Dell EMC S5048F–ON System Release Notes, OS Version 9.14(1.10)

This document contains information about open and resolved caveats, and operational information specific to the Dell EMC Networking operating software (OS) and the S5048F-Open Networking (ON) platform.

**Current Release Version:** 9.14(1.10)

**Release Date:** 2021-09-30

**Previous Release Version:** 9.14(1.9P4)

Topics:

- Document Revision History
- Requirements
- New Dell EMC Networking OS Version 9.14(1.10) Features
- Restrictions
- Changes to the Default Behavior and CLI Syntax
- Documentation Corrections
- Deferred Issues
- Fixed Issues
- Known Issues
- Upgrading the ONIE Package for the S5048F-ON System
- Upgrading the DIAG Package for the S5048F-ON System
- Installing Dell EMC Networking OS on the S5048F-ON using ONIE
- Upgrading the CPLD
- Upgrading the SmartFusion Microcontroller Subsystem — SMF MSS-IAP
- Upgrading the SmartFusion Microcontroller Subsystem — SMF MSS-FPGA
- Upgrading the OOB-FPGA
- Upgrading the S5048F-ON Dell EMC Networking OS Image using Dell EMC Networking OS CLI
- Upgrade the Boot Selector and Boot Flash Images from Dell EMC Networking OS
- Uninstalling the Dell EMC Networking OS
- Installing a Third Party Operating System
- Support Resources

For more information on hardware and software features, commands, and capabilities, refer to the Dell EMC Networking support website at: https://www.dell.com/support

### Document Revision History

<table>
<thead>
<tr>
<th>Date</th>
<th>Description</th>

<tbody>
<tr>
<td>2021-09</td>
<td>Initial release.</td>
</tr>
</tbody>
</table>
Requirements

The following requirements apply to the S5048F-ON system.

Hardware Requirements

The following lists the Dell EMC S5048F-ON system hardware requirements:

- 1/10/25/40/50/100 GbE switch
- Forty-eight 1 GbE/10 GbE/25 GbE SFP28 ports
- Six 100 GbE QSFP28 ports (Each 100 GbE port can be fanned-out into 1x40 GbE, 2x50 GbE, 4x25 GbE, and 4x10 GbE)
- One MicroUSB-B console port
- One RJ-45 serial console port
- One USB Type-A port for more file storage
- On-board Rangeley central processing unit (CPU) system with 8GB DDR III RAM, 16GB iSLC mSATA SSD
- One 10/100/1000BaseT Ethernet management port
- Two hot-swappable redundant power supplies
- Four hot-swappable fan modules
- Standard 1U switch

The following lists the individual Dell EMC S5048F-ON system hardware components that are available to order:

- Fan with airflow from I/O side to PSU side
- Fan with airflow from PSU side to I/O side
- AC or DC power supply with airflow from I/O side to PSU side
- AC or DC power supply with airflow from PSU side to I/O side

**NOTE:** Fan modules and power supplies are field replaceable units.

**NOTE:** All fans and PSUs must have the same airflow direction. If you mix the airflow direction, the switch detects the discrepancy, issues an alarm, and may auto-shutdown to avoid heat damage to components. You must correct the mixed airflow direction.

Software Requirements

**NOTE:** For information about non-Dell OS versions, see Dell EMC S5048F-Open Networking (ON) System Release Notes.

New Dell EMC Networking OS Version 9.14(1.10) Features

The following features have been added to the S5048F–ON with Dell EMC Networking OS version 9.14(1.10):

None.
Restrictions

- After you upgrade Dell EMC Networking OS to 9.14(1.10) from an earlier version and update the BIOS using the booted option, the system does not allow you to downgrade the BIOS to an earlier version. To run an earlier BIOS version, use FTP, TFTP, or SCP option from the current OS version.

```
DellEMC#upgrade boot bootselector-image stack-unit 1 tftp://10.16.127.7/FTOS-S5048F-ON-9.14.1.10.bin
Sep 24 09:32:03 : Discarded 1 pkts. Expected block num : 51. Received block num: 50
Sep 24 09:32:06 : Discarded 1 pkts. Expected block num : 65. Received block num: 64

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

Current Boot information in the system:
========================================================================
Card       BootSelector    Current Version     New Version
------------------------------------------------------------------------
Unit1       Boot Selector        3.38.0.1-4     3.38.0.1-3
***********************************************************************
*  Warning - Upgrading boot selectors is inherently risky and should *
*  only be attempted when necessary. A failure at this upgrade may *
*  cause a board RMA. Proceed with caution !                          *
***********************************************************************
Proceed upgrade Boot Selector image for stack-unit 1 [yes/no]: yes

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

!!!
Bootselector image upgrade for stack-unit 1 completed successfully.
```

If you downgrade the Dell EMC Networking OS version from 9.14(1.10) to 9.11(0.0) or any older version, the system displays the following error message even though there is no functional impact:

```
CDB boot error:  C.cdb file format
```

Before downgrading, save the current configuration and then remove the CDB files (confd_cdb.tar.gz.version and confd_cdb.tar.gz). To remove the files, use the following steps:

```
DellEMC#write memory
DellEMC#delete flash://confd_cdb.tar.gz.version
DellEMC#delete flash://confd_cdb.tar.gz
DellEMC#reload
```

- The following features are not available in Dell EMC Networking OS:
  - Protocol-independent multicast (PIM) equal cost multi path (ECMP)
  - Static Internet group management protocol (IGMP) join (ip igmp static-group)
  - IGMP querier timeout configuration (ip igmp querier-timeout)
  - IGMP group join limit (ip igmp group join-limit)

- When 1024 or more VNI profiles are configured, the system takes more time to load. Dell EMC recommends to restrict the VNI profiles to be less than 1000.

- If you use the interface range command to select multiple interfaces that are added to the management VRF, the ipv6 address command does not display the autoconfig option. You can configure the autoconfig command on individual interfaces.

- If you use the interface range command to select multiple interfaces that are added to the management VRF, the ipv6 nd command displays the following options but they do not take effect if you use them:
  - dns-server
  - hop-limit
  - managed-config-flag
  - max-ra-interval
  - mtu
  - other-config-flag
  - prefix
When FRRP is enabled in a VLT domain, no flavor of Spanning tree should concurrently be enabled on the nodes of that specific VLT domain. In essence FRRP and xSTP should not co-exist in a VLT environment.

On the device, the 48 SFP28 ports are split into 12 port groups; each group constituting four continuous SFP28 ports. Within a port group, all four ports can run at 25G/10G/1G speed. The port group speed is determined by the first optic inserted in any one of the four ports. For example, if you insert an SFP+ in port 1/1, the port group speed is set to 1G/10G. If you insert a 25G optic in port 1/2, the system displays an error message and does not enable the 25G optic. The port group speed resets to the default speed of 25G when you remove the SFP+ from port 1/1.

Changes to the Default Behavior and CLI Syntax

Following default behavior and CLI syntax changes occurred during the Dell EMC Networking OS release:

To enhance security, the default RSA key size has been changed to 2048 bits from 1024 bits from 9.14.1.10 onwards.

If you configure an NTP server using a DNS hostname, the switch tries to resolve the name to an IP address instead of the hostname. If it succeeds, the system saves the command using the IP address instead of the hostname, to the running-config. If it fails, you see the following error message:

```
Error: Destination name lookup failed for host <DNS hostname>
```

Documentation Corrections

This section describes the errors identified in the current release of the Dell EMC Networking OS.

None.

Deferred Issues

Issues that appear in this section were reported in Dell Networking OS version 9.14(1.0) as open, but have since been deferred. Deferred issues are those that are found to be invalid, not reproducible, or not scheduled for resolution.

Deferred issues are reported using the following definitions.

<table>
<thead>
<tr>
<th>Category</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>PR#</td>
<td>Problem Report number that identifies the issue.</td>
</tr>
<tr>
<td>Severity</td>
<td></td>
</tr>
<tr>
<td>S1</td>
<td>Crash: A software crash occurs in the kernel or a running process that requires a restart of AFM, the router, switch, or process.</td>
</tr>
<tr>
<td>S2</td>
<td>Critical: An issue that renders the system or a major feature unusable, which can have a pervasive impact on the system or network, and for which there is no work-around acceptable to the customer.</td>
</tr>
<tr>
<td>S3</td>
<td>Major: An issue that affects the functionality of a major feature or negatively effects the network for which there exists a work-around that is acceptable to the customer.</td>
</tr>
<tr>
<td>S4</td>
<td>Minor: A cosmetic issue or an issue in a minor feature with little or no network impact for which there might be a work-around.</td>
</tr>
</tbody>
</table>

Synopsis is the title or short description of the issue.

Release Notes description contains more detailed information about the issue.

Work around describes a mechanism for circumventing, avoiding, or recovering from the issue. It might not be a permanent solution.
Deferred S5048F–ON 9.14(1.0) Software Issues

None

Fixed Issues

Fixed issues are reported using the following definitions.

<table>
<thead>
<tr>
<th>Category</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>PR#</td>
<td>Problem Report number that identifies the issue.</td>
</tr>
<tr>
<td>Severity</td>
<td>S1 — Crash: A software crash occurs in the kernel or a running process that requires a restart of AFM, the router, switch, or process. S2 — Critical: An issue that renders the system or a major feature unusable, which can have a pervasive impact on the system or network, and for which there is no work-around acceptable to the customer. S3 — Major: An issue that affects the functionality of a major feature or negatively effects the network for which there exists a work-around that is acceptable to the customer. S4 — Minor: A cosmetic issue or an issue in a minor feature with little or no network impact for which there might be a work-around.</td>
</tr>
<tr>
<td>Synopsis</td>
<td>Synopsis is the title or short description of the issue.</td>
</tr>
<tr>
<td>Work around</td>
<td>Work around describes a mechanism for circumventing, avoiding, or recovering from the issue. It might not be a permanent solution. The work-around is unnecessary, as the version of code for which this release note is documented has resolved the issue.</td>
</tr>
</tbody>
</table>

Fixed S5048F–ON 9.14(1.10) Software Issues

NOTE: Dell EMC Networking OS 9.14(1.10) includes fixes for issues addressed in previous 9.14 releases. Refer to the respective release notes documentation for the list of issues fixed in earlier 9.14 releases.

The following issues are fixed in Dell EMC Networking OS version 9.14(1.10):

PR#170115

Severity: Sev 3
Synopsis: The switch may encounter an exception when an incorrect length field is specified in a TACACS packet.
Release Notes: The switch may encounter an exception when an incorrect length field is specified in a TACACS packet.
Workaround: None

PR#170159

Severity: Sev 3
**Synopsis:**
SSH connections with Cipher Block Chaining (CBC) ciphers are vulnerable.

**Release Notes:**
SSH connections with Cipher Block Chaining (CBC) ciphers are vulnerable.

**Workaround:**
Configure a stronger Cipher/MAC/KEX setting using the `ip ssh server` command.

**PR#170161**

**Severity:**
Sev 2

**Synopsis:**
SSH connections may be vulnerable with switches running on a 1024 bit RSA key.

**Release Notes:**
SSH connections may be vulnerable with switches running on a 1024 bit RSA key.

**Workaround:**
Create a new 2048 bit RSA key using the `crypto key generate rsa` command.

**PR#170206**

**Severity:**
Sev 2

**Synopsis:**
Addressed OpenSSL CVE's: CVE-2021-3711 and CVE-2021-3712.

**Release Notes:**
The following CVEs have been addressed:
- CVE-2021-3711
- CVE-2021-3712

The CVE database can be accessed here: https://cve.mitre.org/cve/search_cve_list.html.

**Workaround:**
None

**PR#170211**

**Severity:**
Sev 2

**Synopsis:**
When a switch with scaled VLANs is reloaded, traffic drop may occur due to a delay in VLAN programming.

**Release Notes:**
When a switch with scaled VLANs is reloaded, traffic drop may occur due to a delay in VLAN programming.

**Workaround:**
None

---

**Known Issues**

Known issues are reported using the following definitions.

<table>
<thead>
<tr>
<th>Category</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>PR#</strong></td>
<td>Problem Report number that identifies the issue.</td>
</tr>
<tr>
<td><strong>Severity</strong></td>

</tr>
<tr>
<td>S1 — Crash: A software crash occurs in the kernel or a running process that requires a restart of AFM, the router, switch, or process.</td>
<td></td>
</tr>
<tr>
<td>S2 — Critical: An issue that renders the system or a major feature unusable, which can have a pervasive impact on the system or network, and for which there is no work-around acceptable to the customer.</td>
<td></td>
</tr>
</tbody>
</table>
Known S5048F–ON 9.14(1.10) Software Issues

The following issues are open in Dell EMC Networking OS version 9.14(1.10):

PR#169841

Severity: Sev 2

Synopsis: In certain scenarios, an MSDP learnt PIM TIB entry stays in registering state indefinitely.

Release Notes: In certain scenarios, an MSDP learnt PIM TIB entry stays in registering state indefinitely.

Workaround: Set the affected node as a non-designated router in the RPF neighbor interface.

Upgrading the ONIE Package for the S5048F-ON System

To upgrade the ONIE package, use one of the following two processes:

- Zero touch (dynamic): Copy the updated ONIE installer for your system to the TFTP/HTTP server. Configure the DHCP options using the ONIE specifications shown at the following link: https://github.com/opencomputeproject/onie/wiki/Design-Spec-SW-Updating-ONIE
- Manual: Copy the image onto the TFTP/HTTP servers and boot ONIE. Update the ONIE using the onie-self-update command, then download and run an ONIE updater image (onie-updater-x86_64-dell EMC_s5000_c2538-r0). The supported URL types are: HTTP, FTP, TFTP, and FILE.

To upgrade ONIE, perform the following steps:

1. Reboot the system. During the reboot process, the system displays the following message prompting you to press the Esc key in order to stop the auto-boot process:

   Press Esc to stop autoboot ... 5
   Grub 2.02-beta2 (Dell EMC)
   Built by root at gbbdev-maa-01 on Fri_Sep_24_10:07:52.UTC_2021
   S5048F Boot Flash Label 3.38.2.6 NetBoot Label 3.38.2.6

2. At this prompt message, press the Esc key. The following menu appears:

   GNU Grub 2.02-beta2 (Dell EMC)
   Built by root at gbbdev-maa-01 on Fri_Sep_24_10:07:52.UTC_2021
   +---------------------------------+---------------------------------+
   | "DELL EMC Networking OS          |
   | DELL EMC Networking OS-Boot Line Interface |
   +---------------------------------+---------------------------------+
3. From the menu, choose the **ONIE** option.

**NOTE:** To choose an option from the menu, highlight one of the options using the up or down arrow key and press Enter.

The following menu appears:

```
GNU Grub 2.02-beta2 (Dell EMC)
```

| ONIE: Install OS |
| ONIE: Rescue |
| ONIE: Uninstall OS |
| **ONIE: Update ONIE** |
| ONIE: Embed ONIE |
| EDA-DIAG |

Press enter to boot the selected OS, 'e' to edit the commands before booting or 'c' for a command-line.

4. From this menu, choose the **ONIE : Update ONIE** option.

**NOTE:** To choose an option from the menu, highlight one of the options using the up or down arrow key and press Enter.

The ONIE update mode is enabled and the ONIE prompt appears, as shown:

```
ONIE: ONIE Update Mode ...
Version  : 3.38.1.1-3
Build Date: 2021-09-24T09:57-0700
Info: Mounting kernel filesystems... done.
Info: Mounting ONIE-BOOT on /mnt/onie-boot ...

Starting: dropbear ssh daemon... done.
Starting: telnetd... done.
discover: ONIE update mode detected. Running updater.
Starting: discover... done.
Please press Enter to activate this console. Info: eth0: Checking link... up.
Info: Trying DHCPv4 on interface: eth0
Warning: Unable to configure interface using DHCPv4: eth0
ONIE: Using link-local IPv4 addr: eth0: 169.254.51.54/16
To check the install status inspect /var/log/onie.log.
```
Try this: `tail -f /var/log/onie.log`

```
** ONIE Update Mode Enabled **
ONIE:/ #
```

5. At the ONIE prompt, to stop the ONIE discovery process, enter the following command:

```
ONIE:/ # onie-discovery-stop
```

The ONIE discovery stops, as shown:

```
discover: ONIE update mode detected.
Stopping: discover... done.
ONIE:/ #
```

6. Configure an interface and assign an IP address to that interface using the following command:

```
ONIE:/ # ifconfig eth0 10.16.129.131/16
```

7. Enter the following command to upgrade ONIE:

```
ONIE:/ # onie-self-update tftp://<tftp-server–address>/onie-updater-x86_64-dellemc_s5000_c2538-r0.
```

**NOTE:** You must copy the `onie-updater-x86_64-dellemc_s5000_c2538-r0` file to the `/tftpboot` folder in the server.

ONIE is updated on the system, as shown:

```
ONIE:/ # onie-self-update tftp://10.16.127.6/users/gk/5048F/onie-updater-x86_64-dellemc_s5000_c2538-r0

```
Upgrading the DIAG Package for the S5048F-ON System

To upgrade the DIAG package, use one of the following two processes:

- **Zero touch (dynamic):** Copy the update ONIE installer for your system to the TFTP/HTTP server. Configure the DHCP options using the ONIE specifications shown at the following link: https://github.com/opencomputeproject/onie/wiki/Design-Spec-SW-Updating-ONIE.

- **Manual:** Copy the image onto the TFTP/HTTP servers and boot ONIE. Update the ONIE using the `onie-self-update` command, then download and run an ONIE updater image (diag-installer-x86_64-dell EMC_s5048f_c2538-r0-3.38.3.1-1-2021-09-24.bin). The supported URL types are: HTTP, FTP, TFTP, and FILE.

**NOTE:** If Dell EMC Networking OS is already installed on the S5048F-ON system, before upgrading the DIAG package, you must first uninstall Dell EMC Networking OS. For more information on uninstalling Dell EMC Networking OS, see Uninstalling Dell EMC Networking OS on the S5048F-ON.

To upgrade DIAG, perform the following steps:

1. Reboot the system. During the reboot process, the system displays the following message prompting you to press the Esc key in order to stop the auto-boot process:

```
Press Esc to stop autoboot ... 5
Grub 2.02-beta2 (Dell EMC)
Built by root at gbbdev-maa-01 on Fri_Sep_24_10:07:52_UTC_2021
S5048F Boot Flash Label 3.38.2.6 NetBoot Label 3.38.2.6
```

2. At this prompt message, press the Esc key. The following menu appears:

```
GNU Grub 2.02-beta2 (Dell EMC)
Built by root at gbbdev-maa-01 on Fri_Sep_24_10:07:52_UTC_2021
+----------------------------------------------------------------------------+
|*DELL EMC Networking OS                                                     |
| DELL EMC Networking OS-Boot Line Interface                                 |
| EDA-DIAG                                                                   |
| ONIE                                                                       |
+----------------------------------------------------------------------------+

Use the ^ and v keys to select which entry is highlighted.
Press enter to boot the selected OS, 'f' to boot FTOS, 'b' to go to BLI, 'o' to boot ONIE, 'd' to boot DIAG-OS, 'e' to edit the commands before booting or 'c' for a command-line.
```

3. From the menu, choose the **ONIE** option.

   **NOTE:** To choose an option from the menu, highlight one of the options using the up or down arrow key and press Enter.

   The following menu appears:

```
GNU Grub 2.02-beta2 (Dell EMC)
+----------------------------------------------------------------------------+
|*ONIE: Install OS                                                           |
| ONIE: Rescue                                                              |
```

4. From this menu, choose the ONIE : Install OS option.

**NOTE:** To choose an option from the menu, highlight one of the options using the up or down arrow key and press Enter.

The ONIE Installer mode is enabled and the ONIE prompt appears, as shown:

```
ONIE: OS Install Mode ...
Version  : 3.38.1.1-3
Build Date: 2021-09-24T09:57-0700
Info: Mounting kernel filesystems... done.
Info: Mounting ONIE-BOOT on /mnt/onie-boot ...
random: fnos urandom read with 14 bits of entropy available
Info: Mounting EFI System on /boot/efi ...
Info: Using eth0 MAC address: 34:17:eb:37:2d:00
Info: eth0: Checking link... up.
Info: Trying DHCPv4 on interface: eth0
Warning: Unable to configure interface using DHCPv4: eth0
random: nonblocking pool is initialized
ONIE: Using link-local IPv4 addr: eth0: 169.254.47.74/16
Starting: dropbear ssh daemon... done.
Starting: telnetd... done.
discover: installer mode detected. Running installer.
Starting: discover... done.

Please press Enter to activate this console. Info: eth0: Checking link... up.
Info: Trying DHCPv4 on interface: eth0

To check the install status inspect /var/log/onie.log.
Try this: tail -f /var/log/onie.log

** Installer Mode Enabled **

ONIE:/ 
```

5. At the ONIE prompt, to stop the ONIE discovery process, enter the following command:
```
ONIE:/ # onie-discovery-stop
```

The ONIE discovery stops, as shown:
```
ONIE:/ # onie-discovery-stop
discover: installer mode detected.
Stopping: discover... done.
ONIE:/ #
```

6. Configure an interface and assign an IP address to that interface using the following command:
```
ONIE:/ # ifconfig eth0 10.16.129.131/16
```

7. Enter the following command to upgrade DIAG on the S5048F-ON system:
```
onie-nos-install ftp://ftp:ftp@<ftp-server-adress>/tftpboot/diag-installer-x86_64-dellemc_s5048f_c2538-r0-3.38.3.1-1.bin
```

**NOTE:** You must copy the diag-installer-x86_64-dellemc_s5048f_c2538-r0-3.38.3.1-1.bin file to the /tftpboot folder in the server.

The DIAG is updated on the system, as shown:
```
onie-nos-install diag-installer-x86_64-dellemc_s5048f_c2538-r0-3.38.3.1-1.bin

Installing Dell EMC Networking OS on the S5048F-ON using ONIE

NOTE: You will need the Dell EMC Networking OS installer package, ONIE-FTOS-S5048F-ON-9.14.1.10.bin to install the Dell EMC Networking OS on your S5048F-ON system that has only ONIE.

To install the Dell EMC Networking OS version 9.14(1.10) on a new S5048F-ON device, perform the following steps:

1. Reboot the system. During the reboot process, the system displays the following message prompting you to press the Esc key in order to stop the auto-boot process:

   Press Esc to stop autoboost ... 5
   Grub 2.02-beta2 (Dell EMC)
   Built by root at gbbdev-maa-01 on Fri_Sep_24_10:07:52_UTC_2021
   S5048F Boot Flash Label 3.38.2.6 NetBoot Label 3.38.2.6

2. At this prompt message, press the Esc key. The following menu appears:

   GNU Grub 2.02-beta2 (Dell EMC)
   Built by root at gbbdev-maa-01 on Fri_Sep_24_10:07:52_UTC_2021
   +--------------------------------------------------------+
   | DELL EMC Networking OS                                  |
   | DELL EMC Networking OS-Boot Line Interface              |
   | EDA-DIAG                                                |
   | ONIE                                                    |
   |                                                        |
   +--------------------------------------------------------+

   Use the ^ and v keys to select which entry is highlighted.
   Press enter to boot the selected OS, 'f' to boot FTOS, 'b' to go to BLI, 'o' to boot ONIE, 'd' to boot DIAG-OS, 'e' to edit the commands before booting or 'c' for a command-line.

3. From the menu, choose the ONIE option.
NOTE: To choose an option from the menu, highlight one of the options using the up or down arrow key and press Enter.

The following menu appears:

```
GNU Grub 2.02~beta2 (Dell EMC)
+----------------------------------------------+
|*ONIE: Install OS                          |
| ONIE: Rescue                                |
| ONIE: Uninstall OS                          |
| ONIE: Update ONIE                           |
| ONIE: Embed ONIE                            |
|                                              |
+----------------------------------------------+
```

Use the ^ and v keys to select which entry is highlighted. Press enter to boot the selected OS, `e' to edit the commands before booting or `c' for a command-line.

4. From this menu, choose the **ONIE : Install OS** option.

**NOTE:** To choose an option from the menu, highlight one of the options using the up or down arrow key and press Enter.

The ONIE Installer mode is enabled and the ONIE prompt appears, as shown:

```
ONIE: OS Install Mode ...
Version   : 3.38.1.1-3
Build Date: 2021-07-24T09:57-0700
Info: Mounting kernel filesystems... done.
Info: Mounting ONIE-BOOT on /mnt/onie-boot ...
random: fsck urandom read with 14 bits of entropy available
Info: Mounting EFI System on /boot/efi ...
Info: Using eth0 MAC address: 34:17:eb:37:2d:00
Info: eth0: Checking link... up.
Info: Trying DHCPv4 on interface: eth0
Warning: Unable to configure interface using DHCPv4: eth0
random: nonblocking pool is initialized
ONIE: Using link-local IPv4 addr: eth0: 169.254.47.74/16
Starting: dropbear ssh daemon... done.
Starting: telnetd... done.
discover: installer mode detected. Running installer.
Starting: discover... done.

Please press Enter to activate this console. Info: eth0: Checking link... up.
Info: Trying DHCPv4 on interface: eth0
To check the install status inspect /var/log/onie.log.
Try this: tail -f /var/log/onie.log

** Installer Mode Enabled **
ONIE:/ #
ONIE:/ # Warning: Unable to configure interface using DHCPv4: eth0
ONIE:/ Using link-local IPv4 addr: eth0: 169.254.168.149/16
```

5. At the ONIE prompt, to stop the ONIE discovery process, enter the following command:

```
ONIE:/ # onie-discovery-stop
```

The ONIE discovery stops, as shown:

```
ONIE:/ # onie-discovery-stop
discover: installer mode detected.
Stopping: discover... done.
ONIE:/ #
```

6. Configure an interface and assign an IP address to that interface using the following command:

```
ONIE:/ # ifconfig eth0 10.16.129.131/16
```
7. Enter the following command to begin the installation process:

```
ONIE:/ # onie-nos-install tftp://<tftp-server-address>/ONIE-FTOS-S5048F-ON-9.14.1.10.bin
```

**NOTE:** You must copy the ONIE-FTOS-S5048F-ON-9.14.1.10.bin file to the /tftpboot folder in the server.

**NOTE:** After the Dell EMC Networking OS installation completes, the system automatically reboots.

Following is the installation and boot log of Dell EMC Networking OS:

```

DellEMC>

## Upgrading the CPLD

The S5048F-ON system with Dell EMC Networking OS Version 9.14(1.10) requires System complex programmable logic device (CPLD) 1 revision 1, CPLD2 revision 1, CPLD3 revision 1, CPLD4 revision 1, MSS FPGA revision 0.1, MSS IAP revision 1.4, and OOB-FPGA revision 1.0.

**NOTE:** If your CPLD revisions are higher than the ones shown here, DO NOT make any changes. If you have questions regarding the CPLD revision, contact Technical Support.

### Verify that you need a CPLD upgrade

To identify the CPLD version, use the show revision command.

```
DellEMC#show revision
```

```
-- Stack unit 1 --
S5048F-ON CPLD 1 : 1.0
S5048F-ON CPLD 2 : 1.0
S5048F-ON CPLD 3 : 1.0
S5048F-ON CPLD 4 : 1.0
S5048F-ON MSS FPGA : 0.1
S5048F-ON MSS IAP : 1.4
S5048F-ON OOB-FPGA : 1.0
```

To view the CPLD version that is associated with the Dell EMC Networking OS image, use the following command:

```
DellEMC#show os-version
```

```
RELEASE IMAGE INFORMATION :
---------------------------------------------------------------------
Platform          Version        Size           ReleaseTime

TARGET IMAGE INFORMATION :
---------------------------------------------------------------------
Type          Version                   Target    checksum
runtime       9.14(1.10)        Control Processor      passed

BOOT IMAGE INFORMATION :
---------------------------------------------------------------------
Type          Version                   Target    checksum
boot flash     3.38.2.6        Control Processor      passed

BOOTSEL IMAGE INFORMATION :
---------------------------------------------------------------------
Type          Version                   Target    checksum
boot selector  3.38.0.1-4        Control Processor      passed

FPGA IMAGE INFORMATION :
---------------------------------------------------------------------
Card          FPGA Name Version
stack-unit 1  S5048F-ON CPLD 1   1.0
stack-unit 1  S5048F-ON CPLD 2   1.0
```
Upgrading the CPLD Image

**NOTE:** The upgrade fpga-image system cpld stack-unit 1 booted command is hidden when using the feature in the CLI. However, it is a supported command.

To upgrade the CPLD image, follow these steps.

1. Shut down all of the interfaces on the system.
   ```
   INTERFACE Mode
   shutdown
   ```

2. Upgrade the CPLD image.
   ```
   EXEC Privilege Mode
   upgrade fpga-image system cpld stack-unit <id> booted
   ```

3. Power cycle the system physically. Switch off the system by unplugging the power chords from the Rear PSUs and wait until the PSU Fan–Rear Status LED is OFF.

   **NOTE:** Do not switch on the system with the PSU–Rear LED glowing AMBER.

   You can alternatively power cycle the switch using the power-cycle stack-unit <1-6> command as follows:

   ```
   DellEMC#power-cycle stack-unit 1
   Proceed with power-cycle? Confirm [yes/no]:yes
   ```
4. Verify the CPLD version using the `show revision` command output.

EXEC Privilege Mode

```
show revision
```

DellEMC#show revision

```
-- Stack unit 1 --
S5048F-ON CPLD 1         : 1.0
S5048F-ON CPLD 2         : 1.0
S5048F-ON CPLD 3         : 1.0
S5048F-ON CPLD 4         : 1.0
S5048F-ON MSS FPGA       : 0.1
S5048F-ON MSS IAP        : 1.4
S5048F-ON OOB-FPGA       : 1.0
```

**NOTE:** Do not power off the system while the FPGA upgrade is in progress. For any queries, contact Technical Support.

---

### Upgrading the SmartFusion Microcontroller Subsystem — SMF MSS-IAP

To upgrade the SmartFusion Microcontroller Subsystem — SMF MSS-IAP, follow these steps.

1. Shut down all of the interfaces on the system.
   
   INTERFACE Mode
   
   `shutdown`

2. Upgrade the SMF MSS-IAP image.
   
   EXEC Privilege Mode
   
   `upgrade mss-iap-image stack-unit <stack-unit-id> booted`

```
DellEMC#upgrade mss-iap-image stack-unit 1 booted

Current information for the system:
========================================================================
Card                    Device Name    Current Version     New Version
------------------------------------------------------------------------
CP              S5048F-ON MSS IAP                1.4             1.4
------------------------------------------------------------------------

Warning - Upgrading FPGA is inherently risky and should only be attempted when necessary. A failure at this upgrade may cause a board RMA. Proceed with caution !

Warning - PSU and FANTRAYS Syslog messages may appear during SMF FPGA upgrade. Please ignore these messages !!!

Upgrade image for stack-unit 1 [yes/no]: yes

SMF MSS upgrade in progress!!! Please do NOT power off the unit!!! Auto Reset will happen at the end of Upgrade!!!

Upgrade result :
UNIT1 SMF MSS upgrade successful UNIT1. will go for reboot to complete the upgrade.
```
After the SMF MSS-IAP upgrade is successfully completed, the system re-boots automatically.

3. After the system re-boots, wait for the Dell EMC prompt. Verify the MSS-IAP version using the `show revision` command output.

EXEC Privilege Mode
`show revision`

```
DellEMC#show revision
-- Stack unit 1 --
S5048F-ON CPLD 1         : 1.0
S5048F-ON CPLD 2         : 1.0
S5048F-ON CPLD 3         : 1.0
S5048F-ON CPLD 4         : 1.0
S5048F-ON MSS FPGA       : 0.1
S5048F-ON MSS IAP        : 1.4
S5048F-ON OOB-FPGA       : 1.0
DellEMC#
```

**NOTE:** Do not power off the system while the FPGA upgrade is in progress. For any queries, contact Technical Support.

## Upgrading the SmartFusion Microcontroller Subsystem — SMF MSS-FPGA

**NOTE:** Before upgrading the SmartFusion Microcontroller Subsystem SMF MSS-FPGA, you must first upgrade the SMF MSS-IAP.

To upgrade the SmartFusion Microcontroller Subsystem — SMF MSS-FPGA, follow these steps.

1. Shut down all of the interfaces on the system.

   INTERFACE Mode
   `shutdown`

2. Upgrade the SMF MSS-FPGA image.

   EXEC Privilege Mode
   `upgrade mss-fpga-image stack-unit <stack-unit-id> booted`

```
DellEMC#upgrade mss-fpga-image stack-unit 1 booted
Current information for the system:
========================================================================
<table>
<thead>
<tr>
<th>Card</th>
<th>Device Name</th>
<th>Current Version</th>
<th>New Version</th>
</tr>
</thead>
<tbody>
<tr>
<td>CP</td>
<td>S5048F-ON MSS FPGA</td>
<td>0.1</td>
<td>0.1</td>
</tr>
</tbody>
</table>

* Warning - Upgrading FPGA is inherently risky and should only be attempted when necessary. A failure at this upgrade may cause a board RMA. Proceed with caution !

* Warning - Please upgrade mss-iap-image to 1.4 version, before
```
* upgrading mss-fpga-image to 0.1 version. *

Upgrade image for stack-unit 1 [yes/no]: yes

SMF FPGA upgrade in progress!!! Please do NOT power off the unit!!! Auto Reset will happen at the end of Upgrade!!!

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

Upgrade result:

UNIT1 SMF FPGA upgrade successful UNIT1. will go for reboot to complete the upgrade.

DellEMC#Sep 24 14:48:21 %STKUNIT1-M:CP %DOWNLOAD-6-FPGA_UPGRADE: UNIT 1 fpga upgrade success.

NOTE: Upgrade takes approximately five minutes and the system may appear unresponsive or powered off. During this time, if you remove power from the system, you might need to return the unit to Dell for repair. For any queries, contact Technical Support.

3. After the system re-boots, wait for the Dell EMC prompt. Verify the MSS FPGA version using the `show revision` command output.

EXEC Privilege Mode

`show revision`

DellEMC#show revision

-- Stack unit 1 --
S5048F-ON CPLD 1 : 1.0
S5048F-ON CPLD 2 : 1.0
S5048F-ON CPLD 3 : 1.0
S5048F-ON CPLD 4 : 1.0
S5048F-ON MSS FPGA : 0.1
S5048F-ON MSS IAP : 1.4
S5048F-ON OOB-FPGA : 1.0

NOTE: Do not power off the system while the FPGA upgrade is in progress. For any queries, contact Technical Support.

### Upgrading the OOB-FPGA

To upgrade the OOB-FPGA, follow these steps.

1. Shut down all of the interfaces on the system.

   INTERFACE Mode

   `shutdown`

2. Upgrade the OOB-FPGA image.

   EXEC Privilege Mode

   `upgrade fpga-image system fpga stack-unit <stack-unit-id> booted`

DellEMC#upgrade fpga-image system fpga stack-unit 1 booted

Current information for the system:

<table>
<thead>
<tr>
<th>Card</th>
<th>Device Name</th>
<th>Current Version</th>
<th>New Version</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
To upgrade OOB-FPGA on the local region, use the `upgrade fpga-image system fpga stack-unit <stack-unit-id> booted` command.

### Upgrading the S5048F-ON Dell EMC Networking OS Image using Dell EMC Networking OS CLI

#### Bare Metal Provisioning

**NOTE:** If you are using Bare Metal Provisioning (BMP), see the Bare Metal Provisioning topic in the Dell EMC Networking OS Configuration Guide or the Open Automation Guide.

#### Manual Upgrade Procedure

Follow these steps carefully to upgrade your S5048F-ON systems:

1. Dell EMC Networking recommends that you back up your startup configuration and any important files and directories to an external media prior to upgrading the system.

2. Upgrade the Dell EMC Networking OS in flash partition A: or B:

   ```
   EXEC Privilege
   DellEMC#upgrade system tftp://10.16.127.6/users/pr9/FTOS-S5048F-ON-9.14.1.10.bin A:
   03:18:55 : Discarded 1 pkts. Expected block num : 51. Received block num: 50
   03:18:58 : Discarded 1 pkts. Expected block num : 65. Received block num: 64
   !!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!
   !!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!
   58994997 bytes successfully copied
   System image upgrade completed successfully.
   DellEMC#Sep 24 5 13:53:58 %STKUNIT1-M:CP %DOWNLOAD-6-UPGRADE: Upgrade completed successfully
   DellEMC#
   ```

   ```
   DellEMC#upgrade system tftp://10.16.127.6/users/pr9/FTOS-S5048F-ON-9.14.1.10.bin B:
   03:18:55 : Discarded 1 pkts. Expected block num : 51. Received block num: 50
   03:18:58 : Discarded 1 pkts. Expected block num : 65. Received block num: 64
   !!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!
   !!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!
   58994997 bytes successfully copied
   System image upgrade completed successfully.
   ```

3. Verify that the Dell EMC Networking OS has been upgraded correctly in the upgraded flash partition

   ```
   show boot system stack-unit [1-6] | all
   ```
EXEC Privilege

```text
DellEMC#show boot system stack-unit all
Current system image information in the system:
===========================================================================
<table>
<thead>
<tr>
<th>Type</th>
<th>Boot Type</th>
<th>A</th>
<th>B</th>
</tr>
</thead>
<tbody>
<tr>
<td>stack-unit 1</td>
<td>FLASH BOOT</td>
<td>9.14(1.10)[boot]</td>
<td>9.14(1.9P4)</td>
</tr>
<tr>
<td>stack-unit 2</td>
<td>is not present.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>stack-unit 3</td>
<td>is not present.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>stack-unit 4</td>
<td>is not present.</td>
<td></td>
<td></td>
</tr>
<tr>

</tbody>
</table>
```

4. Change the Primary Boot Parameter of the S5048F-ON to the upgraded partition A: or B:

```text
boot system stack-unit 1 primary system: [A: | B: | tftp: | ftp:]
```

CONFIGURATION

5. Save the configuration so that the configuration will be retained after a reload using write memory command.

```text
write [memory]
```

EXEC PRIVILEGE

```text
DellEMC#write memory
!
Sep 24 18:58:59: %STKUNIT1-M:CP %FILEMGR-5-FILESAVED: Copied running-config to startup-config in flash by default
DellEMC#
```

6. Reload the unit

```text
reload
```

EXEC PRIVILEGE

```text
Command     : reload
Mode        : EXEC PRIVILEGE
DellEMC#reload
Proceed with reload [confirm yes/no]: y
```

7. Verify the S5048F-ON has been upgraded to the Dell EMC Networking OS version 9.14(1.10).

```text
show version
```

EXEC PRIVILEGE

```text
DellEMC#show version
Dell EMC Real Time Operating System Software
Dell EMC Operating System Version: 2.0
Dell EMC Application Software Version: 9.14(1.10)
Copyright (c) 1999-2021 by Dell Inc. All Rights Reserved.
Build Time: Fri Sep 24 08:19:32 2021
Build Path: /build/build02/SW/SRC
Dell EMC Networking OS uptime is 1 minute(s)
System image file is "system://A"

System Type: S5048F-ON
Control Processor: Intel Rangeley with 3 Gbytes (3203256320 bytes) of memory, core(s) 4.
16G bytes of boot flash memory.
  1 54-port TE/TF/FO/FI/HU G (S5048F-ON)
  48 Twenty Five GigabitEthernet/IEEE 802.3 interface(s)
  6 Hundred GigabitEthernet/IEEE 802.3 interface(s)

```
Upgrade the Boot Selector and Boot Flash Images from Dell EMC Networking OS

To upgrade the Boot Selector and Boot Flash images from Dell EMC Networking OS, perform the following steps:

1. Upgrade the S5048F-ON Boot Selector image.

   EXEC Privilege Mode
   ```
   upgrade boot bootselector-image stack-unit [<id> | all] [booted]
   ```

   To upgrade the Boot Selector image to the image version packed with the loaded Dell EMC Networking OS image, use the `booted` option. You can find the Boot Selector image version packed with the loaded Dell EMC Networking OS using the `show os-version` command in EXEC Privilege mode.

   ```
   DellEMC#upgrade boot bootselector-image stack-unit 1 booted
   Current Boot information in the system:
   *************************************************************
   Card    BootSelector    Current Version     New Version
   Unit1    Boot Selector       3.38.0.1-3      3.38.0.1-4
   *************************************************************
   * Warning - Upgrading boot selectors is inherently risky and should *
   * only be attempted when necessary. A failure at this upgrade may *
   * cause a board RMA. Proceed with caution !
   *************************************************************
   Proceed upgrade Boot Selector image for stack-unit 1 [yes/no]: yes
   Bootselector image upgrade for stack-unit 1 completed successfully.
   ```

2. Reload the unit

   EXEC Privilege Mode
   ```
   reload
   ```

3. Verify the Boot Selector image

   EXEC Privilege Mode
   ```
   show system stack-unit <id>
   ```

   ```
   DellEMC#show system stack-unit 1
   -- Unit 1 --

Uninstalling the Dell EMC Networking OS

To un-install the Dell EMC Networking OS version 9.14(1.10) from your S5048F-ON system, perform the following steps:

1. Reboot the system. During the reboot process, the system displays the following message prompting you to press the Esc key in order to stop the auto-boot process:

   Press Esc to stop autoboot ... 5
   Grub 2.02-beta2 (Dell EMC)
   Built by root at gbbdev-maa-01 on Fri_Sep_24_10:07:52.UTC_2021
   S5048F Boot Flash Label 3.38.2.6 NetBoot Label 3.38.2.6

2. At this prompt message, press the Esc key. The following menu appears:

   GNU Grub 2.02-beta2 (Dell EMC)
   Built by root at gbbdev-maa-01 on Fri_Sep_24_10:07:52.UTC_2021
   +-------------------------------------------+
   | *DELL EMC Networking OS                  |
   | DELL EMC Networking OS-Boot Line Interface |
   | EDA-DIAG                                  |
   | ONIE                                      |
   +-------------------------------------------+
   Use the ^ and v keys to select which entry is highlighted.
   Press enter to boot the selected OS, 'f' to boot FTOS, 'b' to go to

---
3. From the menu, choose the ONIE option.

   **NOTE:** To choose an option from the menu, highlight one of the options using the up or down arrow key and press Enter.

   The following menu appears:

   ```
   GNU Grub 2.02-beta2 (Dell EMC)
   +--------------------------------------------+
   | ONIE: Install OS                           |
   | ONIE: Rescue                               |
   |*ONIE: Uninstall OS                         |
   | ONIE: Update ONIE                          |
   | ONIE: Embed ONIE                           |
   | EDA-DIAG                                   |
   |                                            |
   +--------------------------------------------+
   
   Use the ^ and v keys to select which entry is highlighted. Press enter to boot the selected OS, 'e' to edit the commands before booting or 'c' for a command-line.
   ```

4. From this menu, choose the **ONIE : Uninstall OS** option.

   **NOTE:** To choose an option from the menu, highlight one of the options using the up or down arrow key and press Enter.

   The uninstall process begins, as shown:

   ```

  ONIE:/ #

Installing a Third Party Operating System

Apart from the Dell EMC Networking OS, you can also install a supported third party operating system on the S5048F-ON system. For more information on installing a third party operating system, refer to the third party OS vendor’s website for OS installation instructions.

Support Resources

The following support resources are available for the S5048–ON system.

Documentation Resources

This document contains operational information specific to the S5048–ON system.
For information about using the S5048–ON, see the following documents at http://www.dell.com/support:
  ● Installation Guide for the S5048–ON System
  ● Getting Started Guide for the S5048–ON System
  ● Dell EMC Open Networking (ON) Hardware Diagnostic Guide
Issues

Issues are unexpected or incorrect behavior and are listed in order of Problem Report (PR) number within the appropriate sections.

Finding Documentation

This document contains operational information specific to the S5048F–ON system.

- For information about using the S5048F–ON, refer to the documents at http://www.dell.com/support.
- For more information about hardware features and capabilities, refer to the Dell EMC Networking website at https://www.dell.com/networking.
- For more information about the open network installation environment (ONIE)-compatible third-party operating system, refer to http://onie.org.

Contacting Dell EMC

NOTE: If you do not have an active Internet connection, you can find contact information on your purchase invoice, packing slip, bill, or Dell EMC product catalog.

Dell EMC provides several online and telephone-based support and service options. Availability varies by country and product, and some services may not be available in your area. To contact Dell EMC for sales, technical support, or customer service issues:

Go to www.dell.com/support.
Notes, cautions, and warnings

**NOTE:** A NOTE indicates important information that helps you make better use of your product.

**CAUTION:** A CAUTION indicates either potential damage to hardware or loss of data and tells you how to avoid the problem.

**WARNING:** A WARNING indicates a potential for property damage, personal injury, or death.
