### Before you begin

**WARNING:** Before you set up and operate your Dell EMC NAS system, read through the safety instructions that shipped with your system.

**Dell EMC Software License Agreement**
- Before using your system, read through the Dell EMC Software License Agreement that shipped with the system.
- You must consider any media of Dell EMC installed software as backup copies of the software installed on your system.
- If you do not accept the terms of agreement, see Dell.com/contactdell.

**Documentation**
For more information, go to:
- Dell.com/storagemanuals for documentation and information updates.
- Dell.com/support, type the Service Tag, and then click Submit.

### Verifying package contents
Verify that all components listed on your packing slip are available. Save all documentation and accessories.

### Installing the system in a rack
The system requires a properly grounded electrical outlet, a compatible rack, and a rack installation kit. For more information, see the section More information in this document.

### Locating your system Service Tag
- Your system is identified by a unique Express Service Code and Service Tag number. Pull out the information tag at the front of the system to view the Express Service Code and Service Tag.
- Alternatively, the information may be on a sticker on the chassis.

**NOTE:** The illustrations in this document are not intended to represent a specific NAS system.

### Default password
The default password of the NAS system is Stor@ge!

### Default system name
- Your system is configured with a default system name of D<ServiceTag>, where <ServiceTag> is the Service Tag.
- To locate the Service Tag of your system, see the section Locating your system Service Tag in this document.

### For more information about Dell EMC NX series documentation, go to Dell.com/storagemanuals.
Always read the updates first, because they often supersede information in other documents.

### Cabling the system using iSCSI

#### Network Cabling

- **iSCSI/SAN switches**
- **Client switches**
- **Dell EMC NX3340 and NX3240 system Controller 0**
- **Dell EMC NX3340 and NX3240 system Controller 1**
- **Storage array**
- **Active directory server connected to the network**
- **External iSCSI (directly connected to MD array)**

**NOTE:** This figure is an example of cabling the Dell EMC NX3340 and NX3240 systems with the MD3XXX storage array. To connect other Dell EMC storage arrays to the Dell EMC NX3340 and NX3240 systems, see the documentation for the storage array.

### Turning on/off and managing your NAS system

#### Turning on your storage array
You must first turn on the storage arrays and additional expansion enclosures, if any. After the storage arrays and enclosures are initialized, turn on the Dell EMC NX3340 and NX3240 systems.

#### Managing your NAS
To manage your NAS locally, connect a keyboard, monitor, and mouse directly to the NAS system.

To manage your NAS remotely, you can use:
- **Remote desktop**
  - **NOTE:** For more information about remote desktop, see the section Starting remote desktop in this document.
- **iDRAC**
  - **NOTE:** For information about initial setup, configuration, and console redirection using iDRAC, see the Integrated Dell Remote Access Controller User’s Guide at Dell.com/idracmanuals.

#### Turning off your NAS system
To turn off your NAS system:
1. Close the application or the cluster.
2. Turn off the NAS system.
3. Turn off the storage devices.
4. Turn off the DAE (if any).
Initial configuration

1. When you start your NAS system that runs Windows Storage Server 2016 for the first time, on the Default Password page, click OK.
   
   **NOTE:** Before changing the password, make sure that you change the system language according to your preference.

2. To change your administrator password, press Ctrl+Alt+Del, and then click Change a Password.

3. To change the default language, navigate to C:\Dell_OEM\MUI and run the appropriate language batch file. Complete the on-screen instructions to install your preferred language.

Server Manager starts automatically when you log in the first time.

In Server Manager, click Configure this local server to:

- Change the computer name (if required)
- Add NAS system to the domain
- Check for latest Windows updates
- Specify the time zone
- Configure remote desktop

**NOTE:** To start a software system, on the taskbar, click Start, and then click the program name.

Documentation
