Initial release: October 2009

Configurar Dell™ Latitude ON™ Flash

Para usar *Configurar Cuenta* en Windows

Si todavía no ha creado una Cuenta de Usuario de Latitude ON Flash, al iniciar su ordenador con el sistema operativo Windows® aparecerá un cuadro de mensaje de *Bienvenida* que le informará de que *Latitude ON™ Flash* está instalado en su ordenador y le invitará a usarlo. Antes de hacerlo, necesitará crear una cuenta para su uso con Latitude ON Flash.

1. Haga clic en el botón **Configurar Ahora**. El cuadro de diálogo **Configurar Cuenta** se abrirá, y su actual Nombre de Usuario de Windows será mostrado en el cuadro de diálogo **Configurar Cuenta**. Dicho nombre será usado para su cuenta de Latitude ON Flash.
2. Introduzca una contraseña para su uso con Latitude ON Flash. Haga clic en el icono del símbolo de interrogación  del cuadro de diálogo **Configurar Cuenta** para consultar las reglas de creación de contraseñas.
3. Vuelva a introducir la contraseña en el campo **Confirmar**.
4. Haga clic en **Aceptar**. El Asistente de primer inicio se ejecutará, como se explica a continuación.

Para usar *Configurar Cuenta* en Latitude ON Flash:

Presione el botón **Latitude ON** (∞) en su teclado. Si todavía no ha creado una Cuenta de Usuario de Latitude ON Flash, se mostrará un mensaje que le ofrecerá dos opciones para crear una cuenta:

- La primera opción es "Crear una cuenta usando su nombre de inicio de sesión de Windows". Este es el método recomendado. Si selecciona este botón y luego hace clic en **Configurar Ahora**, su ordenador se reiniciará y arrancará con el sistema operativo Windows. A continuación seleccione **Menú Inicio > Programas > Dell Latitude ON Flash Tool > Dell Latitude ON Configuration Utility** para crear una cuenta como se describe en los párrafos anteriores. Su nombre de inicio de sesión de Windows será usado como su Nombre de Usuario de Latitude ON Flash, y usted solo necesitará crear una contraseña.
- Alternativamente, puede hacer clic en el segundo botón. Esta opción usa el nombre predeterminado "User" de Latitude ON Flash. Esta opción no le permitirá usar su nombre de inicio de sesión ni su contraseña de Windows. Haga clic en **Configurar Ahora** para crear su contraseña. Haga clic en el icono del símbolo de interrogación  del cuadro de diálogo **Configurar Cuenta** para consultar las reglas de creación de contraseñas. Después de crear la contraseña y de hacer clic en **Aceptar**, se iniciará el Asistente de primer inicio.

Asistente de primer inicio

Después de crear la cuenta se iniciará el Asistente de primer inicio que le permitirá establecer algunas preferencias iniciales. Tendrá la oportunidad de:

- Seleccionar su idioma y teclado.
- Ver el Contrato de Licencia para el Usuario Final (debe hacer clic en **Aceptar** para continuar).
- Establecer la hora y la zona horaria (puede cambiar esto en el futuro usando Fecha y Hora en el [Panel de Configuración](#)).
- Especificar la configuración de [red](#).
- Configurar el [Acceso con un solo clic al Correo Web](#). Opcionalmente, puede introducir la dirección de correo electrónico y la contraseña relacionadas con el servicio de correo basado en web que seleccione. Si lo hace, el servicio de correo electrónico se iniciará automáticamente cada vez que haga clic en el icono **Correo** en el futuro.
- Seleccionar un [protocolo de escritorio remoto](#) (Citrix® Receiver™, VMware® View Client, o rdesktop).

Después de haber completado el Asistente de primer inicio, podrá seleccionar varias aplicaciones desde la [LaunchBar](#) que está ubicada, de manera predeterminada, en la parte inferior de la pantalla de Latitude ON.

Para configurar otras preferencias, haga clic en el icono de **Configuración** en la LaunchBar y use el [Panel de Configuración](#).

 **NOTA:** Después de crear una cuenta de Latitude ON Flash, podrá abrir la Utilidad de Configuración en el Menú Inicio en cualquier momento (**Menú Inicio > Programas > Dell Latitude ON Flash Tool > Dell Latitude ON Configuration Utility**). Esta utilidad le permite hacer cambios a su cuenta o eliminarla. Si usted elimina su cuenta, al presionar el botón Latitude ON () en su teclado se iniciará otra vez el **Asistente para Configurar Cuenta de Dell Latitude ON**.

Inicios de sesión posteriores.

Después de haber creado una cuenta, cada vez que inicie Latitude ON Flash aparecerá una pantalla de inicio de sesión. Si hay más de un usuario y no se muestra su cuenta de usuario, haga clic en **Cambiar Usuario** y seleccione su nombre de usuario de la lista.

Si está en el entorno Windows y presiona el botón **Latitude ON**, Windows pasará al estado de hibernación y arrancará el entorno Latitude ON Flash.

Después de haber iniciado la sesión correctamente, se mostrará la primera pantalla de Latitude ON Flash. Esta pantalla contiene iconos para el Correo Electrónico, el Explorador Web, la mensajería instantánea Chat, VoIP (Skype™), y la aplicación de Escrito Remoto configurada como predeterminada.

 **NOTA:** Para cambiar el tipo de teclado, haga clic en el icono *Teclado* situado junto a la parte inferior de la pantalla de inicio de sesión, luego introduzca su contraseña y haga clic en el botón **Iniciar Sesión**.

 **NOTA:** Latitude ON Flash le pedirá que introduzca su contraseña cada vez que inicie una sesión nueva. Si introduce una contraseña incorrecta cinco veces consecutivas, el ordenador se apagará. Reinicie el ordenador en el modo Latitude ON para intentarlo otra vez.

Salir de Latitude ON Flash

Si usted quiere salir de Latitude ON Flash y arrancar con el sistema operativo Windows, haga clic en el botón **Acceder a SO**

. Para apagar el ordenador haga clic en el botón **Apagar**

. En cualquiera de los dos casos sus cambios se

guardarán automáticamente.

Configuración de Red

- [Activar LAN, WiFi o WWAN](#)
- [Conectarse a una Red de Área Local \(LAN\)](#)
- [Conectarse a una Red Inalámbrica \(WiFi\)](#)
- [Conectarse a una Red de Banda Ancha Móvil \(WWAN\)](#)

Activar LAN, WiFi o WWAN

Antes de empezar a usar su ordenador en el modo Dell™ Latitude ON™, debe configurarlo para que se conecte a una LAN, WiFi, o WWAN. La primera vez que inicie Latitude ON Flash, un Asistente de primer inicio le guiará a través del proceso de configuración de red. También puede hacer las configuraciones en cualquier momento, tal como se explica a continuación.

1. Abra el cuadro de diálogo **Configuración de Red** de cualquiera de estas formas:

- Haciendo clic en el icono **Red**  en la LaunchBar. (Al desplazar el puntero del ratón sobre este icono se muestra el estado actual de la conexión LAN y WiFi).
- Haciendo clic sobre el icono **WWAN**  en la LaunchBar, este icono está disponible solo si se detecta un dispositivo WWAN. (Al desplazar el puntero del ratón sobre este icono se muestra el estado actual de la conexión WWAN y la intensidad de la señal detectada).
- Haciendo clic en el icono **Panel de Configuración**  en la LaunchBar, luego haga clic en **Red**  dentro del [Panel de Configuración](#).

2. Seleccione su tipo de conexión haciendo clic en **WiFi**, **LAN** o **WWAN** en el lado izquierdo del cuadro de diálogo **Configuración de Red**

3. Si la casilla de verificación **Habilitada** no está marcada, haga clic sobre ésta para habilitar la conexión. (Si la casilla de verificación está marcada, la conexión se deshabilitará al hacer clic en ella).

Si las configuraciones de red han sido establecidas apropiadamente, después de establecer una conexión por primera vez, Latitude ON Flash reconocerá automáticamente la conexión y se conectará a la red activa, si ésta es LAN, WiFi o WWAN; o bien una combinación de las mismas.

Conectarse a una Red de Área Local (LAN)

Para una conexión automática estándar:

1. Asegúrese de haber conectado un cable de red a su ordenador.
2. Después de que el cable ha sido conectado, el servicio DHCP estará disponible en su red de manera predeterminada y debería recibir la configuración IP/DNS apropiada automáticamente.

No obstante, si desea especificar la configuración de conexión manualmente:

1. Haga clic en **LAN** al lado izquierdo del cuadro de diálogo **Configuración de Red**.
2. Desmarque las casillas de verificación **Configuración IP** y **Configuración DNS**. Dicha acción activará los campos que están debajo para permitir la entrada de texto.
3. Introduzca los valores de IP y de DNS asignados por su personal técnico.
Alternativamente, puede hacer clic en **Asistente de Conexión** en la esquina inferior derecha del cuadro de diálogo. Esta cómoda función le guiará a través del proceso de configuración.

Conectarse a una Red Inalámbrica (WiFi)

1. Haga clic en **WiFi** en el lado izquierdo del cuadro de diálogo **Configuración de Red** para abrir una lista de redes disponibles con sus intensidades de señal y niveles de seguridad.
2. Seleccione la red a la que quiere conectarse.
 - o Para conectarse a una red WiFi sin difusión, haga clic en el icono +. Dicha acción abrirá el cuadro de diálogo **Conectarse a la Red**. Introduzca el Nombre de la Red y la Contraseña, así como cualquier otra información que necesite para conectarse.
3. Introduzca o seleccione la información de conexión de la red WiFi (Tipo de Seguridad, Configuración IP/DNS, Contraseña, etc.). Haga clic en **Configuración Avanzada** si quiere establecer los valores de IP/DNS manualmente.

Conectarse a una Red de Banda Ancha Móvil (WWAN)

Si ha instalado un dispositivo WWAN, esta ficha estará disponible para su uso. De lo contrario, se mostrará el mensaje "No Hay Dispositivo" debajo de WWAN, al lado izquierdo del cuadro de diálogo **Configuración de Red**, y el botón **Configuración** será desactivado.

Por otra parte, si inserta un dispositivo WWAN, se mostrará el icono **WWAN**  en la LaunchBar. Si el dispositivo se ha detectado pero está deshabilitado, se mostrará como . Al desplazar el puntero del ratón sobre este icono se mostrará el estado actual de la conexión WWAN y la intensidad de la señal detectada. Al hacer clic sobre este icono se abrirá el cuadro de diálogo **Configuración de Red** con la ficha **WWAN** activa.

 **NOTA:** Su cuenta de WWAN y su tarjeta de WWAN deben ser activadas y registradas antes de usar la conexión. Además, la primera vez que usted la use, se le pedirá que seleccione su **País** y el nombre del **Proveedor de Servicio** WWAN (Nombre del Operador) de la lista desplegable.

Al insertar una tarjeta SIM, Latitude ON Flash normalmente puede detectar la información necesaria y crear automáticamente un perfil ya preparado para establecer la conexión.

Sin embargo, usted también puede crear un perfil manualmente. Primero, algunas notas:

- Para una red WWAN tipo EV-DO (como las de Verizon o Sprint), usted *no* necesitará disponer de un perfil.
- Para una red WCDMA WWAN (como la de AT&T), usted *sí* necesitará disponer de un perfil para usar la conexión WWAN.
- Para una red WWAN tipo WCDMA (UMTS), puede que necesite conocer el Nombre del Punto de Acceso (APN), el Nombre de Usuario, la Contraseña y el número PIN.

1. Haga clic en **WWAN** al lado izquierdo del cuadro de diálogo **Configuración de Red**.

2. Si es necesario, haga clic en **Configuración** para acceder a las cuatro fichas de configuración avanzada: **Perfiles**, **PIN**, **Preferencias de Radio** y **Propiedades del Dispositivo**.

- En la ficha **Perfiles**, haga clic en **Nuevo** para crear un perfil nuevo (especifique: Nombre del Perfil, Nombre del Operador, Nombre del Usuario, Contraseña y el Nombre del Punto de Acceso), o puede seleccionar un perfil existente y hacer clic en **Editar** para modificarlo o en **Eliminar** para eliminarlo.
- Seleccione la ficha **PIN** si quiere introducir o cambiar la información asociada con el Número de Identificación Personal WWAN. Marque la casilla de verificación **Activar PIN** para permitir la entrada del PIN, o desmárquela si quiere desactivar este requisito. (Esta función se asemeja a la que se utiliza para proteger un teléfono móvil (creando un PIN) para evitar el uso no autorizado).
- En la ficha **Preferencias de Radio**, puede especificar las preferencias de radio usadas para la conexión.
- La ficha **Propiedades del Dispositivo** muestra información general sobre el dispositivo WWAN.

3. Cuando haya terminado con las cuatro fichas de **Configuración**, haga clic en **Aceptar**. Volverá a la página anterior, y podrá marcar la casilla de verificación **Habilitada**. (Tenga en cuenta que la casilla de verificación **Habilitada** estará disponible solo si se ha creado un perfil WWAN). Después de que la casilla de verificación **Habilitada** haya sido marcada empezará el proceso para detectar la tarjeta SIM y el operador (proveedor). La intensidad y el protocolo se mostrarán interactivamente durante este tiempo.

4. Haga clic en el botón **Conectar** para conectarse a la red WWAN. Después de una conexión correcta, la etiqueta del botón

cambiará de "**Conectar**" a "**Desconectar**" y los tres iconos situados debajo del botón muestran los siguientes estados:

El número de bytes enviados se muestra a la derecha de este icono.

El número de bytes recibidos se muestra a la derecha de este icono.

El tiempo de conexión se muestra a la derecha de este icono.

Configuración de Conexiones Remotas

- [Acceder a un servidor de forma remota a través de **rdesktop**.](#)
- [Acceder de forma remota a las aplicaciones de un servidor a través de **Citrix Receiver**.](#)
- [Acceder a un servidor de forma remota a través de **VMware View Client**.](#)

✎ NOTA: Si usa alguna de las funciones indicadas anteriormente con más frecuencia que las demás, puede establecerla como su "Protocolo de escritorio remoto predeterminado". Si lo hace, la función correspondiente estará disponible en la primera pantalla que aparece al iniciar Latitude ON Flash, lo cual le permitirá seleccionarla con mayor comodidad. Para ello, seleccione [Aplicaciones](#) en el panel de **Configuración**, luego haga clic en **Escritorio Remoto** y seleccione la aplicación deseada.

rdesktop

1. En la LaunchBar, haga clic en el icono **rdesktop**

2. En el cuadro de diálogo de **rdesktop**, introduzca la dirección IP o el Nombre de Dominio del servidor al que desea conectarse.
3. Se abrirá la ventana de inicio de sesión de Windows[®]. Introduzca el Identificador de usuario y la Contraseña relacionados para acceder a dicho servidor.

✎ NOTA: Puede abrir el cuadro de diálogo **Editar Configuración de rdesktop**, haciendo clic con el botón secundario en el icono de **rdesktop** en la LaunchBar y luego seleccionado **Editar** en el menú. (También lo puede abrir haciendo clic en [Aplicaciones](#) en el panel de **Configuración** y luego seleccionado **rdesktop**). Esto le permite introducir la información de conexión de cada servidor solo una vez y guardarla para poder seleccionarla posteriormente en la lista desplegable.

Citrix[®] Receiver[™]

1. En la LaunchBar, seleccione el icono **Citrix Receiver**

2. En la ventana de **Citrix Receiver**, seleccione **Configuración** en el Menú Herramientas.
3. En el cuadro de diálogo **Configuración**, haga clic en **Preferencias** y luego seleccione **Citrix XenApp**.
4. Introduzca la URL del servidor al que quiere conectarse. (Es posible que necesite hacer clic en el botón **Cambiar...** para habilitar el campo **URL del Servidor**).
5. Haga clic en **Aceptar**. Regresará a la ventana inicial de **Citrix Receiver**.
6. Abra el Menú Ver y seleccione **Citrix XenApp View**. Se abrirá el cuadro de diálogo **Inicio de sesión de Citrix XenApp**.
7. Introduzca el Nombre del Usuario, la Contraseña y el Dominio relacionados.
8. Aquellas aplicaciones a las que tenga autorización para usar serán mostradas y estarán disponibles. Seleccione la aplicación que desee usar.

VMware[®] View Client

1. En la LaunchBar, seleccione el icono **VMware View**

2. Introduzca la dirección IP del servidor deseado. Haga clic en **Conectar**.
3. En el cuadro de diálogo que aparece a continuación, introduzca el Nombre del Usuario, la Contraseña y el Domino relacionados
4. Haga clic en el botón de **Iniciar Sesión**. Según sus reglas empresariales, el sistema pondrá a su disposición el entorno VMware que esté autorizado a usar.

Usar la Mensajería Instantánea "Chat"

- [Configurar Cuentas de Chat](#)
 - [Agregar Conocidos y Grupos](#)
 - [Agregar Grupos Nuevos](#)
 - [Enviar un mensaje de Chat](#)
-

Configurar Cuentas de Chat

La función *Chat* le permite conversar con sus amigos usando las cuentas existentes en una variedad de herramientas populares de Mensajería Instantánea. También puede organizar a sus "conocidos" por grupos, y realizar muchas otras funciones. Puede especificar configuraciones detalladas de las Preferencias, e iniciar sesiones con múltiples cuentas de Mensajería Instantánea simultáneamente.

Haga clic en el icono **Chat** . La primera vez que inicie *Chat*, se abrirá el cuadro de diálogo **Cuentas**. Se le pedirá

que identifique al menos una de sus cuentas existentes de Mensajería Instantánea, la cual será usada con *Chat*.

1. Asegúrese de que ha creado una o más Cuentas de Usuario en al menos uno de los protocolos compatibles.
2. Haga clic en el botón **Agregar** en la ventana **Cuentas**. Se abrirá la ventana **Agregar Cuentas**.
3. En la ficha *Básico*, abra la lista desplegable **Protocolos**, y seleccione el protocolo asociado con la cuenta que desee agregar (como AIM, MSN, Yahoo, etc.).
4. En el campo que está debajo del campo **Protocolo**, introduzca el **Nombre** de la cuenta correspondiente y la **Contraseña** de esa cuenta, luego haga clic en **Guardar**. (El Alias es opcional.)

Agregar Conocidos y Grupos

1. En la ventana de *Chat*, seleccione **Agregar Conocido...** desde el Menú Conocidos. Se abrirá el cuadro de diálogo *Agregar Conocido*, que ya tendrá su Nombre de Cuenta junto a la parte superior del cuadro de diálogo. Los otros campos estarán vacíos.
2. Introduzca el **Nombre de Usuario** (nombre de pantalla) del conocido y opcionalmente el **Alias**, nombre de la persona que desee agregar, y especifique el **Grupo** al que desee agregarlo. Puede seleccionar un grupo de la lista desplegable, o escribir un nuevo nombre de grupo para crear un grupo nuevo.
3. Haga clic en el botón **Agregar**. La persona que usted desea agregar recibirá una notificación diciendo que usted quiere agregarla a su lista de conocidos. Luego esa persona puede decidir si aceptar o no. (Del mismo modo, puede seleccionar **Negar** o **Autorizar** los intentos de otras personas para agregarlo a usted a sus listas de contactos.

Agregar Grupos Nuevos

Seleccione **Agregar Grupos...** desde el Menú Conocidos. Se abrirá el cuadro de diálogo *Agregar Grupo*. Simplemente escriba el nombre deseado para el nuevo grupo dentro del campo **Por favor, introduzca el nombre del grupo que será agregado**, y haga clic en el botón **Agregar**.

En la ventana *Chat*, usted puede hacer clic en el nombre de un grupo para ver una lista de todos los conocidos pertenecientes a ese grupo.

Tenga en cuenta que si usted desplaza el puntero del ratón sobre el nombre de un conocido en esa lista, se mostrará la

información de esa persona. En la información mostrada, el mensaje "**Lo tiene a usted**", indica si esa persona lo tiene a usted incluido en su lista de conocidos o no. Si se muestra **Sí**, quiere decir que usted *está* en la lista de esa persona.

Enviar un mensaje de Chat

Haga doble clic sobre el nombre de la persona a la que desee enviar un mensaje y luego escriba el mensaje en el cuadro de diálogo *Nuevo Mensaje Instantáneo*. Alternativamente, puede seleccionar **Nuevo Mensaje Instantáneo...** desde el Menú Conocidos en la ventana *Chat*, e introducir después el Alias o el Nombre de Pantalla del conocido al que desee enviar un mensaje.

Configuración de su correo electrónico Latitude ON™ Flash

Antes de empezar a enviar o recibir correos electrónicos en el modo Latitude ON™, debe especificar qué cliente de correo electrónico basado en web desea usar con Latitude ON Flash.

Durante el Asistente de primer inicio se le dio una oportunidad de hacerlo. Si omitió esta configuración durante el Asistente de primer inicio, aparecerá el mismo cuadro de diálogo la primera vez que haga clic en el icono **Correo** de la LaunchBar o en la pantalla principal de Latitude ON Flash.

Haga clic en el icono **Correo**  .

- Si ya ha especificado el cliente de servicio de correo electrónico basado en web que desea usar con Latitude ON Flash, la página de inicio de sesión de ese servicio de correo electrónico basado en web será iniciada automáticamente y usted podrá introducir su nombre de usuario y su contraseña como de costumbre.
- Si aún no ha especificado un servicio de correo electrónico basado en web, se abrirá el cuadro de diálogo **Editar la Configuración de la Aplicación de Correo Electrónico**. Seleccione el servicio de correo electrónico que quiere usar.
 - Tenga en cuenta que si selecciona **Outlook Web Access**, se le pedirá que introduzca la dirección URL, el nombre de usuario y la contraseña relacionados.
 - Si selecciona **Otro**, necesitará introducir la dirección URL del otro servicio de correo electrónico basado en web.
- Haga clic en **Terminar**. La próxima vez que usted haga clic en el icono **Correo** que está arriba, se invocará el servicio de correo electrónico que haya seleccionado.
 - Después de entrar en el servicio de correo electrónico basado en web, puede usar la opción de ese servicio para "permanecer conectado" y que éste recuerde su nombre de usuario/contraseña e inicie la sesión automáticamente cada vez que usted haga clic en el icono **Correo** en el futuro.

 **NOTA:** También puede ver y editar los archivos adjuntos a un correo electrónico. Si el archivo adjunto es un archivo PDF, DOC, XLS o PPT, podrá ver y/o editar el archivo, pero tenga en cuenta que el archivo sólo puede ser guardado en un dispositivo de almacenamiento externo, como un dispositivo USB.

Cambiar a otro servicio de correo electrónico

Si ya ha especificado un servicio de correo electrónico para usarlo con Latitude ON Flash, y luego decide usar otro servicio de correo electrónico, puede cambiarse al servicio de correo electrónico deseado en cualquier momento haciendo clic en

[Aplicaciones](#) en el panel **Configuración** (o haciendo clic con el botón secundario sobre el icono **Correo** ), y luego

haciendo clic en **Editar** bajo "*Aplicación de Correo.*"

Usar la LaunchBar

La LaunchBar, de manera predeterminada, está situada en la parte inferior de la pantalla de Latitude ON. (Puede cambiar la posición de la LaunchBar haciendo clic en el [icono de la LaunchBar](#) en el panel de **Configuración** y especificando la Orientación a continuación).

Haga clic en los botones de la LaunchBar para invocar/cambiar entre aplicaciones, o para iniciar varias utilidades. Cada uno de los iconos de la LaunchBar se describe a continuación, acompañado de su ilustración.

| | |
|--|---|
|  | <p>Correo. Haga clic sobre este icono para acceder a la aplicación de correo electrónico basada en web que ha sido especificada para su uso con Latitude ON Flash. Si todavía no se ha especificado ninguna aplicación de correo electrónico, se abrirá el cuadro de diálogo Editar la Configuración de la Aplicación de Correo Electrónico. También puede hacer clic con el botón secundario sobre este icono para abrir el cuadro de diálogo <i>Editar la Configuración de la Aplicación de Correo Electrónico</i> en cualquier momento.</p> |
|  | <p>Web. Inicia el navegador web, para acceder a la World Wide Web. Este navegador ha sido optimizado para ofrecerle una gran experiencia de Internet inmediatamente.</p> |
|  | <p>Inicia la herramienta de mensajería instantánea Chat, que le permitirá usar las cuentas existentes en varios programas de mensajería instantánea para chatear con sus amigos y configurar las preferencias como usted lo desee. Desde la aplicación Chat, puede abrir un archivo independiente de ayuda acerca de la propia aplicación.</p> |
|  | <p>VoIP. Inicia Skype™, una aplicación de VoIP (Voz sobre Internet Protocolo) que le permitirá comunicarse (de manera gratuita) con otros usuario de Skype. Desde la aplicación Skype, puede abrir un archivo independiente de ayuda acerca de la propia aplicación.</p> |
|  | <p>Permite acceder a un servidor de forma remota a través de rdesktop.</p> |
|  | <p>Permite acceder a las aplicaciones de un servidor de forma remota a través de Citrix Receiver.</p> |
|  | <p>Permite acceder a un servidor de forma remota a través de VMware View Client.</p> |
|  | <p>Inicia la aplicación Music, que le permitirá reproducir archivos de música en el formato MP3. Desde la aplicación Music Player, puede abrir un archivo independiente de ayuda acerca de la propia aplicación..</p> |
|  | <p>Inicia la aplicación Photo, un visor de imágenes que le permitirá organizar sus archivos de fotos JPEG / BMP / GIF / PNG por álbumes, y mostrarlas/compartirlas con diferentes modos de presentación. Desde la aplicación Photo Manager, puede abrir un archivo independiente de ayuda acerca de la propia aplicación</p> |
| | <p>Indicador de dispositivo de almacenamiento extraíble. Este icono se muestra en la LaunchBar cuando se inserta un dispositivo de almacenamiento extraíble, como una unidad USB, en el sistema. Haga clic sobre este icono para abrir la ventana del <i>Administrador de Archivos</i>, que le permitirá de una manera</p> |

| | |
|--|---|
|  | conveniente, acceder a las carpetas y a los archivos en el dispositivo de almacenamiento extraíble. Si desea retirar el dispositivo de almacenamiento, haga clic con el botón secundario sobre este icono y seleccione Expulsar Disco USB . |
|  | WWAN . Si se inserta y se habilita un dispositivo WWAN, el icono WWAN se mostrará en la LaunchBar. (Si el dispositivo es detectado pero está deshabilitado, se mostrará como ). Al desplazar el puntero del ratón sobre este icono se mostrará el estado actual de la conexión WWAN y la intensidad de la señal detectada. Al hacer clic sobre este icono se abrirá el cuadro de diálogo Configuración de Red , con la ficha WWAN activa. |
|  | Estado de Red . Al desplazar el puntero del ratón sobre este icono se mostrará el estado actual de la conexión LAN y WiFi. Si hace clic sobre este icono se abrirá el cuadro de diálogo Configuración de Red . Dicho cuadro de diálogo también se puede abrir desde el panel de Configuración . |
|  | Volumen . Al hacer clic sobre este icono se abrirá el mismo cuadro de control de Volumen que se abre al hacer clic en Volumen en el panel de Configuración. Al desplazar el puntero del ratón sobre este icono se muestra la configuración actual del volumen de los altavoces principales y del micrófono. |
|  | Ayuda . Haga clic en este icono para acceder a la Ayuda principal en línea de Latitude ON Flash. Después de abrir la ventana de Ayuda , puede acceder al cuadro Acerca de (que contiene información sobre la versión y el copyright), haciendo clic en el icono  , situado en la parte superior derecha de la ventana de la Ayuda. |
|  | Abre el panel de Configuración , que le permitirá establecer las preferencias de varias funciones y comportamientos de Latitude ON Flash. |
|  | Acceder al SO . Le permite salir de Latitude ON Flash e iniciar una sesión en su sistema operativo Microsoft® Windows®. Después de hacer clic en este icono, se mostrará un mensaje solicitando su confirmación. |
|  | Apagar . Después de hacer clic en este icono, se le pedirá que confirme su solicitud para apagar el ordenador. Cualquier cambio que haya realizado durante la sesión será guardado automáticamente. |
|  | Estado de Batería /Corriente Alterna . Se mostrará uno de entre varios iconos diferentes, dependiendo de la fuente de energía y de la intensidad de la corriente. (A la izquierda se muestran sólo algunos ejemplos). Desplace el puntero del ratón sobre el icono que se muestra para conocer el estado/nivel de la energía eléctrica, o haga clic en el icono si quiere abrir la ficha de Administración de Energía de los Ajustes de Entorno . |

Usar el Panel de Configuración

Para abrir el **Panel de configuración**, haga clic en el icono  en la LaunchBar. Luego haga clic en el icono que desee dentro del Panel de configuración para acceder a las herramientas de configuración correspondientes. Las siguientes herramientas están disponibles:

| | |
|--|--|
|  | Fecha y Hora. Abre un cuadro de diálogo que le permite ajustar la fecha y la hora o seleccionar una zona horaria. También puede abrir este cuadro de diálogo haciendo clic en la hora que se muestra en la LaunchBar de la pantalla de Latitude ON. |
|  | Idioma de entrada. Le permite establecer los métodos de entrada, los idiomas y las opciones de la función de idioma de entrada SCIM (Método común de entrada inteligente, por sus siglas en inglés "Smart Common Input Method"). NOTA: Para habilitar esta función, asegúrese de que la casilla de verificación Habilitar el servicio de idioma de entrada esté marcada. A continuación, coloque el cursor de texto en un campo de entrada editable de Latitude ON Flash y presione Ctrl + Espacio para activar el idioma de entrada SCIM actual. Para desactivar la función SCIM, presione las teclas Ctrl + Espacio otra vez. |
|  | Idioma y Teclado. Le permite establecer el idioma de entrada y el método de entrada deseados, el idioma que se usará para mostrar los menús, los mensajes, etc. y el idioma de entrada del teclado. |
|  | Configuración de la LaunchBar . Le permite: <ul style="list-style-type: none">• Especificar la ubicación predeterminada de la LaunchBar.• Activar o desactivar la información sobre herramientas de la LaunchBar.• Seleccionar si la LaunchBar debe ocultarse automáticamente o no.• Seleccionar si la LaunchBar debe mostrarse sobre las demás ventanas o no. |
|  | Red. Especifique cómo se conecta su ordenador a Internet. Si necesita ayuda, puede hacer clic en el botón Asistente para la conexión . Dicho asistente facilitará la configuración de la conexión. |
|  | Configuración de entorno. Este cuadro de diálogo cuenta con dos fichas: Ficha Administración de Energía. Contiene dos perfiles con configuraciones predeterminadas. Seleccione el perfil Ahorro de energía o el perfil Máximo rendimiento . Si lo desea, puede cambiar el tiempo de espera de la <i>Pantalla</i> o para <i>Apagar</i> , de acuerdo con el tipo de fuente de energía que está usando. Si cambia la configuración, se creará un perfil nuevo llamado Personalizado , que contendrá la configuración correspondiente. Ficha General. Esta ficha contiene un botón de Restaurar . Este botón le permite limpiar toda la configuración de Latitude ON Flash, así como también cualquier información personal guardada por el explorador web, y restaurar todo el sistema a la configuración establecida por el fabricante. Los datos del usuario y de entorno serán restaurados a la configuración predeterminada. Todos los marcadores, configuraciones de red y otros cambios que usted ha realizado se perderán. Tras hacer clic en Restaurar, se abrirá un cuadro de diálogo de confirmación. Si hace clic en "Sí" en el cuadro de diálogo de confirmación, su sistema se apagará para poder terminar de limpiar la configuración. Esto también resulta útil si la configuración se daña, lo cual ocurre en raras ocasiones. |
|  | Pantalla. Seleccione la mejor resolución para su pantalla. |
|  | Volumen. Le permite ajustar el volumen de salida de sus altavoces/auriculares; o |

| | |
|--|---|
|  | <p>el volumen de entrada de su micrófono incorporado o externo. Usted puede hacer clic en Avanzado, en el cuadro de Volumen, si desea especificar <i>Micrófono 1</i> (Predeterminado), o <i>Micrófono 2</i> (Frontal/Externo).</p> |
|  | <p>Aplicaciones. Botón Latitude ON / Comportamiento del botón de encendido

La siguiente tabla describe el efecto obtenido al pulsar el botón de **Encendido** o el botón **Latitude ON** (☞) situado junto al anterior, dependiendo del estado actual del ordenador.

| Modo Latitude ON | | |
|---|--|---|
| Estado del ordenador | Al presionar el botón Latitude ON | Al presionar el botón de Encendido |
| Apagado | Arranca con Latitude ON Flash | Arranca con Windows |
| En la pantalla de solicitud de contraseña o en la pantalla de inicio de la aplicación principal | Apaga el sistema | Apaga el sistema |
| Encendido | Apaga el sistema | Se le pregunta al usuario si desea apagar el sistema o arrancar con Windows |

| Modo Windows (Latitude ON Configuration Utility está instalada) | | |
|---|--|--|
| Estado del ordenador | Al presionar el botón Latitude ON | Al presionar el botón de Encendido |
| Apagado | Arranca con Latitude ON Flash | Arranca con Windows |
| En espera / En suspensión híbrida | Windows se reanuda e hiberna inmediatamente, luego se arranca con Latitude ON Flash. * | Reanuda Windows |
| En hibernación | Arranca con Latitude ON Flash | Reanuda Windows |
| Encendido | Windows hiberna inmediatamente y se arranca con Latitude ON Flash. * | Acción configurada por el usuario en Windows |

* Si no se ha configurado ninguna cuenta de usuario de Latitude ON Flash, se le pedirá que configure una cuenta.

Teclas de acceso rápido admitidas en Latitude ON™ Flash

| Tecla de acceso rápido | Acción |
|------------------------|--|
| Fn + F2 | Habilita / Deshabilita la carga de la batería |
| Fn + F4 | Habilita / Deshabilita Bloq Num |
| Fn + ← | Habilita / Deshabilita el sensor de luz ambiental |
| Fn + → | Habilita / Deshabilita la iluminación de fondo del teclado (si está instalada) |
| Fn + ↑ | Incrementa el brillo del LCD |
| Fn + ↓ | Disminuye el brillo del LCD |

Mozilla Public License

[Version 1.1]

1. Definitions.

1.0.1. "Commercial Use"
means distribution or otherwise making the Covered Code available to a third party.

1.1. "Contributor"
means each entity that creates or contributes to the creation of Modifications.

1.2. "Contributor Version"
means the combination of the Original Code, prior Modifications used by a Contributor, and the Modifications made by that particular Contributor.

1.3. "Covered Code"

means the Original Code or Modifications or the combination of the Original Code and Modifications, in each case including portions thereof.

1.4. "Electronic Distribution Mechanism"

means a mechanism generally accepted in the software development community for the electronic transfer of data.

1.5. "Executable"

means Covered Code in any form other than Source Code.

1.6. "Initial Developer"

means the individual or entity identified as the Initial Developer in the Source Code notice required by Exhibit A.

1.7. "Larger Work"

means a work which combines Covered Code or portions thereof with code not governed by the terms of this License.

1.8. "License"

means this document.

1.8.1. "Licensable"

means having the right to grant, to the maximum extent possible, whether at the time of the initial grant or subsequently acquired, any and all of the rights conveyed herein.

1.9. "Modifications"

means any addition to or deletion from the substance or structure of either the Original Code or any previous Modifications. When Covered Code is released as a series of files, a Modification is:

1.9.1. Any addition to or deletion from the contents of a file containing Original Code or previous Modifications.

1.9.2. Any new file that contains any part of the Original Code or previous Modifications.

1.10. "Original Code"

means Source Code of computer software code which is described in the Source Code notice required by Exhibit A as Original Code, and which, at the time of its release under this License is not already Covered Code governed by this License.

1.10.1. "Patent Claims"

means any patent claim(s), now owned or hereafter acquired, including without limitation, method, process, and apparatus claims, in any patent Licensable by grantor.

1.11. "Source Code"

means the preferred form of the Covered Code for making modifications to it, including all modules it contains, plus any associated interface definition files, scripts used to control compilation and installation of an Executable, or source code differential comparisons against either the Original Code or another well known, available Covered Code of the Contributor's choice. The Source Code can be in a compressed or archival form, provided the appropriate decompression or de-archiving software is widely available for no charge.

1.12. "You" (or "Your")

means an individual or a legal entity exercising rights under, and complying with all of the terms of, this License or a future version of this License issued under Section 6.1. For legal entities, "You" includes any entity which controls, is controlled by, or is under common control with You. For purposes of this definition, "control" means (a) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (b) ownership of more than fifty percent (50%) of the outstanding shares or beneficial ownership of such entity.

2. Source Code License.

2.1. The Initial Developer Grant.

The Initial Developer hereby grants You a world-wide, royalty-free, non-exclusive license, subject to third party intellectual property claims:

1. Under intellectual property rights (other than patent or trademark) Licensable by Initial Developer to use, reproduce, modify, display, perform, sublicense and distribute the Original Code (or portions thereof) with or without Modifications, and/or as part of a Larger Work; and
2. Under Patents Claims infringed by the making, using or selling of Original Code, to make, have made, use, practice, sell, and offer for sale, and/or otherwise dispose of the Original Code (or portions thereof).
3. The licenses granted in this Section 2.1 (a) and (b) are effective on the date Initial Developer first distributes Original Code under the terms of this License.
4. Notwithstanding Section 2.1 (b) above, no patent license is granted: 1) for code that You delete from the Original Code; 2) separate from the Original Code; or 3) for infringements caused by: i) the modification of the Original Code or ii) the combination of the Original Code with other software or devices.

2.2. Contributor Grant.

Subject to third party intellectual property claims, each Contributor hereby grants You a world-wide, royalty-free, non-exclusive license:

1. Under intellectual property rights (other than patent or trademark) Licensable by Contributor, to use, reproduce, modify, display, perform, sublicense and distribute the Modifications created by such Contributor (or portions thereof) either on an unmodified basis, with other Modifications, as Covered Code and/or as part of a Larger Work; and
2. Under Patent Claims infringed by the making, using, or selling of Modifications made by that Contributor either alone and/or in combination with its Contributor Version (or portions of such combination), to make, use, sell, offer for sale, have made, and/or otherwise dispose of: 1) Modifications made by that Contributor (or portions thereof); and 2) the combination of Modifications made by that Contributor with its Contributor Version (or portions of such combination).
3. The licenses granted in Sections 2.2 (a) and 2.2 (b) are effective on the date Contributor first makes Commercial Use of the Covered Code.
4. Notwithstanding Section 2.2 (b) above, no patent license is granted: 1) for any code that Contributor has deleted from the Contributor Version; 2) separate from the Contributor Version; 3) for infringements caused by: i) third party modifications of Contributor Version or ii) the combination of Modifications made by that Contributor with other software (except as part of the Contributor Version) or other devices; or 4) under Patent Claims infringed by Covered Code in the absence of Modifications made by that Contributor.

3. Distribution Obligations.

3.1. Application of License.

The Modifications which You create or to which You contribute are governed by the terms of this License, including without limitation Section 2.2. The Source Code version of Covered Code may be distributed only under the terms of this License or a future version of this License released under Section 6.1, and You must include a copy of this License with every copy of the Source Code You distribute. You may not offer or impose any terms on any Source Code version that alters or restricts the applicable version of this License or the recipients' rights hereunder. However, You may include an additional document offering the additional rights described in Section 3.5.

3.2. Availability of Source Code.

Any Modification which You create or to which You contribute must be made available in Source Code form under the terms of this License either on the same media as an Executable version or via an accepted Electronic Distribution Mechanism to anyone to whom you made an Executable version available; and if made available via Electronic Distribution Mechanism, must remain available for at least twelve (12) months after the date it initially became available, or at least six (6) months after a subsequent version of that particular Modification has been made available to such recipients. You are responsible for ensuring that the Source Code version remains available even if the Electronic Distribution Mechanism is maintained by a third party.

3.3. Description of Modifications.

You must cause all Covered Code to which You contribute to contain a file documenting the changes You made to create that Covered Code and the date of any change. You must include a prominent statement that the Modification is derived, directly or indirectly, from Original Code provided by the Initial Developer and including the name of the Initial Developer in (a) the Source Code, and (b) in any notice in an Executable version or related documentation in which You describe the origin or ownership of the Covered Code.

3.4. Intellectual Property Matters

(a) Third Party Claims.

If Contributor has knowledge that a license under a third party's intellectual property rights is required to exercise the rights granted by such Contributor under Sections 2.1 or 2.2, Contributor must include a text file with the Source Code distribution titled "LEGAL" which describes the claim and the party making the claim in sufficient detail that a recipient will know whom to contact. If Contributor obtains such knowledge after the Modification is made available as described in Section 3.2, Contributor shall promptly modify the LEGAL file in all copies Contributor makes available thereafter and shall take other steps (such as notifying appropriate mailing lists or newsgroups) reasonably calculated to inform those who received the Covered Code that new knowledge has been obtained.

(b) Contributor APIs.

If Contributor's Modifications include an application programming interface and Contributor has knowledge of patent licenses which are reasonably necessary to implement that API, Contributor must also include this information in the legal file.

(c) Representations.

Contributor represents that, except as disclosed pursuant to Section 3.4 (a) above, Contributor believes that Contributor's Modifications are Contributor's original creation(s) and/or Contributor has sufficient rights to grant the rights conveyed by this License.

3.5. Required Notices.

You must duplicate the notice in Exhibit A in each file of the Source Code. If it is not possible to put such notice in a particular Source Code file due to its structure, then You must include such notice in a location (such as a relevant directory) where a user would be likely to look for such a notice. If You created one or more Modification(s) You may add your name as a Contributor to the notice described in Exhibit A. You must also duplicate this License in any documentation for the Source Code where You describe recipients' rights or ownership rights relating to Covered Code. You may choose to offer, and to charge a fee for, warranty, support, indemnity or liability obligations to one or more recipients of Covered Code. However, You may do so only on Your own behalf, and not on behalf of the Initial Developer or any Contributor. You must make it absolutely clear than any such warranty, support, indemnity or liability obligation is offered by You alone, and You hereby agree to indemnify the Initial Developer and every Contributor for any liability incurred by the Initial Developer or such Contributor as a result of warranty, support, indemnity or liability terms You offer.

3.6. Distribution of Executable Versions.

You may distribute Covered Code in Executable form only if the requirements of Sections 3.1, 3.2, 3.3, 3.4 and 3.5 have been met for that Covered Code, and if You include a notice stating that the Source Code version of the Covered Code is available under the terms of this License, including a description of how and where You have fulfilled the obligations of Section 3.2. The notice must be conspicuously included in any notice in an Executable version, related documentation or collateral in which You describe recipients' rights relating to the Covered Code. You may distribute the Executable version of Covered Code or ownership rights under a license of Your choice, which may contain terms different from this License, provided that You are in compliance with the terms of this License and that the license for the Executable version does not attempt to limit or alter the recipient's rights in the Source Code version from the rights set forth in this License. If You distribute the Executable version under a different license You must make it absolutely clear that any terms which differ from this License are offered by You alone, not by the Initial Developer or any Contributor. You hereby agree to indemnify the Initial Developer and every Contributor for any liability incurred by the Initial Developer or such Contributor as a result of any such terms You offer.

3.7. Larger Works.

You may create a Larger Work by combining Covered Code with other code not governed by the terms of this License and distribute the Larger Work as a single product. In such a case, You must make sure the requirements of this License are fulfilled for the Covered Code.

4. Inability to Comply Due to Statute or Regulation.

If it is impossible for You to comply with any of the terms of this License with respect to some or all of the Covered Code due to statute, judicial order, or regulation then You must: (a) comply with the terms of this License to the maximum extent possible; and (b) describe the limitations and the code they affect. Such description must be included in the legal file described in Section 3.4 and must be included with all distributions of the Source Code. Except to the extent prohibited by statute or regulation, such description must be sufficiently detailed for a recipient of ordinary skill to be able to understand it.

5. Application of this License.

This License applies to code to which the Initial Developer has attached the notice in Exhibit A and to related Covered Code.

6. Versions of the License.

6.1. New Versions

Netscape Communications Corporation ("Netscape") may publish revised and/or new versions of the License from time to time. Each version will be given a distinguishing version number.

6.2. Effect of New Versions

Once Covered Code has been published under a particular version of the License, You may always continue to use it under the terms of that version. You may also choose to use such Covered Code under the terms of any subsequent version of the License published by Netscape. No one other than Netscape has the right to modify the terms applicable to Covered Code created under this License.

6.3. Derivative Works

If You create or use a modified version of this License (which you may only do in order to apply it to code which is not already Covered Code governed by this License), You must (a) rename Your license so that the phrases "Mozilla", "MOZILLAPL", "MOZPL", "Netscape", "MPL", "NPL" or any confusingly similar phrase do not appear in your license (except to note that your license differs from this License) and (b) otherwise make it clear that Your version of the license contains terms which differ from the Mozilla Public License and Netscape Public License. (Filling in the name of the Initial Developer, Original Code or Contributor in the notice described in Exhibit A shall not of themselves be deemed to be modifications of this License.)

7. Disclaimer of warranty.

Covered code is provided under this license on an "as is" basis, without warranty of any kind, either expressed or implied, including, without limitation, warranties that the covered code is free of defects, merchantable, fit for a particular purpose or non-infringing. The entire risk as to the quality and performance of the covered code is with you. Should any covered code prove defective in any respect, you (not the initial developer or any other contributor) assume the cost of any necessary servicing, repair or correction. This disclaimer of warranty constitutes an essential part of this license. No use of any covered code is authorized hereunder except under this disclaimer.

8. Termination.

8.1. This License and the rights granted hereunder will terminate automatically if You fail to comply with terms herein and fail to cure such breach within 30 days of becoming aware of the breach. All sublicenses to the Covered Code which are properly granted shall survive any termination of this License. Provisions which, by their nature, must remain in effect beyond the termination of this License shall survive.

8.2. If You initiate litigation by asserting a patent infringement claim (excluding declaratory judgment actions) against Initial Developer or a Contributor (the Initial Developer or Contributor against whom You file such action is referred to as "Participant") alleging that:

1. Such Participant's Contributor Version directly or indirectly infringes any patent, then any and all rights granted by such Participant to You under Sections 2.1 and/or 2.2 of this License shall, upon 60 days notice from Participant terminate prospectively, unless if within 60 days after receipt of notice You either: (i) agree in writing to pay Participant a mutually agreeable reasonable royalty for Your past and future use of Modifications made by such Participant, or (ii) withdraw Your litigation claim with respect to the Contributor Version against such Participant. If within 60 days of notice, a reasonable royalty and payment arrangement are not mutually agreed upon in writing by the parties or the litigation claim is not withdrawn, the rights granted by Participant to You under Sections 2.1 and/or 2.2 automatically terminate at the expiration of the 60 day notice period specified above.
2. Any software, hardware, or device, other than such Participant's Contributor Version, directly or indirectly infringes any patent, then any rights granted to You by such Participant under Sections 2.1(b) and 2.2(b) are revoked effective as of the date You first made, used, sold, distributed, or had made, Modifications made by that Participant.

8.3. If You assert a patent infringement claim against Participant alleging that such Participant's Contributor Version directly or indirectly infringes any patent where such claim is resolved (such as by license or settlement) prior to the initiation of patent infringement litigation, then the reasonable value of the licenses granted by such Participant under Sections 2.1 or 2.2 shall be taken into account in determining the amount or value of any payment or license.

8.4. In the event of termination under Sections 8.1 or 8.2 above, all end user license agreements (excluding distributors and resellers) which have been validly granted by You or any distributor hereunder prior to termination shall survive termination.

9. Limitation of liability.

Under no circumstances and under no legal theory, whether tort (including negligence), contract, or otherwise, shall you, the initial developer, any other contributor, or any distributor of covered code, or any supplier of any of such parties, be liable to any person for any indirect, special, incidental, or consequential damages of any character including, without limitation, damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses, even if such party shall have been informed of the possibility of such damages. This limitation of liability shall not apply to liability for death or personal injury resulting from such party's negligence to the extent applicable law prohibits such limitation. Some jurisdictions do not allow the exclusion or limitation of incidental or consequential damages, so this exclusion and limitation may not apply to you.

10. U.S. government end users.

The Covered Code is a "commercial item," as that term is defined in 48 C.F.R. 2.101 (Oct. 1995), consisting of "commercial computer software" and "commercial computer software documentation," as such terms are used in 48 C.F.R. 12.212 (Sept. 1995). Consistent with 48 C.F.R. 12.212 and 48 C.F.R. 227.7202-1 through 227.7202-4 (June 1995), all U.S. Government End Users acquire Covered Code with only those rights set forth herein.

11. Miscellaneous.

This License represents the complete agreement concerning subject matter hereof. If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable. This License shall be governed by California law provisions (except to the extent applicable law, if any, provides otherwise), excluding its conflict-of-law provisions. With respect to disputes in which at least one party is a citizen of, or an entity chartered or registered to do business in the United States of America, any litigation relating to this License shall be subject to the jurisdiction of the

Federal Courts of the Northern District of California, with venue lying in Santa Clara County, California, with the losing party responsible for costs, including without limitation, court costs and reasonable attorneys' fees and expenses. The application of the United Nations Convention on Contracts for the International Sale of Goods is expressly excluded. Any law or regulation which provides that the language of a contract shall be construed against the drafter shall not apply to this License.

12. Responsibility for claims.

As between Initial Developer and the Contributors, each party is responsible for claims and damages arising, directly or indirectly, out of its utilization of rights under this License and You agree to work with Initial Developer and Contributors to distribute such responsibility on an equitable basis. Nothing herein is intended or shall be deemed to constitute any admission of liability.

13. Multiple-licensed code.

Initial Developer may designate portions of the Covered Code as "Multiple-Licensed". "Multiple-Licensed" means that the Initial Developer permits you to utilize portions of the Covered Code under Your choice of the MPL or the alternative licenses, if any, specified by the Initial Developer in the file described in Exhibit A.

Exhibit A - Mozilla Public License:

"The contents of this file are subject to the Mozilla Public License Version 1.1 (the "License"); you may not use this file except in compliance with the License. You may obtain a copy of the License at:

<http://www.mozilla.org/MPL/>

Software distributed under the License is distributed on an "AS IS" basis, WITHOUT WARRANTY OF ANY KIND, either express or implied. See the License for the specific language governing rights and limitations under the License.

The Original Code is _____.

The Initial Developer of the Original Code is _____.

Portions created by _____ are Copyright (C) _____
_____. All Rights Reserved.

Contributor(s): _____.

Alternatively, the contents of this file may be used under the terms of the _____ license (the "[_____] License"), in which case the provisions of [_____] License are applicable instead of those above. If you wish to allow use of your version of this file only under the terms of the [_____] License and not to allow others to use your version of this file under the MPL, indicate your decision by deleting the provisions above and replace them with the notice and other provisions required by the [_____] License. If you do not delete the provisions above, a recipient may use your version of this file under either the MPL or the [_____] License."

NOTE: The text of this Exhibit A may differ slightly from the text of the notices in the Source Code files of the Original Code. You should use the text of this Exhibit A rather than the text found in the Original Code Source Code for Your Modifications.

Initial Developers:

In accordance with MPL section 3.3, we state that this software is derived, directly or indirectly, from Original Code provided by some or all of the following people, companies and organisations:

Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc. 51 Franklin St, Fifth Floor, Boston, MA 02110-1301 USA

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Library General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions: a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change. b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License. c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive

but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following: a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or, b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or, c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted

interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

Copyright (C)

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 51 Franklin St, Fifth Floor, Boston, MA 02110-1301 USA

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

Gnomovision version 69, Copyright (C) year name of author Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type "show w". This is free software, and you are welcome to redistribute it under certain conditions; type "show c" for details.

The hypothetical commands "show w" and "show c" should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than "show w" and "show c"; they could even be mouse-clicks

or menu items -- whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the program "Gnomovision" (which makes passes at compilers) written by James Hacker.

, 1 April 1989
Ty Coon, President of Vice

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Library General Public License instead of this License.

GNU Lesser General Public License

Version 2.1, February 1999

Copyright (C) 1989, 1991 Free Software Foundation, Inc. 51 Franklin St, Fifth Floor, Boston, MA 02110-1301 USA

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

[This is the first released version of the Lesser GPL. It also counts as the successor of the GNU Library Public License, version 2, hence the version number 2.1.]

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public Licenses are intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some specially designated software packages--typically libraries--of the Free Software Foundation and other authors who decide to use it. You can use it too, but we suggest you first think carefully about whether this license or the ordinary General Public License is the better strategy to use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish); that you receive source code or can get it if you want it; that you can change the software and use pieces of it in new free programs; and that you are informed that you can do these things.

To protect your rights, we need to make restrictions that forbid distributors to deny you these rights or to ask you to surrender these rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link other code with the library, you must provide complete object files to the recipients, so that they can relink them with the library after making changes to the library and recompiling it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method: (1) we copyright the library, and (2) we offer you this license, which gives you legal permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that there is no warranty for the free library. Also, if the library is modified by someone else and passed on, the recipients should know that what they have is not the original version, so that the original author's reputation will not be affected by problems that might be introduced by others.

Finally, software patents pose a constant threat to the existence of any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library must be consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain designated libraries, and is quite different from the ordinary General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library. The ordinary General Public License therefore permits such

linking only if the entire combination fits its criteria of freedom. The Lesser General Public License permits more lax criteria for linking other code with the library.

We call this license the "Lesser" General Public License because it does Less to protect the user's freedom than the ordinary General Public License. It also provides other free software developers Less of an advantage over competing non-free programs. These disadvantages are the reason we use the ordinary General Public License for many libraries. However, the Lesser license provides advantages in certain special circumstances.

For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, so that it becomes a de-facto standard. To achieve this, non-free programs must be allowed to use the library. A more frequent case is that a free library does the same job as widely used non-free libraries. In this case, there is little to gain by limiting the free library to free software only, so we use the Lesser General Public License.

In other cases, permission to use a particular library in non-free programs enables a greater number of people to use a large body of free software. For example, permission to use the GNU C Library in non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/Linux operating system.

Although the Lesser General Public License is Less protective of the users' freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The former contains code derived from the library, whereas the latter must be combined with the library in order to run.

GNU LESSER GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions: a) The modified work must itself be a software library. b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change. c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License. d) If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful. (For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the

application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General Public License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License. Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also combine or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things: a) Accompany the work with the complete corresponding machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.) b) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user's computer system, rather than copying library functions into the executable, and (2) will operate properly with a modified version of the library, if the user installs one, as long as the modified version is interface-compatible with the version that the work was made with. c) Accompany the work with a written offer, valid for at least three

years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution. d) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place. e) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things: a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above. b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation may publish revised and/or new versions of the Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible

with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

Copyright (C)

This library is free software; you can redistribute it and/or modify it under the terms of the GNU Lesser General Public License as published by the Free Software Foundation; either version 2.1 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU Lesser General Public License for more details.

You should have received a copy of the GNU Lesser General Public License along with this library; if not, write to the Free Software Foundation, Inc., 51 Franklin St, Fifth Floor, Boston, MA 02110-1301 USA

Also add information on how to contact you by electronic and paper mail.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the library, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the library `Frob' (a library for tweaking knobs) written by James Random Hacker.

, 1 April 1990
Ty Coon, President of Vice

That's all there is to it!

Python 2.4.4 License

This is the official license for the Python 2.4 release.

A. HISTORY OF THE SOFTWARE

=====

Python was created in the early 1990s by Guido van Rossum at Stichting Mathematisch Centrum (CWI, see <http://www.cwi.nl>) in the Netherlands as a successor of a language called ABC. Guido remains Python's principal author, although it includes many contributions from others.

In 1995, Guido continued his work on Python at the Corporation for National Research Initiatives (CNRI, see <http://www.cnri.reston.va.us>) in Reston, Virginia where he released several versions of the software.

In May 2000, Guido and the Python core development team moved to **BeOpen.com** to form the BeOpen PythonLabs team. In October of the same year, the PythonLabs team moved to Digital Creations (now Zope Corporation, see <http://www.zope.com>). In 2001, the Python Software Foundation (PSF, see <http://www.python.org/psf/>) was formed, a non-profit organization created specifically to own Python-related Intellectual Property. Zope Corporation is a sponsoring member of the PSF.

All Python releases are Open Source (see <http://www.opensource.org> for the Open Source Definition). Historically, most, but not all, Python releases have also been GPL-compatible; the table below summarizes the various releases:

| Release | Derived from | Year | Owner | GPL-compatible? |
|----------------|--------------|-----------|------------|-----------------|
| 0.9.0 thru 1.2 | | 1991-1995 | CWI | yes |
| 1.3 thru 1.5.2 | 1.2 | 1995-1999 | CNRI | yes |
| 1.6 | 1.5.2 | 2000 | CNRI | no |
| 2.0 | 1.6 | 2000 | BeOpen.com | no |
| 1.6.1 | 1.6 | 2001 | CNRI | yes (2) |
| 2.1 | 2.0 + 1.6.1 | 2001 | PSF | no |
| 2.0.1 | 2.0 + 1.6.1 | 2001 | PSF | yes |
| 2.1.1 | 2.1 + 2.0.1 | 2001 | PSF | yes |
| 2.2 | 2.1.1 | 2001 | PSF | yes |
| 2.1.2 | 2.1.1 | 2002 | PSF | yes |
| 2.1.3 | 2.1.2 | 2002 | PSF | yes |
| 2.2.1 | 2.2 | 2002 | PSF | yes |
| 2.2.2 | 2.2.1 | 2002 | PSF | yes |
| 2.2.3 | 2.2.2 | 2003 | PSF | yes |
| 2.3 | 2.2.2 | 2002-2003 | PSF | yes |

| | | | | |
|-------|-------|-----------|-----|-----|
| 2.3.1 | 2.3 | 2002-2003 | PSF | yes |
| 2.3.2 | 2.3.1 | 2002-2003 | PSF | yes |
| 2.3.3 | 2.3.2 | 2002-2003 | PSF | yes |
| 2.3.4 | 2.3.3 | 2004 | PSF | yes |
| 2.3.5 | 2.3.4 | 2005 | PSF | yes |
| 2.4 | 2.3 | 2004 | PSF | yes |
| 2.4.1 | 2.4 | 2005 | PSF | yes |
| 2.4.2 | 2.4.1 | 2005 | PSF | yes |
| 2.4.3 | 2.4.2 | 2006 | PSF | yes |
| 2.4.4 | 2.4.3 | 2006 | PSF | yes |

Footnotes:

(1) GPL-compatible doesn't mean that we're distributing Python under the GPL. All Python licenses, unlike the GPL, let you distribute a modified version without making your changes open source. The GPL-compatible licenses make it possible to combine Python with other software that is released under the GPL; the others don't.

(2) According to Richard Stallman, 1.6.1 is not GPL-compatible, because its license has a choice of law clause. According to CNRI, however, Stallman's lawyer has told CNRI's lawyer that 1.6.1 is "not incompatible" with the GPL.

Thanks to the many outside volunteers who have worked under Guido's direction to make these releases possible.

B. TERMS AND CONDITIONS FOR ACCESSING OR OTHERWISE USING PYTHON

=====

PSF LICENSE AGREEMENT FOR PYTHON 2.4

1. This LICENSE AGREEMENT is between the Python Software Foundation ("PSF"), and the Individual or Organization ("Licensee") accessing and otherwise using Python 2.4 software in source or binary form and its associated documentation.
2. Subject to the terms and conditions of this License Agreement, PSF hereby grants Licensee a nonexclusive, royalty-free, world-wide license to reproduce, analyze, test, perform and/or display publicly, prepare derivative works, distribute, and otherwise use Python 2.4 alone or in any derivative version, provided, however, that PSF's License Agreement and PSF's notice of copyright, i.e., "Copyright (c) 2001, 2002, 2003, 2004 Python Software Foundation; All Rights Reserved" are retained in Python 2.4 alone or in any derivative version prepared by Licensee.
3. In the event Licensee prepares a derivative work that is based on or incorporates Python 2.4 or any part thereof, and wants to make the derivative work available to others as provided herein, then Licensee hereby agrees to include in any such work a brief summary of the changes made to Python 2.4.
4. PSF is making Python 2.4 available to Licensee on an "AS IS" basis. PSF MAKES NO REPRESENTATIONS OR WARRANTIES, EXPRESS OR IMPLIED. BY WAY OF EXAMPLE, BUT NOT LIMITATION, PSF MAKES NO AND DISCLAIMS ANY REPRESENTATION OR WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OR THAT THE USE OF PYTHON 2.4 WILL NOT INFRINGE ANY THIRD PARTY RIGHTS.
5. PSF SHALL NOT BE LIABLE TO LICENSEE OR ANY OTHER USERS OF PYTHON 2.4 FOR ANY INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES OR LOSS AS A RESULT OF MODIFYING, DISTRIBUTING, OR OTHERWISE USING PYTHON 2.4, OR ANY DERIVATIVE THEREOF, EVEN IF ADVISED OF THE POSSIBILITY THEREOF.
6. This License Agreement will automatically terminate upon a material breach of its terms and conditions.
7. Nothing in this License Agreement shall be deemed to create any relationship of agency, partnership, or joint venture between PSF and Licensee. This License Agreement does not grant permission to use PSF trademarks or trade name in a trademark sense to endorse or promote products or services of Licensee, or any third party.
8. By copying, installing or otherwise using Python 2.4, Licensee agrees to be bound by the terms and conditions of this License Agreement.

BEOPEN.COM LICENSE AGREEMENT FOR PYTHON 2.0

BEOPEN PYTHON OPEN SOURCE LICENSE AGREEMENT VERSION 1

1. This LICENSE AGREEMENT is between **BeOpen.com** ("BeOpen"), having an office at 160 Saratoga Avenue, Santa Clara, CA 95051, and the Individual or Organization ("Licensee") accessing and otherwise using this software in source or binary form and its associated documentation ("the Software").
2. Subject to the terms and conditions of this BeOpen Python License Agreement, BeOpen hereby grants Licensee a non-exclusive, royalty-free, world-wide license to reproduce, analyze, test, perform and/or display publicly, prepare derivative works, distribute, and otherwise use the Software alone or in any derivative version, provided, however, that the BeOpen Python License is retained in the Software, alone or in any derivative version prepared by Licensee.
3. BeOpen is making the Software available to Licensee on an "AS IS" basis. BEOPEN MAKES NO REPRESENTATIONS OR WARRANTIES, EXPRESS OR IMPLIED. BY WAY OF EXAMPLE, BUT NOT LIMITATION, BEOPEN MAKES NO AND DISCLAIMS ANY REPRESENTATION OR WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OR THAT THE USE OF THE SOFTWARE WILL NOT INFRINGE ANY THIRD PARTY RIGHTS.
4. BEOPEN SHALL NOT BE LIABLE TO LICENSEE OR ANY OTHER USERS OF THE SOFTWARE FOR ANY INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES OR LOSS AS A RESULT OF USING, MODIFYING OR DISTRIBUTING THE SOFTWARE, OR ANY DERIVATIVE THEREOF, EVEN IF ADVISED OF THE POSSIBILITY THEREOF.
5. This License Agreement will automatically terminate upon a material breach of its terms and conditions.
6. This License Agreement shall be governed by and interpreted in all respects by the law of the State of California, excluding conflict of law provisions. Nothing in this License Agreement shall be deemed to create any relationship of agency, partnership, or joint venture between BeOpen and Licensee. This License Agreement does not grant permission to use BeOpen trademarks or trade names in a trademark sense to endorse or promote products or services of Licensee, or any third party. As an exception, the "BeOpen Python" logos available at <http://www.pythonlabs.com/logos.html> may be used according to the permissions granted on that web page.
7. By copying, installing or otherwise using the software, Licensee agrees to be bound by the terms and conditions of this License Agreement.

CNRI LICENSE AGREEMENT FOR PYTHON 1.6.1

1. This LICENSE AGREEMENT is between the Corporation for National Research Initiatives, having an office at 1895 Preston White Drive, Reston, VA 20191 ("CNRI"), and the Individual or Organization ("Licensee") accessing and otherwise using Python 1.6.1 software in source or binary form and its associated documentation.
2. Subject to the terms and conditions of this License Agreement, CNRI hereby grants Licensee a nonexclusive, royalty-free, world-wide license to reproduce, analyze, test, perform and/or display publicly, prepare derivative works, distribute, and otherwise use Python 1.6.1 alone or in any derivative version, provided, however, that CNRI's License Agreement and CNRI's notice of copyright, i.e., "Copyright (c) 1995-2001 Corporation for National Research Initiatives; All Rights Reserved" are retained in Python 1.6.1 alone or in any derivative version prepared by Licensee. Alternately, in lieu of CNRI's License Agreement, Licensee may substitute the following text (omitting the quotes): "Python 1.6.1 is made available subject to the terms and conditions in CNRI's License Agreement. This Agreement together with Python 1.6.1 may be located on the Internet using the following unique, persistent identifier (known as a handle): 1895.22/1013. This Agreement may also be obtained from a proxy server on the Internet using the following URL: <http://hdl.handle.net/1895.22/1013>".
3. In the event Licensee prepares a derivative work that is based on or incorporates Python 1.6.1 or any part thereof, and wants to make the derivative work available to others as provided herein, then Licensee hereby agrees to include in any such work a brief summary of the changes made to Python 1.6.1.
4. CNRI is making Python 1.6.1 available to Licensee on an "AS IS" basis. CNRI MAKES NO REPRESENTATIONS OR WARRANTIES, EXPRESS OR IMPLIED. BY WAY OF EXAMPLE, BUT NOT LIMITATION, CNRI MAKES NO AND DISCLAIMS ANY REPRESENTATION OR WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OR THAT THE USE OF PYTHON 1.6.1 WILL NOT INFRINGE ANY THIRD PARTY RIGHTS.
5. CNRI SHALL NOT BE LIABLE TO LICENSEE OR ANY OTHER USERS OF PYTHON 1.6.1 FOR ANY INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES OR LOSS AS A RESULT OF MODIFYING, DISTRIBUTING, OR OTHERWISE USING PYTHON 1.6.1, OR ANY DERIVATIVE THEREOF, EVEN IF ADVISED OF THE POSSIBILITY THEREOF.
6. This License Agreement will automatically terminate upon a material breach of its terms and conditions.
7. This License Agreement shall be governed by the federal intellectual property law of the United States, including without limitation the federal copyright law, and, to the extent such U.S. federal law does not apply, by the law of the Commonwealth of Virginia, excluding Virginia's conflict of law provisions. Notwithstanding the foregoing, with regard to derivative works based on Python 1.6.1 that incorporate non-separable material that was previously distributed under the GNU General Public License (GPL), the law of the Commonwealth of Virginia shall govern this License Agreement only as to issues arising under or with

respect to Paragraphs 4, 5, and 7 of this License Agreement. Nothing in this License Agreement shall be deemed to create any relationship of agency, partnership, or joint venture between CNRI and Licensee. This License Agreement does not grant permission to use CNRI trademarks or trade name in a trademark sense to endorse or promote products or services of Licensee, or any third party.

8. By clicking on the "ACCEPT" button where indicated, or by copying, installing or otherwise using Python 1.6.1, Licensee agrees to be bound by the terms and conditions of this License Agreement.

ACCEPT

CWI LICENSE AGREEMENT FOR PYTHON 0.9.0 THROUGH 1.2

Copyright (c) 1991 - 1995, Stichting Mathematisch Centrum Amsterdam, The Netherlands. All rights reserved.

Permission to use, copy, modify, and distribute this software and its documentation for any purpose and without fee is hereby granted, provided that the above copyright notice appear in all copies and that both that copyright notice and this permission notice appear in supporting documentation, and that the name of Stichting Mathematisch Centrum or CWI not be used in advertising or publicity pertaining to distribution of the software without specific, written prior permission.

STICHTING MATHEMATISCH CENTRUM DISCLAIMS ALL WARRANTIES WITH REGARD TO THIS SOFTWARE, INCLUDING ALL IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS, IN NO EVENT SHALL STICHTING MATHEMATISCH CENTRUM BE LIABLE FOR ANY SPECIAL, INDIRECT OR CONSEQUENTIAL DAMAGES OR ANY DAMAGES WHATSOEVER RESULTING FROM LOSS OF USE, DATA OR PROFITS, WHETHER IN AN ACTION OF CONTRACT, NEGLIGENCE OR OTHER TORTIOUS ACTION, ARISING OUT OF OR IN CONNECTION WITH THE USE OR PERFORMANCE OF THIS SOFTWARE.

Credits

DeviceVM acknowledges all open source community members, and especially thanks contributors to the following open source projects that we leveraged in developing Splashtop®. If you find your project missing from the list below, please contact DeviceVM through your project lead, and we will add your project name to the list. To obtain the source code, please visit <http://www.splashtop.com/developer>.
