Video Profile

1 Scope

The Dell Video Profile describes the properties and interfaces for executing system management tasks related to the management of video controllers within a system. The profile standardizes and aggregates the description for the video properties into a video controller view representation as well as provides static methodology for the clients to query the video views without substantial traversal of the model.

3 Terms and Definitions

For the purposes of this document, the following terms and definitions apply.

3.1 conditional
indicates requirements to be followed strictly in order to conform to the document when the specified conditions are met

3.2 mandatory
indicates requirements to be followed strictly in order to conform to the document and from which no deviation is permitted

3.3 may
indicates a course of action permissible within the limits of the document
3.4  
optional  
indicates a course of action permissible within the limits of the document

3.5  
referencing profile  
indicates a profile that owns the definition of this class and can include a reference to this profile in its “Related Profiles” table

3.6  
shall  
indicates requirements to be followed strictly in order to conform to the document and from which no deviation is permitted

3.7  
FQDD  
Fully Qualified Device Descriptor is used to identify a particular component in a system.

3.8  
Interop Namespace  
Interop Namespace is where instrumentation instantiates classes to advertise its capabilities for client discovery.

3.9  
Implementation Namespace  
Implementation Namespace is where instrumentation instantiates classes relevant to executing core management tasks.

3.10  
ENUMERATE  
Refers to WS-MAN ENUMERATE operation as described in Section 8.2 of DSP0226_V1.1 and Section 9.1 of DSP0227_V1.0

3.11  
GET  
Refers to WS-MAN GET operation as defined in Section 7.3 of DSP00226_V1.1 and Section 7.1 of DSP0227_V1.0

5 Synopsis

Profile Name: Video
Version: 1.0.0
Organization: Dell

CIM Schema Version: 2.26 Experimental
Dell Schema Version: 1.0.0

Interop Namespace: root/interop
Implementation Namespace: root/dcim

Central Class: DCIM_VideoView
Scoping Class: DCIM_ComputerSystem

The Dell Video Profile is a component profile that contains the Dell specific implementation requirements for video controller view.

DCIM_VideoView shall be the Central Class.

Table 1 identifies profiles that are related to this profile.

6 Description

The Dell Video Profile describes platform’s videos. Each video controller’s information is represented by an instance of DCIM_VideoView class.

Figure 1 details the class diagram of the Dell Video Profile.

![Class Diagram]

Figure 1 – Class Diagram
Figure 2 details typical Dell Video Profile implementation for a platform containing a video controller. In order for client to discover the instrumentation’s support of this profile, VideoProfile is instantiated in the Interop Namespace. VideoProfile instance describes the information about the implemented profile: most importantly, the name and version of the profile and the organization name that produced the profile.

Video1 is the video view representing the video controller in the Implementation Namespace. It is associated to the Interop namespace’s VideoProfile instance.

7.1 Video View

This section describes the implementation for the DCIM_VideoView class.

This class shall be instantiated in the Implementation Namespace.

The DCIM_ElementConformsToProfile association(s) shall reference the DCIM_VideoView instance(s).

7.1.1 Resource URIs for WinRM®

The class Resource URIs shall be "http://schemas.dell.com/wbem/wscim/1/cim-schema/2/DCIM_VideoView?__cimnamespace=root/dcim"

The key property shall be the InstanceID.

The instance Resource URIs for DCIM_VideoView instance shall be: "http://schemas.dell.com/wbem/wscim/1/cim-schema/2/DCIM_VideoView?__cimnamespace=root/dcim+InstanceID=<FQDD>"

7.1.2 Operations

The following table details the implemented operations on DCIM_VideoView.

7.1.3 Properties

The following table details the implemented properties for DCIM_VideoView instance representing a video controller in a system. The “Requirements” column shall denote the implementation requirement for the corresponding property. If the column “Property Name” matches the property name, the property either shall have the value denoted in the corresponding column “Additional Requirement”, or shall be implemented according to the requirements in the corresponding column “Additional Requirement”.

| LastSystemInventoryTime | Mandatory | string | This property provides the last time \"System Inventory Collection On Reboot(CSIO)\" was performed. The value is represented as yyyyMMddHHMMSS. |
| LastUpdateTime | Mandatory | string | This property provides the last time the data was updated. The value is represented as yyyyMMddHHMMSS |

### 7.2 VideoNWParams View

This section describes the implementation for the DCIM_VideoNWParamsView class. This class shall be instantiated in the
Implementation Namespace.

The DCIM_ElementConformsToProfile association(s) shall reference the DCIM_VideoView instance(s).

7.2.1 Resource URIs for WinRM®

The class Resource URIs shall be “http://schemas.dell.com/wbem/wscim/1/cim-schema/2/DCIM_VideoNWParamsView?__cimnamespace=root/dcim”

The key property shall be the InstanceID.

The instance Resource URIs for DCIM_VideoNWParaView instance shall be: “http://schemas.dell.com/wbem/wscim/1/cim-schema/2/DCIM_VideoViewNWParams?__cimnamespace=root/dcim+InstanceID= <FQDD>”

7.2.2 Operations

7.2.3 Properties

The following table details the implemented properties for DCIM_VideoNWParamsView instance representing Amulet Network card in a system. The “Requirements” column shall denote the implementation requirement for the corresponding property. If the column “Property Name” matches the property name, the property either shall have the value denoted in the corresponding column “Additional Requirement”, or shall be implemented according to the requirements in the corresponding column “Additional Requirement”.

### 7.3 Video Profile Profile Registration

This section describes the implementation for the DCIM_LCRegisteredProfile class.

This class shall be instantiated in the Interop Namespace. The DCIM_ElementConformsToProfile association(s) shall reference the DCIM_LCRegisteredProfile instance.

#### 7.3.1 Resource URIs for WinRM®

The class Resource URIs shall be "http://schemas.dmtf.org/wbem/wscim/1/cim-schema/2/CIM_RegisteredProfile?cimnamespace= root/interop"

The key property shall be the InstanceID property.

The instance Resource URIs shall be: "http://schemas.dell.com/wbem/wscim/1/cim-schema/2/DCIM_LCRegisteredProfile?__cimnamespace= root/interop+InstanceID= DCIM:Video:1.0.0"

#### 7.3.2 Operations

#### 7.3.3 Properties

The following table details the implemented properties for DCIM_LCRegisteredProfile instance representing Video Profile implementation. The “Requirements” column shall denote the implementation requirement for the corresponding property. If the column “Name” matches the property name, the property either shall have the value denoted in the corresponding column “Additional Requirements”, or shall be implemented according to the requirements in the corresponding column “Additional Requirements”.
