## 135 1 Scope

136 The DCIM Simple Identity Management Profile describes the properties and interfaces for executing  
137 system management tasks related to the management of accounts and identities. The profile  
138 standardizes and aggregates the description for the platform's basic properties into a system view  
139 representation and provides static methodology for the clients to query the system views without  
140 substantial traversal of the model.
