1. **Scope**

The Dell Fan Profile describes the properties and interfaces for executing system management tasks related to the management of fans within a system. The profile standardizes and aggregates the description for the fan speed sensors and other fan properties into a fan view representation as well as provides static methodology for the clients to query the fan views without substantial traversal of the model.

2. **Normative References**

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

DMTF DSP1033, *Profile Registration Profile 1.0.0*

DMTF DSP0226, *Web Services for Management (WS-Management) Specification 1.1.0*

DMTF DSP0227, *WS-Management CIM Binding Specification 1.0.0*

3. **Terms and Definitions**

For the purposes of this document, the following terms and definitions apply.

3.1. **Conditional**

Indicates requirements to be followed strictly in order to conform to the document when the specified conditions are met

3.2. **Mandatory**

Indicates requirements to be followed strictly in order to conform to the document and from which no deviation is permitted

3.3. **May**

Indicates a course of action permissible within the limits of the document

3.4. **Optional**

Indicates a course of action permissible within the limits of the document

3.5. **Referencing profile**

Indicates a profile that owns the definition of this class and can include a reference to this profile in its “Related Profiles” table
3.6. Shall
Indicates requirements to be followed strictly in order to conform to the document and from which no deviation is permitted.

3.7. FQDD
Fully Qualified Device Descriptor is used to identify a particular component in a system.

3.8. Interop Namespace
Interop Namespace is where instrumentation instantiates classes to advertise its capabilities for client discovery.

3.9. Implementation Namespace
Implementation Namespace is where instrumentation instantiates classes relevant to executing core management tasks.

3.10. ENUMERATE
Refers to WS-MAN ENUMERATE operation as described in Section 8.2 of DSP0226_V1.1 and Section 9.1 of DSP0227_V1.0

3.11. GET
Refers to WS-MAN GET operation as defined in Section 7.3 of DSP00226_V1.1 and Section 7.1 of DSP0227_V1.0

4. Symbols and Abbreviated Terms

4.1. CIM
Common Information Model

4.2. iDRAC
Integrated Dell Remote Access Controller – management controller for blades and monolithic servers

4.3. CMC
Chassis Manager Controller – management controller for the modular chassis

4.4. WBEM
Web-Based Enterprise Management

5. Synopsis
Profile Name: Fan
Version: 4.0.0
Organization: Dell
CIM Schema Version: 2.41 Final
Dell Schema Version: 1.0.0
Interop Namespace: root/interop
Implementation Namespace: root/dcim
Central Class: DCIM_FanView
Scoping Class: DCIM_ComputerSystem

The Dell Fan Profile is a component profile that contains the Dell specific implementation requirements for fan view.

DCIM_FanView shall be the Central Class.

Table 1 identifies profiles that are related to this profile.

Table 1. Related Profiles

<table>
<thead>
<tr>
<th>Profile Name</th>
<th>Organization</th>

<tbody>
<tr>
<td>Profile Registration</td>
<td>DCIM</td>
<td>1.0</td>
<td>Reference</td>
</tr>
</tbody>
</table>

6. Description

The Dell Fan Profile describes platform’s fans including the fan speed sensor information. Each platform fan is represented by an instance of DCIM_FanView class.

Figure 1 details the class diagram of the Dell Fan Profile.

![Class Diagram](image)

Figure 1. Class Diagram

Figure 2 details typical Dell Fan Profile implementation for a platform containing two fans. In order for client to discover the instrumentation’s support of this profile, FanProfile is instantiated in the Interop Namespace. FanProfile instance describes the information about the implemented profile: most importantly, the name and version of the profile and the organization name that produced the profile.

Fan1 and fan2 are the fan views representing the two fans in the Implementation Namespace. They are associated to the Interop namespace’s FanProfile instance.
7. Implementation Description

This section describes the requirements and guidelines for implementing Dell Fan Profile.

Table 2. Class Requirements: Fan Profile

<table>

7.1. DCIM_FanView – Fan View

This section describes the implementation for the DCIM_FanView class. This class shall be instantiated in the Implementation Namespace.
The DCIM_LCElementConformsToProfile association(s) shall reference the DCIM_FanView instance(s).

### 7.1.1. Resource URI s for WinRM®

The class Resource URI shall be "http://schemas.dell.com/wbem/wscim/1/cim-schema/2/DCIM_FanView?__cimnamespace=root/dcim"

The key property shall be the InstanceID.

The instance Resource URI for DCIM_FanView instance shall be: "http://schemas.dell.com/wbem/wscim/1/cim-schema/2/DCIM_FanView?__cimnamespace=root/dcim+InstanceID=<FQDD>"

### 7.1.2. Operations

The following table details the implemented operations on DCIM_FanView.

<table>
<thead>
<tr>
<th>Operation Name</th>
<th>Requirements</th>
<th>Required Input</th>
</tr>
</thead>
<tbody>
<tr>
<td>Get</td>
<td>Mandatory</td>
<td>Instance URI</td>
</tr>
<tr>
<td>Enumerate</td>
<td>Mandatory</td>
<td>Class URI</td>
</tr>
</tbody>
</table>

### 7.1.3. Properties

The following table details the implemented properties for DCIM_FanView instance representing a fan in a system. The “Requirements” column shall denote the implementation requirement for the corresponding property. If the column “Property Name” matches the property name, the property either shall have the value denoted in the corresponding column “Additional Requirement”, or shall be implemented according to the requirements in the corresponding column “Additional Requirement”.

<table>
<thead>
<tr>
<th>Property Name</th>
<th>Requirements</th>
<th>Type</th>
<th>Requirement and description</th>
</tr>
</thead>
<tbody>
<tr>
<td>InstanceID</td>
<td>Mandatory</td>
<td>string</td>
<td>The property value shall be the FQDD property value.</td>
</tr>
<tr>
<td>FQDD</td>
<td>Mandatory</td>
<td>string</td>
<td>A string containing the Fully Qualified Device Description, a user-friendly name for the object.</td>
</tr>
<tr>
<td>PrimaryStatus</td>
<td>Mandatory</td>
<td>uint32</td>
<td>PrimaryStatus provides a high level status value:</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>• “0” - “Unknown”,</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>• “1” - “OK”,</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>• “2” - “Degraded”,</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>• “3” - “Error”,</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>• “0x8000” - “DMTF Reserved”,</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>• “0xFFFF” - “Vendor Reserved”</td>
</tr>
<tr>
<td>BaseUnits</td>
<td>Mandatory</td>
<td>uint16</td>
<td>The property value shall be 19 (RPM). The base unit of the CurrentReading property value.</td>
</tr>
<tr>
<td>UnitModifier</td>
<td>Mandatory</td>
<td>sint32</td>
<td>The property value shall be 0. The unit multiplier of the CurrentReading property value.</td>
</tr>
<tr>
<td>RateUnits</td>
<td>Mandatory</td>
<td>uint16</td>
<td>The property value shall be 0 (None).</td>
</tr>
<tr>
<td>CurrentReading</td>
<td>Mandatory</td>
<td>sint32</td>
<td>The property value shall be in RPMs. The current value of the fan’s RPM sensor.</td>
</tr>
<tr>
<td>VariableSpeed</td>
<td>Mandatory</td>
<td>boolean</td>
<td>Indication of whether the fan supports variable speeds.</td>
</tr>
<tr>
<td>ActiveCooling</td>
<td>Mandatory</td>
<td>boolean</td>
<td>ActiveCooling is a Boolean that indicates that the fan provides active (as opposed to passive) cooling.</td>
</tr>
</tbody>
</table>
### RedundancyStatus

**Mandatory**

**Type:** `uint16`

RedundancyStatus provides information on the state of the fan redundancy:

- "0" - "Unknown",
- "2" - "Fully Redundant",
- "3" - "Degraded Redundancy",
- "4" - "Redundancy Lost",
- "5" - "Overall Failure"

### LastSystemInventoryTime

**Mandatory**

**Type:** `string`

This property provides the last time "System Inventory Collection On Reboot(CSIOR)" was performed. The value is represented as `yyyymmdHHMMSS`.

### LastUpdateTime

**Mandatory**

**Type:** `string`

This property provides the last time the data was updated. The value is represented as `yyyymmdHHMMSS`.

## 7.2. DCIM_LCRegisteredProfile – Fan Profile Profile Registration

This section describes the implementation for the DCIM_LCRegisteredProfile class.

This class shall be instantiated in the Interop Namespace.

The DCIM_LCElementConformsToProfile association(s) shall reference the DCIM_LCRegisteredProfile instance.

### 7.2.1. Resource URI for WinRM®

The class Resource URI shall be "http://schemas.dmtf.org/wbem/wscim/1/cim-schema/2/CIM_RegisteredProfile?__cimnamespace=root/interop"

The key property shall be the InstanceID property.

The instance Resource URI shall be: "http://schemas.dell.com/wbem/wscim/1/cim-schema/2/DCIM_LCRegisteredProfile?__cimnamespace=root/interop+InstanceId=DCIM:Fan:1.0.0"

### 7.2.2. Operations

The following table details the implemented operations on DCIM_LCRegisteredProfile.

<table>
<thead>
<tr>
<th>Operation Name</th>
<th>Requirements</th>
<th>Required Input</th>
</tr>
</thead>
<tbody>
<tr>
<td>Get</td>
<td>Mandatory</td>
<td>Instance URI</td>
</tr>
<tr>
<td>Enumerate</td>
<td>Mandatory</td>
<td>Class URI</td>
</tr>
</tbody>
</table>

### 7.2.3. Properties

The following table details the implemented properties for DCIM_LCRegisteredProfile instance representing Fan Profile implementation. The "Requirements" column shall denote the implementation requirement for the corresponding property. If the column "Name" matches the property name, the property either shall have the value denoted in the corresponding column "Additional Requirements", or shall be implemented according to the requirements in the corresponding column "Additional Requirements".

<table>
<thead>
<tr>
<th>Property Name</th>
<th>Requirement</th>
<th>Type</th>
<th>Additional Requirements</th>
</tr>
</thead>
<tbody>
<tr>
<td>InstanceID</td>
<td>Mandatory</td>
<td>String</td>
<td>DCIM:Fan:4.0.0</td>
</tr>
<tr>
<td>RegisteredName</td>
<td>Mandatory</td>
<td>String</td>
<td>This property shall have a value of &quot;Fan&quot;.</td>
</tr>
</tbody>
</table>
### 8. Methods

This section details the requirements for supporting extrinsic methods for the CIM elements defined by this profile. No additional details specified.

### 9. Use Cases

See Lifecycle Controller (LC) Integration Best Practices Guide.

### 10. CIM Elements

No additional details specified.

### 11. Privilege and License Requirement

The following table describes the privilege and license requirements for the listed operations. For the detailed explanation of the privileges and licenses, refer to the Dell WSMAN Licenses and Privileges specification.

<table>
<thead>
<tr>
<th>Class and Method</th>
<th>Operation</th>
<th>User Privilege Required</th>
<th>License Required</th>
</tr>
</thead>
<tbody>
<tr>
<td>DCIM_FanView</td>
<td>ENUMERATE, GET</td>
<td>Login</td>
<td>LM_REMOTE_ASSET_INVENTORY</td>
</tr>
<tr>
<td>DCIM_LCRegisteredProfile</td>
<td>ENUMERATE, GET</td>
<td>Login</td>
<td>None</td>
</tr>
<tr>
<td>DCIM_LCElementConformsToProfile</td>
<td>ENUMERATE, GET</td>
<td>Login</td>
<td>None</td>
</tr>
</tbody>
</table>
