosen the two captive screws that secure the module cover to the computer base.
4. Lift the module cover up at an angle and carefully disengage it from the computer base.

Processor Module

Dell™ Inspiron™ 1464 Service Manual

- Removing the Processor Module
- Replacing the Processor Module

WARNING: Before working inside your computer, read the safety information that shipped with your computer. For additional safety best practices information, see the Regulatory Compliance Homepage at www.dell.com/regulatory_compliance.

CAUTION: Only a certified service technician should perform repairs on your computer. Damage due to servicing that is not authorized by Dell™ is not covered by your warranty.

CAUTION: To avoid electrostatic discharge, ground yourself by using a wrist grounding strap or by periodically touching an unpainted metal surface (such as a connector on your computer).

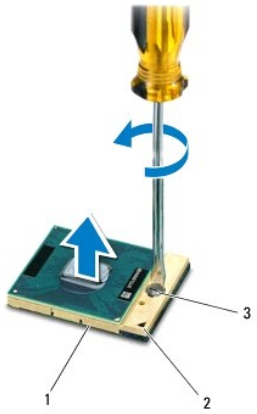
CAUTION: To prevent intermittent contact between the ZIF-socket cam screw and the processor when removing or replacing the processor, press to apply slight pressure to the center of the processor while turning the cam screw.

CAUTION: To avoid damage to the processor, hold the screwdriver so that it is perpendicular to the processor when turning the cam screw.

CAUTION: To help prevent damage to the system board, remove the main battery (see Removing the Battery) before working inside the computer.

Removing the Processor Module

1. Follow the procedures in Before You Begin.
2. Remove the battery (see Removing the Battery).
3. Follow the instructions from step 3 to step 20 in Removing the System Board.
4. Remove the processor heat sink (see Removing the Processor Heat Sink).
5. To loosen the ZIF socket, use a small, flat-blade screwdriver and rotate the ZIF-socket cam screw counterclockwise until it comes to the cam stop.



1	ZIF socket	2	pin-1 corner
3	ZIF-socket cam screw		

CAUTION: To ensure maximum cooling for the processor, do not touch the heat transfer areas on the processor thermal-cooling assembly. The oils in your skin can reduce the heat transfer capability of the thermal pads.

CAUTION: When removing the processor module, lift the module straight up. Be careful not to bend the pins on the processor module.

6. Lift the processor module from the ZIF socket.

Replacing the Processor Module

NOTE: If a new processor is installed, you will receive a new thermal-cooling assembly, which will include an affixed thermal pad, or you will receive a new thermal pad along with documentation to illustrate proper installation.

1. Follow the procedures in Before You Begin.
2. Align the pin-1 corner of the processor module with the pin-1 corner of the ZIF socket, then place the processor module.

NOTE: The pin-1 corner of the processor module has a triangle that aligns with the triangle on the pin-1 corner of the ZIF socket.

When the processor module is properly seated, all four corners are aligned at the same height. If one or more corners of the module are higher than the others, the module is not seated properly.

CAUTION: To avoid damage to the processor, hold the screwdriver perpendicular to the processor when turning the cam screw.

3. Tighten the ZIF socket by turning the cam screw clockwise to secure the processor module to the system board.
4. Replace the processor heat sink (see Replacing the Processor Heat Sink).
5. Follow the instructions from step 4 to step 24 in Replacing the System Board.

CAUTION: Before turning on the computer, replace all screws and ensure that no stray screws remain inside the computer. Failure to do so may result in damage to the computer.

Processor Heat Sink

Dell™ Inspiron™ 1464 Service Manual

- Removing the Processor Heat Sink
- Replacing the Processor Heat Sink

WARNING: Before working inside your computer, read the safety information that shipped with your computer. For additional safety best practices information, see the Regulatory Compliance Homepage at www.dell.com/regulatory_compliance.

WARNING: If you remove the processor heat sink from the computer when the heat sink is hot, do not touch the metal housing of the processor heat sink.

CAUTION: Only a certified service technician should perform repairs on your computer. Damage due to servicing that is not authorized by Dell™ is not covered by your warranty.

CAUTION: To avoid electrostatic discharge, ground yourself by using a wrist grounding strap or by periodically touching an unpainted metal surface (such as the back panel) on the computer.

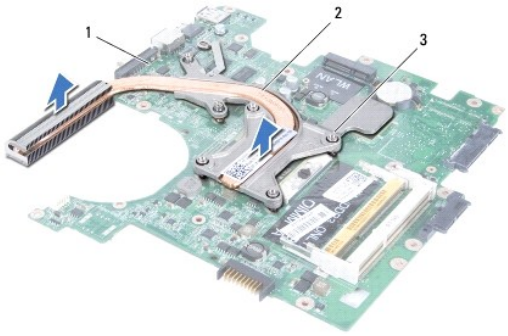
CAUTION: To help prevent damage to the system board, remove the main battery (see Removing the Battery) before working inside the computer.

Removing the Processor Heat Sink

1. Follow the procedures in Before You Begin.
2. Remove the battery (see Removing the Battery).
3. Follow the instructions from step 3 to step 20 in Removing the System Board.

NOTE: Depending on the model of your computer, the heat sink will have either four or six captive screws.

4. In sequential order, loosen the captive screws that secure the processor heat sink to the system board.
5. Remove the processor heat sink from the system board.



1	system board	2	processor heat sink
3	captive screws		

Replacing the Processor Heat Sink

NOTE: The original thermal pad can be reused if the original processor and heat sink are reinstalled together. If either the processor or heat sink is replaced, use the thermal pad provided in the kit to ensure that thermal conductivity is achieved.

NOTE: This procedure assumes that you have already removed the processor heat sink and are ready to replace it.

1. Follow the procedures in Before You Begin.
2. Align the captive screws on the processor heat sink with the screw holes on the system board and tighten the screws in sequential order (indicated on the processor heat sink).

3. Follow the instructions from step 4 to step 24 in Replacing the System Board.

CAUTION: Before turning on the computer, replace all screws and ensure that no stray screws remain inside the computer. Failure to do so may result in damage to the computer.

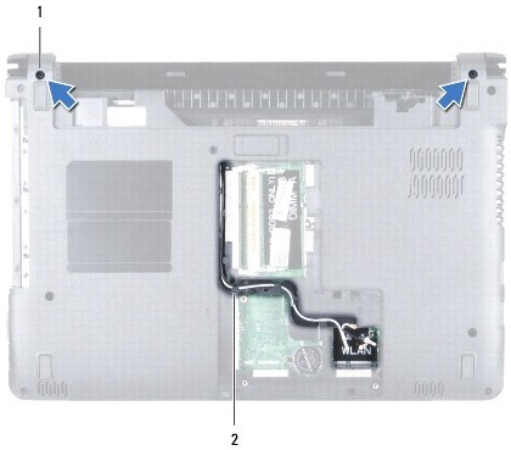
Removing the Display Assembly

1. Follow the procedures in Before You Begin.
2. Remove the battery (see Removing the Battery).
3. Remove the optical drive (see Removing the Optical Drive).
4. Remove the module cover (see Removing the Module Cover).
5. Disconnect the Mini-Card antenna cables (see step 4 in Removing the Mini-Card).
6. Note the routing of the Mini-Card antenna cables and remove them from the routing guides on the bottom of the computer.
7. Remove the two screws on the bottom of the computer that secure the display assembly to the computer base.



1	screws (2)	2	Mini-Card antenna cable routing

8. Remove the power button panel (see Removing the Power Button Panel).

9. Remove the keyboard (see Removing the Keyboard).
10. Pull the Mini-Card antenna cables up through the slot in the computer base.
11. Note the routing of the Mini-Card antenna cables and remove them from the routing guides on the palm rest.
12. Disconnect the display cable from the connector on the system board and remove the display cable grounding screw.

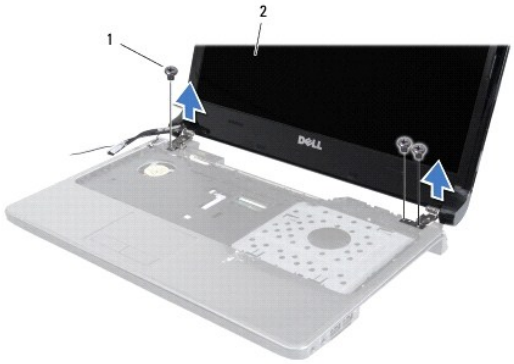
3	display cable		

13. Remove the three screws that secure the display assembly to the computer base.
14. Lift the display assembly off the alignment posts on the computer base.



1	screws (3)	2	display assembly

Replacing the Display Assembly

1. Follow the procedures in Before You Begin.
2. Use the alignment posts to place the display assembly on the computer base.
3. Replace the three screws that secure the display assembly to the computer base.
4. Connect the display cable to the connector on the system board and replace the display cable grounding screw.
5. Route the Mini-Card antenna cables through the routing guides on the palm rest.
6. Thread the Mini-Card antenna cables through the slot in the computer base.
7. Turn the computer over and replace the two screws that secure the display assembly to the computer base.

8. Route and connect the Mini-Card antenna cables (see step 5 in Replacing the Mini-Card).
9. Replace the module cover (see Replacing the Module Cover).
10. Replace the keyboard (see Replacing the Keyboard).
11. Replace the power button panel (see Replacing the Power Button Panel).
12. Replace the optical drive (see Replacing the Optical Drive).
13. Replace the battery (see Replacing the Battery).

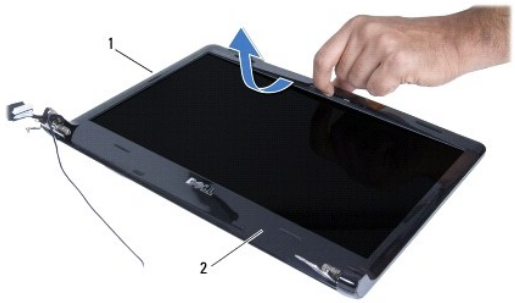
CAUTION: Before turning on the computer, replace all screws and ensure that no stray screws remain inside the computer. Failure to do so may result in damage to the computer.

Display Bezel

Removing the Display Bezel

CAUTION: The display bezel is extremely fragile. Be careful when removing it to prevent damaging the bezel.

1. Follow the procedures in Before You Begin.
2. Remove the display assembly (see Removing the Display Assembly).
3. Carefully pull up around the inside edges of the display bezel to remove it from the display assembly.



1	display assembly	2	display bezel

Replacing the Display Bezel

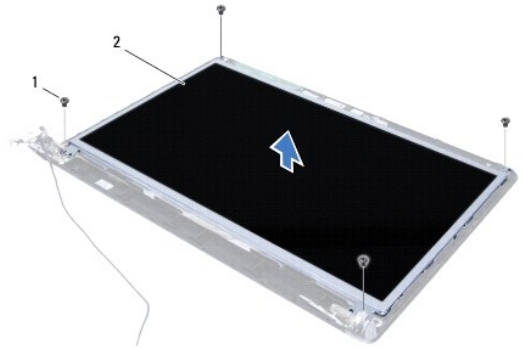
1. Follow the procedures in Before You Begin.
2. Ensure the display cable and Mini-Card antenna cables run through the notch on the left hinge to keep the cables clear of the display bezel.
3. Place the display bezel over the hinges first.
4. Gently press down around the display bezel to snap it into place.
5. Replace the display assembly (see Replacing the Display Assembly).
6. Replace the battery (see Replacing the Battery).

CAUTION: Before turning on the computer, replace all screws and ensure that no stray screws remain inside the computer. Failure to do so may result in damage to the computer.

Display Panel

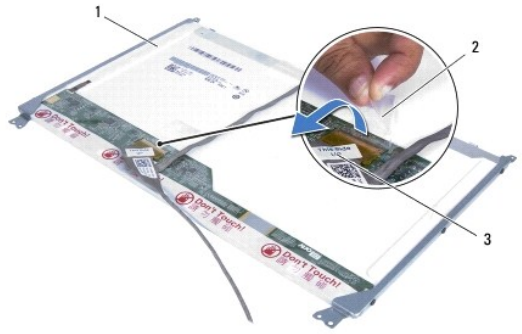
Removing the Display Panel

1. Follow the procedures in Before You Begin.
2. Remove the display assembly (see Removing the Display Assembly).
3. Remove the display bezel (see Removing the Display Bezel).
4. Remove the four screws that secure the display panel to the display cover.
5. Lift the display panel and turn it over on a flat, clean surface.



1	screws (4)	2	display panel

6. Peel the tape on the display cable and disconnect the display cable from the connector on the display panel.



1	display panel	2	tape
3	display cable		

Replacing the Display Panel

1. Follow the procedures in Before You Begin.
2. Connect the display cable to the connector on the back of the display panel, and replace the tape securing the display cable to the display panel.
3. Use the alignment posts to place the display panel on the display cover.
4. Replace the four screws that secure the display panel to the display cover.

5. Replace the display bezel (see Replacing the Display Bezel).
6. Replace the display assembly (see Replacing the Display Assembly).
7. Replace the battery (see Replacing the Battery).

CAUTION: Before turning on the computer, replace all screws and ensure that no stray screws remain inside the computer. Failure to do so may result in damage to the computer.

Display Cable

Removing the Display Cable

1. Follow the procedures in Before You Begin.
2. Remove the display assembly (see Removing the Display Assembly).
3. Remove the display bezel (see Removing the Display Bezel).
4. Remove the display panel (see Removing the Display Panel).
5. Remove the display cable from the routing guides on the display cover.

Replacing the Display Cable

1. Follow the procedures in Before You Begin.
2. Route the display cable in the routing guides on the display cover.
3. Replace the display panel (see Replacing the Display Panel).
4. Replace the display bezel (see Replacing the Display Bezel).
5. Replace the display assembly (see Replacing the Display Assembly).
6. Replace the battery (see Replacing the Battery).

CAUTION: Before turning on the computer, replace all screws and ensure that no stray screws remain inside the computer. Failure to do so may result in damage to the computer.

Display Panel Brackets

Removing the Display Panel Brackets

1. Follow the procedures in Before You Begin.
2. Remove the display assembly (see Removing the Display Assembly).
3. Remove the display bezel (see Removing the Display Bezel).
4. Remove the display panel (see Removing the Display Panel).
5. Remove the six screws that secure the display panel brackets to the display panel.

1	display panel	2	screws (6)

Hard Drive

Dell™ Inspiron™ 1464 Service Manual

- Removing the Hard Drive
- Replacing the Hard Drive

WARNING: Before working inside your computer, read the safety information that shipped with your computer. For additional safety best practices information, see the Regulatory Compliance Homepage at www.dell.com/regulatory_compliance.

WARNING: If you remove the hard drive from the computer when the drive is hot, do not touch the metal housing of the hard drive.

CAUTION: Only a certified service technician should perform repairs on your computer. Damage due to servicing that is not authorized by Dell is not covered by your warranty.

CAUTION: To prevent data loss, turn off your computer (see Turning Off Your Computer) before removing the hard drive. Do not remove the hard drive while the computer is On or in Sleep state.

CAUTION: To help prevent damage to the system board, remove the main battery (see Removing the Battery) before working inside the computer.

CAUTION: Hard drives are extremely fragile. Exercise care when handling the hard drive.

NOTE: Dell does not guarantee compatibility or provide support for hard drives from sources other than Dell.

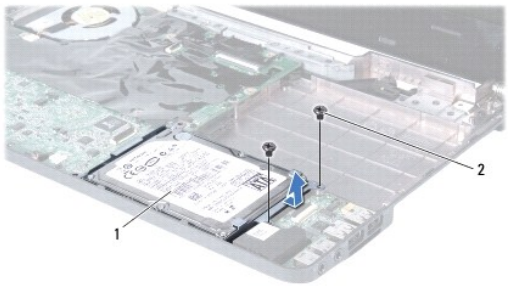
NOTE: If you are installing a hard drive from a source other than Dell, you need to install an operating system, drivers, and utilities on the new hard drive (see the *Dell Technology Guide*).

Removing the Hard Drive

1. Follow the procedures in Before You Begin.
2. Remove the battery (see Removing the Battery).
3. Remove the optical drive (see Removing the Optical Drive).
4. Remove the module cover (see Removing the Module Cover).
5. Remove the power button panel (see Removing the Power Button Panel).
6. Remove the keyboard (see Removing the Keyboard).
7. Remove the palm rest (see Removing the Palm Rest).
8. Disconnect the USB/audio cable from the connector on the USB/audio board (see step 8 in Removing the USB/Audio Board).
9. Remove the two screws that secure the hard drive assembly to the computer base.

CAUTION: When the hard drive is not in the computer, store it in protective antistatic packaging (see "Protecting Against Electrostatic Discharge" in the safety instructions that shipped with your computer).

10. Slide the hard drive assembly to the right to disconnect it from the connector on the system board, then lift the hard drive assembly out of the computer base.



1	hard drive assembly	2	screws (2)

11. Remove the four screws that secure the hard drive to the hard drive bracket.
12. Lift the hard drive out of the hard drive bracket.

1	screws (4)	2	hard drive
3	hard drive bracket		

Replacing the Hard Drive

1. Follow the procedures in Before You Begin.
2. Remove the new hard drive from its packaging.

   Save the original packaging for storing or shipping the hard drive.
3. Place the hard drive in the hard drive bracket.
4. Replace the four screws that secure the hard drive bracket to the hard drive.
5. Place the hard drive assembly in the computer base and push to connect the hard drive assembly to the connector on the system board.
6. Replace the two screws that secure the hard drive assembly to the computer base.
7. Connect the USB/audio cable to the connector on the USB/audio board (see step 5 in Replacing the USB/Audio Board).
8. Replace the palm rest (see Replacing the Palm Rest).
9. Replace the keyboard (see Replacing the Keyboard).
10. Replace the power button panel (see Replacing the Power Button Panel).
11. Replace the module cover (see Replacing the Module Cover).
12. Replace the optical drive (see Replacing the Optical Drive).
13. Replace the battery (see Replacing the Battery).

CAUTION: Before turning on the computer, replace all screws and ensure that no stray screws remain inside the computer. Failure to do so may result in damage to the computer.

14. Install the operating system for your computer, as needed. See "Restoring Your Operating System" in the *Setup Guide*.
15. Install the drivers and utilities for your computer, as needed. For more information, see the *Dell Technology Guide*.

Memory Module(s)

Dell™ Inspiron™ 1464 Service Manual

- Removing the Memory Module(s)
- Replacing the Memory Module(s)

WARNING: Before working inside your computer, read the safety information that shipped with your computer. For additional safety best practices information, see the Regulatory Compliance Homepage at www.dell.com/regulatory_compliance.

CAUTION: Only a certified service technician should perform repairs on your computer. Damage due to servicing that is not authorized by Dell™ is not covered by your warranty.

CAUTION: To avoid electrostatic discharge, ground yourself by using a wrist grounding strap or by periodically touching an unpainted metal surface (such as a connector on the back of the computer).

CAUTION: To help prevent damage to the system board, remove the main battery (see Removing the Battery) before working inside the computer.

You can increase your computer memory by installing memory modules on the system board. See "Basic Specifications" in your *Setup Guide* and *Comprehensive Specifications* at **support.dell.com/manuals** for information on the memory supported by your computer.

NOTE: Memory modules purchased from Dell™ are covered under your computer warranty.

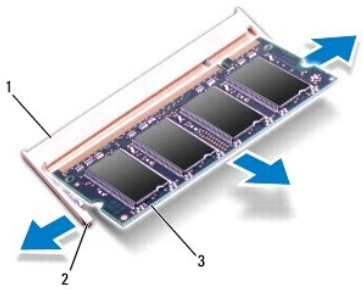
Your computer has two SODIMM connectors that you can access from the bottom of your computer.

Removing the Memory Module(s)

1. Follow the procedures in Before You Begin.
2. Remove the battery (see Removing the Battery).
3. Remove the module cover (see Removing the Module Cover).

CAUTION: To prevent damage to the memory module connector, do not use tools to spread the memory module securing clips.

4. Use your fingertips to carefully spread apart the securing clips on each end of the memory module connector until the memory module pops up.
5. Remove the memory module from the memory module connector.



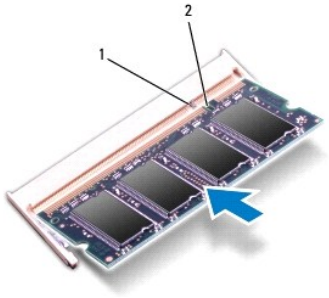
1	memory module connector	2	securing clips (2)
3	memory module		

Replacing the Memory Module(s)

CAUTION: If you need to install memory modules in two connectors, install a memory module in the lower connector before you install a memory module in the upper connector.

1. Follow the procedures in Before You Begin.
2. Align the notch in the memory module with the tab in the memory module connector.
3. Slide the memory module firmly into the slot at a 45-degree angle, and press the memory module down until it clicks into place. If you do not hear the click, remove the memory module and reinstall it.

NOTE: If the memory module is not installed properly, the computer may not boot.



1	tab	2	notch

4. Replace the module cover (see Replacing the Module Cover).
5. Replace the battery (see Replacing the Battery). Connect the AC adapter to your computer and an electrical outlet.

CAUTION: Before turning on the computer, replace all screws and ensure that no stray screws remain inside the computer. Failure to do so may result in damage to the computer.

6. Turn on the computer.

As the computer boots, it detects the memory module(s) and automatically updates the system configuration information.

Confirm the amount of memory installed in the computer:

In Microsoft Windows Vista®, click **Start** → **Help and Support**→ **Dell System Information**.

In Microsoft Windows® 7, click **Start** → **Control Panel**→ **System and Security**→ **System**.

Wireless Mini-Card

Dell™ Inspiron™ 1464 Service Manual

- Removing the Mini-Card
- Replacing the Mini-Card

WARNING: Before working inside your computer, read the safety information that shipped with your computer. For additional safety best practices information, see the Regulatory Compliance Homepage at www.dell.com/regulatory_compliance.

CAUTION: Only a certified service technician should perform repairs on your computer. Damage due to servicing that is not authorized by Dell™ is not covered by your warranty.

CAUTION: To avoid electrostatic discharge, ground yourself by using a wrist grounding strap or by periodically touching an unpainted metal surface.

CAUTION: To help prevent damage to the system board, remove the main battery (see Removing the Battery) before working inside the computer.

CAUTION: When the Mini-Card is not in the computer, store it in protective antistatic packaging (see "Protecting Against Electrostatic Discharge" in the safety instructions that shipped with your computer).

NOTE: Dell does not guarantee compatibility or provide support for Mini-Cards from sources other than Dell.

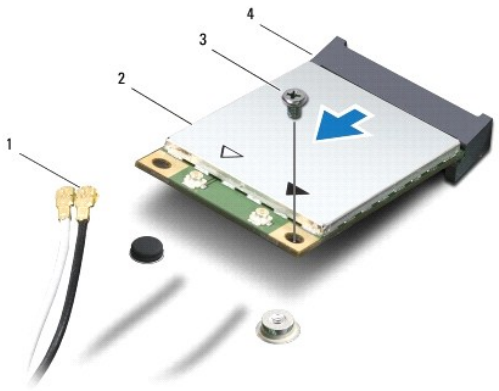
NOTE: Depending on the configuration of the computer when it was sold, the Mini-Card slot may or may not have a Mini-Card installed in the slot.

If you ordered a wireless Mini-Card with your computer, the card is already installed.

Your computer supports one half Mini-Card slot for the Wireless Local Area Network (WLAN) Mini-Card.

Removing the Mini-Card

1. Follow the procedures in Before You Begin.
2. Remove the battery (see Removing the Battery).
3. Remove the module cover (see Removing the Module Cover).
4. Disconnect the antenna cables from the Mini-Card.
5. Remove the screw that secures the Mini-Card to the system board.
6. Lift the Mini-Card out of the connector on the system board.



1	antenna cables (2)	2	Mini-Card
3	screw	4	connector on the system board

Replacing the Mini-Card

1. Follow the procedures in Before You Begin.
2. Remove the new Mini-Card from its packaging.

CAUTION: Use firm and even pressure to slide the card into place. If you use excessive force, you may damage the connector.

CAUTION: The connectors are keyed to ensure correct insertion. If you feel resistance, check the connectors on the card and on the system board, and realign the card.

CAUTION: To avoid damage to the Mini-Card, never place cables under the card.

3. With the label on the Mini-Card facing up, insert it at a 45-degree angle into the appropriate connector on the system board.
4. Press the other end of the Mini-Card down into the slot on the system board and replace the screw that secures the Mini-Card to the system board.
5. Connect the white antenna cable to the main WLAN connector labeled with a white triangle. Connect the black antenna cable to the auxiliary WLAN connector labeled with a black triangle.
6. Replace the module cover (see Replacing the Module Cover).
7. Replace the battery (see Replacing the Battery).

CAUTION: Before turning on the computer, replace all screws and ensure that no stray screws remain inside the computer. Failure to do so may result in damage to the computer.

8. Install the drivers and utilities for your computer, as required. For more information, see the *Dell Technology Guide*.

NOTE: If you are installing a communication card from a source other than Dell, you must install the appropriate drivers and utilities. For more generic driver information, see the *Dell Technology Guide*.
