---

**CAUTION: Safety Instructions**

1. Do not use the projector near appliances that generate a lot of heat.
2. Do not use the projector in areas where there is an excessive amount of dust. The dust may cause the system to fail and the projector will automatically shut down.
3. Ensure that the projector is mounted in a well-ventilated area.
4. Do not block the ventilation slots and openings on the projector.
5 Ensure the projector operates between ambient temperatures (5 °C to 35 °C).
6 Do not try to touch the ventilation outlet as it can become very hot after the projector has been turned on or immediately after it is turned off.
7 Do not look into the lens while the projector is on as it may cause injury to your eyes.
8 Do not place any objects near or in front of the projector or cover its lens while the projector is on as the heat may cause the object to melt or burn.
9 Do not use the wireless projector near cardiac pacemakers.
10 Do not use the wireless projector near medical equipment.
11 Do not use the wireless projector near microwave ovens.

NOTE:
• Do not attempt to wall mount the projector yourself. It should be installed by a qualified technician.
• Recommended Projector Ceiling Mount Kit (P/N: C5505). For more information, see the Dell Support website at support.dell.com.
• For more information, see the Safety Information that shipped with your projector.
• The 4220/4320 projector can only be used indoors.

NOTE: Connectors are the same for 4220 and 4320 projectors.

CAUTION: Before you begin any of the procedures in this section, follow the Safety Instructions as described on page 8.

Installing the Optional Wireless Dongle

Your projector must be installed with a wireless dongle if you want to use the wireless networking option. Refer to "Wireless Networking Installation" on page 57. The wireless dongle is not shipped with your 4220/4320 projector. You can purchase it on the Dell website at www.dell.com.

1. Unscrew and take off the wireless cover.

2. Plug in the wireless dongle.

3. Assemble the wireless cover.
Connecting to a Computer

Connecting a Computer Using a VGA Cable

</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Power cord</td>
</tr>
<tr>
<td>2</td>
<td>VGA to VGA cable</td>
</tr>
</tbody>
</table>

**NOTE:** Only one VGA cable is shipped with your projector. An additional VGA cable can be purchased on the Dell website at [www.dell.com](http://www.dell.com).
Connecting a Computer Using a RS232 Cable

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Power cord</td>
</tr>
<tr>
<td>2</td>
<td>RS232 cable</td>
</tr>
</tbody>
</table>

**NOTE:** The RS232 cable is not shipped with your projector. Consult a professional installer for the cable and RS232 remote control software.
Connecting a Computer by USB Cable

1 Power cord
2 USB-A to USB-B cable

**NOTE:** Plug and Play. Only one USB cable is shipped with your projector. An additional USB cable can be purchased on the Dell website at [www.dell.com](http://www.dell.com).
Connecting a Computer Using Wireless

**NOTE:** Your computer should be equipped with a wireless connector and properly configured to detect another wireless connection. Refer to your computer's documentation on how to configure a wireless connection.

**NOTE:** Your projector must be installed with a wireless dongle if you want to use the wireless networking. Refer to “Wireless Networking Installation” on page 57.
Connecting a DVD Player

Connecting a DVD Player Using an S-Video Cable

1. Power cord
2. S-Video cable

**NOTE:** The S-Video cable is not shipped with your projector. You can purchase the S-Video extension (50 ft/100 ft) cable on the Dell website at [www.dell.com](http://www.dell.com).
Connecting a DVD Player Using a Composite Video Cable

1. Power cord
2. Composite Video cable

**NOTE:** The Composite Video cable is not shipped with your projector. You can purchase the Composite Video Extension (50 ft/100 ft) cable on the Dell website at [www.dell.com](http://www.dell.com).
Connecting a DVD Player Using a Component Video Cable

1 Power cord
2 VGA to Component Video cable

**NOTE:** The VGA to Component Video cable is not shipped with your projector. You can purchase the VGA to Component Video Extension (50 ft/100 ft) cable on the Dell website at [www.dell.com](http://www.dell.com).
Connecting a DVD Player Using an HDMI Cable

1. Power cord
2. HDMI cable

**NOTE:** The HDMI cable is not shipped with your projector. You can purchase the HDMI cable on the Dell website at [www.dell.com](http://www.dell.com).
Connecting to Local Area Network

To project an image and control the projector that is connected to a network through a RJ45 cable.

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Power cord</td>
</tr>
<tr>
<td>2</td>
<td>RJ45 cable</td>
</tr>
</tbody>
</table>

**NOTE:** The RJ45 cable is not shipped with your projector. You can purchase the RJ45 cable on the Dell website at [www.dell.com](http://www.dell.com).
Professional Installation Options: Installation for Driving Automatic Screen

1. Power cord
2. 12 V DC Plug
3. Motorized projection screen

**NOTE:** Use a 12 V DC plug in, 1.7 mm (ID) x 4.00 mm (OD) x 9.5 mm (shaft), to connect the automatic screen to the projector.

12 V DC Plug
Connection With Commercial RS232 Control Box

1 Power cord
2 RS232 cable
3 Commercial RS232 control box

NOTE: The RS232 cable is not shipped with your projector. Consult a professional technician to obtain the cable.
Using Your Projector

Turning Your Projector On

- **NOTE:** Turn on the projector before you turn on the source (computer, DVD player, etc.). The Power button light blinks blue until pressed.

1. Remove the lens cap.
2. Connect the power cord and appropriate signal cables to the projector. For information about connecting the projector, see "Connecting Your Projector" on page 10.
3. Press the Power button (see "Using the Control Panel" on page 31 to locate the Power button).
4. Turn on your source (computer, DVD player, etc.)
5. Connect your source to the projector using the appropriate cable. See "Connecting Your Projector" on page 10 for instructions to connect your source to the projector.
6. By default, the input source of the projector is set to VGA-A. Change the input source of the projector if necessary.
7. If you have multiple sources connected to the projector, press the Source button on the remote control or control panel to select the desired source. See "Using the Control Panel" on page 31 and "Using the Remote Control" on page 33 to locate the Source button.

Turning Your Projector Off

- **CAUTION:** Unplug the projector after properly shutting down as explained in the following procedure.

1. Press the Power button. Follow the instruction displayed on screen to properly turn off the projector.

- **NOTE:** The "Press Power Button to Turn off Projector" message will appear on the screen. The message disappears after 5 seconds or you can press the Menu button to clear it.

2. Press the Power button again. The cooling fans continue to operate for 120 seconds.
To power off the projector quickly, press the Power button and hold for 1 second while the projector’s cooling fans are still running.

NOTE: Before you turn on the projector again, wait for 60 seconds to allow the internal temperature to stabilize.

4 Disconnect the power cord from the electrical outlet and the projector.

Adjusting the Projected Image

Raising the Projector Height
1 Press the Elevator button.
2 Raise the projector to the desired display angle, and then release the button to lock the elevator foot into position.
3 Use the tilt adjustment wheel to fine-tune the display angle.

Lowering the Projector Height
1 Press the Elevator button.
2 Lower the projector, then release the button to lock the elevator foot into position.

1 Elevator button
2 Elevator foot (Angle of tilt: 0 to 9.5 degrees)
3 Tilt adjustment wheel
Adjusting the Projector Zoom and Focus

⚠️ CAUTION: To avoid damaging the projector, ensure that the zoom lens and elevator foot are fully retracted before moving the projector or placing the projector in its carrying case.

1. Rotate the zoom tab to zoom in and out.
2. Rotate the focus tab until the image is clear. The projector focuses at distances ranging between 3.94 ft to 32.81 ft (1.2 m to 10 m).

Using the Control Panel

1. LAMP warning light
   If the LAMP amber indicator is on or blinking, one of the following problems could be occurring:
   • Lamp is reaching its end of usable life
   • Lamp module is not properly installed
   • Lamp driver failure
   • Color wheel failure
   For more information, see "Troubleshooting Your Projector" on page 101 and "Guiding Signals" on page 105.

2. TEMP warning light
   If the TEMP amber indicator is on or blinking, one of the following problems could be occurring:
   • Internal temperature of the projector is too high
   • Color wheel failure
   For more information, see "Troubleshooting Your Projector" on page 101 and "Guiding Signals" on page 105.

3. Power
   Turns the projector on or off. For more information, see "Turning Your Projector On" on page 24 and "Turning Your Projector Off" on page 24.

</tbody>
</table>

NOTE: Actual operating range may slightly differ from the diagram. Weak batteries will also prevent the remote control from properly operating the projector.
Using the On-Screen Display

- The projector has a multi-language On-Screen Display (OSD) Menu that can be displayed with or without an input source.
- Press the Menu button on the control panel or the remote control to enter the Main Menu.
- To navigate through the tabs in the Main Menu, press the ▼ or ► buttons on your projector’s control panel or remote control.
- To select a submenu, press the ▼ or ► button on your projector’s control panel or remote control.
- To select an option, press the ▼ or ► buttons on your projector’s control panel or remote control. When an item is selected, the color changes to dark blue.
- Use the ▼ or ► buttons on the control panel or remote control to adjust the settings.
- To go back to the Main Menu, press the ◄ button on the control panel or the remote control.
- To exit the OSD, press the Menu button directly on the control panel or the remote control.

**NOTE:** OSD structure and set are the same for the 4220 and 4320 models.

INPUT SOURCE

The Input Source menu allows you to select your projector’s input source.

<table>
<thead>
<tr>
<th>Menu</th>
<th>Dell 4220</th>

</tbody>
</table>

**VGA-A**—Press ◄ to detect a VGA-A signal.

**VGA-B**—Press ◄ to detect a VGA-B signal.

**HDMI**—Press ◄ to detect a HDMI signal.

**COMPOSITE**—Press ◄ to detect a Composite Video signal.

**S-VIDEO**—Press ◄ to detect a S-Video signal.

**WIRELESS/USB**—Press ◄ to activate the Input Source Wireless/USB menu.
NOTE: The Wireless/USB can be used after the "Wireless and LAN" option is turned on.

INPUT SOURCE WIRELESS/USB

The Input Source Wireless/USB menu allows you to activate the Wireless Display, USB Display, and USB Viewer.

USB DISPLAY—Allows you to display the computer/laptop screen to your projector via the USB cable.

USB VIEWER—Allows you to display photo and PPT files from your USB flash. See "Presentation to Go (PtG) Installation" on page 67.

AUTO ADJUST

Auto Adjust automatically adjusts the projector’s Horizontal, Vertical, Frequency, and Tracking in PC mode.
**BRIGHTNESS/CONTRAST**

The Brightness/Contrast menu allows you to adjust the brightness/contrast settings of your projector.

- **Brightness**—Use ▼ and ▲ to adjust the brightness of the image.
- **Contrast**—Use ▼ and ▲ to adjust the display contrast.

**NOTE:** If you adjust the settings for Brightness and Contrast the projector automatically switch to Custom mode.

**VIDEO MODE**

The Video Mode menu allows you to optimize the display image: Presentation, Bright, Movie, sRGB (provides more accurate color representation), and Custom (set your preferred settings).
**VOLUME**

The Volume menu allows you to adjust the volume settings of your projector.

**VOLUME**—Press ▲ to increase the volume and ▼ to decrease the volume.

**AUDIO INPUT**

The Audio Input menu allows you to select your audio input source. The options are: Audio-A, Audio-B, Audio-C, HDMI, and Wireless/LAN.

**ADVANCED SETTINGS**

The Advanced Settings menu allows you to change settings for Image, Display, Projector, LAN, Wireless, Menu, Power, and Information.
**IMAGE SETTINGS (IN PC MODE)—** Select and press \( \downarrow \) to activate image settings.

The image settings menu provides the following options:

<table>
<thead>

**NOTE:** If you adjust the settings for Color Temperature, RGB Color Adjust, and White Intensity the projector automatically switch to Custom mode.

---

42 | Using Your Projector
COLOR TEMPERATURE— Allows you to adjust the color temperature. The screen appears cooler at higher color temperatures and warmer at lower color temperatures. When you adjust the values in the Color Adjust menu, the Custom mode is activated. The values are saved in the Custom mode.

RGB COLOR ADJUST— Allows you to manually adjust the colors red, green, and blue.

SATURATION— Allows you to adjust the video source from black and white to fully saturated color. Press \( \uparrow \) to increase the amount of color in the image and \( \downarrow \) to decrease the amount of color in the image.

SHARPNESS— Press \( \uparrow \) to increase the sharpness and \( \downarrow \) to decrease the sharpness.

TINT— Press \( \uparrow \) to increase the amount of green in the image and \( \downarrow \) to decrease the amount of green in the image (available for NTSC only).

WHITE INTENSITY— Press \( \uparrow \) and use \( \uparrow \) and \( \downarrow \) to display white intensity.

COLOR SPACE— Allows you to select the color space. The options are: RGB, YCbCr, and YPbPr.

VGA OUTPUT— Select On or Off the VGA output function at projector standby status. Default is Off.

NOTE:

1. If you adjust the settings for Color Temperature, RGB Color Adjust, Saturation, Sharpness, Tint, and White Intensity the projector automatically switch to Custom mode.

2. Saturation, Sharpness, and Tint are only available when the input source is from Composite or S-Video.

IMAGE SETTINGS (NO INPUT SOURCE)— Select and press \( \uparrow \) to activate image settings. The image settings menu provides the following options:

VGA OUTPUT— Select On or Off the VGA output function at projector standby status. Default is Off.
**DISPLAY SETTINGS (IN PC MODE)**—Select and press [ ] to activate display settings. The display settings menu provides the following options:

<table>
<thead>
<tr>
<th>Advanced Settings</th>

<td></td>
</tr>
</tbody>
</table>

**Horizontal Position**—Press [ ] to move the image right and [ ] to move the image left.

**Vertical Position**—Press [ ] to move the image up and [ ] to move the image down.

**Frequency**—Allows you to change the display data clock frequency to match the frequency of your computer’s graphics card. If you see a vertical flickering wave, use the Frequency control to minimize the bars. This is a coarse adjustment.

**Tracking**—Synchronize the phase of the display signal with the graphic card. If you experience an unstable or flickering image, use Tracking to correct it. This is a fine adjustment.

**Aspect Ratio**—Allows you to select the aspect ratio to adjust how the image appears. Options are: Origin, 16:9, and 4:3.
- **Origin** — Select Origin to maintain the aspect ratio of the image projector according to the input source.
- **16:9** — The input source scales to fit the width of the screen to project a 16:9 screen image.
- **4:3** — The input source scales to fit the screen and projects a 4:3 image.

**Zoom**—Press [ ] and [ ] to zoom and view the image.

Adjust the image scale by pressing [ ] or [ ] and press [ ] to view on your remote control only.

**Zoom Navigation**—Press [ ] to activate the Zoom Navigation menu.

Use [ ], [ ], [ ], and [ ] to navigate the projection screen.
3D DISPLAY—Select On to start the 3D display function (default is Off).

NOTE:

1. When you want to create a 3D experience, you will need a few other components including:
   a. Computer/Laptop with a 120 Hz signal output quad-buffered graphics card.
   b. "Active" 3D glasses with DLP Link™.
   c. 3D content. See "Note 4".
   d. 3D Player. (Example: Stereoscopic Player...)

2. Enable the 3D function when it satisfies any of the below-mentioned conditions:
   a. Computer/Laptop with a graphics card, capable of outputting a 120 Hz signal via VGA or HDMI cable.
   b. Input a suite of 3D content via Video and S-Video.

3. "3D Display" selection will only be enabled in the "Display Settings of the Advanced Settings" menu when the projector detects either of the inputs mentioned above.

4. 3D support and refresh rate are as below:
   a. VGA/HDMI 1280 x 720 120 Hz, 1024 x 768 120 Hz, and 800 x 600 120 Hz
   b. Composite/S-Video 60 Hz
   c. Component 480i

5. The recommended VGA signal for laptop is Single-mode output (Dual mode is not recommended).

3D SYNC INVERT—If you see a discrete or overlapping image while wearing DLP 3D goggles, you may need to execute 'Invert' to get best match of left/right image sequence to get the correct image. (For DLP 3D goggles)
DISPLAY SETTINGS (IN VIDEO MODE)—Select and press \( \text{Menu} \) to activate display settings. The display settings menu provides the following options:

**Aspect Ratio**—Allows you to select the aspect ratio to adjust how the image appears. Options are: Origin, 16:9, and 4:3.
- **Origin** — Select Origin to maintain the aspect ratio of image projector according to the input source.
- **16:9** — The input source scales to fit the width of the screen to project a 16:9 screen image.
- **4:3** — The input source scales to fit the screen and projects a 4:3 image.

**Zoom**—Press \( \text{Zoom} \) to zoom and view the image.
Adjust the image scale by pressing \( \text{Zoom} \) and press \( \text{Menu} \) to view on your remote control only.

**Zoom Navigation**—Press \( \text{Menu} \) to activate the Zoom Navigation menu.
Use \( \text{Up} \), \( \text{Down} \), \( \text{Left} \), \( \text{Right} \) to navigate the projection screen.

**3D Display**—Select On to start the 3D display function (default is Off).

**NOTE:**
1. When you want to create a 3D experience, you will need a few other components including:
   a. Computer/Laptop with a 120 Hz signal output quad-buffered graphics card.
   b. “Active” 3D glasses with DLP Link™.
   c. 3D content. See “Note 4”.
   d. 3D Player. (Example: Stereoscopic Player...)
2. Enable the 3D function when it satisfies any of the below-mentioned conditions:
   a. Computer/Laptop with a graphics card, capable of outputting a 120 Hz signal via VGA or HDMI cable.
   b. Input a suite of 3D content via Video and S-Video.
3. “3D Display” selection will only be enabled in the “Display Settings of the Advanced Settings” menu when the projector detects either of the inputs mentioned above.
4. 3D support and refresh rate are as below:
   a. VGA/HDMI 1280 x 720 120 Hz, 1024 x 768 120 Hz, and 800 x 600 120 Hz
   b. Composite/S-Video 60 Hz
   c. Component 480i
5. The recommended VGA signal for laptop is Single-mode output (Dual mode is not recommended).

3D Sync Invert—If you see a discrete or overlapping image while wearing DLP 3D goggles, you may need to execute 'Invert' to get best match of left/right image sequence to get the correct image. (For DLP 3D goggles)
**PROJECTOR SETTINGS**—Select and press \( \text{\textcircled{F}} \) to activate projector settings. The projector settings menu provides the following options:

<table>
<thead>
<tr>
<th>Advanced Settings</th>
<th>Del: 6/26</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Image Settings</strong></td>
<td>Auto Source</td>
</tr>
<tr>
<td><strong>Display Settings</strong></td>
<td>Auto Keystone</td>
</tr>
<tr>
<td><strong>Projector Settings</strong></td>
<td>Projector Mode</td>
</tr>
<tr>

<tr>
<td><strong>Menu Settings</strong></td>
<td>Startup Screen</td>
</tr>
<tr>
<td><strong>Power Settings</strong></td>
<td>Text Pattern</td>
</tr>
<tr>
<td><strong>Information</strong></td>
<td>Factory Reset</td>
</tr>
</tbody>
</table>

**Auto Source**—Select Off (the default) to lock the current input signal. If you press the Source button when the Auto Source mode is set to Off, you can manually select the input signal. Select On to auto detect the available input signals. If you press the Source button when the projector is on, it automatically finds the next available input signal.

**Auto Keystone**—Select On to automatically adjust image distortion caused by tilting the projector.

**Projector Mode**—Allows you to select the projector mode, depending upon how the projector is mounted.

- **Rear Projection-Desktop** — The projector reverses the image so that you can project from behind a translucent screen.
- **Rear Projection-Ceiling Mount** — The projector reverses and turns the image upside down. You can project from behind a translucent screen with a ceiling-mounted projection.
- **Front Projection-Desktop** — This is the default option.
- **Front Projection-Ceiling Mount** — The projector turns the image upside down for ceiling-mounted projection.

**Speaker**—Select On to enable the speaker. Select Off to disable the speaker.

**Closed Caption**—Select On to enable close caption and activate the closed caption menu. Select appropriate closed caption options: CC1, CC2, CC3, and CC4.

**NOTE:** Closed caption option is available for NTSC only.
STARTUP SCREEN—Default is Dell logo as wallpaper. You can also select Capture Screen option to capture the screen display. The following message appears on the screen.

![Screen capture in progress...](image)

**NOTE:** To capture a full image, ensure that the input signal connected to the projector is at 1024 x 768 resolution.

TEST PATTERN—Test Pattern is used to test focus and resolution. You can enable or disable the Test Pattern by selecting Off, 1, or 2. You can also invoke the Test Pattern 1 by pressing and holding down ▼ and ▼ buttons on the control panel simultaneously for 2 seconds. You can also invoke the test pattern 2 by pressing and holding down ▼ and ▼ buttons on the control panel simultaneously for 2 seconds.

Test Pattern 1:

![Test Pattern 1](image)

Test Pattern 2:

![Test Pattern 2](image)

FACTORY RESET—Select and press to reset all settings to its factory default. The below warning message appears:

![Resetting to factory default](image)
Reset items include both computer sources and Video source settings.

**LAN SETTINGS**—Select and press \[\text{3}\] to activate LAN settings. The LAN settings menu provides the following options:

<table>
<thead>
<tr>
<th>Advanced Settings</th>
<th>Default</th>
</tr>
</thead>
<tbody>
<tr>
<td>Image Settings</td>
<td></td>
</tr>
<tr>
<td>Display Settings</td>

<td>255.255.255.0</td>
</tr>
<tr>
<td>Gateway</td>
<td></td>
</tr>
<tr>
<td>Store</td>
<td>Press</td>
</tr>
</tbody>
</table>

**WIRELESS AND LAN**—Select **Enabled** to activate the Wireless and LAN function.

**DHCP**—If a DHCP server exists in the network to which the projector is connected, the IP address will automatically be acquired when you select DHCP On. If DHCP is Off, manually set the IP Address, Subnet Mask, and Gateway. Use \[\text{1}\] and \[\text{2}\] to select the number of IP address, Subnet Mask, and Gateway. Key in enter to confirm each number and then use \[\text{1}\] and \[\text{2}\] to set the next item.

**IP ADDRESS**—Automatically or manually assigns the IP address to the projector connected to the network.

**SUBNET MASK**—Configure the Subnet Mask of the network connection.

**GATEWAY**—Check the Gateway address with your network/system administrator if you configure it manually.

**DNS**—Check the DNS Server IP address with your network/system administrator if you configure it manually.

**STORE**—Press \[\text{3}\] to save the changes made in network configuration settings.

**NOTE:**

1. Use \[\text{1}\] and \[\text{2}\] buttons to select IP Address, Subnet Mask, Gateway, DNS, and Store.
2. Press the \[\text{3}\] button to enter IP Address, Subnet Mask, Gateway, or DNS to set the value. (The selected option is highlighted in blue)
   a. Use \[\text{1}\] and \[\text{2}\] buttons to select the option.
   b. Use \[\text{1}\] and \[\text{2}\] buttons to set the value.
c After the setup is complete, press the button to exit.

3. After the IP Address, Subnet Mask, Gateway, and DNS is set up, select Store and press button to store the settings.

4. If you select Store without pressing the Enter button, the system will keep the original settings.

**RESET**—Press button to reset network configuration.

**WIRELESS SETTINGS**—Select and press button to activate wireless settings. The wireless settings menu provides the following options:

<table>
<thead>
<tr>
<th>Advanced settings</th>
<th>Date 03/08</th>
</tr>
</thead>
<tbody>
<tr>
<td>Operation Settings</td>
<td>Wireless</td>

</tr>
<tr>
<td>LAN Settings</td>
<td>Subnet Mask</td>
</tr>
<tr>
<td></td>
<td>Gateway</td>
</tr>
<tr>
<td></td>
<td>DNS</td>
</tr>
</tbody>
</table>
| Store | Press to save the changes made in wireless configuration settings.

**NOTE:** Use and buttons to select IP Address, Subnet Mask, Gateway, DNS, and Store.

**WIRELESS**—Default option is Connected. Select Disconnected to disable the wireless connection.

**DHCP SERVER**—Allows you to enable DHCP server of the wireless.

**START IP ADDRESS**—Automatically or manually assigns the Start IP address of the DHCP server to the projector connected to the wireless.

**END IP ADDRESS**—Automatically or manually assigns the End IP address of the DHCP server to the projector connected to the wireless.

**SUBNET MASK**—Configure the Subnet Mask of the wireless connection.

**GATEWAY**—Check the Gateway address with your network/system administrator if you configure it manually.

**DNS**—Check the DNS Server IP address with your network/system administrator if you configure it manually.

**STORE**—Press button to save the changes made in wireless configuration settings.

**NOTE:**

1. Use and buttons to select IP Address, Subnet Mask, Gateway, DNS, and Store.
2. Press the button to enter IP Address, Subnet Mask, Gateway, or DNS to set the value. (The selected option is highlighted in blue)
   a. Use and buttons to select the option.
   b. Use and buttons to set the value.
   c. After the setup is complete, press the button to exit.

3. After the IP Address, Subnet Mask, Gateway, and DNS is set up, select Store and press button to store the settings.

4. If you select Store without pressing the Enter button, the system will keep the original settings.

**RESET**—Press to reset wireless configuration.

**MENU SETTINGS**—Select and press to activate the menu settings. The menu settings consists of the following options:

### Advanced Settings

<table>
<thead>
<tr>
<th>Setting</th>
<th>Option</th>
</tr>
</thead>
<tbody>
<tr>
<td>Image Settings</td>
<td>Menu Position</td>

<tr>
<td>Menu Settings</td>
<td>Change Password</td>
</tr>
<tr>
<td>Power Settings</td>
<td>Enable/Disable</td>
</tr>
<tr>
<td>Information</td>
<td>Menu Lock</td>
</tr>
</tbody>
</table>

**MENU POSITION**—Allows you to change the position of the OSD menu on the screen.

**MENU TIMEOUT**—Allows you to adjust the time for an OSD timeout. By default, the OSD disappears after 20 seconds of non-activity.

**MENU TRANSPARENCY**—Select to change the transparency level of the OSD background.

**MENU LOCK**—Select On to enable the Menu Lock and hide the OSD menu. Select Off to disable the Menu Lock. If you want to disable the Menu Lock function and have the OSD disappear, press the Menu button on the control panel or remote control for 15 seconds, and then disable the function.

**PASSWORD**—When Password Protect is enabled, a Password Protect screen requesting you to enter a password will be displayed when the power plug is inserted into the electrical output and the power for the projector is first turned on. By default, this function is disabled. You can enable this feature by selecting Enabled. If the password has been set before, key in the
password first and select the function. This password security feature will be activated the next time you turn on the projector. If you enable this feature, you will be asked to enter the projector’s password after you turn on the projector:

1 First time password input request:
   a Go to **Menu Settings**, press \[F4\] and then select **Password** to **Enabled** the password settings.
   b Enabling the Password function will pop up a change screen. Key in a 4-digit number from the screen and press \[F4\].
   c To confirm, enter the password again.
   d If the password verification is successful, you may resume with accessing the projector’s functions and its utilities.

2 If you have entered an incorrect password, you will be given another two chances. After three invalid attempts, the projector will automatically turn off.

**NOTE:** If you forget your password, contact DELL™ or a qualified service personnel.

3 To disable the password function, select the **Disabled** option to close the function.

4 To delete the password, select the **Delete** option.
**CHANGE PASSWORD**—Key in the original password. Then, enter the new password and confirm the new password again.

---

**POWER SETTINGS**—Select and press 

![Power Settings Menu]

- Advanced Settings
- Image Settings
- Display Settings
- Projector Settings
- LAN Settings
- Wireless Settings
- Main Settings
- Power Settings
- Information

**Quick Shutdown**
- Off

**Power Saving**
- 12h Mode

**During Standby**
- Wireless Off

**Lamp Mode**
- Normal

**Lamp Hour Reset**
- Press 

---

54 | Using Your Projector
**QUICK SHUTDOWN**—Select **On** to turn off the projector with a single press of the Power button. This function allows the projector to quickly power off with an accelerated fan speed. Slightly higher acoustic noise is expected during quick power off.

**NOTE:** Before you turn on the projector again, wait for 60 seconds to allow the internal temperature to stabilize. The projector will take a longer time to turn on if you try to power on immediately. Its cooling fan will run at full speed for about 30 seconds to stabilize the internal temperature.

**POWER SAVING**—Select **Off** to disable Power Saving mode. By default, the projector is set to enter power saving mode after 120 minutes of no activity. A warning message appears on screen showing a 60 seconds countdown before switching to power saving mode. Press any button during the countdown period to stop the power-saving mode.

You can also set a different delay period to enter power saving mode. The delay period is the time you want the projector to wait without an input signal. Power saving can be set to 30, 60, 90, or 120 minutes.

If an input signal is not detected during the delay period, the projector turns off. To turn on the projector press the Power button.

**DURING STANDBY**—Select **Wireless On** or **Off** to set the Wireless/LAN module on/off while the projector is standby status (default is Wireless Off).

**LAMP MODE**—Allows you to select between **Normal** or **ECO** mode.

Normal mode operates at full power level. ECO mode operates at a lower power level which may provide longer lamp life, quieter operation, and dimmer luminance output on the screen.

**LAMP HOUR RESET**—Press \( \square \) and select the **Confirm** option to reset the lamp hour.
INFORMATION—The information menu displays the current 4220 or 4320 projector settings.

LANGUAGE
Allows you to set the language for the OSD. Press the button to activate the Language menu.

HELP
If you encounter problems with your projector, you can access the help menu for troubleshooting.
Wireless Networking Installation

NOTE: Your computer must have the following minimum system requirements:

Operating System:
- Windows
  Microsoft Windows 2000™ with service pack 4 or later, Windows XP™ Home or Professional Service pack 2 (32-bit recommended), Windows Vista 32-bit, and Windows® 7 Home or Professional 32-bit or 64-bit
- MAC
  MacBook and above, MacOS 10.5 and above

Minimum Hardware:
- Intel Dual Core 1.4 MHz or higher
- 256 MB of RAM required, 512 MB or more recommended
- 10 MB of available hard-disk space
- nViDIA or ATI graphic card must with 64 MB VRAM or above
- Ethernet adapter (10 / 100 bps) for an Ethernet connection
- A supported WLAN adapter for a WLAN connection (any NDIS-compliant 802.11b or 802.11g or 802.11n WiFi device)

Web browser
- Microsoft Internet Explorer 6.0 or 7.0 (recommended) or 8.0, Firefox 1.5 or 2.0, and Safari 3.0 and above

NOTE: Wireless Networking Installation steps are the same for the 4220 and 4320 models.
Enable Wireless on the Projector

In order to use your projector wirelessly, you need to complete the steps below:

1. Install the optional wireless dongle. See "Installing the Optional Wireless Dongle" on page 11.
2. Connect the power cable to the wall outlet and press the power button.
3. Press the Menu button on your projector control panel or remote control.

NOTE: Use , , , and buttons to navigate and to select.
4. The wireless connection default is enable. See "Wireless Settings" on page 51.
5. Access the INPUT SOURCE menu, select Wireless/USB and then select Wireless Display on the sub-menu. See "INPUT SOURCE WIRELESS/USB" on page 59.
The **Wireless Guide Screen** shown below appears:

![Wireless Guide Screen](image.png)

**NOTE:** If wireless connection is disabled, then follow these steps to set up:
ADVANCED SETTINGS → Wireless settings → Wireless → Connected. The image input source will be automatically switched to wireless screen when wireless option is selected in this step.

</tbody>
</table>

- Take note of the **LOGIN CODE**, **NETWORK NAME (SSID)**, and **IP ADDRESS**. You will need these information to log in later.
Install the Wireless Application software on Your Computer

7 Connect your computer to the 4220 or 4320 wireless network.

NOTE:
• Your computer must have wireless network function to detect the connection.
• When you connect to the 4220 or 4320 wireless network, you will lose wireless connectivity with other wireless networks.

NOTE: Remember to turn off all proxies. (In Microsoft® Windows Vista: Click Control Panel → Internet Options → Connections → LAN Settings)

8 Open your Internet browser. You will be automatically directed to the 4220 or 4320 Web Management web page.
**NOTE:** If the web page does not load automatically, enter the IP address (default IP address is 192.168.100.10) noted from the projector's screen in the browser's address bar.

9 The 4220 or 4320 Web Management page opens. For first time use, click Download.

10 Select the appropriate operating system, then click Download.
11 Click **Run** to proceed with the one-time installation of the software.

**NOTE:** You may choose to save the file and install it at a latter time. To do this, click **Save**.

**NOTE:** If you are unable to install the application because of inadequate rights on the computer, please contact your network administrator.

12 The installation software will launch. Follow the on-screen instructions to complete setup.
Launch the Wireless Application

Once the installation is complete, the 4220 or 4320 Wireless Application software will launch and will search for the projector automatically. The below screen appears.

Login

To communicate with your projector, enter the Login Code provided in Step 6 of Wireless Networking Installation, then click OK.

NOTE: If the IP Address is not detected, enter the IP Address displayed at the bottom left corner of the screen.

Understanding the Buttons

After a successful log in, the following screen appears:
### Projection Mode

</tr>
<tr>
<td>&lt; 40%</td>
<td>25</td>
</tr>
<tr>
<td>&lt; 75%</td>
<td>22</td>
</tr>
<tr>
<td>≤ 100%</td>
<td>20</td>
</tr>
</tbody>
</table>

**NOTE:**
1 The percentage of screen variation is based on 1024 x 768. Example to display a 320 x 240 video clip on 1024 x 768 desktop, the screen variation is 9.8%.
Actual frame rate could be different depending on factors such as network environment, image content, signal conditions, locations, and CPU performance.

Under clean WLAN environment using 802.11g connection, and no screen stretching.

Compressed to 1024 x 768 and under 802.11g.

NOTE: Your computer will not enter S1 (standby mode) / S3 (sleep mode) / S4 (hibernate mode) when running a wireless, USB Display, or USB Viewer presentation.

Using the Menu
Click \[\text{[E]}\] to display the menu.

**Web Management**—Click to open the Web Management page. See "Managing the Projector From Web Management" on page 81.

**Search for Projector**—Click to search and connect to wireless projector.

**Make Application Token**—Click to make application token. See "Make Application Token" on page 100.

**Info**—Click to display system information.

**About**—Click to display the application version.

**Exit**—Click to close the application.
Presentation to Go (PtG) Installation

Minimum system requirements to install PtG are as follows:

**Operating System:**
- Windows
  - Microsoft Windows XP™ Home or Professional Service pack 2/3 (32-bit recommended), Windows Vista 32-bit, or Windows® 7 Home or Professional 32-bit or 64-bit
  - Office 2003 or Office 2007

**NOTE:** Presentation to Go (PtG) installation steps are the same for the 4220 and 4320 models.

In order to use your USB Viewer, you need to complete the steps below:

"Wireless and LAN" option and "Wireless connection" default are enabled.

1. Plug the USB Flash to your projector.

**NOTE:**
- Supports only the JPEG format photo within 10 MB x 40 M pixels.
- The PtG converter can convert your PowerPoint files into PtG files. See "PtG Converter - Lite Application Software" on page 72.
- You can download the "PtG Converter - Lite" from the Dell Support site at: support.dell.com.

2. At INPUT SOURCE menu, select Wireless/USB and then select USB Viewer on the sub-menu. See "INPUT SOURCE WIRELESS/USB" on page 39.

**NOTE:**
1. When the Wireless and LAN function is disabled, go to LAN Settings menu, select the "Enabled" in the "Wireless and LAN" option to activate the Wireless and LAN function.
2. When the Wireless connection is disconnected, go to Wireless Settings menu, select the "Connected" in the Wireless option to enable wireless connection.
PtG Viewer
System will stay in this page when ready.

Photo Viewer
PtG/Photo Function Introduction

Show valid PtG and Photo files which are stored in the USB disk.

NOTE: If only one disk is detected, the system will skip this step.

PtG Overview

[Image of PtG menu with file options listed below]
Photo Overview

NOTE: Supports 14 languages of photo files name format (Languages: English, Dutch, French, German, Italian, Japanese, Korean, Polish, Portuguese, Russian, Simplified Chinese, Spanish, Swedish, and Traditional Chinese).

Buttons-Introduction

Use the up, down, and left buttons to navigate and the button on your projector's control panel or remote control to select.

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

NOTE: If you enter the OSD menu while using PtG, PtG navigation by the up, down, and left buttons will not function.
Set up PtG Converter - Lite

Please follow the on-screen instructions to complete the setup.
PtG Converter - Lite Application Software

Please launch the "PtG Converter - Lite". The below screen appears:

1  Click \( \text{to start conversion.} \)
2  Select the PowerPoint file you want to convert.

3  Click Browse button to select the storage location and then press OK.

\[ \text{NOTE:} \]
1  If your computer does not have MS PowerPoint installed, file convert will fail.
2  PtG converter only supports up to 20 pages.
3  PtG converter only supports conversion of .ppt files to .PtG files.

72  |  Using Your Projector
Audio Projection Installation

Audio Projection only supports the Wireless Display and LAN Display source.

Minimum system requirements as follow:

Operation System:
- Windows
  - Microsoft Windows XP™ Home or Professional Service pack 2/3 (32-bit recommended), Windows Vista 32-bit, or Windows® 7 Home or Professional 32-bit or 64-bit

Minimum Hardware:
- a Intel® Core™ i5-460 MHz (2.53 GHz/Turbo 2.8 GHz) or greater
- b 1 GB DDR3 VRAM independent graphics card or more recommended
- c 2 GB dual channel DDR3 SDRAM memory at 1066 MHz required or more recommended
- d Gigabit Ethernet
- e Integrated 802.11 b/g/n Wi-Fi Device for a WLAN connection

NOTE: Audio Projection function not supports the MAC operation system.

NOTE: If your computer does not meet the minimum hardware requirements, audio projection may have lag or noise. Meet the recommended system requirements to have optimized performance of audio projection.

NOTE: Audio Projection Setting steps are the same for the 4220 and 4320 models.

Follow these steps to set up the audio projection function:
Enable Wireless or LAN on the Projector

1. Connect the power cable and turn on the projector by pressing the power button.

2.1 If you choose the LAN connection mode, follow these steps to enable Wireless and LAN function (default is Enabled): Advanced Settings → LAN Settings → Wireless and LAN → Enabled.

2.2 If you choose the wireless connection mode, follow these steps to enable wireless connection (default is Connected): Advanced Settings → Wireless Settings → Wireless → Connected.

NOTE: If you want to use the wireless connection for 4220 or 4320 projector, you need installed the optional wireless dongle. See “Installing the Optional Wireless Dongle” on page 11.
3. Access the Input Source menu, select the Wireless/USB and then select the Wireless Display on the sub-menu.

![Input Source Menu](image)

The Wireless Guide Screen shown below appears:

![Wireless Guide Screen](image)

4. Take note of the LOGIN CODE, NETWORK NAME (SSID), and IP ADDRESS. You will need these information to log in later.

**Install the Dell Wireless Application Software on Your Computer**

5. Connect the LAN cable to the projector and the computer.
NOTE: If your projector has installed the optional wireless dongle, you can also select the wireless connection. See "Wireless Connection" on page 60.

NOTE: It is recommended that all proxies are turned off. (In Microsoft® Windows 7: Click Control Panel → Internet Options → Connections → LAN Settings)

6 “Wireless Application Software” is required if the Wireless or LAN is used for the Audio Projection set-up. Please download and install the software the first time you use Audio Projection. If it is already installed, skip Step 6 - 7.

NOTE: You only need to install the “Wireless Application Software” once.

7 Wireless Application Software download and installation steps refer to "Install the Wireless Application Software" on page 60.
Launch the Wireless Application

8 Once the installation is complete, the program will launch automatically. Or you can double-click the icon or on the desktop to start the application.

![Connecting](image)

**NOTE:**

1. If you choose LAN connection mode, click 'Skip'.
2. If you choose wireless connection mode, select your projector, and then click 'OK'.

Login

9 To communicate with your projector, enter the Login Code (see Step 4), and then click OK.

![Log in screen](image)

**NOTE:** If the IP Address is not detected, enter the IP Address displayed at the bottom left corner of the wireless screen.
10 You are now logged into the 4220 or 4320 Wireless Application. Press the "Play" button in the application to starting the LAN or wireless projection.

![Image](image.png)

**NOTE:** You may use the controls to either project in full screen mode or in split screen mode.

11 Press the "Audio Projection" button in the application to enable Audio Projection function.

![Image](image.png)

**NOTE:** Audio projector function need install extra driver, if your computer do not install driver, will pop-up need install driver message on screen. You can download the "extra driver" from the Dell Support site at support.dell.com.

12 Executing the Windows Media Player or others audio player software (example: Winamp player...) on your computer.

![Image](image.png)
Video Stream Installation

Video Stream only supports the Wireless Display and LAN Display source. Minimum system requirements as follow:

Operation System:

- Windows
  Microsoft Windows XP™ Home or Professional Service pack 2/3 (32-bit recommended), Windows Vista™ 32-bit, or Windows® 7 Home or Professional 32-bit or 64-bit

- MAC
  MacBook Pro and above, MacOS 10.5 and above

Minimum Hardware:

a. Dual® Core™ 1.4 GHz or greater
b. 64 MB VRAM independent graphics card or more recommended
c. 2 GB DDR SDRAM memory or more recommended
d. Gigabit Ethernet
e. Integrated 802.11 b/g/n Wi-Fi Device for a WLAN connection

NOTE: If your computer does not meet the minimum hardware requirements, video stream may have lag. Meet the recommended system requirements to have optimized performance of the video stream.

NOTE: Video Stream Setting steps are the same for the 4220 and 4320 models.

Video Stream Support Format

<table>
<thead>
<tr>
<th>File Format</th>
<th>Video Format</th>

Enable Wireless or LAN on the Projector
Please refer to steps 1 to 4 of the Audio Projection Installation to enable wireless or LAN feature.

Install the Dell Wireless Application Software on Your Computer
Please refer to steps 5 to 7 of the Audio Projection Installation to install the Dell Wireless Application Software.

Launch the Wireless Application
Please refer to steps 8 of the Audio Projection Installation to launching the Wireless Application.

Login
Please refer to steps 9 of the Audio Projection Installation to log-in the application.

1 You are now logged into the 4220 or 4320 Wireless Application. Click "Video Mode" button switch to Video Mode screen.

2 Click to select the video or music files and starting player.
Managing the Projector From Web Management

Configuring the Network Setting
If the projector is connected to a network, you can access the projector using a web browser. For configuring the network setting, refer to "LAN Settings" on page 50.

Accessing Web Management
Use Internet Explorer 5.0 and above or Firefox 1.5 and above and enter the IP address. You can now access Web Management and manage the projector from a remote location.

**NOTE:** Web management and set are the same for the 4220 and 4320 models.

Home Page
- Access the Web Management Home page by entering the projector’s IP address at the web browser. See "LAN Settings" on page 50.
- Select the language for web management from the list.
- Click any menu item on the left tab to access the page.
Download the Wireless Application Software

See also "Wireless Networking Installation" on page 57.

Click the Download button of the corresponding operating system of your computer.
Conference Control

This allows you to host conference presentations from different sources without using projector cables and lets you control how each presentation will appear on screen.

**NOTE:** Without Conference Play Control, the last user to hit the 'Play' button on the application will take control of the full-screen projection.

**Computer Name:** Lists the computers logged for conference control.

**Play Control:** Click the buttons to control how each computer’s projection will appear on screen.

- **Full screen projection** — The presentation from the computer occupies the whole screen.
- **Split 1** - The presentation from the computer appears on the upper left corner of the screen.
- **Split 2** - The presentation from the computer appears on the upper right corner of the screen.
- **Split 3** - The presentation from the computer appears on the lower left corner of the screen.
- **Split 4** - The presentation from the computer appears on the lower right corner of the screen.
- **Stop** - Projection from the computer is stopped.

**IP Address:** Shows each computer’s IP Address.

**NOTE:** To end the conference, click Home.
Managing Properties

Admin

An administrator password is required to access the Admin page.

- **Admin Password**: Enter the administrator password and then click **Login**. The default password is "admin". To change the password, see "Change Passwords" on page 89.
System Status

Displays the **Network Status**, **Connection Status**, and **Projector Status** information.
Network Status

See OSD section on page 50.

IP Setup
- Choose Obtain an IP address automatically to assign an IP address to the projector automatically, or Use the following IP address to assign an IP address manually.

DHCP Server Setup
- Choose Auto to automatically set up the Start IP, End IP, Subnet Mask, Default Gateway, and DNS Server address from a DHCP server, or Disable to disable this function.

Wireless Setup
- Choose Enable to set up the Region, SSID, SSID Broadcast, Channel, Encryption, and Key. Choose Disable to disable the wireless set up.
SSID: Up to maximum length of 32 characters.

Encryption: You can Disable WPA key or select one of 64-bit or 128-bit in ASCII or HEX string.

Key: If Encryption is enabled, you have to set key value according to the encryption mode you selected.

RADIUS Server Setup
• Set up the IP address, Port, and Key information.

GateKeeper
• There are three options:
  All Pass: Allow users to access the office network via the wireless projector.
  All Block: Block users from accessing the office network via the wireless projector.
  Internet Only: Block users from the office network, but still reserve Internet connection capability.

Set Security For SNMP
• Setup Write Community information.

Click the Apply button to save and apply changes. The projector must be restarted for the changes to take effect.
Projection Setup

- **Resolution**: Allows you to select the resolution. Options are: XGA (1024 x 768) and WXGA (1280 x 800).

- **Login Code**: Select how you want the login code to be generated by the projector. There are three options:
  - **Disable**: Login code will not be required when logging in to the system.
  - **Random**: Default is Random. Login code will be randomly generated.
  - **Use the following code**: Enter a 4-digit code. This code will be used to log in to the system.

Projector Setup

- **Set up the Model Name, Projector Name, Location, and Contact information** (up to 21 characters for each field).

Click the Apply button to save and apply changes. The projector must be restarted for the changes to take effect.
Change Passwords

This page allows you to change the administrator password.

- **Enter New Password**: Enter the new password.
- **Confirm New Password**: Enter the password again and click **Apply**.

**NOTE**: Contact Dell if you forget your administrator password.
Reset to Default

Click the Apply button to restore the wireless/network setup to its factory default settings.
Firmware Upgrade

Use the Firmware Upgrade page to update your projector’s wireless firmware.

![Firmware Upgrade Page](image)

**NOTE:** Please disable and enable wireless/network using the OSD to restart the network card for the projector after firmware upgrade is successful.

To start the firmware update, follow these steps:

1. Press **Browse** to select the file to update.
2. Click the **Update** button to start. Wait while the system updates the firmware in your device.
3. Click **OK** when the update is complete.

**CAUTION:** Do not interrupt the update process as this may cause the system to crash!

![Update Confirmation MessageBox](image)
Projector Control Panel

Projector Information

- **Projector Status**: There are five status: Lamp On, Standby, Power Saving, Cooling, and Warming up. Click **Refresh** to refresh the status and control settings.

- **Power Saving**: Power Saving can be set to Off, 30, 60, 90, or 120 minutes. For more information, see "Power Saving" on page 55.

- **Alert Status**: There are three alert states: Lamp warning, Low lamp life, and Temperature warning. Your projector might lock up in the protection mode if any of the alerts are activated. To exit the protection mode, click **Clear** to clear the Alert Status before you power on your projector.

---

Using Your Projector
**Image Control**

- **Operation Mode**: Allows you to select the operation mode. The two options are: Normal Mode and ECO Mode.

- **Projector Mode**: Allows you to select the projector mode, depending on how the projector is mounted. There are four projection modes: Front Projection-Desktop, Front Projection-Ceiling Mount, Rear Projection-Desktop, and Rear Projection-Ceiling Mount.

- **Source Select**: The Source Select menu allows you to select your projector’s input source. You can select VGA-A, VGA-B, S-Video, Composite Video, HDMI, Wireless Display, USB Display, or USB Viewer.

- **Video Mode**: Select a mode to optimize the display image based on how the projector is being used:
  - **Presentation**: Best for presentation slides.
  - **Bright**: Maximum brightness and contrast.
  - **Movie**: For viewing movies and photos.
  - **sRGB**: Provides a more accurate color representation.
  - **Custom**: User-preferred settings.

- **Blank Screen**: You can select On or Off.

- **Aspect Ratio**: Allows you to select the aspect ratio to adjust how the image appears.

- **Brightness**: Select value to adjust the brightness of the image.

- **Contrast**: Select value to adjust the display contrast.

Click the **Auto Adjust** button to adjust the settings automatically.

**Audio Control**

- **Audio Input**: Select the input source. Options are: Audio-A, Audio-B, Audio-C, HDMI, and Wireless/LAN.

- **Volume**: Select the value (0–20) for audio volume.

- **Speaker**: Select **On** to enable the audio function or select **Off** to disable the audio function.

Click the **Factory Reset** button to restore the factory default settings.
### Alert Setting

**E-mail Alert**
- **E-mail Alert**: You can set whether to be notified by email (Enable) or not (Disable).
- **To/CC/From**: You can enter email address of sender (From) and recipients (To/Cc) to receive notification when an abnormality or warning occurs.
- **Subject**: You can enter the subject line of the email.

Click the **E-mail Alert Test** button to test the e-mail alert settings.

**SMTP Setting**
- **Out going SMTP server**, **Username**, and **Password** should be provided by your network administrator or MIS.

**Alert Condition**
- You can select the abnormalities or warnings to be notified by email. When any of the alert conditions occur, an email will be sent to the recipients (To/Cc).

Click the **Save** button to save the settings.

**NOTE**: E-mail alert is designed to work with a standard SMTP server using the default 25 port. It does not support encryption and authentication (SSL or TLS).
Reboot System

Click Reboot to reboot the system.

Crestron

For Crestron function.
I would like to remotely access the projector via the Internet. What is the best setting for the browser?

To have the best setting for the browser, please follow the below steps:

1. Open Control Panel → Internet Options → General tab → Temporary Internet Files → Settings → Select Every visit to the pages.
2. Some firewall or anti-virus may block the HTTP application. If possible, turn off the firewall or anti-virus.

I would like to remotely access the projector via Internet. What socket port number should I open for it in the firewall?

The following are the TCP/IP socket ports which the projector uses.

<table>
<thead>
<tr>
<th>UDP/TCP</th>
<th>Port Number</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>TCP</td>
<td>80</td>
<td>Web configuration (HTTP)</td>
</tr>
<tr>
<td>UDP/TCP</td>
<td>25</td>
<td>SMTP: used for email routing between mail servers</td>
</tr>
<tr>
<td>UDP/TCP</td>
<td>161</td>
<td>SNMP: Simple Network Management Protocol</td>
</tr>
<tr>
<td>UDP</td>
<td>9131</td>
<td>AMX: used for AMX discovery</td>
</tr>
</tbody>
</table>

Why am I unable to access the projector via the Internet?

1. Check whether your computer/laptop is connected to the Internet.
2. Check with your MIS or network administrator whether your computer/laptop is in the same subnet.
| Why am I unable to access the SMTP server? | 1 Check with your MIS or network administrator whether the SMTP server function is open for the projector and the IP assigned to the projector is allowed to access the SMTP server. The projector’s SMTP socket port number is 25, this cannot be changed.  
2 Check if the outgoing SMTP server, user name, and password are set correctly.  
3 Some SMTP servers will check whether the mail address of "From" correlates with the "User name" and "Password". For example, you use test@dell.com as the mail address in "From". You should also use test@dell.com account information for the User name and the password to log in the SMTP server. |
| Why am I unable to receive the test alert email even though the projector already indicates the test mail is already sent? | It could be because the SMTP server recognized the alert mail as a spam mail or because of the SMTP server restriction. Check with your MIS or network administrator for the SMTP server’s setting. |
**Firewall Configuration and FAQ**

Q: Why can’t I access the Web Management Page?

A: Your computer’s firewall configuration may prevent you from accessing the Web Management Web Page. Please refer to the following configuration settings:

<table>
<thead>
<tr>
<th>Firewall Protection</th>
<th>Configuration</th>
</tr>
</thead>
</table>
| McAfee Security Center      | 1. Launch McAfee Security Center (Start > All Programs > McAfee > McAfee Security Center).
                                     
                                   2. On the personal firewall plus tab, click View the Internet Applications List.
                                     
                                   3. Find and select Dell 4220 or 4320 Projector from the list.
                                     
                                   4. Right-click on its Permissions column.
                                     
                                   5. Select Allow Full Access from the pop-up menu. |
| Norton AntiVirus            | 1. Open Norton AntiVirus (Start > All Programs > Norton AntiVirus > Norton AntiVirus).
                                     
                                   2. Click Options menu, then select Norton AntiVirus.
                                     
                                   3. On the Status page, select Internet Worm Protection.
                                     
                                   4. Find and select Dell 4220 or 4320 Projector from the list of programs.
                                     
                                   5. Right-click on its Internet Access column.
                                     
                                   6. Select Permit All from the pop-up menu.
                                     
                                   7. Click OK.                       |
| Sygate Personal Firewall    | 1. Open Sygate Personal Firewall (Start > All Programs > Sygate > Sygate Personal Firewall).
                                     
                                   2. From the Running Applications list, find and right-click on Dell 4220 or 4320 Projector.
                                     
                                   3. Select Allow from the pop-up menu. |
<table>
<thead>
<tr>

</table>
| **Windows Firewall** | 1. Open Windows Firewall (Start > All Programs > Control Panel). Double-click on **Windows Firewall**.  
2. On the **General** tab, uncheck **Don’t allow exceptions**.  
3. On the **Exceptions** tab, click the **Add Program...** button.  
4. Find and select **Dell 4220 or 4320 Projector** from the list of programs, then click **OK**.  
5. Click **OK** to confirm exceptions settings. |
| **Zone Alarm**       | 1. Open Zone Alarm Firewall (Start > All Programs > Zone Labs > Zone Labs Center).  
2. On the **Program Control** page, find and select **Dell 4220 or 4320 Projector** from the list.  
3. Right-click on its **Access-Trusted** column.  
4. Select **Allow** from the pop-up menu.  
5. Right-click and select **Allow** for the **Access-Internet**, **Server-Trusted**, and **Server-Internet** columns. |
Make Application Token

The Application Token lets you perform Plug and Show using a USB token.

1. From the application software, click `Make Application Token`.
2. The following screen appears. Click Next.
3. Plug a flash drive into any of the USB ports on your computer. Select the drive from the list, then click Next.
4. Click Finish to close the wizard.
Troubleshooting Your Projector

If you experience problems with your projector, see the following troubleshooting tips. If the problem persists, contact Dell™ (see Contacting Dell™ on page 115).

<table>
<thead>
<tr>
<th>Problem</th>
<th>Possible Solution</th>
</tr>
</thead>
</table>
| No image appears on the screen | • Ensure that the lens cap is removed and the projector is turned on.  
• Ensure that you have chosen the correct input source on the INPUT SOURCE menu.  
• Ensure the external graphics port is enabled. If you are using a Dell™ laptop computer, press `Fn + F8`. For other computers, see your respective documentation. If images are not displayed properly, please upgrade the video driver of your computer. For Dell computers, see support.dell.com.  
• Ensure that all the cables are securely connected. See "Connecting Your Projector" on page 10.  
• Ensure that the pins of the connectors are not bent or broken.  
• Ensure that the lamp is securely installed (see "Changing the Lamp" on page 106).  
• Use Test Pattern in the Projector Settings of the Advanced Settings menu. Ensure that the colors of the test pattern are correct. |

Changing the Lamp

⚠️ **CAUTION:** Before you begin any of the procedures in this section, follow the Safety Instructions as described on page 8.

Replace the lamp when the message "Lamp is approaching the end of its useful life in the operation. Replacement suggested! www.dell.com/lamps" appears on the screen. If this problem persists after replacing the lamp, contact Dell™. For more information, see Contacting Dell™ on page 115.

⚠️ **CAUTION:** Use an original lamp to ensure safe and optimal working condition of your projector.

⚠️ **CAUTION:** The lamp becomes very hot when in use. Do not attempt to replace the lamp until the projector has been allowed to cool down for at least 30 minutes.

⚠️ **CAUTION:** Do not touch the bulb or the lamp glass at any time. Projector lamps are very fragile and may shatter if touched. The shattered glass pieces are sharp and can cause injury.

⚠️ **CAUTION:** If the lamp shatters, remove all broken pieces from the projector and dispose or recycle according to state, local, or federal law. For more information see www.dell.com/hg.

1. Turn off the projector and disconnect the power cord.
2. Let the projector cool for at least 30 minutes.
3. Loosen the two screws that secure the lamp cover, and remove the cover.
4. Loosen the two screws that secure the lamp.
5. Pull the lamp up by its metal handle.
6. Replace with the new lamp.
7. Tighten the two screws that secure the lamp.
8. Replace the lamp cover and tighten the two screws.
9. Reset the lamp usage time by selecting "Yes" for Lamp Reset in the OSD Power Settings of the Advanced Setting menu (see Power Settings of the Advanced Troubleshooting Your Projector 106
Setting menu on page 54). When a new lamp module has been changed, the projector will automatically detect and reset the lamp hours.

⚠️ **CAUTION:** Lamp Disposal (for the US only)

Lamp(s) inside this product contain mercury and must be recycled or disposed of according to local, state, or federal laws. For more information, go to www.dell.com/hg or contact the Electronic Industries Alliance at www.eiae.org. For lamp-specific disposal information, check www.lamprecycle.org.

Power Consumption

- Normal mode: 375 W ± 10% @ 110 Vac (Network On)
- Eco mode: 320 W ± 10% @ 110 Vac (Network On)
- Power saving mode: <10 W (Wireless and Network On)
- Standby mode: < 0.5 W (Network, VGA_Out, and Wireless Off)

Audio
- 2 speakers x 5 watt RMS

Noise Level
- 35 dB(A) Normal mode, 32 dB(A) Eco mode

Weight
- 6.4 lb (2.9 kg) ± 0.05 lb

Dimensions (W x H x D)
- 11.26 x 4.33 x 9.76 inches (286 x 110 x 247.8 mm)

Environmental
- Operating temperature: 5 °C - 35 °C (41 °F - 95 °F)
- Humidity: 80 % maximum
- Storage temperature: 0 °C to 60 °C (32 °F to 140 °F)
- Humidity: 90 % maximum
- Shipping temperature: -20 °C to 60 °C (-4 °F to 140 °F)
- Humidity: 90 % maximum

I/O Connectors
- Power: One AC power socket (3-pin - C14 inlet)
- VGA input: Two 15-pin D-sub connectors (Blue), VGA-A and VGA-B, for analog RGB/Component input signals.
- VGA output: One 15-pin D-sub connector (Black) for VGA-A loop through.
- SVideo input: One standard 4-pin mini-DIN SVideo connector for Y/C signal.
Composite Video input: One Yellow RCA jack for CVBS signal.

HDMI input: One HDMI connector for supporting HDMI 1.3. HDCP compliant.

Analog Audio input: Two 3.5 mm stereo mini phone jack (Blue) and one pair of RCA connector (Red/White).

Variable audio output: One 3.5 mm stereo mini phone jack (Green).

USB (type A) port: One USB connector for Photo/PPT viewer (JPG/PPT format).

USB (type B) port: One mini USB slave for remote support and One USB connector for supporting USB Display.

RS232 port: One mini-DIN 6-pin for RS232 communication.

RJ45 port: One RJ45 connector for control of projector through network and LAN Display.

12 V output: One 12 V DC / 200 mA max. relay output for driving automatic screen.

Wireless Dongle

Wireless Standard: IEEE802.11b/g/n

Wireless: One WiFi USB (type A) connector for supporting wireless dongle (USB interface, Optional).

Support: Presentation slides and projector control.

Allow connection up to 30 users at the same time.

4-to-1 split screen. Allow four presentation slides to be projected on screen.

Conference Control mode.

Supports Audio Projection (need to install extra driver)

Lamp

Philips 300 W user-replaceable lamp (up to 2500 hours in eco mode)
NOTE: The lamp life rating for any projector is a measure of brightness degradation only, and is not a specification for the time it takes a lamp to fail and cease light output. Lamp life is defined as the time it takes for more than 50 percent of a lamp sample population to have brightness decrease by approximately 50 percent of the rated lumens for the specified lamp. The lamp life rating is not guaranteed in any way. The actual operating life span of a projector lamp will vary according to operating conditions and usage patterns. Usage of a projector in stressful conditions which may include dusty environments, under high temperatures, many hours per day, and abrupt powering-off will most likely result in a lamp's shortened operating life span or possible lamp failure.

Contacting Dell

For customers in the United States, call 800-WWW-DELL (800-999-3355).

⚠️ **NOTE:** If you do not have an active Internet connection, you can find contact information on your purchase invoice, packing slip, bill, or Dell product catalog.

Dell™ provides several online and telephone-based support and service options. Availability varies by country and product, and some services may not be available in your area. To contact Dell for sales, technical support, or customer service issues:

1. Visit [support.dell.com](http://support.dell.com).
2. Verify your country or region in the Choose A Country/Region dropdown menu at the bottom of the page.
3. Click Contact Us on the left side of the page.
4. Select the appropriate service or support link based on your need.
5. Choose the method of contacting Dell that is convenient for you.
Appendix: Glossary

ANSI Lumens — A standard for measuring the brightness. It is calculated by dividing a square meter image into nine equal rectangles, measuring the lux (or brightness) reading at the center of each rectangle, and averaging these nine points.

Aspect Ratio — The most popular aspect ratio is 4:3 (4 by 3). Early television and computer video formats are in a 4:3 aspect ratio, which means that the width of the image is 4/3 times the height.

Brightness — The amount of light emitted from a display or projection display or projection device. The brightness of projector is measured by ANSI lumens.

Color Temperature — The color appearance of white light. Low color temperature implies warmer (more yellow/red) light while high color temperature implies a colder (more blue) light. The standard unit for color temperature is Kelvin (K).

Component Video — A method of delivering quality video in a format that consists of the luminance signal and two separate chrominance signals and are defined as YPbPr' for analog component and Y’Cb’Cr’ for digital component. Component video is available on DVD players.

Composite Video — A video signal that combines the luma (brightness), chroma (color), burst (color reference), and sync (horizontal and vertical synchronizing signals) into a signal waveform carried on a single wire pair. There are three kinds of formats, namely, NTSC, PAL, and SECAM.

Compressed Resolution — If the input images are of higher resolution than the native resolution of the projector, the resulting image will be scaled to fit the native resolution of the projector. The nature of compression in a digital device means that some image content is lost.

Contrast Ratio — Range of light and dark values in a picture, or the ratio between their maximum and minimum values. There are two methods used by the projection industry to measure the ratio:

1. Full On/Off — measures the ratio of the light output of an all white image (full on) and the light output of an all black (full off) image.

2. ANSI — measures a pattern of 16 alternating black and white rectangles. The average light output from the white rectangles is divided by the average light output of the black rectangles to determine the ANSI contrast ratio.

Full On/Off contrast is always a larger number than ANSI contrast for the same projector.
dB — decibel — A unit used to express relative difference in power or intensity, usually between two acoustic or electric signals, equal to ten times the common logarithm of the ratio of the two levels.

Diagonal Screen — A method of measuring the size of a screen or a projected image. It measures from one corner to the opposite corner. A 9 ft high and 12 ft wide, screen has a diagonal of 15 ft. This document assumes that the diagonal dimensions are for the traditional 4:3 ratio of a computer image as per the example above.

DHCP — Dynamic Host Configuration Protocol — A network protocol that enables a server to automatically assign a TCP/IP address to a device.

DLP® — Digital Light Processing™ — Reflective display technology developed by Texas Instruments, using small manipulated mirrors. Light passing through a color filter is sent to the DLP mirrors which arrange the RGB colors into a picture projected onto screen, also known as DMD.

DMD — Digital Micro-Mirror Device — Each DMD consists of thousands of tilting, microscopic aluminum alloy mirrors mounted on a hidden yoke.

DNS — Domain Name System — An Internet service that translates domain names into IP addresses.

Focal Length — The distance from the surface of a lens to its focal point.

Frequency — It is the rate of repetition in cycles per seconds of electrical signals. Measured in Hz (Hertz).

HDCP — High-Bandwidth Digital-Content Protection — A specification developed by Intel™ Corporation to protect digital entertainment across digital interface, such as DVI, HDMI.

HDMI — High-Definition Multimedia Interface — HDMI carries both uncompressed high definition video along with digital audio and device control data in a single connector.

Hz (Hertz) — Unit of frequency.

IEEE802.11 — A set of standards for wireless local area network (WLAN) communication. 802.11b/g/n uses the 2.4 GHz band.

Keystone Correction — Device that will correct an image of the distortion (usually a wide-top narrow-bottom effect) of a projected image caused by improper projector to screen angle.

Maximum Distance — The distance from a screen the projector can be to cast an image that is usable (bright enough) in a fully darkened room.

Maximum Image Size — The largest image a projector can throw in a darkened room. This is usually limited by focal range of the optics.
Minimum Distance — The closest position that a projector can focus an image onto a screen.

NTSC — National Television Standards Committee. North American standard for video and broadcasting, with a video format of 525 lines at 30 frames per second.

PAL — Phase Alternating Line. A European broadcast standard for video and broadcasting, with a video format of 625 lines at 25 frames per second.

Reverse Image — Feature that allows you to flip the image horizontally. When used in a normal forward projection environment text, graphics, etc. are backwards. Reverse image is used for rear projection.

RGB — Red, Green, Blue — typically used to describe a monitor that requires separate signals for each of the three colors.

S-Video — A video transmission standard that uses a 4-pin mini-DIN connector to send video information on two signal wires called luminance (brightness, Y) and chrominance (color, C). S-Video is also referred to as Y/C.

SECAM — A French and international broadcast standard for video and broadcasting, closely related to PAL but with a different method of sending color information.

SSID — Service Set Identifiers — A name used to identify the particular wireless LAN to which a user wants to connect.

SVGA — Super Video Graphics Array — 800 x 600 pixels count.

SXGA — Super Extended Graphics Array — 1280 x 1024 pixels count.

UXGA — Ultra Extended Graphics Array — 1600 x 1200 pixels count.

VGA — Video Graphics Array — 640 x 480 pixels count.

WEP — Wired Equivalent Privacy — This is a method for encrypting communication data. The encryption key is created and notified only to the communicating user, so the communication data cannot be decrypted by a third party.

XGA — Extended Video Graphics Array — 1024 x 768 pixels count.

WXGA — Wide Extended Graphics Array — 1280 x 800 pixels count.

Zoom Lens — Lens with a variable focal length that allows operator to move the view in or out making the image smaller or larger.

Zoom Lens Ratio — Is the ratio between the smallest and largest image a lens can project from a fixed distance. For example, a 1.4:1 zoom lens ratio means that a 10 foot image without zoom would be a 14 foot image with full zoom.
