Notes, Cautions, and Warnings

A NOTE indicates important information that helps you make better use of your computer.

A CAUTION indicates potential damage to hardware or loss of data if instructions are not followed.

A WARNING indicates a potential for property damage, personal injury, or death.

If you purchased a Dell™ n Series computer, any references in this document to Microsoft® Windows® operating systems are not applicable.

June 2010 Rev. A00
Removing the Access Panel

1. Follow the procedures in Before Working Inside Your Computer.
2. Loosen the captive screw that secures the access panel to the base of the computer.
3. Slide the access panel towards the front of the computer.
4. Lift the access panel up and away from the computer.

Replacing the Access Panel

To replace the access panel, perform the above steps in reverse order.
WARNING: Before working inside your computer, read the safety information that shipped with your computer. For additional safety best practices information, see the Regulatory Compliance Homepage at www.dell.com/regulatory_compliance.

Removing the Battery

1. Follow the procedures in Before Working Inside Your Computer.
2. Slide the battery release latches to the unlock position.
3. Slide and remove the battery from the computer.

Replacing the Battery

To replace the battery, perform the above steps in reverse order.
Removing the Bottom Chassis Assembly

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the battery.
3. Remove the access panel.
4. Remove the subscriber identity module (SIM) card.
5. Remove the optical drive.
6. Remove the keyboard.
7. Remove the coin-cell battery.
8. Remove the hinge covers.
9. Remove the display Assembly.
10. Remove the hard drive.
11. Remove the Latitude ON™ Flash card.
12. Remove the wireless wide area network (WWAN) card.
13. Remove the wireless local area network (WLAN) card.
14. Remove the heat sink and fan assembly.
15. Remove the Processor.
16. Remove the palm rest assembly.
17. Remove the Bluetooth® card.
18. Remove the Express Card Board.
19. Remove the SD Media Board.
20. Remove the I/O Port Card.

Replacing the Bottom Chassis Assembly

To replace the bottom chassis assembly, perform the above steps in reverse order.

NOTE: You may need to install Adobe™ Flash Player™ from Adobe.com in order to view the illustrations below.
Overview

Use System Setup as follows:

- To change the system configuration information after you add, change, or remove any hardware in your computer
- To set or change a user-selectable option such as the user password
- To read the current amount of memory or set the type of hard drive installed

Before you use System Setup, it is recommended that you write down the System Setup screen information for future reference.

⚠ CAUTION: Unless you are an expert computer user, do not change the settings for this program. Certain changes can cause your computer to work incorrectly.

Entering System Setup

1. Turn on (or restart) your computer.
2. When the blue DELL™ logo is displayed, press <F2> immediately.

Boot Menu

The Boot menu lists all the valid boot devices for your computer. Use the Boot menu to:

- Run diagnostics on your computer
- Enter system setup
- Change the boot sequence without changing the boot sequence permanently in the system setup.

To access the Boot menu:

1. Turn on (or restart) your computer.
2. When the blue DELL™ logo is displayed, press <F12> immediately.

Navigation Keystrokes

Use the following keystrokes to navigate System Setup screens.

<table>
<thead>
<tr>
<th>Navigation</th>
<th>Keystroke(s)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Expand and collapse field</td>
<td>&lt;Enter&gt;, left- or right-arrow key, or +/-</td>
</tr>
<tr>
<td>Expand or collapse all fields</td>
<td>&lt;&gt;</td>
</tr>
<tr>
<td>Exit BIOS</td>
<td>&lt;Esc&gt;—Remain in Setup, Save/Exit, Discard/Exit</td>
</tr>
<tr>
<td>Change a setting</td>
<td>Left or right-arrow key</td>
</tr>
<tr>
<td>Select field to change</td>
<td>&lt;Enter&gt;</td>
</tr>
<tr>
<td>Cancel modification</td>
<td>&lt;Esc&gt;</td>
</tr>
<tr>
<td>Reset defaults</td>
<td>&lt;Alt&gt;&lt;F&gt; or Load Defaults menu option</td>
</tr>
</tbody>
</table>

System Setup Menu Options

The following tables describe the menu options for the System Setup program.

<table>
<thead>
<tr>
<th>General</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>This section lists the primary hardware features of your computer. There are no configurable options in this section.</td>
<td></td>
</tr>
<tr>
<td>System Information</td>
<td></td>
</tr>
<tr>
<td>- BIOS Version</td>
<td></td>
</tr>
<tr>
<td>- Service Tag</td>
<td></td>
</tr>
<tr>
<td>- Asset Tag</td>
<td></td>
</tr>
<tr>
<td>- Ownership Tag</td>
<td></td>
</tr>
<tr>
<td>Memory Information</td>
<td></td>
</tr>
</tbody>
</table>
### System Information
- Memory Installed
- Memory Available
- Memory Speed
- Memory Channel Mode
- Memory Technology
- DIMM A Size
- DIMM B Size

#### Processor Information
- Processor Type
- Core Count
- Processor ID
- Current Clock Speed

#### Device Information
- Primary Hard Drive
- System eSATA Device
- Dock eSATA Device
- Video Controller
- Video BIOS Version
- Video Memory
- Panel Type
- Native Resolution
- Audio Controller
- Modem Controller
- Wi-Fi Device
- Cellular Device
- Bluetooth Device

### Battery Information
Displays the status of the battery and the type of AC adapter connected to the computer.

### Boot Sequence
Specifies the order in which the computer attempts to find an operating system.
- CardBus NIC
- Diskette drive
- USB Storage Device
- Internal HDD
- CD/DVD/CD-RW Drive
- Built-in EFI shell
- Onboard NIC

### Date/Time
Displays current date and time settings.

---

### NOTE: System Configuration contains options and settings related to integrated system devices. Depending on your computer and installed devices, the items listed in this section may or may not appear.

**Default setting:** All enabled.

### System Configuration

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Integrated NIC</td>
<td>Allows you to configure the integrated network controller. The options are:</td>
</tr>
<tr>
<td></td>
<td>Disabled, Enabled, and Enabled w/PXE.</td>
</tr>
<tr>
<td>Parallel Port</td>
<td>Allows you to enable or disable the parallel ports on the docking station. The options are: Disabled, AT, PS2, and ECP.</td>
</tr>
<tr>
<td>Serial Port</td>
<td>Allows you to avoid resource conflicts between devices by disabling or remapping the address of the port. The options are: Disabled, COM1, COM2, COM3, and COM4.</td>
</tr>
<tr>
<td>SATA Operation</td>
<td>Allows you to configure the operating mode of the internal SATA hard drive controller. The options are: Disabled, ATA, and AHCI</td>
</tr>
<tr>
<td>Miscellaneous Devices</td>
<td>Allows you to enable or disable the following devices:</td>
</tr>
<tr>
<td></td>
<td>- Internal Modem</td>
</tr>
<tr>
<td></td>
<td>- Module Bay</td>
</tr>
<tr>
<td></td>
<td>- Express Card</td>
</tr>
<tr>
<td></td>
<td>- Hard Drive Free Fall Protection</td>
</tr>
<tr>
<td></td>
<td>- External USB Port</td>
</tr>
<tr>
<td></td>
<td>- Microphone</td>
</tr>
<tr>
<td></td>
<td>- eSATA Ports</td>
</tr>
<tr>
<td></td>
<td>- Media Card, PC Card and 1394</td>
</tr>
<tr>
<td>USB PowerShare</td>
<td>Allows you to charge external devices using the stored system battery power through the USB PowerShare port on the notebook, even while the notebook is turned off.</td>
</tr>
</tbody>
</table>

### Video

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ambient Light Sensor</td>
<td>Allows your system to automatically change the brightness of your system’s LCD panel based on the amount of light in the environment.</td>
</tr>
<tr>
<td>LCD Brightness</td>
<td>Allows you to set the display brightness depending up on the power source (On Battery and On AC).</td>
</tr>
</tbody>
</table>

### Security

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Admin Password</td>
<td>Allows you to set, change, or delete the administrator (admin) password. When set, the admin password enables several security features including:</td>
</tr>
<tr>
<td></td>
<td>- Restricts changes to the settings in Setup</td>
</tr>
<tr>
<td></td>
<td>- Restricts the boot devices listed in the &lt;F12&gt; Boot Menu to those enabled in the &quot;Boot Sequence&quot; field</td>
</tr>
<tr>
<td></td>
<td>- Prohibits changes to the owner and asset tags</td>
</tr>
<tr>
<td></td>
<td>- Substitutes for the system and hard drive password</td>
</tr>
</tbody>
</table>

**NOTE:** You must set the admin password before you set the system or hard drive password.
<table>
<thead>
<tr>
<th>Feature</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>System Password</td>
<td>Allows you to enable or disable changes to the System and hard drive passwords when the admin password is set.</td>
</tr>
<tr>
<td>Internal HDD Password</td>
<td>This field lets you set, change, or delete the password on the system's internal hard disk drive (HDD). Successful changes take place immediately and require a system restart. The HDD password travels with the hard drive, so the HDD is protected even when installed in another system.</td>
</tr>
<tr>
<td>Password Bypass</td>
<td>Allows you to bypass the system and internal hard drive password prompts when your computer restarts or resumes from standby. You can set Password Bypass to: Disabled, Reboot Bypass, Resume Bypass, and Reboot &amp; Resume Bypass.</td>
</tr>
<tr>
<td>TPM Security</td>
<td>Allows you to enable or disable the Trusted Platform Module (TPM) on the computer. When TPM is enabled, the following options are available: 1. Deactivate—Disables the TPM. The TPM restricts access to the stored owner information and does not execute any commands that use TPM resources. 2. Activate—Enables and activates the TPM. 3. Clear—Clears the owner information stored in the TPM.</td>
</tr>
<tr>
<td>Computrace®</td>
<td>Allows you to enable or disable the optional Computrace software. The options are Deactivate, Disable, and Activate.</td>
</tr>
<tr>
<td>CPU XD Support</td>
<td>Allows you to enable or disable the Execute Disable mode of the processor. Default setting: Enabled</td>
</tr>
<tr>
<td>Non-Admin Setup Changes</td>
<td>Determines whether changes to the setup option are permitted when an administrator password is set. If disabled the setup option is locked by the admin password. It cannot be modified unless setup is unlocked. Setup is unlocked when there is no admin password, or when the admin password has been entered. When enabled, the device setting can be modified even when other setup options are locked by the admin password. Default setting: Disabled</td>
</tr>
</tbody>
</table>

### Performance

<table>
<thead>
<tr>
<th>Feature</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Multi Core Support</td>
<td>Enables or disables multi-core support for the processor.</td>
</tr>
<tr>
<td>HDD Acoustic Mode</td>
<td>Allows you to optimise the performance and acoustic noise level of the hard drive.</td>
</tr>
<tr>
<td>Intel® SpeedStep™</td>
<td>Enables or disables the Intel SpeedStep feature.</td>
</tr>
<tr>
<td>Intel® TurboBoost™</td>
<td>Enables or disables the Intel TurboBoost feature.</td>
</tr>
</tbody>
</table>

### Power Management

<table>
<thead>
<tr>
<th>Feature</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Wake on AC</td>
<td>Allows you to enable or disable the computer from turning on automatically when an AC adapter is connected.</td>
</tr>
<tr>
<td>Auto On Time</td>
<td>Allows you to set the time at which the computer must turn on automatically. You can set the of days, if any, when you would like the system to turn on automatically. The settings are Disabled, Everyday, or Weekdays. Default setting: Off</td>
</tr>
<tr>
<td>USB Wake Support</td>
<td>Allows you to enable or disable the ability of USB devices to wake the computer from Standby. This feature is only functional when the AC power adapter is connected. If the AC power adapter is removed during Standby, the BIOS will remove power from all of the USB ports to conserve battery power.</td>
</tr>
<tr>
<td>Wake on LAN</td>
<td>Allows the computer to turn on by a special LAN signal or from Hibernate state when triggered by a special wireless LAN signal. Wake-up from the Standby state is unaffected by this setting and must be enabled in the operating system. 1. Disabled—Do not allow the system to power on when it receives a wake-up signal from the LAN or wireless LAN. 2. LAN Only—Allow the system to be powered on by special LAN signals. The factory default setting is Disabled.</td>
</tr>
<tr>
<td>ExpressCharge</td>
<td>Allows you to enable or disable the ExpressCharge feature. Note: ExpressCharge may not be available for all batteries.</td>
</tr>
<tr>
<td>Charger Behaviour</td>
<td>Allows you to enable or disable the battery charger. If disabled, the battery will not lose power when the system is connected to an AC adapter but it will not charge either. Default setting: Enabled</td>
</tr>
</tbody>
</table>

### POST Behaviour

<table>
<thead>
<tr>
<th>Feature</th>
<th>Description</th>
</tr>
</thead>
</table>
### Adapter Warnings
Allows you to enable or disable the BIOS warning messages when you use certain power adapters. The BIOS displays these messages if you attempt to use a power adapter that has too little capacity for your configuration.

The factory default setting is **Enabled**.

### Keypad (Embedded)
Allows you to select one of two methods to enable the keypad that is embedded in the internal keyboard.

- **Fn Key Only** — The keypad is only enabled when you hold down the <Fn> key.
- **By Num Lk** — The keypad is enabled when (1) the Num Lock LED is on and (2) no external keyboard is attached. Note that the system might not notice immediately when an external keyboard is detached.

**NOTE:** When Setup is running, this field has no effect—Setup works in the **Fn Key Only** mode.

Default setting: **Fn Key Only**.

### Mouse/Touchpad
Determines how the system handles mouse and the touchpad input.

Default setting: **Touchpad/PS-2 Mouse**.

### Numlock LED
Allows you to enable or disable the Num Lock LED when the computer boots.

Default setting: **Enabled**.

### USB Emulation
Defines how the BIOS handles the USB devices. USB emulation is always enabled during POST.

The factory default setting is **Enabled**.

### Fn Key Emulation
Allows you to use the <Scroll Lock> key on an external PS/2 keyboard the same way you use the <Fn> key on the computer's internal keyboard.

**NOTE:** USB keyboards cannot emulate the <Fn> key if you are running an ACPI operating system such as Microsoft® Windows® XP. USB keyboards will only emulate the <Fn> key in non-ACPI mode (e.g., when you are running a DOS).

Default setting: **Enabled**.

### Fast Boot
Allows you to enable or disable the Fast Boot feature. The following options are available:

- **Minimal** — Boot quickly unless the BIOS has been updated, memory changed, or the previous POST did not complete.
- **Thorough** — Do not skip any steps in the boot process.
- **Auto** — Allow the operating system to control this setting (this works only when the operating system supports Simple Boot Flag).

Default setting: **Minimal**.

### Intel Fast Call for Help
Used in conjunction with iAMT 4.0. Allows you to initiate contact with a management console while residing outside of the corporate infrastructure (i.e. remote location, behind a firewall or NAT, etc.) Use the check box to enable / disable this feature.

Default setting: **Disabled**.

### Virtualization Support
<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Virtualization</td>
<td>Specifies whether a Virtual Machine Monitor (VMM) can utilize the additional hardware capabilities provided by Intel Virtualization Technology. Default setting: <strong>Enabled</strong>.</td>
</tr>
<tr>
<td>VT for Direct I/O</td>
<td>Specifies whether a Virtual Machine Monitor (VMM) can utilize the additional hardware capabilities provided by Intel Virtualization Technology for Direct I/O. Default setting: <strong>Disabled</strong>.</td>
</tr>
<tr>
<td>Trusted Execution</td>
<td>Specifies whether a Measured Virtual Machine Monitor (MVMM) can utilize the additional hardware capabilities provided by Intel Trusted Execution Technology. Default setting: <strong>Disabled</strong>.</td>
</tr>
</tbody>
</table>

### Wireless
<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Wireless Switch</td>
<td>Allows you to choose the wireless devices that can be controlled by the wireless switch.</td>
</tr>
<tr>
<td>Wireless Devices</td>
<td>Allows you to enable or disable the following internal wireless devices: <strong>WWAN, WLAN, and Bluetooth</strong>.</td>
</tr>
</tbody>
</table>

### Maintenance
<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Service Tag</td>
<td>Displays your computer's Service Tag. If for some reason the Service Tag was not already set, you would be able to use this field to set it. If a Service Tag has not been set for this computer, the computer will automatically bring up this screen when you enter the BIOS. You will be prompted to enter the Service Tag.</td>
</tr>
<tr>
<td>Asset Tag</td>
<td>Allows you to create a system Asset Tag. The field can only be updated if the Asset Tag is not already set.</td>
</tr>
</tbody>
</table>

### System Logs
<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>

<td>Allows you to view and clear BIOS POST events. It includes the date and time of the event as well as the LED code.</td>
</tr>
<tr>
<td>DellDiag Events</td>
<td>Allows you to view the diagnostic results from Dell Diagnostics and PSA. It includes the time and date, the diagnostic and version which was run and the resulting code.</td>
</tr>
<tr>
<td>Thermal Events</td>
<td>Allows you to view and clear thermal events. It includes the date and time as well as the name of the event.</td>
</tr>
<tr>
<td>----------------</td>
<td>--------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Power Events</td>
<td>Allows you to view and clear power events. It includes the date and time of the event as well as the power state and reason.</td>
</tr>
<tr>
<td>BIOS Progress Events</td>
<td>Allows you to view and clear BIOS Progress events. It includes the date and time of the event as well as the power state.</td>
</tr>
</tbody>
</table>
Removing the Bluetooth Card

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the battery.
3. Remove the access panel.
4. Remove the optical drive.
5. Remove the keyboard.
6. Remove the hinge covers.
7. Remove the palm rest assembly.
8. Remove the display assembly.
9. Remove the screw that secures the Bluetooth® card to the system board.
10. Disconnect the Bluetooth cable from its connector on the system board and remove the Bluetooth card from the computer.
11. Disconnect the Bluetooth cable from the Bluetooth card.

Replacing the Bluetooth Card

To replace the Bluetooth card, perform the above steps in reverse order.
WARNING: Before working inside your computer, read the safety information that shipped with your computer. For additional safety best practices information, see the Regulatory Compliance Homepage at www.dell.com/regulatory_compliance.

Removing the Camera and Microphone

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the battery.
3. Remove the access panel.
4. Remove the hinge covers.
5. Remove the display assembly.
6. Remove the display bezel.
7. Loosen the captive screw that secures the camera and microphone to the display panel.
8. Disconnect the data cable from the camera and microphone and remove lift the camera and microphone up and away from the display panel.

Replacing the Camera and Microphone

To replace the camera and microphone, perform the above steps in reverse order.
Removing the Coin-Cell Battery

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the battery.
3. Remove the access panel.
4. Disconnect the coin-cell battery cable from its connector on the system board.
5. Lift the coin-cell battery up and away from the computer.

Replacing the Coin-Cell Battery

To replace the coin-cell battery, perform the above steps in reverse order.
Removing the DC-In Port

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the battery.
3. Remove the access panel.
4. Remove the subscriber identity module (SIM) card.
5. Remove the optical drive.
6. Remove the keyboard.
7. Remove the coin-cell battery.
8. Remove the hinge covers.
9. Remove the display assembly.
10. Remove the hard drive.
11. Remove the Latitude ON™ Flash card.
12. Remove the wireless wide area network (WWAN) card.
13. Remove the wireless local area network (WLAN) card.
14. Remove the heat sink and fan assembly.
15. Remove the processor.
16. Remove the palm rest assembly.
17. Remove the Bluetooth® card.
18. Remove the ExpressCard board.
19. Remove the SD card board.
20. Remove the system board.
21. Remove the I/O port card.
22. Release the DC-In port from its routing guides on the chassis.
23. Lift the DC-In port up and remove it from the chassis.

Replacing the DC-In Port

To replace the DC-In port, perform the above steps in reverse order.
Device Status Lights

- Turns on when you turn on the computer and blinks when the computer is in a power management mode.
- Turns on when the computer reads or writes data.
- Turns on steadily or blinks to indicate battery charge status.
- Turns on when wireless networking is enabled.
- Turns on when a card with Bluetooth® wireless technology is enabled. To turn off only the Bluetooth wireless technology function, right-click the icon in the system tray and select Disable Bluetooth Radio.

Battery Status Lights

If the computer is connected to an electrical outlet, the battery light operates as follows:

- Alternately blinking amber light and blue light — An unauthenticated or unsupported, non-Dell AC adapter is attached to your laptop.
- Constantly blinking amber light — Fatal battery failure with AC adapter present.
- Light off — Battery in charge mode with AC adapter present.
- Blue light on — Battery in charge mode with AC adapter present.

Battery Charge and Health

To check the battery charge, press and release the status button on the battery charge gauge to illuminate the charge-level lights. Each light represents approximately 20 percent of the total battery charge. For example, if four lights are on, the battery has 80 percent of its charge remaining. If no lights appear, the battery has no charge.

To check battery health using the charge gauge, press and hold the status button on the battery charge gauge for at least 3 seconds. If no lights appear, the battery is in good condition and more than 80 percent of its original charge capacity remains. Each light represents incremental degradation. If five lights appear, less than 60 percent of the charge capacity remains, and you should consider replacing the battery.

Keyboard Status Lights

The green lights located above the keyboard indicate the following:

- Turns on when the numeric keypad is enabled.
- Turns on when the Caps Lock function is enabled.
- Turns on when the Scroll Lock function is enabled.

LED Error Codes

The following table shows the possible LED codes that may display in a no-POST situation.

<table>
<thead>
<tr>
<th>Appearance</th>
<th>Description</th>
<th>Next Step</th>
</tr>
</thead>
</table>
| ON-FLASH-FLASH     | No SODIMMs are installed | 1. Install supported memory modules.  
                      2. If memory is already present, reseat the module(s) one at time in each slot.  
                      3. Try known good memory from another computer or replace the memory.  
                      4. Replace the system board. |
| FLASH-ON-ON        | System board error     | 1. Reseat the processor.  
                      2. Replace the system board.  
                      3. Replace the processor.    |
<table>
<thead>
<tr>
<th>Light Pattern</th>
<th>Error Type</th>
<th>Solutions</th>
</tr>
</thead>
</table>
| **FLASH-ON-FLASH** | Display panel error | 1. Reseat the display cable.  
2. Replace the display panel.  
3. Replace the video card/system board. |
| **OFF-FLASH-OFF** | Memory compatibility error | 1. Install compatible memory modules.  
2. If two modules are installed remove one and test. Try the other module in the same slot and test. Test the other slot with both modules.  
3. Replace the memory.  
4. Replace the system board. |
| **ON-FLASH-ON** | Memory is detected but has errors | 1. Reseat the memory.  
2. If two modules are installed remove one and test. Try the other module in the same slot and test. Test the other slot with both modules.  
3. Replace the memory.  
4. Replace the system board. |
| **OFF-FLASH** | Modem error | 1. Reseat the modem.  
2. Replace the modem.  
3. Replace the system board. |
| **FLASH-FLASH-FLASH** | System board error | 1. Replace the system board. |
| **FLASH-FLASH-OFF** | Option ROM error | 1. Reseat the device.  
2. Replace the device.  
3. Replace the system board. |
| **OFF-ON-OFF** | Storage device error | 1. Reseat the hard drive and optical drive.  
2. Test the computer with just the hard drive and just the optical drive.  
3. Replace the device that is causing the failure.  
4. Replace the system board. |
| **FLASH-FLASH-ON** | Video card error | Replace the system board. |

Back to Contents Page
Removing the ExpressCard Board

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the battery.
3. Remove the ExpressCard.
4. Remove the access panel.
5. Remove the optical drive.
6. Remove the keyboard.
7. Remove the hinge covers.
8. Remove the display assembly.
9. Remove the palm rest assembly.
10. Remove the screws that secure the ExpressCard board to the system board.
11. Disconnect the ExpressCard board from the system board and remove it from the computer.

Replacing the ExpressCard Board

To replace the ExpressCard board, perform the above steps in reverse order.

NOTE: You may need to install Adobe Flash Player from Adobe.com in order to view the illustrations below.
Removing the ExpressCard

1. Press on the ExpressCard and release it from the computer.
2. Slide the ExpressCard out of the computer.

Replacing the ExpressCard

To replace the ExpressCard, perform the above steps in reverse order.
Removing the Fingerprint Reader

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the battery.
3. Remove the access panel.
4. Remove the optical drive.
5. Remove the keyboard.
6. Loosen the captive screw (labeled 'F') that secures the fingerprint reader to the computer.
7. Open the clip that secures the fingerprint data cable and disconnect it from the system board.
8. Push the fingerprint reader from the back of the computer to remove the fingerprint reader from the computer.

Replacing the Fingerprint Reader

To replace the fingerprint reader, perform the above steps in reverse order.

NOTE: You may need to install Adobe Flash Player from Adobe.com in order to view the illustrations below.
Removing the Hard Drive

1. Follow the procedures in Before Working Inside Your Computer.
2. Place the computer upside down on a clean, flat surface.
3. Remove the screws that secure the hard drive to the computer.
4. Slide the hard drive out of the computer.
5. Remove the screw that secures the face plate to the hard drive.
6. Pull out the face plate to remove it from the hard drive.

Replacing the Hard Drive

To replace the hard drive, perform the above steps in reverse order.

WARNING: Before working inside your computer, read the safety information that shipped with your computer. For additional safety best practices information, see the Regulatory Compliance Homepage at www.dell.com/regulatory_compliance.

NOTE: You may need to install Adobe™ Flash Player™ from Adobe.com in order to view the illustrations below.
WARNING: Before working inside your computer, read the safety information that shipped with your computer. For additional safety best practices information, see the Regulatory Compliance Homepage at www.dell.com/regulatory_compliance.

Removing the Heat Sink and Fan Assembly

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the battery.
3. Remove the access panel.
4. Disconnect the cable that connects the fan to the system board.
5. Remove the screws that secure the fan to the heat sink.
6. Remove the fan from the computer.
7. Loosen the captive screws that secure the heat sink to the system board.
8. Lift the edge of the heat sink that is closest to the center of the computer, and then slide the heat sink out of the computer.

Replacing the Heat Sink and Fan Assembly

To replace the heat sink and fan assembly, perform the above steps in reverse order.
Removing the I/O Board

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the battery.
3. Remove the access panel.
4. Remove the subscriber identity module (SIM) card.
5. Remove the optical drive.
6. Remove the keyboard.
7. Remove the coin-cell battery.
8. Remove the hinge covers.
9. Remove the display assembly.
10. Remove the hard drive.
11. Remove the Latitude On™ flash card.
12. Remove the wireless wide area network (WWAN) card.
13. Remove the wireless local area network (WLAN) card.
14. Remove the heat sink and fan assembly.
15. Remove the processor.
16. Remove the palm rest assembly.
17. Remove the ExpressCard board.
18. Remove the Bluetooth card.
19. Remove the system board.
20. Remove the screw (labeled "I") that secures the I/O board to the computer.
21. Remove the screws that secure the I/O board to the computer.
22. Remove the I/O board from the computer.

Replacing the I/O Board

To replace the I/O board, perform the above steps in reverse order.
Removing the Keyboard

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the battery.
3. Remove the LED cover.
4. Remove the screws along the top of the keyboard.

5. Using the pull tab, gently lift the keyboard at an angle and slide it out of the computer.

Replacing the Keyboard

To replace the keyboard, perform the above steps in reverse order.
Removing the Latitude ON Flash Card

NOTE: You may need to install Adobe™ Flash Player™ from Adobe.com in order to view the illustrations below.

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the battery.
3. Remove the access panel.
4. Remove the screw that secures the Latitude ON™ Flash card to the system board.
5. Slide the Latitude ON Flash card out of its connector on the system board.

Replacing the Latitude ON Flash Card

To replace the Latitude ON Flash card, perform the above steps in reverse order.
Removing the Display Assembly

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the battery.
3. Remove the access panel.
4. Remove the hinge covers.
5. Loosen the captive screws that secure the display cable to the system board and disconnect the display cable from its connector on the system board.
6. Disconnect and release the antenna cables from wireless local area network (WLAN) card.
7. Remove the screws that secure the display assembly to the computer.
8. Disconnect and release the antenna cables from wireless wide area network (WWAN) card.
9. Remove the screws that secure the display assembly to the computer.
10. Lift the display assembly up and away from the computer.

Replacing the Display Assembly

To replace the display assembly, perform the above steps in reverse order.

⚠️ WARNING: Before working inside your computer, read the safety information that shipped with your computer. For additional safety best practices information, see the Regulatory Compliance Homepage at www.dell.com/regulatory_compliance.

NOTE: You may need to install Adobe™ Flash Player™ from Adobe.com in order to view the illustrations below.
Removing the Display Bezel

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the battery.
3. Remove the access panel.
4. Remove the hinge covers.
5. Remove the display assembly.
6. Starting from the bottom, gently pry the bezel inside out from the display assembly.
7. Remove the bezel from the display assembly.

Replacing the Display Bezel

To replace the display bezel, perform the above steps in reverse order.
Removing the Display Cover

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the battery.
3. Remove the access panel.
4. Remove the hinge covers.
5. Remove the display assembly.
6. Remove the display bezel.
7. Remove the display panel.
8. Remove the camera and microphone.

Replacing the Display Cover

To replace the display cover, perform the above steps in reverse order.
Removing the Hinge Covers

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the battery.
3. Remove the access panel.
4. Remove the screws that secure the right hinge cover to the computer.
5. Remove the screws that secure the left hinge cover to the computer.
6. Slide the left and right hinge covers toward the back of the computer and remove them from the computer.

Replacing the Hinge Covers

To replace the hinge covers, perform the above steps in reverse order.

NOTE: You may need to install Adobe™ Flash Player™ from Adobe.com in order to view the illustrations below.
Removing the Display Hook(s)

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the battery.
3. Remove the display bezel.
4. Remove the screw that secures the display hook to the display panel.
5. Remove the display hook from the display panel.
6. Remove the screw that secures the display hook to the display panel.
7. Remove the display hook from the display panel.

Replacing the Display Hook

To replace the display hook(s), perform the above steps in reverse order.
Removing the Display Panel

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the battery.
3. Remove the access panel.
4. Remove the hinge covers.
5. Remove the display assembly.
6. Remove the display bezel.
7. Remove the screws that secure the display panel to the display assembly.
8. Lift the display panel and gently lay it on a flat clean surface.
9. Disconnect the display cable from the display panel.
10. Remove the display panel from the display assembly.
11. Remove the screws on either sides of the display panel, to release the display brackets.
12. Remove the display brackets from the display panel.

Replacing the Display Panel

To replace the display panel, perform the above steps in reverse order.

NOTE: You may need to install Adobe™ Flash Player™ from Adobe.com in order to view the illustrations below.
Removing the LED Cover

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the battery.
3. Press in on the LED cover release latches in the battery bay.
4. Turn the computer over, with the right side facing up and remove the LED cover from the computer.

Replacing the LED Cover

To replace the LED cover, perform the above steps in reverse order.
Removing the Modem Connector

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the battery.
3. Remove the access panel.
4. Remove the subscriber identity module (SIM) card.
5. Remove the optical drive.
6. Remove the keyboard.
7. Remove the coin-cell battery.
8. Remove the hinge covers.
9. Remove the display assembly.
10. Remove the hard drive.
11. Remove the Latitude On™ Flash card.
12. Remove the wireless wide area network (WWAN) card.
13. Remove the wireless local area network (WLAN) card.
14. Remove the heat sink and fan assembly.
15. Remove the processor.
16. Remove the palm rest assembly.
17. Remove the Bluetooth® card.
18. Remove the ExpressCard board.
19. Remove the SD card board.
20. Remove the I/O board.
21. Release the modem cable from its routing guides at the bottom of the computer.

22. Release the modem cable from its routing guides inside the computer.

23. Lift the modem connector up and away from the computer.

Replacing the Modem Connector

To replace the modem connector, perform the above steps in reverse order.
Removing the Modem Port Plug

1. Follow the procedures in Before Working Inside Your Computer.
2. Insert a paper clip into the release hole and remove the modem port plug from the computer.

Replacing the Modem Port Plug

To replace the modem port plug, slide the modem port plug back into the modem port.

NOTE: You may need to install Adobe™ Flash Player™ from Adobe.com in order to view the illustrations below.
Removing the Memory Module(s)

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the battery.
3. Remove the access panel.
4. Carefully spread apart the securing clips on each end of the memory module connector until the memory module pops up.
5. Remove the memory module from the connector.

Replacing the Memory

To replace the memory modules(s), perform the above steps in reverse order.
Removing the Modem

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the battery.
3. Remove the access panel.
4. Remove the screw that secures the modem to the computer.
5. Using the Mylar tab, gently lift the modem up.
6. Disconnect the modem cable from the modem and remove the modem from the computer.

Replacing the Modem

To replace the modem, perform the above steps in reverse order.
Removing the Optical Drive

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the screw that secures the optical drive to the computer.
3. Press in on the optical drive release latch to release the optical drive from the computer.
4. Slide the optical drive out of the computer.

Replacing the Optical Drive

To replace the optical drive, perform the above steps in reverse order.
Removing the Palm Rest Assembly

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the battery.
3. Remove the access panel.
4. Remove the optical drive.
5. Remove the keyboard.
6. Remove the hinge covers.
7. Remove the fingerprint reader.
8. Remove the display assembly.
9. Remove the screws that secure the palm rest to the bottom of the computer.

10. Disconnect the Smart Card, speakers, touchpad, and RFID (if applicable) cables from their connectors on the system board.

11. Release the palm rest from the computer:
   a. Starting from the back of the computer, lift the right side of the palm rest to release it from the computer.
   b. Gently pull the palm rest forward and flip the palm rest over.

12. Disconnect the HAL sensor cable from the system board.

13. Remove the palm rest from the computer.

Replacing the Palm Rest Assembly

To replace the palm rest assembly, perform the above steps in reverse order.
Removing and Replacing Parts

- Hinge Covers
- Modem Port Plug
- Wireless Local Area Network (WLAN) Card
- Latitude ON™ Flash Card
- Processor
- Display Bezel
- Display Panel
- Display Cover
- PCMCIA Card Cage
- System Board
- SD Card Board
- DC-In Power Cable
- Bottom Chassis Assembly
Removing the PCMCIA Card

1. Follow the procedures in Before Working Inside Your Computer.
2. Press the PCMCIA card eject button in to release the eject button from the computer.
3. Press the PCMCIA card eject button in again to release the PCMCIA card from the computer.
4. Slide the PCMCIA card out of the computer.

Replacing the PCMCIA Card

To replace the PCMCIA card, perform the above steps in reverse order.

NOTE: You may need to install Adobe™ Flash Player™ from Adobe.com in order to view the illustrations below.
Removing the PCMCIA Card Cage

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the battery.
3. Remove the PCMCIA card.
4. Remove the access panel.
5. Remove the hinge covers.
6. Remove the LED cover.
7. Remove the keyboard.
8. Remove the hard drive.
9. Remove the finger print reader.
10. Remove the heat sink and fan assembly.
11. Remove the display assembly.
12. Remove the palm rest assembly.
13. Remove the screws that secure the PCMCIA card cage to the chassis.

14. Press down the PCMCIA card cage and lift it by the edge to release the PCMCIA card cage from the securing tabs.

15. Remove the PCMCIA card cage from the computer.

Replacing the PCMCIA Card Cage

To replace the PCMCIA card cage, perform the above steps in reverse order.
Removing the Processor

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the battery.
3. Remove the access panel.
4. Remove the heat sink and fan assembly.
5. Turn the cam screw counter-clockwise until it comes to a stop to release the processor from the system board.
6. Carefully lift the processor up from its slot on the system board and remove the processor from the computer.

Replacing the Processor

⚠️ CAUTION: While replacing the processor, ensure that the cam lock is in the fully open position before seating the processor module. A processor module that is not properly seated can result in an intermittent connection or permanent damage to the microprocessor and socket.

To replace the processor, perform the above steps in reverse order.
Removing the SD Card Board

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the battery.
3. Remove the access panel.
4. Remove the optical drive.
5. Remove the keyboard.
6. Remove the hinge covers.
7. Remove the SD card.
8. Remove the display assembly.
9. Remove the palm rest assembly.
10. Release the cable tab and disconnect the SD card data cable from the system board.

NOTE: You may need to install Adobe Flash Player from Adobe.com in order to view the illustrations below.

11. Remove the screw that secures the SD card board to the computer.

12. Lift the SD card board up and away from the computer.

Replacing the SD Card Board

To replace the SD card board, perform the above steps in reverse order.
Removing the SD Card

WARNING: Before working inside your computer, read the safety information that shipped with your computer. For additional safety best practices information, see the Regulatory Compliance Homepage at www.dell.com/regulatory_compliance.

1. Press in on the SD card and release it from the computer.

2. Slide the SD card out of the computer.

Replacing the SD Card

To replace the SD card, perform the above steps in reverse order.

NOTE: You may need to install Adobe™ Flash Player™ from Adobe.com in order to view the illustrations below.
Removing the SIM Card

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the battery.
3. Press the SIM card in to release it from the computer.
4. Slide the SIM card out of the computer.

Replacing the SIM Card

To replace the SIM card, perform the above steps in reverse order.

WARNING: Before working inside your computer, read the safety information that shipped with your computer. For additional safety best practices information, see the Regulatory Compliance Homepage at www.dell.com/regulatory_compliance.

NOTE: You may need to install Adobe™ Flash Player™ from Adobe.com in order to view the illustrations below.
WARNING: Before working inside your computer, read the safety information that shipped with your computer. For additional safety best practices information, see the Regulatory Compliance Homepage at www.dell.com/regulatory_compliance.

Removing the Smart Card

1. Follow the procedures in Before Working Inside Your Computer.
2. Slide the Smart Card out of the computer.

Replacing the Smart Card

To replace the Smart Card, perform the above steps in reverse order.

NOTE: You may need to install Adobe™ Flash Player™ from Adobe.com in order to view the illustrations below.

</table>
### Audio
- **Type**: two-channel high-definition audio codec (HDA)
- **Controller**: IDT 92HD81B
- **Speaker**: two
- **Internal speaker amplifier**: 2 W channel
- **Volume controls**: volume up, volume down, and mute buttons

### Communications
- **Modem**: internal (optional)
- **Network adapter**: 10/100/1000 Mbps Intel 82577LM Gigabit Ethernet Controller
- **Wireless**: dedicated WLAN, WWAN, WiMAX, and Bluetooth® wireless support if optional cards are purchased.
- **GPS**: mobile broadband mini-card

### ExpressCard
- **NOTE**: The ExpressCard slot does NOT support PC Cards.
- **ExpressCard connector**: ExpressCard slot
- **Cards supported**: 34 mm ExpressCards

### PC Card
- **NOTE**: The PC card slot does NOT support Express Cards.
- **PC card connector**: PC Card slot
- **Cards supported**: 34 mm PC cards

### Secure Digital (SD) Memory Card Reader
- **Cards supported**: SD / MMC / SDHC / SDHS / MiniSD / MicroSD / SDIO

### Contactless Smart Cards (Optional)
- **Supported Smart Cards and Technologies**
  - ISO14443A — 106 kbps, 212 kbps, 424 kbps, and 848 kbps
  - ISO14443B — 106 kbps, 212 kbps, 424 kbps, and 848 kbps
  - ISO15693
  - HID iClass
  - FIPS201
  - NXP Desfire

### Fingerprint Reader (Optional)
- **Type**: swipe fingerprint sensor, FIPS 140-2 / FIPS 201

### Ports and Connectors
- **Audio**: microphone connector, stereo headphone/ speakers connector
- **Video**: one 15-pin VGA connector, one dual-mode DisplayPort connector
- **Network adapter**: one RJ-45 connector
- **Modem**: one RJ-11 connector
- **IEEE 1394**: one 4-pin connector
- **USB**: three USB 2.0-compliant connectors, one eSATA/USB 2.0-compliant connector
- **Memory card reader**: one 6-in-1 memory card reader
- **Smart card reader**: integrated smart card reader
- **Mini-Card**: two half-height mini-card slots, one full-height mini-card slot
- **Docking connector**: one E-Family 144-pin docking connector

### Drives
- **Hard drive**: SATA 2 HDD, SATA 2 Mobile HDD

### NVIDIA Quadro NVS 3100M
- **Output**: 15-pin VGA connector, 20-pin DisplayPort connector
### Optical drives
- DVD
- DVD+/-RW
- Blu-ray™

### Display
- **Type and size**: 396.24 mm (15.6 inches) diagonal TFT with white LED backlight
- **Active area (X/Y)**: 344.2 mm x 193.5 mm (13.55 inches x 7.61 inches)
- **Dimensions**
  - **Height**: 210 mm (8.26 inches)
  - **Width**: 360 mm (14.17 inches)
  - **Diagonal**: 417 mm (16.14 inches)
- **Display Option 1: High Definition**
  - **Maximum resolution**: 1366 (H) x 768 (V) at 262K colors
  - **Typical brightness**: 220 nits
  - **Refresh rate**: 60 Hz
  - **Viewing angle**
    - **Horizontal**: 40 degrees/40 degrees
    - **Vertical**: 15 degrees/30 degrees
  - **Pixel pitch**: 0.250 mm x 0.250 mm
- **Display Option 2: High Definition+Wide View Anti-Glare**
  - **Maximum resolution**: 1600 (H) x 900 (V) at 262K colors
  - **Typical brightness**: 250 nits
  - **Refresh rate**: 60 Hz
  - **View angle**
    - **Horizontal**: 55 degrees/55 degrees
    - **Vertical**: 45 degrees/45 degrees
  - **Pixel pitch**: 0.216 mm x 0.216 mm
- **Display Option 3: Full High Definition**
  - **Maximum resolution**: 1920 (H) x 1080 (V) at 262K colors
  - **Maximum brightness**: 300 nits
  - **Refresh rate**: 60 Hz
  - **Viewing angles**
    - **Horizontal**: 55 degrees/55 degrees
    - **Vertical**: 45 degrees/45 degrees
  - **Pixel pitch**: 0.179 mm x 0.179 mm

### Keyboard
- **Number of keys**
  - United States: 83 keys
  - Europe: 84 keys
  - Japan: 87 keys
- **Layout**: QWERTY/AZERTY/Kanji
- **Backlit keyboard**: yes

### Touchpad
- **Active area**
  - **X-axis**: 80 mm (3.14 inches)
  - **Y-axis**: 45 mm (1.77 inches)

### Battery
- **Type**
  - 4-cell "smart" lithium ion (37 WHR)
  - 6-cell "smart" lithium ion (60 WHR)
  - 9-year life-time 9-cell "smart" lithium ion (81 WHR)
  - 9-cell "smart" lithium ion (90 WHR)
  - 12-cell "smart" lithium ion (88 WHr)
- **Charge time with computer off**
  - 4-, 6-, 9-cell — approximately 1 hour to 80% capacity and 2 hours to 100% capacity.
  - 12-cell — approximately 3 hours 20 minutes to 100% capacity.
- **Operating time**
  - Battery operating time varies depending on operating conditions and can significantly reduce under certain power-intensive conditions.
- **Life span**: approximately 300 charge/discharge cycles
- **Dimensions**

Removing the System Board

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the battery.
3. Remove the subscriber identity module (SIM) card.
4. Remove the optical drive.
5. Remove the keyboard.
6. Remove the coin-cell battery.
7. Remove the hinge covers.
8. Remove the hard drive.
9. Remove the Latitude On Flash™ card.
10. Remove the wireless wide area network (WWAN) card.
11. Remove the wireless local area network (WLAN) card.
12. Remove the display assembly.
13. Remove the heat sink and fan assembly.
14. Remove the processor.
15. Remove the palm rest assembly.
16. Remove the ExpressCard board.
17. Remove the Bluetooth® card.
18. Release the cable tab and disconnect the SD media board cable from the system board.
19. Remove the screws that secure the system board to the chassis.
20. Disconnect the system board from I/O board, and flip the system board over.
21. Disconnect the DC-in cable from the system board.
22. Remove the system board from the chassis.

Replacing the System Board

To replace the system board, perform the above steps in reverse order.
Removing the WLAN Card

![WLAN Card](image)

**NOTE:** You may need to install Adobe™ Flash Player™ from [Adobe.com](http://www.adobe.com) in order to view the illustrations below.

1. Follow the procedures in [Before Working Inside Your Computer](https://www.dell.com/support/article/sln164816/).
2. Remove the [battery](https://www.dell.com/support/article/sln164816/).
3. Remove the [access panel](https://www.dell.com/support/article/sln164816/).
4. Remove the [hinge covers](https://www.dell.com/support/article/sln164816/).
5. Release the display cable from its routing guides on the computer.

6. Disconnect the antenna cables from the WLAN card.

7. Remove the screw that secures the WLAN card to the computer.

8. Slide the WLAN card out of its connector on the system board and remove it from the computer.

---

Replacing the WLAN Card

To replace the WLAN card, perform the above steps in reverse order.

Before Working Inside Your Computer

Use the following safety guidelines to help protect your computer from potential damage and to help to ensure your personal safety. Unless otherwise noted, each procedure included in this document assumes that the following conditions exist:

- You have performed the steps in Working on Your Computer.
- You have read the safety information that shipped with your computer.
- A component can be replaced or, if purchased separately, installed by performing the removal procedure in reverse order.

To avoid damaging your computer, perform the following steps before you begin working inside the computer.

1. Ensure that your work surface is flat and clean to prevent the computer cover from being scratched.
2. Turn off your computer (see Turning Off Your Computer).
3. If the computer is connected to a docking device (docked) such as the optional Media Base or Battery Slice, undock it.
4. Disconnect all network cables from the computer.
5. Disconnect your computer and all attached devices from their electrical outlets.
6. Close the display and turn the computer upside-down on a flat work surface.
7. Remove the main battery (see Battery).
8. Turn the computer top-side up.
9. Open the display.
10. Press the power button to ground the system board.

To avoid damaging the system board, you must remove the main battery before you service the computer.

- CAUTION: To disconnect a network cable, first unplug the cable from your computer and then unplug the cable from the network device.

To avoid losing data, save and close all open files and exit all open programs before you turn off your computer.

Recommended Tools

The procedures in this document may require the following tools:

- Small flat-blade screwdriver
- #0 Phillips screwdriver
- #1 Phillips screwdriver
- Small plastic scribe
- Flash BIOS update program CD

Turning Off Your Computer

- CAUTION: To avoid losing data, save and close all open files and exit all open programs before you turn off your computer.
1. Shut down the operating system:

   - In Windows® 7:
     Click Start  , then click Shut Down.
   - In Windows Vista®:
     Click Start , then click the arrow in the lower-right corner of the Start menu as shown below, and then click Shut Down.
   - In Windows® XP:
     Click Start → Turn Off Computer→ Turn Off.

     The computer turns off after the operating system shutdown process is complete.

2. Ensure that the computer and all attached devices are turned off. If your computer and attached devices did not automatically turn off when you shut down your operating system, press and hold the power button for about 6 seconds to turn them off.

---

### After Working Inside Your Computer

After you complete any replacement procedure, ensure you connect any external devices, cards, and cables before turning on your computer.

⚠️ **CAUTION:** To avoid damage to the computer, use only the battery designed for this particular Dell computer. Do not use batteries designed for other Dell computers.

1. Connect any external devices, such as a port replicator, battery slice, or media base, and replace any cards, such as an ExpressCard.

⚠️ **CAUTION:** To connect a network cable, first plug the cable into the network device and then plug it into the computer.

2. Connect any telephone or network cables to your computer.
3. Replace the battery.
4. Connect your computer and all attached devices to their electrical outlets.
5. Turn on your computer.
Wireless Wide Area Network (WWAN) Card

Dell™ Latitude™ E6510 Service Manual

Removing the WWAN Card

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the battery.
3. Remove the access panel.
4. Disconnect the antenna cables from the WWAN card.
5. Remove the screw that secures the WWAN card to the system board.
6. Slide the WWAN card out of its connector on the system board and remove it from the computer.

Replacing the WWAN Card

To replace the WWAN card, perform the above steps in reverse order.

WARNING: Before working inside your computer, read the safety information that shipped with your computer. For additional safety best practices information, see the Regulatory Compliance Homepage at www.dell.com/regulatory_compliance.

NOTE: You may need to install Adobe™ Flash Player™ from Adobe.com in order to view the illustrations below.

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the battery.
3. Remove the access panel.
4. Disconnect the antenna cables from the WWAN card.
5. Remove the screw that secures the WWAN card to the system board.
6. Slide the WWAN card out of its connector on the system board and remove it from the computer.

Replacing the WWAN Card

To replace the WWAN card, perform the above steps in reverse order.
