Installing Your Dell™ Latitude ON™ Flash Card

1. Disconnect the AC adapter and remove the battery.

2. Remove the back cover to access the FCM or WWAN Mini Card slot to install the Latitude ON Flash card.

NOTE: Power connector and battery location varies by computer model. For more information, see the documentation that shipped with your computer.

NOTE: The FCM and WWAN Mini Card slot location varies by computer model. For more information, see the documentation on the Dell Support website at support.dell.com.

WARNING: Before performing any of the steps listed below, read and follow the safety information that shipped with your computer.

CAUTION: Do not install or remove the Dell Latitude ON Flash card when your computer is turned on.

CAUTION: Electrical and electronic devices are sensitive to electrostatic discharge (ESD). Exposure can harm your device and potentially cause it to function improperly. Ensure that you are properly grounded before handling your Dell Latitude ON Card.

WARNING: If the computer is turned on while installing your Dell Latitude ON Flash card, your computer may lock up and you will lose all work performed on the computer. If this occurs, you will have to re-start the computer to return to the previous screen.

CAUTION: Do not install or remove the Dell Latitude ON Flash card when your computer is turned on.

CAUTION: Electrical and electronic devices are sensitive to electrostatic discharge (ESD). Exposure can harm your device and potentially cause it to function improperly. Ensure that you are properly grounded before handling your Dell Latitude ON Card.
